Budget Message

By

GOVERNOR EDMUND G. BROWN

To the Senate and Assembly of the Legislature of California:

The budget is a stern test of our principles. It reveals our values and spotlights our goals. It is, indeed, a ledger of our character, our choices, and our courage.

I welcome the challenge of the budget. This is a meaningful opportunity to show that liberal leadership can be also responsible leadership. I have prepared a fair and forthright budget, and I am prepared to fight for it.

For years now, we have been deceiving ourselves about our State finances. Despite an expanding economy, we have spent far more than we have taken in. In the last three fiscal years, including the current year, General Fund expenditures will have exceeded revenues by more than \$323 million. In the 1958-59 fiscal year alone the deficiency of current revenues is estimated at \$147.5 million.

Up to now it has been possible to avoid facing up to the fiscal realities because surpluses built up during and after the war and held in so-called "reserve" funds or in the General Fund have been used to meet the deficits. But these fund balances are now exhausted or needed elsewhere. By using the fund surpluses to meet annual deficits we have succeeded only in postponing the day of reckoning. That day is now upon us.

Again this year, we have been told that we can dodge the hard facts of fiscal life. We have been urged to invade the Investment Fund and abandon our vital water program. I am determined that we shall not do this. We must have the courage to face our financial responsibilities without flinching.

We must now put our State back in the black. To do this, I offer neither platitudes nor panaceas. There will be no fancy schemes and no money miracles. I bring you, instead, economy in government, a balanced budget, and a sound program for financing it.

Although the incoming Governor has no Constitutional or other responsibility for the \$68.4 million deficit we are inheriting, I have concluded that it must be erased as rapidly as possible.

These are stringent times, and this is a stringent budget. We have examined the expenditure requests of every department and agency with rigorous care. There have been no special preserves or privileged exceptions.

To run our State departments I have appointed able, frugal executives. I have given them firm instructions and full authority to launch an aggressive economy drive. I intend to reward people who save money. We are already on our way to saving five million dollars before this fiscal year is out.

The increases in the budget reflect the paramount needs of our people. We are a great State with great resources. We would confuse responsibility with timidity if we failed to meet the vital needs of our people. Thus, for instance, no austerity aims have prevented us from providing funds for a Fair Employment Practices Commission, from increasing the funds for smog research, or from providing medical care for permanently disabled persons.

No matter how determined we are to make economies, we must recognize that our expenses are increasing.

As our population expands, so inevitably do costs for such items as schools, mental hospitals, courts, and prisons. We must be prepared to accept both the perils and the promise of our magnificent growth.

If we are to restore fiscal solvency to our State—and I say we must—we will need \$200 million in new revenues next year. I have proposed a revenue program which will not only balance next year's budget but will serve us well as a fiscal vehicle in the years ahead.

In the proposed program, our goal has been to obtain broadly based revenues with contribution fairly geared to overall ability to pay. We have not surrendered to the power of vested interests or to the fear of public clamor. We have refused to yield to pressures to favor business or labor, industry or consumers. After long and intensive study, our program has been carefully fashioned to make the ultimate burden fall equitably on all of our people, and on all segments of our economy.

When we balance our budget with current revenues, we take a long stride toward responsible leadership. But we must remember that a balanced budget is not an end in itself. The budget exists, not as an exercise in bookkeeping, but as a measure of a government's service to its people. Only if our total program is confident, pioneering, and responsive to the needs of the people can we properly take credit for fiscal solvency. Even in the drama of the budget, people are more important than dollars.

1957-58 AND 1958-59 DEFICITS

In 1957-58 General Fund expenditures exceeded General Fund revenues by \$135.7 million. This deficit was met by application of a surplus from the preceding fiscal year of \$110.2 million plus transfers from other funds of \$32.3 million, thus leaving a General Fund surplus at June 30, 1958, of \$6.8 million.

In January 1958 when the current 1958-59 Budget was presented it had been anticipated that required transfers from other funds to balance the 1957-58 Budget would be less than \$12 million and that the carry-over surplus would be \$8 million. The current budget (1958-59) was presented to the Legislature in January 1958 as a balanced budget. At the time the current budget was adopted spending was estimated to exceed revenues by \$99.2 million, and it was proposed to balance the budget by transfers from other funds of \$91.2 million and by application of the expected \$8 million surplus from 1957-58.

Since the 1958 session of the Legislature, however, several things happened. There was a substantial decline in estimated revenues for 1958-59, and a substantial increase in estimated expenditures. To meet the 1957-58 deficit required use of about \$20 million more of reserve funds than had been anticipated. Since substantially all of the balances in these funds (except the Investment Fund) would have been exhausted by June 30, 1959, in balancing the current budget, this had a cumulative effect.

As presently estimated, expenditures for the current fiscal year will exceed current revenues by \$147.5 million, and the resulting General Fund deficit at June 30, 1959, will be \$68.4 million.

This figure is exclusive of \$7.2 million remaining unexpended from \$7.5 million appropriated in 1957 from the General Fund to meet in part the capital expenditure program for the new State Fair. Since overall financing plans for this project include the marketing of authorized revenue bonds in the total amount of \$13 million and since it is doubtful when funds from this source can be made available, it is not anticipated that the \$7.2 million referred to will be expended in the current fiscal year. Hence this latter figure has been excluded from expenditures in calculating the deficit expected at June 30, 1959. For the same reason further expenditure from this appropriation for the 1959-60 Fiscal Year is not included in this budget.

1959-60 EXPENDITURE PROGRAM

Formulation of the proposed budget has included a careful review of departmental requests. Wherever possible, without impairing needed State services or working a hardship on recipients of such services, these have been modified to reduce net expenditures. Major policy determinations in this area are noted

in the budget document, and involve total reductions in departmental requests for General Fund expenditures of some \$24 million. Budget requests for new functions or increased levels of service totaling \$21.5 million were submitted. Of these, only \$3.6 million have been approved. (These figures do not include the Department of Education request to the Legislature for an increased level of public school support.)

Mental Hygiene. In the Mental Hygiene budget, I am recommending a \$9 million increase in appropriation over 1958-59 to provide for the opening of new facilities and growth factors, plus a \$1.5 million increase to provide for improved and expanded programs. This latter amount covers augmentation of the inservice training program, psychiatric research activities, increases in professional, technical and nursing staff levels, and increased allowances for special drugs. A nonproductive statistical research unit has been deleted, thus saving \$50,000. The budget also proposes elimination of 49 food service assistants for small congregate dining rooms serving less than 125 patients. This service can be adequately handled by regular ward personnel, with a resultant saving of \$146,000.

Public Health. In addition to normal growth factor increases in expenditures, the budget provides \$508,000 for new programs in connection with radiation hazards, air pollution research, and related activities. The subsidy for mosquito abatement has been eliminated except for districts now taxing at the maximum 40-cent tax rate. This will save \$390,000. I recommend that in computing subsidies to the counties for tuberculosis sanatoria, we adjust the amounts to recognize the repayments the counties receive from paying patients. This will save \$260,000.

Inaugural Message Programs. In my inaugural address, I presented certain proposals for new or augmented programs. Included in the budget is a total of \$1.7 million for these proposals, as follows:

To provide medical care for permanently disabled persons.....	\$514,620
To establish an Economic Development Agency.....	350,000
To establish a Fair Employment Practices Commission.....	240,000
To enable the Department of Public Health to maintain guard against levels of radioactivity that may endanger life or health.....	239,216
To supply additional funds for concentrated research on the causes and prevention of air pollution.....	162,307
To initiate special handling and treatment of paroled narcotic addicts.....	125,000
To establish the office of Consumer Counsel.....	45,000
To establish co-ordination of activities directed toward problems arising from the use of radioactive materials.....	22,705
Total	\$1,698,848

Salary Increases. In its annual report dated December 23, 1957, the Personnel Board recommended a 3 percent salary increase for all employees under its jurisdiction for 1958-59. Funds to implement this recommendation were eliminated by the 1958 Legislature. In its last report of December 5, 1958, the board recommends an increase for fiscal year 1959-60 of 7½ percent, plus an added 5 percent for state college faculties, plus \$875,000 for special salary adjustments. The board states that the cost would be \$20.6 million. However, if these recommendations were adopted, a like increase presumably would be added to University of California salaries and to salaries of statutory and exempt personnel; also retirement contributions would increase for all affected employees. Hence the total cost to the General Fund would approximate \$31.1 million.

While it is true that salary increases for state employees in a time of financial stress should be carefully weighed, it is also true that to hold state employees to existing salary levels in an inflationary period has the effect of requiring them to finance in part the state expenditure program. After full consideration, I have included in the budget provision for a 5 percent increase for salaries of all state employees for the fiscal year 1959-60 at a total cost of \$32 million, of which the General Fund will bear \$19.3 million.

The California Consumer Price Index at June 15, 1958 (which was the approximate effective date of the recommended 3 percent increase mentioned above) was 126.2; and it is estimated that at June 15, 1959 it will be 128.1; an increase of 1.9 points or 1.5 percent. As a check on these figures, a Personnel Board chart dated October 17, 1958 indicates that state salary levels were approximately equivalent to comparable industry and governmental salary levels at July 1, 1957; between that date and June 15, 1959 it is estimated that the index figure will rise from 121.7 to 128.1, an increase of 6.4 points or 5.2 percent. Assuming that the 3 percent increase recommendation referred to was a sound one, and adjusting it to the index figures, it would appear that a salary increase of from 4.5 percent to 5.2 percent would be equitable for 1959-60.

It is on this basis that I have arrived at the recommended 5 percent increase. I am aware of the fact that the wage statutes of California have eliminated regular use of cost of living data from salary survey studies since 1949. But these are stringent times for state finances. The burden of that stringency should not be permitted to fall unduly on state employees. Nevertheless, in making provision for them in the light of existing conditions, statutory guides for survey studies should not be the exclusive consideration.

I have not included any additional increase for the state college faculties, although of course they will receive the 5 percent increase recommended for all

state employees. This should put them on better than a parity basis with similarly situated college personnel in other states. In 1957 state college faculty members received a 10 percent increase while state employees generally got 5 percent, and some university personnel 7 percent. Further preferential treatment for state college faculty members is believed unwarranted at this time.

Water Resources and the Investment Fund. The budget proposes operations of the Department of Water Resources in the total amount of \$12.2 million, an increase of \$.9 million over the current year. This amount will be financed by \$7.1 million from the General Fund and \$5.1 from the Investment Fund. The capital outlay program is budgeted at \$52.9 million, of which the Investment Fund will supply \$52.8 million. \$10 million of this amount has already been appropriated and is available from the current budget year. \$4.7 million is for administration and design, leaving \$38.1 million in new appropriations for construction.

The anticipated activities and capital outlay programs, and my views and recommendations with respect to dedication of the Investment Fund for water development, have been put before you in a special message, and financial details are contained in the budget. For these reasons further discussion here is unnecessary.

I will only repeat that the orderly and prompt development and distribution of California's water resources is a project of the highest priority for the future of our State.

Other Capital Outlay. The State building program, which has been under way for a number of years, will continue under the proposed budget for total expenditures of \$95.5 million. This will be funded by \$20.9 million from special funds, \$66.2 million from State construction bond issues, and \$8.5 million from the Capital Outlay and Savings Fund. The last amount represents a transfer from the General Fund.

Other capital outlay expenditures, all from funds other than the General Fund, include \$218 million from the State Highway Fund, \$52.9 million for water resource development mostly from the Investment Fund, and \$15.6 million from the State Beach and Park Fund. The total in this category is \$318 million.

Military and Veterans Affairs. I recommend elimination of the officers' uniform allowance to the extent that it is duplicated by a federal allowance for uniforms. I also recommend discontinuance of State support for the cadet corps program. These changes will save \$541,000. I also recommend that the subsidy to veterans' organizations for furnishing claims and rights services to veterans, and the similar subsidy for county veterans service officers, be deleted. There

appears to be inadequate justification for continuance of these expenditures by the State in view of federal responsibility and activities in this field. The saving here is \$1.1 million.

Public School Apportionment. I am determined, as I said in my inaugural, that California shall have the best public schools in the United States. Toward this goal, I offer two basic recommendations.

First, the improved level of State support at the ADA figure of \$193.37, as authorized by the 1957 Legislature, must be continued. Unless legislative action is taken, apportionment aid will automatically return to the \$180 formula that was in effect June 30, 1957. The result of this upon our public schools would be tragic. I am, therefore, making a budgetary provision for \$76,260,680, the amount necessary to maintain the 1957 formula, adjusted for the larger number of children now in school. Of this amount, \$34,171,920 is required to meet the ADA increase at \$180, and \$42,088,760 is necessary to provide \$193.37, the 1957 figure, for the total ADA of 1959-60.

Second, I am recommending an additional \$23,453,000 for the express purpose of improving the quality of education beyond that possible under the 1957 figure. Specifically, I recommend that the apportionment figure per unit of average daily attendance be increased by \$7.45, or from \$193.37 to \$200.82.

In its January 1959, report to the Legislature, the Department of Education directed attention to the increasing ratio of the number of children to our total population and to the higher costs of education for each child. The State must assume its share of these increased financial responsibilities. No activity we support is of greater importance than public education.

In urging this increase, I wish to point out that this is the first time since 1952, and the second time since 1945, that the budget message has contained a specific recommendation by the Governor for an improvement in the apportionment aid formula.

The amount of increase I have recommended is less than that suggested by the Department of Education. This is dictated by the necessity of achieving a proper balance among our many State responsibilities, and also in order to keep a firm limit on tax increases.

I am convinced that we must improve our support of the program for physically and mentally handicapped children. Thus, in principle though not in exact amount, I concur in the Department of Education's recommendation that the State increase its contributions for this purpose. I am recommending \$2.49 per ADA unit, which is part of the total increase of \$7.45. To sustain the present support level of \$193.37, adjusted for the larger number of pupils, and adding

the improvement figure I have recommended, will provide a total increase in school apportionment funds of \$60.7 million for 1959-60 over 1958-59.

In tabular form, I compare below the increases proposed by the Department of Education and those which I am recommending.

	<i>Proposed Increases *</i>	
	<i>Department of Education</i>	<i>Budget</i>
Basic and Equalization Aid.....	\$44,175,000	\$20,336,000
Amount per ADA.....	13.97	6.46
County School Service Fund.....	316,300	---
Amount per ADA.....	.10	---
Pupil Transportation	---	---
Amount per ADA.....	---	---
Special Education	10,785,830	7,839,000
Amount per ADA.....	3.41	2.49
Apportionment for Growth.....	—3,398,760	—4,722,000
Amount per ADA.....	—1.07	—1.50
Subtotal, State School Fund.....	\$51,878,370	\$23,453,000
Amount per ADA.....	16.41	7.45
Driver Training	2,309,175	---
Amount per ADA.....	.73	---
Total, State School Fund.....	\$54,187,545	\$23,453,000
Amount per ADA.....	\$17.14	\$7.45

* These increases are over and above apportionments based upon the present amount per ADA of \$193.37 (recommended for continuance both by the Department of Education and in the proposed budget), augmented to include the anticipated increased enrollment for 1959-60.

In explanation of my recommendations, I offer the following analysis.

(1) *Basic and Equalization Aid.*

(a) My recommendations for changes in the basic and equalization aid funds represent a 5 percent increase, less the adjustments noted in the next two paragraphs.

(b) The levying of additional state taxes for increased allowances to the wealthier districts is not deemed warranted at this time. Accordingly, there is no increase recommended for *basic aid*. The department's proposal for an increase in this figure from \$125 to \$130 is not included, reducing the proposed 5 percent increase by approximately \$3 million. This \$3 million would have gone to those wealthier districts not eligible for equalization aid.

(c) Large state expenditures for *adult education* must be weighed against the more pressing needs of the school system for additional funds to educate children, particularly in a time when every additional dollar provided by the State must come from a new tax levy. Thus I recommend a reduction in basic

and equalization aid for adult education programs of approximately 25 percent or \$2.5 million. The effect will be to encourage districts to recoup from fees more of the costs of those adult programs which are not of a truly basic educational character, or to curtail such offerings except to the extent that the district is willing to finance them from local funds.

(2) No increase in the basis of apportionments for the *county school service fund* is recommended. This fund was intended to take care of the very small inefficient districts, which have been decreasing in number since the fund was established. The fund therefore should be declining instead of growing.

(3) As I mentioned earlier, a substantial increase is included for *special education* to cover approximately 100 percent of current average excess costs to school districts in educating the physically handicapped and mentally retarded children; the increase amounts to \$7.8 million. This involves a reduction in amount as compared with the request of the department. Instead of basing its figure on present costs, the department projected annual increases in costs for the next two years.

(4) The department recommends a decrease in *apportionment for growth*. The previous apportionment for growth has proved to be too large. This allowance has been adjusted to bring it into conformity with the other allowances I have recommended. There will be a resultant saving of about \$1.3 million.

(5) Increased support for *driver training programs*, and for encouraging districts to *lengthen the school year*, is not recommended. I cannot accord these items a priority high enough to justify a further tax increase.

The costs of education have taken an increasingly larger share of the General Fund in recent years. This year the growth factor alone will require a significant portion of the new revenues we must develop. Thus, because I must distribute revenues among the many functions and services of the State, I cannot concur in the total recommendations made by the Department of Education.

The years ahead will require greater effort by all to meet the costs of education. Toward the goal of keeping these costs within the limits of our ability to pay, I urge all in the field of public education to make a critical re-examination of methods and offerings. Economies can be achieved through district reorganization and the elimination of small, highly expensive districts.

Improved visual teaching aids and the resources of electronic science can point the way to the wider and more economical distribution of teaching skills. These and other improvements are vitally needed if we are to avoid being overwhelmed by the costs of education. We can, I am convinced, reduce some costs, and those which we cannot reduce we shall recognize as our obligation to the children of California. These we will meet.

University of California. The recommended University appropriation totals \$94.3 million. This will enable the Regents to continue the complete University program as contemplated by the budget requests. This figure contains funds based upon existing formulas for the larger student population expected in the next fiscal year, as well as for the gradual shift to a larger proportion of students in the more expensive upper division and graduate courses. Adjustments made in arriving at the total appropriation figure mentioned include: (a) Budgetary savings in 1959-60 (estimated excess of appropriations over actual expenditures) estimated at \$2.7 million, and for the current fiscal year at \$2 million; (b) A \$1.2 million saving representing approximately 16 percent of the cost of the Extension Division heretofore subsidized by state funds. Since none of these courses are given without a fee charge, small fee increases will make the Extension program self-supporting as is presently the case with similar courses given by the state colleges; (c) Increase in nonresident tuition fees from \$400 to \$500 per year, adding \$550,000 to reimbursements; (d) Providing for a contingent fund of \$1 million instead of \$1.1 million, which would appear reasonable in view of the \$1 million contingent fund utilized for the General Fund operations; (e) Eliminating \$100,000 requested for nonacademic merit pay increases, as not compatible with state employee compensation practices. All employees and faculty of the University are of course included in the provision for a 5 percent salary increase which I am recommending, at a cost (for the University alone) of \$5 million. Provision is made for funds requested for operation of a radio astronomy telescope (\$28,000).

State Colleges. I recommend appropriations in the amount of \$57.6 million, including funds for an off-campus resident center for teacher education in Imperial Valley (\$47,000), and a contingent fund for college presidents' expenses in connection with faculty and student receptions (\$15,000). An increase in resident fees from \$40 to \$50 was recommended by the Department of Education. I recommend that these fees be fixed at \$65 per year, thus increasing anticipated reimbursements by \$1.2 million. The larger amount is justified on the basis of those special and other services for which fees have been customarily charged, and does not involve any charge in the nature of a tuition for educational purposes. At the same time it is proposed to increase nonresident fees from \$180 to \$250 per year. The new fee schedule is in line with charges made by similar institutions in other states. With respect to the authorized colleges in Orange and Alameda Counties, funds have been provided for a staff to continue planning only, and the \$1.5 million requested to commence operation of these new colleges in rented quarters is not included. In view of the present

fiscal situation, temporary deferment of actual opening is proposed until the colleges are prepared to open in their own plants.

Fiscal Affairs. Transfer of certain specialized auditing functions from the State Controller to the Departments of Social Welfare and Public Health respectively will result in additional federal grants to the State of \$75,000. Pre-auditing of claims by the Controller in part duplicates accounting work of other agencies; elimination of this duplication will reduce the Controller's budget by 18 positions or \$88,000. Improvements in methods and staff assignments in the division of buildings and grounds will reduce the Department of Finance budget by \$150,000. Provision is made for 30 additional auditors for the Franchise Tax Board for field audits both in and out of California. I have been assured that this will produce substantial additional tax revenues.

Other Functions. I recommend that administrative costs of the Division of Architecture be transferred to the Architectural Revolving Fund, reducing General Fund expenditures by \$194,000. Similarly, it is proposed that the Division of Administrative Procedures recover from the agencies served (mostly special fund agencies) the full cost of hearing work performed (\$134,000).

EXPENDITURE COMPARISONS

A summary comparison of total State expenditures for the three years ending June 30, 1960, is as follows:

SUMMARY—ACTUAL AND ESTIMATED EXPENDITURES—ALL FUNDS

	<i>Actual</i> 1957-58	<i>Estimated</i> 1958-59	<i>Proposed</i> 1959-60	<i>Change from</i> 1958-59
State Operations -----	\$541,469,972	\$596,320,446	\$656,925,743	\$60,605,297
Capital Outlay -----	354,787,661	344,322,192	326,620,252	—17,701,940
Local Assistance -----	995,178,465	1,114,318,483	1,204,831,640	90,513,157
Totals -----	\$1,891,436,098	\$2,054,961,121	\$2,188,377,635	\$133,416,514

SUMMARY—ACTUAL AND ESTIMATED EXPENDITURES—GENERAL FUND

	<i>Actual</i> 1957-58	<i>Estimated</i> 1958-59	<i>Proposed</i> 1959-60	<i>Change from</i> 1958-59
State Operations -----	\$396,387,136	\$432,311,807	\$469,123,205	\$36,811,398
Capital Outlay -----	84,742,053	16,003,815	8,485,095	—7,518,720
Local Assistance -----	765,332,588	840,281,034	941,455,180	101,174,146
Totals -----	\$1,246,461,777	\$1,288,596,656	\$1,419,063,480	\$130,466,824

It will be observed that General Fund expenditures are estimated to increase by \$130.4 million in 1959-60 over the current 1958-59 year; whereas the increase for 1958-59 over 1957-58 was \$42.1 million. Such comparisons can be misleading without an analysis of the major elements that enter into the difference.

Increase in expenditures proposed for *Local Assistance* amounts to \$101.1 million of the total \$130.4-million increase in 1959-60. Over and above increases necessitated by growth, which account for more than half the increase in this category, are these important elements: (i) the 1959-60 budget includes the recommended increase in the level of school apportionments amounting to \$23.5 million (no such increase was made in 1958-59); (ii) in 1959-60 a normal State contribution will have to be made to the Teachers Retirement Fund of \$40.2 million, whereas the 1958-59 budget reached into a reserve fund for \$20.1 million of that year's contribution with only \$14.5 million coming from current funds; this accounts for \$25.7 million of the difference; (iii) the increase in the required transfer to the Flood Control Fund in 1959-60 is greater by \$12.0 million than in 1958-59.

Comparisons as to expenditures from the General Fund for *Capital Outlay* for the three years are distorted by the relative use of bond funds (which are not included in the budget totals) in each of the years. In 1957-58 a smaller part of the building program was financed from bond funds with a correspondingly larger part from current funds. For this reason the 1958-59 budget for Capital Outlay shows a reduction in expenditures of \$68.7 million which obscures increases in other sections of the budget. This factor accounts for only \$7.5 million in comparing 1959-60 with 1958-59.

The real test of a "tight" budget is in the part dealing with *State Operations* where a much greater portion of the expenditures are subject to budgetary control. General Fund expenditures for State Operations are budgeted to increase by \$36.8 million in 1959-60 over 1958-59. The corresponding increase in 1958-59 over the preceding year was \$35.9 million. The 1958-59 budget, however, made no provision for salary increases, whereas the 1959-60 budget includes \$19.3 million for this purpose. Moreover, the uncontrollable provision for general debt service will increase by \$5.3 million in 1959-60 compared to an increase of only \$0.8 million in 1958-59.

When consideration is given to the necessity for providing for growth in the State's university, colleges, hospitals, and correctional facilities (in addition to the salary increase and debt service items totaling \$24.6 million), it becomes apparent that the 1959-60 budget compares most favorably to its predecessor.

FAIR AND EXPOSITION FUND

The Fair and Exposition Fund is perhaps the outstanding example of the defects and dangers inherent in the special fund method of financing. Large sums of money from taxation, having no logical relationship to the purposes for which they are dedicated, are substantially diverted from the General Fund

and are directed to various specific functions designated as "agricultural." These dedications, whatever might have been the case when they were created, today bear no relationship to the needs of the various functions and serve to swell their expenditures beyond actual need in many instances. In addition, they have a definite tendency to inhibit appropriate annual budget scrutiny. Moreover, large sums of state moneys are frozen in "reserve" in the Fund, for no apparent or justifiable purpose. The sheer complexities of the Fair and Exposition Fund are inconsistent with any reasonable concept of understandable fiscal procedure.

I am convinced this fund should be abolished forthwith, and the financing now handled through this Fund be accomplished through the General Fund. Fortunately, this is a matter that the Legislature has plenary power to deal with.

I am not proposing any decrease for 1959-60 in appropriations that would otherwise have been made from the Fund had it remained in existence during the coming year. To do so would have the effect of clouding my recommendation for abolishment of the Fund.

As an integral part of my recommendation for abolishment of the Fair and Exposition Fund, I recommend abolishment of the Wildlife Restoration Fund which is fed solely by horse racing revenues, and transfer of the financing of the functions of this Fund to the Fish and Game Preservation Fund. I also recommend abolishment of the State College Fund which is fed solely from Fair and Exposition Fund moneys and from horse racing revenues, with transference of the same functions at the same level of expenditure to General Fund financing.

Coincident with abolishment of the Fair and Exposition Fund and upon the assumption that my recommendation in this regard will be approved by the Legislature, I am proposing an increase in the tax on horse racing revenues as a part of my proposals relating to new revenue sources. This increase will produce new General Fund revenues of \$12.4 million.

In addition, adoption of my recommendations concerning abolishment of the Fair and Exposition Fund will accomplish a nonrecurring transfer to the General Fund of \$4.8 million accumulated in the Fair and Exposition Fund and not allocated or appropriated for any immediate purpose. In addition, there will be an annual accrual to the General Fund of the \$750,000 which now goes to the Wildlife Restoration Fund, making the total 1959-60 benefit to the General Fund \$5.6 million.

Other State Funds. There are, of course, many other funds for which accounts are maintained in the State Treasury; about 80 of these are reflected in

the budget totals of revenues and expenditures. (See Schedule 5 of the 1959-60 budget.) There has been much discussion, some reported in the press, of the desirability of doing away with the special fund method of financing, and statements have been made that all funds should be abolished. In this connection, I would call the following matters to your attention.

(a) Some of these funds are established by constitutional provision, and so are beyond the power of the Legislature to change. Principal items in this category are the various highway user funds and the Fish and Game Preservation Fund.

(b) Apparent fund balances do not always represent cash in the treasury, as some funds have substantial asset investments in realty.

(c) Many funds are created from fees charged to a particular business or professional activity and legally committed to support of regulation in the particular field. The courts have imposed a continuing obligation upon the State for support of such regulatory and service functions as were contemplated when the fees were imposed; and this obligation may affect the ability of the State to divert fund balances.

(d) Where funds are used (as many of them are) for support and capital outlay purposes by the agencies to whose operations they relate, they obviously relieve the General Fund of the necessity of financing such expenditures. If the funds are abolished and their surpluses and income diverted to the General Fund to the extent legally permissible, the recurring benefit to the General Fund will be limited to the amount by which agency expenditures annually are less than the annual income of the respective fund. Furthermore, in a number of instances annual agency expenditures exceed the fund income related to the agency operation, and the General Fund is already "picking up the tab" for the excess, or the fund surplus is being used to provide this amount.

(e) Apparent balances are not always available for diversion, as they may already have been committed by the agency within its authorized powers for specific purposes.

(f) In a not inconsiderable number of cases where an agency is operating through a fund, the fund is used to provide working capital for agency expenditures. For example, fund income may be derived from fees collected on a calendar year basis, whereas the agency operates on a fiscal year basis. In such cases the fund balance may be deceptively large at June 30 of each year because it includes the amount necessary to support agency expenditures between July and December. If balances of this type are diverted to the General Fund, no financial benefit to the General Fund would occur, because the money

would have to be kept intact as working capital for subsequent use of the agency.

(g) As I have already pointed out, the large balances that the State accumulated in the past when General Fund revenues exceeded expenditures and which were placed in the so-called "reserve" funds, will have been entirely used up in meeting annual budget deficits by the end of the current fiscal year. The single exception is the Investment Fund, which I am proposing for dedication to the development of our water resources exclusively.

The special funds are so numerous and many of them are so complex in structure that it was impossible for me to present as a part of this budget an acceptable program for overall modification of special fund financing. Only a more thorough study than has been possible in the time available for preparation of this budget can lay the foundation for such a program. It is for this reason that I have confined my recommendations in this area to the Fair and Exposition Fund. If this recommendation is unacceptable, it is hardly to be expected that any general revision of special fund financing can be expected in the foreseeable future.

Reference is made to a special analysis of fund balances which will be found in the introductory section of the budget.

FINANCING THE 1958-59 DEFICIT

The anticipated deficit from the 1958-59 Fiscal Year is now estimated to be \$68.4 million on June 30 of this year.

With a deep conviction that fiscal responsibility calls for early payment of our past debts, I have chosen to deal with this deficit.

It is my recommendation that the method of assessment and collection of the insurance gross premiums tax be changed to a self-assessment procedure, so that the proceeds of that tax calculated on premiums for the calendar year 1958 instead of being received by the State in the fall of 1959 will be received in April 1959.

This will produce added revenues for the current fiscal year of \$55.6 million, which will be used to reduce the carryover deficit from the current fiscal year from \$68.4 million to \$12.8 million. It is proposed that this remaining deficit be carried by temporary borrowing during the next fiscal year.

The program that I offer is estimated to erase all but \$5.4 million of the 1958-59 deficit by June 30, 1960. Moreover, the economy measures I have already initiated will materially reduce even this carryover.

1959-60 REVENUE PROGRAM

The central problem in this whole massive document we call the budget can be summarized with three figures. The proposed total General Fund expenditure for the next fiscal year, 1959-60, is \$1,419.1 million. The estimated General Fund income from presently expected revenues for that same period totals \$1,218.0 million. That leaves a shortage of \$201.1 million which must be obtained in order to balance income against outgo.

The Constitution enjoins me "to recommend the sources from which the additional revenue shall be provided." I would not have it otherwise. It is the proud responsibility of the chief executive of this State to provide courageous leadership when his tasks are most difficult. I am recommending not only the sources of additional tax money, but the amounts that should be obtained from each so that the budget may be balanced and the tax structure be fair and equitable.

Before I detail these recommendations, I shall discuss briefly the method used in arriving at them.

In the campaign for Governor it was agreed by both candidates that the State faced a fiscal crisis, and that the time had come to face up to the problem of obtaining sufficient revenues to put California back on a pay-as-you-go basis.

Immediately upon my election as Governor I began a study of this State's tax structure. I sought the counsel of leading experts in and out of State Government.

Among these experts, whether economists, tax attorneys, or specialists in governmental finance, I found an amazing degree of general agreement on the makeup of a new tax program for California. I found that it was widely recognized that the income tax, based as it is upon ability to pay, now plays too small a role in California's overall tax program. The income tax as now constituted is not constructed and graduated to reflect adequately the principle which makes it a fair tax.

I am recommending a substantial revision of the California state income tax structure. The revisions can be made—and should be made—so that the family with up to \$10,000 in annual income will not be adversely affected, and in many cases will benefit.

The income tax revisions alone, however, will not provide enough revenue to handle our fiscal problem. In making up the difference, we have gone to sources where the present taxes are considerably lower than in other major states or to recognized sources which California has left untapped.

In doing so, we have been careful to keep a reasonable balance between those taxes which place an added burden on industry and those which directly affect the consumer.

The following description of my tax recommendations, will, I think, explain why this is so:

1. *Income Tax.* I recommend revision of the personal income tax structure to increase revenues by \$60.7 million in the next fiscal year. Here are the proposed changes:

a. The tax brackets should be narrowed from \$5,000 to \$2,500. Under the present system, a man who pays taxes on \$10,000 in taxable income pays at about the same rate as a man who pays taxes on \$14,999. With this change, the rate would increase at \$12,500. At the same time the maximum rate should be increased from 6 percent to 7 percent so that there is a slightly steeper progression through the narrowed brackets.

b. The credit for dependents should be increased from \$400 to \$600, and the standard deduction from 6 percent to 10 percent. Taken together with the other proposed revisions, this would result in actual lowering of taxes for a married man with two children until his income reaches \$10,500 a year. It would also bring this feature of State tax law into conformity with the federal income tax law and simplify preparation of returns.

c. The personal exemption for married couples should be reduced from \$3,500 to \$3,000, and for single persons from \$2,000 to \$1,500. This brings the exemptions into a more logical relationship, and broadens the tax base.

d. Capital gains taxation should be changed to conform to the federal law.

It should be noted that the income tax tends to produce increased revenues as the economy expands and to keep pace with the steady inflation that has become a major factor in our economy.

2. *Inheritance Tax.* I recommend an increase in the rates of the Inheritance Tax on bequests to persons who do not have a close family relationship to the deceased. The rates in Class "C" should go up 25 percent, and in Class "D" 50 percent. Present provisions for credit on payments of federal estate taxes should be eliminated. An estimated \$2 million increase in revenue in 1959-60 would result. California's present rates were established in 1935 and there has been no increase since that date. The changes proposed would keep California well within the rate range of states which levy such taxes. The Gift Tax should be similarly modified, although the revenue effects would be minor.

3. *Bank and Corporation Franchise Tax.* I recommend the following changes in the Bank and Corporation Franchise Tax:

a. The rate for general corporations should be increased from 4 to 5½ percent. This compares to such other states as New York with 5½ percent, Oregon 6 percent, Minnesota 7 percent, and Massachusetts 7 percent. It should also be noted that these taxes are deductions against the federal income tax on corporations, and thus carry an offset factor for the corporate taxpayer of approximately 50 percent.

b. There should be a corresponding increase in the maximum rate applicable to financial institutions from 8 percent to 11 percent for the same general reasons.

c. There should be an increase in the minimum annual corporate franchise tax from \$25 to \$100.

d. There should be a provision permitting accelerated depreciation of assets on the same basis as that in the federal law, once again bringing about federal-state conformity.

Together, these changes would add \$33.6 million in revenues in the 1959-60 Fiscal Year. In the first full year in which the effect of these changes would be felt, the over-all increase over present revenues from these taxes would be \$58.6 million.

4. *Insurance Taxes.* Provision for self-assessment and advancing the date of payment of the insurance gross premiums tax, as proposed, would also increase revenue from that source on an accelerated basis in 1959-60, estimated at \$5 million.

5. *Severance Tax.* I recommend a severance tax on petroleum products at the rate of 2 percent of the gross value. California now has a small severance tax which is imposed for conservation and regulation purposes and which produces only token revenues. Most other major oil-producing states obtain major revenues from severance taxes. The 2 percent rate recommended is well below average among the 28 states which now have such taxes, and far less than the 5 percent levied by Oklahoma and the 4.6 percent levied by Texas. This tax would produce an estimated \$19.3 million in 1959-60, and an estimated \$23.2 million for a full year.

6. *Horse Racing.* I recommend that the State revise its formula for obtaining revenues from horse racing to increase those revenues by some \$12.4 million annually:

a. The gross commission on parimutuel betting should be increased from 13 to 15 percent. The track's share of the gross commission should be decreased by one-half percent on the handle between \$50 million and \$100 million, and by 1 percent on the handle over \$100 million, and there should be a corresponding increase in the State's share.

b. The so-called breakage formula should be changed so that the accumulated amount up to \$25,000 would be retained by the track; the accumulated amount between \$25,000 and \$100,000 would be shared equally between the track and the State; and all amounts over \$100,000 would go to the State.

7. *Cigarette and Tobacco Tax.* I recommend an excise tax on cigarettes at 3 cents per pack, which will produce an estimated \$52.9 million in the 1959-60 Fiscal Year and an estimated \$60 million for a full year. I also recommend an excise tax on other tobacco products at 15 percent of the wholesale price, estimated to produce \$7.1 million in 1959-60, and \$8 million for a full year.

California is one of the few states which does not now have a tobacco tax of any kind and the rates proposed are modest in comparison to those levied in many other states.

8. *Beer Tax.* I recommend that the rate of excise tax on beer be increased from 2 cents per gallon to 7 cents per gallon. It is estimated that this change will produce \$9.2 million in 1959-60 and \$10 million for a full year.

The State's present beer tax is one of the lowest in the Nation. The increase would leave the California beer tax rate still below that in some states in which prices of beer are at about the same level as in California.

Beer and cigarette taxes often hit the consumer the hardest, but it should be remembered that they are the only new taxes I am proposing which will have such an effect. Moreover, these taxes are levied not on necessities, but on items of personal choice.

In the first full year of impact for these new taxes, the estimated revenue is \$256.6 million. Every dollar, I anticipate, will be needed to meet the needs of our booming population—new schools, more teachers, mental hospitals, more correctional institutions, and more of all the essential services rendered by the State. We should return to the principle of financing as much as possible of our capital outlay requirements out of current tax revenue.

ESTIMATED YIELDS (In Millions)		
	<i>Full year (present base)</i>	<i>First year 1959-60</i>
1. Cigarette and tobacco tax-----	\$68.0	\$60.0
2. Beer tax increase-----	10.0	9.2
3. Horseracing revenues -----	12.4	12.4
4. Severance tax on petroleum products-----	23.2	19.3
5. Bank and corporation franchise tax changes-----	58.6	33.6
6. Insurance gross premiums tax advance in payment-----	5.0	5.0
7. Inheritance tax changes-----	8.0	2.0
8. Personal income tax changes-----	71.4	60.7

GENERAL FUND SUMMARY

Revenues from present tax structure	\$1,217,974,289
Revenues from proposed new sources	202,200,000
Total Revenues	\$1,420,174,289
Reallocation of Fair and Exposition Fund	\$5,600,000
Transfers from other funds	709,288
Total Income	\$1,426,483,577
Expenditures	1,419,063,480
Indicated Surplus 1959-60	\$7,420,097
Deduct: 1958-59 deficit	—12,803,624
Accumulated Deficit at June 30, 1960	—\$5,383,527

I transmit to you herewith the detailed Budget for the fiscal year commencing July 1, 1959, and ending June 30, 1960, and I have presented to you my recommendations for the revenue sources required to finance it, pursuant to the provisions of the California Constitution.

These have been formulated with an emphasis upon the need for economy dictated by a decent regard for the stringent financial condition of the State. At the same time my program is a liberal and forward looking one, designed with faith and confidence in the future of this great State.

Respectfully submitted,

Edmund G. Brown

To HONORABLE EDMUND G. BROWN
Governor of California

Transmitted herewith is the proposed Budget of the State of California for the fiscal year 1 July 1959 to 30 June 1960. The detailed statements of the Budget are preceded by a section containing summary tables, charts, and other explanatory material.

I have made a sincere attempt to simplify and clarify the form of presentation of the budget.

For example, in the narrative explanatory material found throughout the detailed statements, wherever possible references dealing particularly with budgetary comments and changes have been italicized so that these important matters are "flagged" for more ready reference. The General Budget Summary found in Schedule 1 has been materially revised in manner of presentation, so that it is clearer and more easily understandable and usable. A new schedule comparing General Fund revenues under both present and proposed tax structures has been added as Schedule 2. Previously used schedules have been retained, and some charts have been added; but the order in which these will be found in the document has been changed. A table of contents has been prepared and included at the beginning of the book, and should provide a readier access to all portions of the volume than has been possible in the past.

As requested by you, the usual summary statement of fund conditions (now found in Schedule 5) has been augmented by a new schedule (Schedule 5-A) showing balances of the major funds with reference to their availability for diversionary use in lieu of additional tax levies.

You will appreciate that conclusions as to "availability" of fund balances not only involve accounting determination as to the number of dollars in the funds at any given time, but also require a complete and careful analysis of many legal and practical considerations.

In this connection, I would caution that the limitations of time for preparation of the budget document have made it necessary to treat this new schedule as a tentative and preliminary approach to a more detailed and thorough study of fund financing which I will present to you in a subsequent report. Of course, no effort has been spared to make the new schedule as accurate as available data has permitted. It is possible, however, that some revisions may have to be made.

In the relatively brief time that I have been working with them, I have already come to appreciate the ability and the devotion to duty of the staff of the Department of Finance. It is therefore with confidence that I advise you that the staff and facilities of the Department will be able to furnish you with additional information and to assist in the consideration of the Budget, as you may require.

Respectfully submitted,

28 January 1959

Director of Finance

^b Includes working balances which may be specially dedicated or otherwise committed, and so not true surpluses in the broader sense.

Schedule 1-A

GENERAL FUND ACCUMULATED SURPLUS, JUNE 30, 1959 RECONCILIATION OF THE CHANGES FROM THE PREVIOUS BUDGET ESTIMATE

ACCUMULATED SURPLUS, JUNE 30, 1959, as estimated in the previous Budget.....			\$536,238
Effect of Legislative action on the Budget:			
Net decrease to General Fund appropriations.....			+\$13,372,755
Increase in the transfer to the Capital Outlay and Savings Fund in the amount of increases made to capital outlay appropriations.....			—133,655
Increase in the transfer to the Flood Control Fund in the amount of increase made in appropriation.....			—440,000
Increase in the transfers to the Legislative Contingent Funds.....			—2,155,300
Add transfer from the Employment Contingent Fund.....			+2,099,295
Add transfer from the Investment Fund.....			+7,193,738
Eliminate transfer from School Building Aid Fund.....			—20,000,000
Decrease deficiency appropriation for 1957-58.....			+30,429
Increase prior year expenditure for storm and flood damage repairs.....			—500,000
Effect of special appropriation measures enacted.....			—35,665
Deficiency appropriations for 1957-58, enacted in amounts less than budget estimates.....			+43,000
REVISED ESTIMATE OF GENERAL FUND SURPLUS, AS OF JUNE 30, 1959, as reported in the Summary of Financial Legislation enacted by the 1958 Legislature, dated July 10, 1958.....			\$10,835
Effect of revised estimates of revenues, expenditures and transfers as reported in the current Budget:			
	Previous Estimate	Revised Estimate	
Revised estimate of revenues:			
Revenues for 1957-58.....	\$1,144,524,507	\$1,110,802,855	—33,721,652
Revenues for 1958-59.....	1,184,293,289	1,141,058,368	—43,234,921
Revised estimate of expenditures: ^a			
Expenditures for 1957-58:			
State Operations.....	393,982,622	392,029,192	+1,953,430
Capital Outlay.....	2,169,641	—13,382	+2,183,023
Local Assistance.....	761,953,986	754,514,998	+7,438,988
Expenditures for 1958-59:			
State Operations.....	415,212,373	425,901,925	—10,689,552
Capital Outlay.....	7,430,045	2,235,351	+5,194,694
Local Assistance.....	826,170,730	834,437,655	—8,266,925
Revised estimate of transfers:			
From other funds:			
1957-58.....	12,274,991	32,279,023	+20,004,032
1958-59.....	91,219,770	72,313,464	+18,906,306
To other funds:			
1957-58.....	99,932,025	99,930,969	+1,056
1958-59.....	35,145,125	26,021,725	+9,123,400
Prior year surplus adjustment.....			+506,274
ACCUMULATED SURPLUS (—Deficit), JUNE 30, 1959, as estimated in the current Budget.....			—\$68,403,624
Recommended change in due date of insurance tax.....			55,600,000
ESTIMATED DEFICIT, JUNE 30, 1959.....			—\$12,803,624

^a See Schedule 8 for further detail.

						TOTAL		TOTAL		TOTAL "AVAILABLE"	
						Deduct: Proposed Salary Increases Applicable to Available Balances					
						4,152,233					
						491,571 ^a					
										\$3,657,662	

^a This is a new schedule. It is to be considered as preliminary only, and subject to further study and possible revision. (See comment at page A-1.) In general funds with balances of less than \$100,000 are not included. Detailed statements as to the condition and transactions of each fund will be found in the appropriate places in Part I; see also Schedule 5, Part A.

^b From General Fund.

^c Minor adjustment.

^d Recommended by Governor for dedication to water resource development exclusively.

^e Department's annual expenditures exceed fund revenues.

^f Estimated on basis of departmental expenditures.

^g For apportionment to local subdivisions.

^h Estimated amount of prepaid fees from school districts for plan checking.

ⁱ Legal commitments from levying of business license fees for regulatory purposes are not evaluated in this schedule.

^j Fund derived from assessment on industry for specific purpose; assumed State is morally and perhaps legally committed to such purpose.

^k Transfer to General Fund.

^l \$5.6 million proposed to be transferred to General Fund on abolishment of Fair and Exposition Fund.

^m Legislatively dedicated to highway use.

ⁿ Legislatively dedicated for education and research.

^o \$256,000 owing to Investment Fund. Balance legislatively dedicated.

^p Any revertible balance should go to Investment Fund from which the money came.

^q Amount required for proposed 5 percent salary increase, applicable to balances in this column.

Schedule 6

¹ There is \$683,739 in the Sacramento State Building and Interest and Sinking Fund in excess of the amount necessary to retire all outstanding bonds. The amount in excess of \$3,000,000 on June 30, 1959, is proposed to be transferred to the General Fund in accordance with Section 20, Chapter 1, Statutes of 1958.

² Money was transferred from the General Fund to the Bond Sinking Fund of 1943 to pay the principal and interest on these issues to final maturity; however, \$5,000,000 was loaned to the Highway Fund for the Golden Gate Bridge and Highway District. This loan will not be repaid until after final maturity of the bonds.

³ There is \$4,897 in the Olympic Bond Fund in excess of the amount necessary to retire all outstanding bonds.

⁴ Money is transferred from the Motor Vehicle License Fee Fund to the General Fund in the amount to meet the annual interest and redemption payments.

⁵ Money was available from the School Bond Retirement Fund to pay part of the annual redemption requirements on the School Building Bonds during the 1957-58 Fiscal Year. As of July, 1958, the remaining balance in the School Bond Retirement Fund was transferred to the General Fund under authority of Chapter 1073, Statutes of 1957. In addition, repayments from school districts and premium and accrued interest earned on the bond funds are available to pay part of the interest and redemption payments.

⁶ Chapter 104, Statutes of 1958, First Extraordinary Session authorizes bonds to be issued and sold amounting to \$20,000,000. The proceeds, from bond sale to be deposited to the credit of the General Fund.

⁷ The servicing of these bonds is primarily the responsibility of the San Francisco Harbor Improvement Fund, Small Craft Harbor Improvement Fund and the Veterans Farm and Home Building Fund of 1943. However, the bonds are general obligation bonds of the State of California.

⁸ Callable on or after January 2, 1951, in the amount available in the Sinking Fund.

⁹ Callable on or after January 2, 1955, in the amount available in the Sinking Fund.

¹⁰ \$500,000 callable on or after March 1, 1971.

¹¹ Callable on or after January 2, 1941, in the amount available in the Sinking Fund.

¹² Chapter 103, Statutes of 1958, First Extraordinary Session authorizes issuance of bonds totaling \$50,000,000 for the San Francisco Harbor and \$10,000,000 for development of small craft harbors.

Analysis of Revenue Estimates

Revenue receipts during the 1959-60 Fiscal Year will total \$2,109,125,100 under the estimates presented in the budget. Of this sum, \$1,906,925,100 will be derived from existing sources and \$202,200,000 will come from the tax adjustments recommended by the Governor. Aggregate revenue will exceed the anticipated total for the current fiscal year by \$199,735,292. However, the current year estimate reflects the effect of a proposed advance in the due date of insurance taxes. Adjusted for this factor, the estimates contemplate a rise of \$255,335,292 in revenue flow from present and proposed sources. Approximately \$53,135,000, or one-fifth, of this increase is traceable to the anticipated improvement in business conditions and four-fifths to tax adjustments.

Receipts to the State General Fund will amount to \$1,420,174,289, including the \$202,200,000 in new or additional levies. The increase over the current year total is estimated at \$223,515,921. Because of the several changes recommended in the State's tax system, this anticipated increase requires further analysis. It is estimated that a moderately strong improvement in business volume during 1959 and early 1960 will add \$76,915,921 to the yield of General Fund revenue from the *existing* tax structure—a gain of 6.7 percent. Advancing the due date of the insurance tax, which is part of the Governor's proposal with respect to the June 30, 1959 deficit, will increase current year collections by \$55,600,000. This change in the collection schedule tends to conceal the uptrend in General Fund revenue implicit in the assumptions regarding higher levels of business, trade, personal income and corporate profits which underlie the 1959-60 budget revenue computations.

Special fund collections will amount to \$688,950,811, a decline of \$23,780,629 from the estimate for the current year. The difference is attributable entirely to bid bonus payments of \$55,555,974, received in the current year in connection with the development of tideland oil resources. Excluding this item, the increase in other special fund revenue between Fiscal Years 1959 and 1960 is estimated at \$31,775,345. It should be noted that highway user tax revenues, which constitute two-thirds of all special fund receipts, have been estimated on the basis of present fuel tax rates and vehicle fees. If current rates are not extended, there will be a drop of approximately \$40,000,000 per fiscal year* in revenue for highways and other activities related to motor vehicle ownership and use.

The distribution of California's tax burden will change appreciably under the revenue proposals presented in this budget. Greater emphasis will be placed upon income and luxury taxes, and there will be less reliance upon the general sales tax. During the coming period, approximately 31.6 percent of all receipts will be derived from the sales tax levy, as compared with 34.6 percent in 1957-58. A little more than 22 percent

will be returned by highway user taxes, down from 24.9 percent of the total in the last completed year. More than 23.5 percent will rest upon personal incomes, corporate profits, inheritances and gifts, up from 21.0 percent last year; and 7.9 percent will relate to such luxury items as alcoholic beverages, tobacco and horse racing, as compared with 4.3 percent in fiscal 1958.

Revenues from major sources during the three fiscal years covered by this budget are summarized in the following table.

Table 1
COMPARATIVE REVENUE
(Thousands of Dollars)

† Excluding revenue from this source for the General Fund.

NOTE: Amounts include estimated receipts under revenue recommendations of the Governor. For additional details see Schedules 2 and 3.

Revised Estimates

As a result of the sharp decline in economic activity last year, state revenue during 1957-58 fell below both the original estimate and the revisions made a year later. Against a projected total of \$1,828,988,000* prepared in the late months of 1956 and the revision to \$1,793,716,000 made in last year's budget, actual receipts amounted to \$1,750,929,000. Thus, in the aggregate the State's income was overstated by 4.4 percent in the first estimate and by 2.4 percent in the revisions made last year. So far as the General Fund is concerned, the original estimate exceeded actual receipts by 5.4 percent, while the revision was on the high side by 3.0 percent.

A similar situation exists with respect to revenues for 1958-59. The first estimate of state receipts during this year, made in the Fall of 1957, totalled \$1,860,-

* Approximately \$20,750,000 during 1959-60, due to the fact that the reduction would become effective January 1, 1960, and to the normal lag in collections.

* This and subsequent numbers have been rounded to the nearest thousand.

104,000; a comparable figure under the revised estimates, adjusted for the proposed change in insurance tax collections and oil bonus bids, is \$1,798,234,000, a reduction of \$61,870,000, or 3.3 percent, from the original estimate. Again, most of the change relates to the General Fund where tax receipts closely reflect business conditions. Compared with last year's estimate of \$1,183,488,000 for the General Fund in the current fiscal year, the revision presented herein (adjusted for the change in insurance tax collections) is \$1,141,059,000, a reduction of 3.6 percent.

ECONOMIC CONDITIONS

Within the short span of five quarters during 1957-58, this Nation experienced its most severe postwar recession. In contrast with the two preceding setbacks, the decline in gross national product was twice as deep and, when compared with 1953-54, took half as long to reach the recession trough. Four principal developments set the pattern for this recession: (1) a temporary overcapacity in industrial plant, (2) inventory excesses, (3) the role of government, and (4) the consumer's attitude toward spending. The first of these developments — overcapacity — stemmed from the very high levels of spending for plant and equipment during 1956 and 1957. The second—excessive inventories—became apparent in late 1957 after a decline in sales. The rapidity and magnitude of the inventory liquidation was the most significant development of the recession and accounted for more than half the decline in gross national product. At the same time, it set the stage for the rapid recovery in the latter half of 1958 as the need to replace stocks in the face of rising sales became apparent.

Government played an unusual role in this last recession. The announced cutback in military expenditures dampened the business outlook and may have precipitated the decline. However, the reductions proved to be minor and of short duration; subsequently, federal outlays started upward, providing a solid foundation to the economy. As in 1954, the consumer deserves the major credit for the shortness of the recession. After a brief and very slight reduction, personal consumption expenditures began to increase rapidly, providing the needed stimulus for recovery in the rest of the economy.

The upturn in economic activity which began in the last half of 1958 is expected to continue throughout the period covered by this budget. Three of the four factors mentioned above will contribute substantially to a new record in gross national product. Almost half the total increase will result from the anticipated improvement in the consumer sector of the economy. Expenditures for consumer durables, nondurables and services are all expected to contribute to this gain. Contrasted with the decline of almost \$3.5 billion in purchases of durable goods last year, largely as a result of the sharp drop in new car sales, an increase of that amount is anticipated for 1959. Sales of 5,750,000 motor vehicles (including foreign) are foreseen, as compared with 4,600,000 in 1958. The high level of housing starts in late 1958 and early 1959 will provide improvement in the market for furniture and household appliances.

Consumption of nondurable goods is expected to rise with the growth in population, and this movement will be compounded by a slight increase in prices and a gradual improvement in standard of living. Expenditures for personal services have traced an uptrend throughout the entire postwar period. Comprising such items as housing and household operations, medical care, transportation and education, these expenditures can also be expected to expand with the Nation's population growth and the improvement in living standards.

More liberal buying attitudes can be expected to reverse the recent trend in consumer credit. Contrasted with the curtailment in credit extensions and the repayment of installment obligations which characterized last year, 1959 is expected to show a more normal increase in credit sales and a rather sharp rise in the short-term obligations of consumers.

On the basis of these factors, personal consumption expenditures for the Nation as a whole are estimated to total \$306 billion in 1959, compared with an indicated \$290.7 billion in the preceding year.

Inventory liquidation, which accounted for more than half the decline in national production during 1958, will be reversed in 1959. The low level of in-

Table 2

* Spendable resources of California residents represents disposable income adjusted for estimated change in short-term consumer credit and estimated change in liquid asset holdings of individuals—e.g. money, bank accounts, savings bonds, etc. Amounts are estimated by the State Department of Finance for use in connection with the analysis and projection of sales tax revenue.

† Index for California has been computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as the weighted average of the Los Angeles and San Francisco indexes.

Source: National data for 1957 from reports of the Office of Business Economics, U. S. Department of Commerce; preliminary figures for 1958 based on Department of Commerce reports for the first three quarters with fourth quarter estimated by the State Department of Finance; estimates of national data for 1959, estimates of California's personal income, personal taxes, disposable income, etc. are based upon studies by the Financial and Population Research Section, Budget Division, State Department of Finance.

ventories now held by manufacturers and dealers is inadequate in the face of rising sales, and the need for additional stocks is an important element in the pattern of production foreseen for this year. Compared with a liquidation of \$5.7 billion during the last 12 months, it is probable that the future period will witness an inventory accumulation of approximately \$3 billion. Thus, inventories can be expected to swing from a strong negative element in 1958 to a strong positive factor this year, contributing \$8.7 billion to the net change in national output.

Expenditures for goods and services by all levels of government are expected to total \$98 billion in 1959, an increase of \$5.7 billion over last year. Outlays by the Federal Government, headed by those for national security, are expected to increase by \$2.3 billion. This rise is virtually assured by the budget approved last year, and it is not likely to be altered appreciably by any decisions on federal spending which may be made in the coming few months. Increased activity in missiles, inspired by the recent successes achieved by American scientists and the vital need to stay at least abreast of Russia, will cause a step-up in the Nation's defense program.

State and local governments comprise another segment of the national economy which has shown an uninterrupted rise in expenditures throughout the postwar period. With growing populations and great changes in the living habits of our citizens, these agencies have been hard pressed to meet the needs for schools and educational institutions, highways, hospitals, recreational centers and public facilities of all types. These needs will not diminish in the current year, and for this reason the basic assumptions which underlie the 1959-60 budget revenue estimates contemplate a further increase of \$3.4 billion in the aggregate outlays of state and local governments.

The current requirements of these three components of the national economy—consumers, governments, and business insofar as its inventories are concerned—account for more than 85 percent of the Nation's output of goods and services. They will determine the course of conditions this year, and under the assumptions here outlined can be expected to increase by approximately \$29.7 billion.

A fourth factor—industrial expenditure for plant and equipment—is unlikely to contribute appreciably to the economic advance. It is improbable that production will fully utilize the tremendous volume of facilities which have resulted from record business investment during recent years. However, this sector of the economy is not expected to show a weakness as it did in 1958 when expenditures declined more than \$6 billion. Obsolescence, product development, continuing search for more efficient production methods and the growth of new business centers will sustain expenditures at approximately the same level as last year.

Residential building, however, will provide a fairly firm economic push. Housing starts rose markedly during the closing months of last year, and continuation of work on these units will result in larger aggregate expenditures for home construction this year. However, some difficulty in arranging financing is expected later in the year, and residential building may taper off during the final months. It should be

emphasized that this sector is viewed as an element of qualified strength rather than weakness in the economic outlook for 1959.

In total, expenditures by consumers, business and government are expected to result in a record gross national product of \$468 billion, compared with an estimated \$436.5 billion last year and the previous high of \$440.3 billion established in 1957.

Recent improvements in productivity indicate that the \$468 billion production for the year can be accomplished with something less than full employment. Employment is expected to increase by some two million workers. However, due to additions to the labor force, the number of unemployed is expected to drop by only 900,000, leaving more than 3,500,000 persons without gainful employment. Allowing for an increase in wage rates and a longer workweek, wage and salary receipts have been estimated to exceed \$250 billion, compared with \$237 billion in 1958.

Other types of income can be expected to follow the upward course which has been so clearly evident during the last few years. An improvement in corporate earnings should provide the basis for larger dividend payments, a source of income which was sustained during the recession in spite of the weakness in profits. Interest income can be expected to rise as a result of the greater volume of savings and higher interest rates, while rental income of persons will also rise moderately. The only area of doubt relates to net farm income, which may decline in the current year, but at worst will be only slightly lower than during 1958.

Receipts from social insurance, sickness benefits, pensions and similar sources will continue to rise. Although a moderate decrease is anticipated in the aggregate amount of unemployment benefits, resulting from a drop in the number of unemployed, there will be a continued growth in such social programs as those relating to health and welfare and old age retirement.

In total, personal income is estimated at \$372 billion, or almost \$19 billion above the indicated total for last year. After deducting personal income taxes the remainder—disposable income—is estimated at \$326 billion, compared with \$310 billion in 1958. With personal expenditures estimated at \$306 billion, savings of \$20 billion will show no change from the amount set aside in 1958.

It is expected that the Federal Reserve Board will continue to keep a tight rein on the money market in its efforts to forestall inflation. In view of this policy and the need of the Federal Government to refinance a sizeable portion of its debt, interest rates are expected to continue in an upward trend during the year. Although demand for corporate funds may be somewhat less during 1959 and an increase in revenue will lessen the demand for new borrowings by the Federal Government, these will be offset by a rise in credit requirements to carry the increased volume of inventories and to finance a part of the expected upturn in consumer buying. The demand for mortgage money will show little change from the \$12 billion required in 1958.

Consumer prices are likely to be slightly higher during the year as increases in wage rates and raw materials prices more than offset gains in pro-

ductivity. Some declines in food prices are in store as a result of a high output of agricultural products, particularly livestock.

Corporate profits in 1959 are expected to exceed any previous year and more than recover the substantial losses of 1958 from 1957 levels. Increased productivity, which became apparent in the latter half of last year, is an important consideration in this profit outlook. This development will become particularly significant as rising sales volume gives business an even greater opportunity to realize the economies inherent in the plant modernization programs of the last two or three years. Durable goods industries, which suffered most during 1958, will make the largest recovery in corporate income.

CALIFORNIA SITUATION

California should share fully in the economic improvement predicted for 1959. Our rate of population growth is more than double that of the Nation, with the result that this State has a more rapidly expanding market for goods and services.

The upsurge in home building in 1958 seems to have been slower in getting underway in California than in the rest of the Country. However, by the closing months of the year, this State appeared to be participating fully in the burst of activity in the construction field. The residential outlook for 1959 is somewhat more favorable than that for the Nation, and outlays for plant and equipment should also be slightly better than anticipated nationally as more industries move closer to this expanding market.

Aircraft, missiles and electronics are of particular importance in the general economic outlook for California. Curtailed aircraft production touched off the recession for California and the emphasis upon missiles, with their accompanying complement of electronic equipment, was an important factor in the upward trend at the end of last year. This undoubtedly will continue throughout 1959. The State seems well established in the new and growing missiles and electronics fields, and the recent installation of testing and firing facilities by the Federal Government will give further impetus to this development.

Personal income of California residents is estimated to have totalled \$36,350,000,000 in 1958, an increase of \$1.2 billion, or 3.5 percent over 1957. The percentage gain in this State was more than twice that of the Nation, and California again increased her share of the national total. From 10.10 percent in 1957, the ratio rose to 10.29 percent last year. Income has been forecast at \$38,750,000,000 next year, or 10.42 percent of the personal income of the entire Country.

Disposable income in the State has been estimated at \$34,025,000,000 in 1959, compared to \$32.0 billion in 1958 and \$30.8 billion in 1957. The increased personal income tax liability under the proposed budget revenue program, while applicable to 1959 income, will not be due and payable until 1960. Savings have been rising since 1956 and a further gain has been anticipated for 1959; however, the savings rate expressed as a percentage of income will be somewhat smaller than was indicated for either 1957 or 1958. Consumer credit is expected to rise moderately after

an almost negligible gain recorded last year. These assumptions produce an estimate of \$32,635,000,000 for spendable resources of California residents in 1959, approximately \$2.2 billion higher than the past year. By way of comparison, the gain in 1958 over 1957 was a mere \$700 million. Corporate profits attributable to operations in California in 1958—taxable in 1959—were \$3.5 billion, based on reports submitted to the Franchise Tax Board by a selected sample of corporations. Earnings for 1959 have been projected at \$3.9 billion.

These estimates of income, spending and profits, with allowance for collections under the various audit programs conducted in connection with all tax levies, and miscellaneous receipts from the operations of state departments form the basis of the 1959-60 revenue forecasts presented in this budget.

GENERAL FUND REVENUE

As indicated above, approximately two-thirds of the aggregate state revenue will accrue to the General Fund. This includes receipts from such broad general levies as the sales tax, the imposts on personal incomes and corporate profits, the alcoholic beverage excises, the inheritance and gift taxes, and other collections. Under the Governor's proposals, two important levies are added to this list—a tobacco tax and a severance tax on petroleum and natural gas.

For the most part, these General Fund taxes are geared directly to business conditions in the State and Nation. The aggregate volume of trade, personal income, bank and corporation profits and other similar economic considerations determine the base for each of these levies. Hence, the estimate of revenue from each source flows directly from the economic assumptions explained in some detail in the foregoing material. The influence of these economic factors upon each of the several taxes and the methods used in preparing the budget revenue estimates are outlined below.

Sales Tax—\$667,000,000

Receipts from the 3 percent state sales tax are expected to reach a record \$667,000,000 during the 1959-60 Fiscal Year, a gain of \$38,000,000 over the estimate for the current period and \$61,762,000 above actual collections during 1957-58. A sharp resurgence in the motor vehicle market and a general increase in the volume of other taxable transactions are the principal factors in the anticipated increase in taxable sales for 1959.

In the final quarter of 1957 and throughout all of last year, the sales tax yield was considerably less than might have been expected from the record level of personal income received by Californians. However, most of the poor showing can be traced to the lower volume of taxable sales of contractors, manufacturers and wholesalers and to the depressed market for new motor vehicles. Other transactions—i.e. sales of consumer nondurables; taxable motor vehicle parts, equipment and supplies; and many of the consumer durable items—continued at about the level normally

associated with the large and growing volume of personal income.

As in the past, two methods have been used in preparing the estimate of taxable sales. The first is based upon the correlation between the aggregate spendable resources of Californians and total taxable sales. The second involves a detailed analysis of per capita sales in constant dollars and sales of specific types of commodities per \$100 of personal income. Although neither of these methods can be described in detail here, it may be noted that technical improvements have been made in both which should provide more reliable estimates.

In general, it is believed that sales of consumer nondurables will continue in close correlation with personal income, reflecting both population growth and slightly higher price levels. After a modest (3.7 percent) improvement last year, sales of these commodities are expected to increase 6.2 percent during 1959.

Sales of motor vehicles in California should recover much of the decline recorded in 1958, and although the projected total of new vehicles to be sold this year is short of the 1957 level, the increase in prices should raise the total dollar volume above that of two years ago.

Transactions by contractors and building material dealers are expected to reflect the effect of the record level of building starts recorded in the closing months of 1958. This carryover of building activity into 1959 should assure record expenditures in the current year. However, some leveling off and possibly a decline may be in evidence during the latter half of the year.

Taxable transactions of light manufacturing and wholesaling establishments should show a 5.5 percent gain, reflecting the increase in population, a slight rise in prices and a general quickening in the pace of business. Transactions involving heavy industries fell almost \$260 million in the past year, and only a small gain is anticipated for 1959. For the most part, these sales represent equipment items which will be relatively stable, reflecting the anticipated stability in capital expenditures by business and industry this year.

Total taxable sales for 1959 have been placed at \$21,350,000,000, or 8 percent higher than 1958 and 6.2 percent above 1957. A comparison in broad groups of sales anticipated for 1959 with apparent transactions for 1958 and actual amounts for 1957 is shown below.

Table 3
TAXABLE TRANSACTIONS IN CALIFORNIA
(Millions of dollars)

	1957 Actual	1958 Apparent	1959 Estimated	Percent change 1959 over 1958
Consumer nondurables	\$8,068	\$8,369	\$8,880	+6.2
Consumer durables	1,778	1,723	1,845	+7.1
Motor vehicle dealer sales	2,897	2,405	3,020	+25.6
Motor vehicle supplies and parts	1,123	1,154	1,235	+7.0
Building materials	2,172	2,253	2,370	+5.0
Producers' equipment and supplies:				
Light industries	1,923	1,986	2,095	+5.5
Heavy industries	2,135	1,877	1,905	+1.5
Totals	\$20,095	\$19,774	\$21,350	+8.0

Taxable transactions for the year were allocated by quarters assuming the seasonal pattern shown in pre-

ceding years with an adjustment for a rising price trend and the effects of an early Easter. To complete the estimate for the fiscal year, sales in the first two quarters of 1960 were projected at 6.5 percent higher than those in 1959. Receipts from the audit program and other miscellaneous assessments have been estimated approximately 10 percent higher than those of the past year.

Personal Income Tax—\$234,700,000

Personal income received in California is, of course, the source of revenue from this levy. Based upon data obtained from the United States Department of Commerce relating to personal income received by California residents in 1957, the Department of Finance prepared estimates for 1958, using employment and payroll data, farm income, payments of various welfare programs and national figures on dividends, interest and rents. California personal income for 1959 was projected on the basis of the economic outlook discussed earlier, and an increase in this State's share of the Nation's income. Estimates of personal income as reported for California for 1957 and as estimated by the Department of Finance for the two following years are shown in the table below.

Table 4
ESTIMATED PERSONAL INCOME
(Millions of dollars)

	1957	1958	1959
Wages and salaries	\$23,832	\$23,485	\$26,160
Proprietors' income	4,478	4,537	4,880
Property income *	4,667	4,757	5,000
Other income †	2,908	3,369	3,610
Less: Social insurance contributions	—753	—795	—900
Totals	\$35,131	\$36,350	\$38,750

* Dividends, interest and rents.

† Chiefly pensions, unemployment benefits, disability allowances and direct relief.

In general, wages and salaries accrue primarily to the lower and middle income groups, proprietors' income to the middle tax brackets and receipts from the ownership of property to the higher income groups. Because of the progressive rate structure, the type of income, as well as the aggregate amount received, is extremely important in estimating revenue from this tax. Analysis of income tax data reveals close relationships between the type of income and the resulting tax payments. Approximately 90 percent of the tax liability was estimated upon the basis of these relationships.

The remaining 10 percent is generated by two income sources having no counterpart in the personal income series. These are net capital gains and miscellaneous income. The tax on capital gains is generated, in great part, from profit taking on stock market activities, and to a lesser extent, on real estate transactions. The rapid rise in stock prices which occurred during 1958 should result in a substantial increase in tax receipts from this source over the previous income year—a period of declining prices and volume. Miscellaneous income is composed mostly of alimony payments and income from fiduciaries.

After adding collections resulting from the audit program of the Franchise Tax Board and converting calendar year data to fiscal years, the estimated amount to be received during the budget year totals \$234,700,000. Of this sum, \$60,700,000 will be gen-

erated by the revisions in the personal income tax law recommended by the Governor. Collections in the current year are estimated at \$157,600,000, while \$149,269,000 was received during 1957-58.

Bank and Corporation Tax—\$212,600,000

Revenue estimates from this source for the years under consideration are, for the greatest part, determined by corporate profits attributable to California operations during 1957, 1958, and 1959. The estimate of profits for 1958 was based upon data obtained from a representative sample consisting of 381 corporations encompassing 66 industry fields and accounting for over 45 percent of the total profits earned in this State. The survey indicated that profits declined in 40 industries, rose in 23 and were relatively stable in the remaining 3. However, because of the substantial gains scored by public utilities and banks, aggregate corporate profits in 1958 are expected to total \$3,514,250,000, down only 3.7 percent from the \$3,650,369,000 earned in 1957.

Table 5

CORPORATE PROFITS BY MAJOR INDUSTRY 1957 AND 1958

(Thousands of dollars)

	1957	1958	Percent change
General Corporations			
Agriculture	\$37,931	\$36,700	—3.2
Mining	18,000	15,800	—12.2
Construction	124,157	104,000	—16.2
Manufacturing	1,546,126	1,319,100	—14.7
Oil production	203,624	199,150	—2.2
Trade	495,076	455,000	—8.1
Services	156,533	158,000	0.9
Miscellaneous	2,250	2,000	—11.1
Totals	\$2,583,697	\$2,289,750	—11.4
Financials	585,389	660,000	12.7
Utilities	481,283	564,500	17.3
Grand Totals	\$3,650,369	\$3,514,250	—3.7

Although general corporations will be faced with a continued cost-price squeeze as labor and other production expenses rise, increased sales volume and greater productivity are expected to produce a substantial advance in net profits next year. In the recessions of 1949 and 1954 corporate profits in California did not decline as much as in the Nation, and in the recoveries which followed these recessions the percentage increase in profits was less in California. The same pattern appears to be emerging from the recent readjustment. The 3.7 percent decline in corporate profits from California operations last year compares with 15 percent for the Country as a whole. Anticipating the same pattern of recovery in 1959, earnings in this State are not expected to increase by as large a percentage as predicted for the Nation.

Corporate profits in California in 1959 are expected to total \$3,930,000,000, up almost 12 percent from 1958. This compares with an increase of approximately 25 percent forecast for the Nation. However, where corporate earnings in the United States will barely top 1957 levels, profits in California are expected to exceed 1957 by 8 percent. Most of this increase will accrue to the general corporations, particularly durable industries, as they recover from a depressed earning period. Public utilities are expected

to advance in relation to population requirements and the increased demands of business for their services.

Profits of banking institutions were at record levels in 1958 and this will be reflected in the bank tax payment due March 15, 1959. The second installment of this tax, due in January, 1960, is estimated at \$16,000,000, compared with the corresponding \$13,204,000 assessed in the current fiscal year. The estimate of bank profits in 1959 contemplates a moderate decline from last year's record level.

After converting calendar year data to fiscal years, the revenue from the bank and corporation tax for the budget period is estimated at \$212,600,000, compared with \$168,000,000 for the current year and \$173,599,000 received in 1957-58.* Included in the estimate for 1959-60 is \$33,600,000, resulting from the changes recommended in the Governor's tax program.

Insurance Gross Premiums Tax—\$60,600,000

Insurance premiums subject to the 2.35 percent gross premiums tax are continuing to expand in volume as more persons seek broader coverage and as the cost of satisfying claims rises. In preparing the estimate of revenue from this source 80 principal insurers were asked to submit estimates of the volume of premiums written by them during 1958 in all major lines. These estimates, when weighted and applied to total California premiums, indicate that 1958 business was 8.1 percent greater than 1957 business—\$2,647,000,000 compared with \$2,447,000,000.

Life and disability (health and accident) insurance premiums show expansion even greater than commensurate with population growth, doubtless reflecting the desire of the insured to provide greater security for beneficiaries in case of death and the increased costs of medical care in case of illness or injury. With a greater number of more costly automobiles on California's highways and large sums being awarded in settlement of bodily injury suits, auto insurance premiums show inevitable growth. The most significant relative increase appears in homeowners' multiple peril insurance—the newer, package-type coverage which draws from fire, inland marine and liability groups. Although still a fairly small part of total business, this line shows a rise of more than 25 percent over 1957. All major lines except title insurance—which apparently suffered from the home building slowdown—and inland marine insurance showed some increase.

The tax base as estimated, after deducting dividends to policyholders and local property taxes paid by insurers on their principal offices, will provide income to the State of \$55,600,000 on 1958 business. Under the Governor's revenue recommendations, this amount will be paid during the current fiscal year. In keeping with the long term upward trend in receipts from this source, it is estimated that the tax on 1959 premiums will amount to \$60,600,000. The budget revenue recommendations provide that this sum will be due in the 1959-60 Fiscal Year.

* The supplementary corporation income tax is combined with the bank and corporation tax for purposes of revenue estimating and reporting in this budget. The two levies are identical in essential features.

Tobacco Tax—\$60,000,000

A tobacco tax imposed at the rate of 3 cents per package of cigarettes and 15 percent of the wholesale price of other tobacco products has been recommended as part of the budget revenue program. The yield of this levy has been estimated at \$60,000,000 for 1959-60.

The estimate of revenue from cigarette consumption has been based upon the yields of cigarette taxes in other states, taking into consideration population, tax rates, personal income and other economic characteristics. The estimate of the tax yield on other tobacco products has been based upon data reported in connection with the federal tobacco tax, allocating a share of the total to this State on the basis of population and income. Since this is a new levy, allowance has been made for a floor tax on dealers' stocks as of July 1, 1959; for initial tax avoidance on the part of consumers through advance buying; and for the normal lag in collections, since only 11 months of revenue will be received during 1959-60.

Alcoholic Beverage Taxes—\$51,650,000

The \$1.50 per gallon tax on distilled spirits provides the major share of state income from alcoholic beverage taxes. Consumption of alcoholic beverages is closely related to both personal income and the number of adult residents of the State. California's population age 21 and over was estimated to be 9,132,000 at mid-1958; it should reach 9,379,000 this year and 9,643,000 in 1960. Although liquor consumption per adult appeared to drop somewhat during the recent recession, it has now resumed a gradual uptrend and is estimated to increase from 2.601 gallons last year to 2.628 in 1959 and 2.644 in 1960. With income, population, and per capita usage rising, total consumption has been projected at 24,650,000 gallons in 1959 and 25,500,000 gallons in 1960, compared with 23,600,000 gallons last year. On a fiscal year basis, consumption at these levels will yield \$36,300,000 in tax revenue during the current year and \$37,400,000 in 1959-60, compared to \$33,963,000 in 1957-58.

Of lesser fiscal importance and accounting for a much smaller part of total collections, is the 2 cents per gallon tax on beer. A slight upward trend has appeared in consumption per adult over the last five years. Assuming this uptrend will continue, the average number of gallons consumed is expected to advance from 22.78 in 1958 to 23.03 in 1959 and 23.23 in 1960. This would result in total consumption of 216 million gallons this year, increasing to 224 million gallons in 1960. Fiscal year tax revenue would amount to \$4,310,000 for the current year and \$13,580,000 for the budget year. Of the latter figure, it is estimated that \$9,200,000 will result from the recommended increase in the rate of tax from the present 2 cents to 7 cents per gallon.

Taxes on sweet, dry, and sparkling wines contribute a minor share of alcoholic beverage tax revenue. Consumption of sweet wine per adult has been following a long-term downtrend. Because of population growth, total consumption should rise from 17,000,000 gallons in 1958 to 17,300,000 gallons and 17,500,000 gallons in 1959 and 1960, respectively. After a sustained incline, per capita consumption of dry

wine appears to have leveled off; consequently, the rise forecast from 10,800,000 gallons in 1958 to 11,050,000 gallons in 1959 and 11,300,000 gallons in 1960 is related to population growth. Sparkling wine is becoming increasingly popular, and the greatest relative increase is projected for this type—from 645,000 gallons consumed last year to 689,000 gallons during 1959 and 723,000 gallons in 1960.

The table below sets forth the revenue expected from each source by fiscal years compared with actual collections during 1957-58.

Table 6
ALCOHOLIC BEVERAGE TAX YIELDS

		(Thousands of dollars)		
		1957-58 Actual	1958-59 Estimated	1959-60 Estimated
Distilled spirits	--	\$33,963	\$36,300	\$37,400
Beer			4,310	13,580
Sweet wine	}	4,595*	340	348
Dry wine			110	112
Sparkling wine			200	210
Totals	-----	\$38,558	\$41,260	\$51,650

* Cannot be distributed according to source due to audit adjustments and other factors.

Inheritance and Gift Tax—\$46,800,000

Revenue from the inheritance and gift tax is primarily dependent upon the number and size of bequests and upon the relationship of the recipient to the decedent or donor. In general, the rates of tax vary directly with the size of the inheritance or gift and with the remoteness of the relationship. Exemptions are reduced as the relationship recedes. General business conditions affect estate valuations and the resultant tax collections, but there is a lag between changes in property values and tax receipts.

Inheritance tax revenue of \$42,551,000 for 1957-58 was considerably larger than the general trend of collections from this source would have suggested, due to the settlement of one very large estate during that year. No such large settlement is foreseen in either the current year or the budget year, and receipts under the present law are therefore expected to follow the more usual pattern of growth, totalling \$40,000,000 in 1958-59, and \$42,000,000 in 1959-60. The budget revenue recommendations, involving elimination of the federal estate tax credit and increasing the rates on bequests to the more remote beneficiaries, will add \$2,000,000 to the latter figure.

As a result of collections on two unusually large gifts, revenue from the gift tax thus far in the current fiscal year is somewhat higher than might have been expected. Projections of income from this source for the remainder of this year and next year assume continuation of previously established trends, and collections on this basis will total \$3,000,000 in 1958-59 and \$2,800,000 in 1959-60. Comparable 1957-58 revenue was \$2,780,000. Increases in gift tax rates comparable to those recommended for the inheritance tax will result in a slight increase in receipts from this source.

Severance Tax—\$19,300,000

Another new levy recommended as part of the budget revenue program is a severance tax of 2 percent on the value of production of petroleum, natural

gas and natural gas liquids. Such a tax has been estimated to yield \$19.3 million in 1959-60.

The estimate has been based on anticipated production totaling \$1,160,000,000, of which petroleum will account for \$975 million, natural gas \$90 million and natural gas liquids \$95 million. Corresponding production for 1958 totaled \$1,075,000,000 and for 1957 amounted to \$1,252,000,000. This latter figure, however, was abnormally large because of the demands made upon California production during the Suez crisis. The estimate of receipts during 1959-60 has been adjusted to a 10-month basis in order to allow for the normal lag in collections.

Private Car Tax—\$1,875,000

Under this levy, railroad cars—typically refrigerator, tank, and sleeping cars—owned by companies other than railroads are taxed by the State rather than by various local governments. Assessed valuations are determined by the State Board of Equalization and the average statewide property tax rate during the preceding fiscal year is applied against the assessment roll.

Average car values have increased sharply during recent years primarily because of replacement and modernization programs. The average tax rate is rising also, and the combined effect of these two factors has been larger collections annually, despite a decline in the total number of cars involved. These trends are expected to continue, producing again a record volume of tax revenue—\$1,875,000—in 1959-60, compared with previous record collections of \$1,712,000 in the current year and \$1,590,000 in 1957-58.

Other General Fund Revenue—\$65,649,000

Revenues from other tax and nontax sources for the State General Fund during 1959-60 are estimated to total \$65,649,000. These comprise five general types of income: (1) a share of receipts from liquor, horse racing and motor vehicle license fees; (2) departmental collections, such as the per diem charges for care and treatment of pay-patients at state hospitals; (3) interest income; (4) a share of oil and mineral royalties; and (5) miscellaneous receipts, such as the proceeds from sale of property, a surcharge on fines for violation of traffic laws and other items of minor income. Principal changes anticipated in these accounts include: a further rise in departmental collections—traceable chiefly to an adjustment in pay-patients' board—a decline in interest earnings caused by the utilization of surplus and reserves; and a substantial increase in receipts from sale of surplus property largely as a result of discontinuing farm operations at Metropolitan and Stockton State hospitals and disposing of excess land at the Fairview Hospital.

SPECIAL FUND REVENUE

Provisions of the State Constitution, codes and statutes restrict the use of certain revenue to specified purposes, and under California's financial procedure these receipts are separately accounted in various special funds. In general, three categories of income are comprised in these special accounts:

(1) receipts from broad tax levies which are dedicated to specific functions; (2) charges for special services to specific groups; and (3) certain rentals, royalties and other receipts earmarked for particular purposes. Motor vehicle taxes and fees illustrate the first of these classes. License fees for the regulation of businesses and professions are typical of the second, while oil royalty revenue dedicated in part to beach and park development is an example of the third group. Interest earned by the investment of special fund money accrues to the fund for which the investments are held.

Motor vehicle taxes and fees account for roughly 85 percent of all special fund revenue, and under provisions of the Constitution and statutes these receipts must be used for highway purposes—including maintenance and construction of roads and streets, traffic control and motor vehicle regulation. Principal sources of this income are the levies upon motor vehicle fuel, registration and weight fees, transportation tax and the vehicle license fee levied in lieu of local taxes on this type of personal property. During the 1959-60 Fiscal Year, \$593,053,000 will be derived from motor vehicle taxes and approximately 40 percent of this revenue will be apportioned to local governments. In total, these levies are expected to increase \$32,097,000 over the anticipated level for the current year and to be \$49,906,000 above actual receipts in 1957-58.

Regulatory fees and charges for special services to industry, business and the professions constitute the second largest source of special fund revenue. Coupled with hunting and fishing licenses and horse racing fees, receipts from these sources will amount to more than \$59,842,000 in the coming fiscal year. Royalties from oil, gas and mineral production on publicly owned lands will provide an estimated \$29,028,000. Of this sum, \$26,269,000 will accrue to special funds and \$2,759,000 to the General Fund.

Motor Vehicle Fees—\$254,004,000

California will receive \$254,004,000 in special fund revenue from motor vehicle fees in fiscal 1959-60. A number of items contribute to this total, chief of which are: a registration fee paid by all vehicle owners; weight fees required on trucks, buses and trailers; and license fees levied in lieu of local property taxes on motor vehicles. Among the other sources of vehicle revenue are the fees required in connection with the transfer of ownership, testing fees, drivers' license fees and miscellaneous charges.

With a larger volume of motor vehicle sales and continued large-scale migration, fee-paid registrations are estimated to reach 8,360,000 by the close of 1960, compared with a projected 7,980,000 at the end of the current year and 7,650,000 on December 31, 1958. This growth in the number of registered vehicles will carry aggregate registration and weight fee collections from \$117,572,000 in 1957-58 to \$122,738,000 in the current period and \$129,179,000 in the budget year.

Market value, as well as number of units, must be taken into consideration when projecting revenue from the motor vehicle license fees. Value, in turn, depends upon the purchase price and the age of each

vehicle. With the anticipated resurgence in demand for domestic vehicles and slightly higher selling prices, revenue from this source should reach \$126,-960,000 in 1959-60, an increase of \$10,280,000 over 1958-59 and a substantial \$17,379,000 over 1957-58 receipts. Approximately \$2,135,000 of the total received from this source in 1959-60 will accrue to the General Fund and the remainder, after cost of administration, will be returned to local governments.

Comparative data on collections from principal fees during the three years covered by this budget are summarized below.

	(Millions of dollars)		
	1957-58 Actual	1958-59 Estimated	1959-60 Estimated
License (in lieu) fees-----	\$109.6 *	\$116.7 *	\$127.0 *
Registration and weight fees	108.0	112.8	118.1
Drivers' licenses -----	6.9	7.1	8.0
Other fees and charges ----	2.5	2.8	3.1
Totals -----	\$227.1	\$239.4	\$256.2

* Includes General Fund share.

Motor Vehicle Fuel Taxes—\$327,620,000

Two levies, a 6-cent tax on each gallon of gasoline and a 7-cent tax per gallon of diesel fuel, are expected to bring total motor vehicle fuel tax receipts to \$327,-620,000 during the 1959-60 Fiscal Year.* This represents a \$14,400,000 increase over the estimate for 1958-59 and a \$24,900,000 jump over actual 1957-58 receipts.

Aside from the tax rate, estimates of revenue from the gasoline tax rest primarily on two considerations: the number of vehicles in operation and average fuel consumption. At the close of the current calendar year there will be approximately 8,073,000 vehicles (fee-paid and exempt) on California highways.

Taxable fuel consumption is subject to many and varied considerations. On the one hand, multicar families, modernized highways with better traffic conditions, and an apparent trend toward the economy car will tend to depress average gasoline consumption per vehicle. Conversely, continued growth of the already impressive tourist trade, the trend toward suburban living, and greater personal income tend to increase fuel consumption. On this basis, net taxable gasoline consumption has been estimated at 635 gallons per vehicle, or more than 5.1 billion total gallons. Tax receipts have been estimated at \$307,-600,000 for the budget year, compared with \$294,800,-000 and \$285,355,000 for 1958-59 and 1957-58, respectively.

The use fuel tax estimate hinges primarily on economic assumptions. There is every indication that the volume of heavy trucking will increase this year, and with recovery accelerating into 1960, this trend should continue. Diesel tax receipts totaling \$20,000,000 have been estimated for the budget year, compared with \$18,400,000 currently and \$17,297,000 actually received in 1957-58.

* Based upon continuation of present fuel tax rates.

Receipts from the two levies during the fiscal years covered by this budget are:

	(Millions of dollars)		
	1957-58 Actual	1958-59 Estimated	1959-60 Estimated
Motor vehicle (gasoline) fuel---	\$285.4	\$294.8	\$307.6
Use (diesel) fuel-----	17.3	18.4	20.0
Totals -----	\$302.7	\$313.2	\$327.6

Motor Vehicle Transportation Tax—\$11,430,000

Effective January 1, 1958, the motor vehicle transportation tax rate was reduced from 3 percent to 1.5 percent, and the weight fee offset was repealed. Other recent changes in the law reduced the tax base, with the result that collections currently are only about two-thirds the volume of a few years ago.

Collections have also been affected by the "piggy-back" operations of California railroads. By maximum use of flat cars on long overland routes, transportation companies are in a position to minimize the use of highways and thereby reduce their motor vehicle transportation tax liability. Because of the reduction in tax rate, the more limited application of this levy and the utilization of rail facilities in certain truck operations, receipts from this source are estimated to reach a low of \$10,530,000 in the current year, compared with \$15,609,000 in 1957-58. The business recovery is expected to bring revenue to \$11,430,000 in the budget year.

Horse Racing Revenue—\$42,095,000

In general the trend of wagering on horse races at California tracks has paralleled the growth in disposable income of California residents. This basic factor underlies the detailed estimates of the parimutuel betting pools at each of the racing meets to be held in California. The estimated total of parimutuel betting in 1959-60 reflects an increase in the number of racing days at Hollywood Park. The operation of this track overlaps two fiscal years, and with an earlier meet scheduled for 1960, more days will fall into the 1959-60 fiscal period. Wagering at all tracks is expected to reach \$515,000,000 during the budget year, as compared with \$473,000,000 in the current fiscal period and \$453,000,000 during 1957-58.

Under present law, the gross commission on all track betting is 13 percent. A part of this gross "take-out" is retained by the track and a part is taken by the State as license fee for the privilege of conducting the meet. In addition, the State receives breakage on pools above \$27,000,000 and proceeds from unclaimed parimutuel tickets plus miscellaneous licenses and fines.

The Governor's revenue recommendations will raise the gross commissions to 15 percent, decrease the track's share of commissions on handles over \$50,000,000 and reduce the portion of breakage retained by track operators. The additional \$12,400,000 produced by these changes will be remitted to the General Fund. Receipts estimated under the existing tax and proposed changes are shown in the table below together with comparisons for preceding years.

(Thousands of dollars)

	1957-58 Actual	1958-59 Estimated	1959-60 Estimated (present law)	1959-60 Estimated (proposed law)
General Fund -----	\$5,463	\$5,628	\$6,430	\$18,830
Fair and Exposition Fund -----	18,159	18,985	20,685	20,685
State College Fund----	1,576	1,570	1,830	1,830
Wildlife Restoration Fund -----	750	750	750	750
Totals -----	\$25,948	\$26,933	\$29,695	\$42,095

Alcoholic Beverage License Fees—\$12,030,000

Little change in alcoholic beverage license fee collections can be expected for the years under consideration if existing laws and present policies of the Department of Alcoholic Beverage Control remain in effect. Annual renewal of a fairly static number of licenses and issuance of new licenses at the same rate as in recent months would result in revenue totaling \$11,955,000 for 1958-59 and \$12,030,000 for 1959-60. The General Fund share of the latter total will be \$2,430,000, substantially unchanged from the two previous years. The remaining receipts are distributed to the cities and counties.

Other Special Fund Revenue—\$63,032,000

Departmental receipts, rentals and royalties, and interest on investments for special funds are estimated at \$63,032,000 during 1959-60. This is substantially below the current year total of \$120,940,000, but the difference is due almost entirely to the \$55,556,000 received in connection with bids for the privilege of drilling for oil in offshore areas. Departmental

income from licenses, service charges and other items is expected to increase moderately during the coming year, reflecting in general the growth of California businesses and professions. Interest earnings will decrease from the current year's total due to the declining balances in the investment fund and other special accounts.

The following table provides a summary of tax collections during the 24 years since the last major revision in California's revenue structure. These data again illustrate the close relationship between aggregate personal income of California residents and receipts from tax levies. With an eight-fold increase in total income since 1936, there has been an eight-fold gain in tax revenue. The ratio of taxes to income was virtually unchanged last year from that of 20 years earlier—\$4.67 per \$100 of personal income last year, compared with \$4.68 per \$100 in 1937-38. The estimated ratio in the current year, \$4.81 per \$100, is almost identical with that of 1940-41.

Revenue increases recommended to balance expenditure requirements in the budget year will raise the tax ratio approximately 36 cents per \$100 of aggregate personal income—from this year's estimated \$4.81 to \$5.17 projected for 1959-60. General Fund levies, which at an estimated rate of \$3.56 per \$100 of income will exceed the current year estimate by 38 cents, but will be only 21 cents above the previous high of \$3.35 recorded in 1940-41.

Comparative yields of State tax levies during the 15 postwar years, including the estimates for 1959-60, are also shown in the accompanying table, and a summary outline of the present tax system is provided for convenient reference.

Table 7

¹ Includes the corporation income tax and includes amounts credited to the postwar employment reserve in 1945-46.

² Includes the motor vehicle (gasoline) fuel tax, use (diesel) fuel tax, and brokers and producers fees.

³ Includes registration and weight fees, motor vehicle license fee (in lieu tax) and other fees. Part of the revenue from the motor vehicle license fee is credited to the General Fund.

⁴ Motor vehicle transportation tax and permit fees. All revenue from this source accrued to the General Fund in 1945-46 and 1946-47 and the early months of 1947-48.

⁵ Includes General Fund share of revenue from horse racing and liquor license fees.

* Estimated. Amounts shown for 1959-60 include recommended new or additional taxes. The proposed tobacco tax, estimated to produce \$60,000,000, and the recommended severance tax, estimated at \$19,300,000, are not shown in this table.

† Adjusted for recommended change in due date of the insurance tax from August 10 to April 1 for general insurers and May 1 for ocean marine.

NOTE: Receipts from the retail sales and use taxes, the bank and corporation tax, and the personal income tax were affected by the temporary tax reduction program during the period from 1943 through 1949. Rate changes also affected collections under the insurance, distilled spirits, private car, motor vehicle fuel, use fuel and motor vehicle transportation taxes, motor vehicle fees and liquor license fees during the period shown above.

Retail Sales and Use (16)	Gross receipts from sales of taxable items	3%	2½%	2½%	3%	3%	3%

- (1) Dry wine 1 cent (2 cents 1933-37) and sweet wine 2 cents per gallon; champagne, sparkling wine, etc., 24 cents per gallon 1935-1955 and 30 cents per gallon thereafter.
- (2) Distilled spirits excise increased to \$1.50 per gallon effective July 1, 1955. Liquor in excess of proof strength taxed at double the rates shown.
- (3) A 15 percent credit against the tax was allowed in the years 1944-1949, inclusive, making the effective rate 3.4% in these years.
- (4) Rate is computed for each year, based upon the ratio of State corporation income tax and personal property taxes paid by general corporations, other than public utilities, to the taxable income of such corporations, but cannot exceed the rates shown above. A 15 percent credit was allowed during 1944-49, inclusive, making the effective maximum rate 6.8 percent in these years.
- (5) Enacted in 1939.
- (6) From 1933 to 1941 the horse racing parimutuel license fee was 4 percent of the parimutuel pool; in 1941 legislation was adopted specifying a rate of 4 percent of the first \$10,000,000 handled in a parimutuel pool, 5 percent of the next \$10,000,000, and 6 percent of the pool over \$20,000,000.
- (7) Beginning in 1943 the insurance tax rate was reduced .05 percentage points each year until the present 2.35 percent rate was reached in 1947. Concurrently the deduction for real estate taxes paid by the insurer on property other than the principal office in this State was gradually eliminated.
- (8) Motor vehicle license fee (in lieu tax) was increased from 1.75 percent of the market value to 2 percent of a specified depreciated value depending on age of the vehicle, effective January 1, 1949.
- (9) Gasoline tax increased to 4.5 cents per gallon effective July 1, 1947 and to 6 cents per gallon effective July 1, 1953.
- (10) Enacted in 1937. Diesel fuel tax increased to 4.5 cents per gallon effective July 1, 1947 and to 7 cents per gallon effective July 1, 1953.
- (11) Motor vehicle registration fee increased to \$6 effective January 1, 1948 and to \$8 effective upon the first registration or reregistration after June 30, 1953.
- (12) Various, depending upon unladen weight and number of axles.
- (13) Motor vehicle transportation tax was amended in 1947 to allow a credit against tax in the amount of one-third of the motor vehicle weight fees paid by each taxpayer. This had the effect of a tax rate reduction, although the rate remained at 3 percent. Chapter 1067, Statutes of 1957 reduced the transportation tax rate to 1.5 percent and eliminated the weight fee credit effective January 1, 1958.
- (14) Personal income tax exemptions were increased from \$1,000 (single) and \$2,500 (married or head of family) to \$2,000 and \$3,500, respectively, effective January 1, 1944 and to \$3,000 and \$4,500 effective January 1, 1946. The exemptions returned to \$2,000 and \$3,500 on January 1, 1950. The maximum rate was reduced from 15 percent on taxable income over \$250,000 to 6 percent over \$30,000, effective January 1, 1944. Between that date and January 1, 1950, the 1 percent rate applied to the first \$10,000 of taxable income, rather than the first \$5,000 as originally enacted in 1935. On January 1, 1950, the 1 percent tax again became applicable to the first \$5,000 and the 6 percent rate was levied on all taxable income over \$25,000.
- (15) Private car tax was enacted in 1937. The rate is computed annually at the average property tax rate in the State during the next preceding year.
- (16) Retail sales tax rate was originally 2.5 percent and applied to sale of foodstuffs as well as other tangible personal property. In 1935, food items (except restaurant meals) were exempted from tax, the use tax was enacted, and the rate was increased to 3 percent. As part of a wartime tax reduction program the rate was reduced to 2.5 percent on July 1, 1943. It returned to 3 percent on July 1, 1949.

Analysis of Expenditure Recommendations

Rapid and sustained population growth continues to be the chief determinant of State budgetary needs. It is reflected in the expenditure requirements for support of public schools and centers of higher education. It compounds the normal problems of highway construction and re-emphasizes the urgency of action in the conservation and development of natural resources. Generating the demand for a greater volume of service in all fields of governmental action, growth at the same time raises the new problems which inevitably accompany a concentration of population. All of these considerations have been recognized in developing the service program of State government and in translating these services into expenditure recommendations for the ensuing fiscal year.

This budget provides for an expenditure program totalling \$2,188,377,635 during 1959-60, an increase of \$133,416,514 over the comparable figure for the current year. Approximately 55 percent of all proposed payments represents State assistance to local governments, chiefly school districts but including also cities, counties and other agencies. At \$1,204,832,000,* the local assistance segment of the expenditure program shows an increase of \$90,513,000 over the estimated requirements in the current fiscal year.

Thirty percent of all budgeted expenditures relates to the operation of State agencies, including centers of higher education, mental hospitals and correctional institutions as well as the various departments, boards, offices and commissions. Aggregating \$656,926,000, the expenses of State operations show an increase of

* This and subsequent expenditure figures have been rounded to the nearest thousand dollars.

\$60,605,000 over the estimated needs for the current operating period. Nearly half of this amount is traceable to the 5 percent salary adjustment recommended for State employees.

Almost 15 percent of the expenditure total represents proposed improvements to the State's physical plant—highways, buildings, parks, beaches and other facilities. These capital outlay items amount to \$326,620,000, of which \$218,266,000 is for highways. This section of the State's budget program shows a decline of \$17,702,000 from the current year's total, due chiefly to a decrease in available highway funds. A substantial part of the present highway construction program is being financed from balances accumulated in earlier years.

A summary of expenditures in the three fiscal years covered by this budget is given in the following data:

	(Millions of dollars)			Percent Of total* Change†	
	1957-58 Actual	1958-59 Estimated	1959-60 Proposed		
State operations -----	\$541.5	\$596.3	\$656.9	30.0	10.2
Capital outlay -----	354.8	344.3	326.6	14.9	-5.1
Local assistance -----	995.2	1,114.3	1,204.8	55.1	8.1
Totals -----	\$1,891.4	\$2,055.0	\$2,188.4	100.0	6.5

* Percent of total in 1959-60.

† Change 1959-60 from 1958-59.

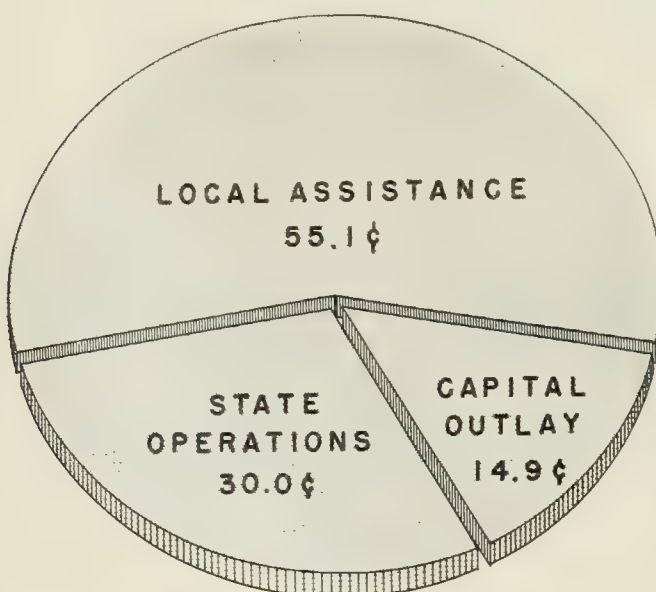

In addition, the sum of \$66,231,000 is programmed for capital outlay from the proceeds of the construction bond issues authorized by the people of California at the 1956 and 1958 general elections. In accordance with governmental accounting practices, disbursements from this source are excluded from current expenditure totals and are reported as expenditures at the time payments for interest and redemption are made. However, the amounts involved in each project are reported in the capital outlay section of the budget so that the entire financial program of the State will be available to the Legislature and the public.

Principal Activities

Historically, expenditures for education have been the principal item in the budgets of this State, and this is again true for the 1959-60 Fiscal Year. Payments to local governments for support of the public school system, coupled with the amounts required for the University of California, the state colleges and related educational items total \$887,589,000, or 40.6 percent of each total expenditure dollar, and 62.1 percent of each General Fund dollar. Compared with the current year, payments for educational purposes will increase \$87,518,000, or 10.9 percent. Almost two-thirds of the increase in aggregate expenditures required for next year relate to education.

Second in fiscal importance are expenditures for highways, roads, streets and the regulation of motor vehicles. A total of \$478,509,000 is budgeted for these items in the coming year—21.9 percent of all expenditures. Payments from State funds for highways and

Chart 6
EXPENDITURE DOLLAR, 1959-60

related activities will decline moderately during the coming year, but Federal money available for State highways will increase by approximately \$100,000,000 as a result of a revision in the basis of Federal aid payments.

Third in order of size are expenditures for social welfare, public health and related activities. In total, these are budgeted at \$245,989,000, accounting for 11.2 percent of the aggregate program. Below these are expenditures for mental hygiene and corrections (\$178,113,000, or 8.1 percent of the total); conservation and development of natural resources (\$170,792,000, or 7.8 percent); fiscal affairs and general administration (\$36,664,000, or 1.7 percent) and all other expenditures (\$191,221,000, or 8.7 percent).

A summary of expenditures by principal functions of government is given in the following table. These data show both the comparative fiscal importance of each function and the relative change from the current, 1958-59 Fiscal Year. (See also Charts 4 and 5.)

Table 10
Expenditures by Functions
(Millions of dollars)

	1957-58 actual	Estimated 1958-59	Proposed 1959-60	Percent of total 1959-60	Change from 1958-59		
					Amount	Per- cent	Per- cent of total
Education	\$773.4	\$800.1	\$887.6	40.6	\$87.5	10.9	65.6
Highways and vehicle regulation	424.9	481.9	478.5	21.9	-3.4	-0.7	-2.5
Welfare, health and related activities	217.5	242.1	246.0	11.2	3.9	1.6	2.9
Mental hygiene and corrections	155.4	166.2	178.1	8.1	11.9	7.2	8.9
Conservation and development of natural resources	120.0	138.6	170.3	7.8	31.7	22.9	23.8
Fiscal affairs and general admin- istration	36.2	40.4	36.7	1.7	-3.7	-0.9	-2.8
Other expenditures	164.0	185.7	191.2	8.7	5.5	3.0	4.1
Totals	\$1,891.4	\$2,055.0	\$2,188.4	100.0	\$133.4	6.5	100.0

In order to show as accurately as possible the total to be spent for each function of government, the cost of the recommended salary adjustment has been distributed to the various functions in the data presented in the above table and in this statement. Throughout the remainder of the budget document, this amount is treated as a lump sum.

Of comparable significance is recognition of the fact that savings will be realized in the appropriations recommended in this budget. An appropriation is an authorization to spend public moneys; no obligations can be incurred legally which are in excess of the amount of the appropriation. Experience has demonstrated that in a program of the magnitude contained in the State budget, savings can be realized by careful fiscal management and control. On this basis \$12,-000,000 has been deducted from the total General Fund expenditures recommended for the 1959-60 Fiscal Year and the revised estimated total expenditures from the General Fund for the current year have been adjusted by \$5,000,000. Amounts shown in this statement for State operations have been adjusted by a proration of these estimated savings among the various expenditure totals.

Education—\$887,589,000

The largest single expenditure of the State of California continues to be in the field of educational activities. In the 1959-60 fiscal period a total of \$887,-589,000 in State funds will be expended on this important activity. The education program of California encompasses all levels and all fields. The State participates in educational programs from support of preschool child care centers to the large instructional and research institution, the University of California.

Local Assistance

Without action at the 1959 Session of the Legislature, either to maintain or increase the current level of public school support, apportionments for this purpose will be reduced automatically to the constitutional level of \$180 per pupil in average daily attendance. The 1957 legislation which raised school apportionments to the present \$193.37 contained a two-year limitation which expires June 30, 1959. The program contained in this budget recognizes the needs of the public school system, as hard pressed by rising costs as any other governmental unit. A 5 percent increase is recommended for those districts now receiving equalization aid. In order to assure that State funds are used in those areas where they are most needed, this 5 percent increase has not been extended to those districts which now qualify for basic aid only. As a further means of directing State support to the most essential functions of the public school system, amounts provided for adult education have been reduced by 25 percent.

State support of classes for physically handicapped, mentally retarded, and severely mentally retarded is increased to cover the average excess costs of these programs. Apportionments for growth have been reduced to actual needs, as present amounts are greater than the pattern of growth currently being experienced by the public school system. A more detailed explanation of recommended changes in public school support is given in Part III of the budget.

The magnitude of this program is illustrated by the fact that \$635,619,000 will be required for the support of the public school system, an increase of \$60,682,000 over expenditures in the 1958-59 period. This can be accounted for principally by our continually increasing school-age population and price increases. School population continues to grow at the rate of approximately 200,000 pupils a year.

These increases in school-age population also affect other budgetary aspects of the educational program. Expenditures for free textbooks reflect increasing population, the adoption of new texts, and printing of a two-year supply of books to permit future savings of \$300,000 annually in printing costs. The publishing and distribution program for 1959-60 totals \$10,383,-000, or more than \$5,057,000 higher than 1957-58 and \$1,333,000 higher than 1958-59.

Another significant expenditure for local government is the State's contribution for teachers' retirement, which will increase \$25,798,000 in 1959-60 to a total of \$40,254,000. Approximately \$20,000,000 of the increase required next year is caused by the depletion of reserves used in the two previous years

for this purpose. Due to the liberalization of benefits, a greater number of teachers are currently retiring. As the State finances all expenditures not funded by the contributions of employing agencies and members of the system, approximately 57 percent of the total benefits paid during 1959-60 will have to be met from General Fund sources.

University of California

Total enrollments at the University of California are projected at 45,000 students for the 1959-60 Fiscal Year, an increase of 5.7 percent over the current year. Thus, the attendance at the University is continuing in the strong upward trend which is expected to show a doubling in enrollment within the course of the next 10 years.

Certain significant adjustments have been made in the budget for the University. One of the most important is that the University Extension Division is projected as a self-supporting service. The State assistance for this purpose which has been approximately 18 percent of total costs is discontinued in 1959-60. Other changes include a proposed increase of nonresident student fees to the legal maximum of \$500 per year so as to recover a greater portion of the costs of education furnished by the State of California.

Historically, the University spends from State funds somewhat less than is appropriated to it each year. Whereas, in the past, these savings have been carried forward for use in a subsequent year, it is now proposed to reduce the appropriation for 1959-60 by \$4,725,000, the sum of the estimated savings in the current and budget year. Notwithstanding these adjustments, the appropriation for support of the University is \$100,392,000, an increase of \$4,750,000 over the estimated expense of the current year. It must be emphasized that the appropriation presented herewith fully recognizes the University's growth and does not disturb the basic program which has received worldwide recognition in both research and instructional activities. The capital outlay program totaling \$24,327,000 also reflects the growth of the University and is designed to meet the population needs in the 1961-62 school year. Of this amount, \$5,519,000 will come from current revenue, \$17,308,000 from bond funds, and the balance from other resources available to the University.

State Colleges

The California State Colleges, once almost exclusively devoted to teacher training, have developed into diversified institutions providing liberal arts, pre-professional, and vocational curricula. In recent years, there has been greater emphasis upon post-graduate instruction, including science and engineering. A total of 66,570 students is expected to attend the State colleges during 1959-60, an increase of 12.8 percent over the current year.

Several significant changes in budget policy have been made for the State colleges. Among these is an increase in student fees to cover the costs of non-instructional activities at the colleges, such as health services, placement, counseling, and student activities. The fee proposed for California students is \$65, increased from the \$42 presently charged. In addition,

the fee for out-of-state students will be increased from the present \$180 to \$250 per year as a means of recovering a greater share of increasing educational costs. The latter change reflects the expressed policy of the State Board of Education and is consistent with fees charged in comparable institutions elsewhere. Opening of newly established colleges in Alameda and Orange Counties has been rescheduled. Because of this factor, minimum staffing for planning purposes only is provided in 1959-60. Funds are available in the current budget for the initial site development of these areas and the preparation of plans for construction.

Off-campus centers operated in Santa Ana, Santa Rosa, and Bakersfield will continue to perform their function of preparing persons for a teaching career, as well as affording teachers in these localities an opportunity to continue their professional education. One new off-campus center is proposed for the Imperial Valley to be operated by San Diego State College.

Undoubtedly the growth of State colleges represents one of the most pressing problems confronting State Government. Attendance at these institutions is expected to be nearly three times the present number during the course of the next decade. Accordingly, provision is made in this budget to meet the enrollment needs of 1961-62. Total capital outlay expenditures will amount to \$31,401,000, of which \$4,495,000 will represent appropriations from current State revenue, and \$26,906,000 will come from bond funds.

Other Educational Expenditures

Maintenance and operation of the six special schools and training facilities for the physically handicapped, together with the operation of three manufacturing centers for the blind, will require expenditures totaling \$4,973,000. This represents an increase of \$275,000 from the current year levels, chiefly due to the proposed salary adjustment for State employees. Other educational expenses totaling \$8,624,000 are to be

found in the proposed budget of the Department of Education and the State Scholarship Commission. The Department of Education has broad supervisory responsibilities for public schools and the State colleges. It operates the vocational rehabilitation program designed to assist physically handicapped persons toward a maximum degree of self support. Maintenance of the State library also falls within the jurisdiction of this Department. The Scholarship Commission has general administration of 2,560 scholarship awards involving tuition payments totaling \$1,225,000.

Highways, Streets, and Motor

Vehicle Regulations—\$478,509,000

Brought together under this functional classification are the recommended expenditures for motor vehicle registration and licensing of drivers, traffic law enforcement, and the construction and maintenance of highways, roads and streets.

For the fiscal year ending June 30, 1960, the sum of \$478,509,000 is budgeted for these activities. This represents a decrease of \$3,368,000, or 0.7 percent from the \$481,876,000 estimated as the cost of these programs for the current fiscal year.

The budget provides approximately \$221,471,000 for state highway construction purposes, including rights-of-way, based on the assumption that the Legislature will continue highway user taxes at present levels rather than permitting some to drop back on January 1, 1960. Under the present law, the gasoline tax will change from 6 cents per gallon to 5½ cents on that date with corresponding adjustments in other levies.

This program will permit the State to undertake 196 projects involving 685 miles of new or improved highways in addition to the maintenance and minor improvement of the 14,000 miles in the State Highway System. Although federal funds are excluded from the budget totals, it will be noted that the apportionment of federal aid for the interstate highway system is now on the basis of each state's actual needs instead of on the previous area-population-post road mileage formula. This change in method of apportionment increased the amount received by California from this source from less than 6 percent of the national total to about 10 percent. The principal effect of this revision will be felt in the budget year.

Among the major items included in the local assistance section of the budget for this general area of responsibility are: \$81,799,000 to counties for road purposes, and \$4,273,000 for use in matching federal funds; \$33,033,000 to cities for major streets other than state highways, and \$5,000,000 for matching city and county funds for elimination of railroad grade crossings on local streets and roads.

The anticipated 8,253,000 registered vehicles and 8,237,000 licensed drivers illustrates the continuing problem faced by both the Department of Motor Vehicles and the Highway Patrol. Nearly 2,200 persons died as a result of traffic accidents on the highways of the unincorporated areas of the State during 1958. As high as this number is, it represents a substantial reduction from the record of 2,481 in 1956.

While this is an improvement, particularly when viewed in the light of a half-million increase in vehicle registrations, it must not obscure the urgent need for action to reduce death and injury rates through vigorous traffic enforcement and operator licensing procedures designed to prevent the operation of motor vehicles by unsafe drivers.

To continue the attack on the problem of traffic accidents, the proposed budget for the Department of Motor Vehicles includes an additional 29 positions to expand the driver improvement program. An additional 50 driver license examiners are proposed as the third increment of a 4-year program to increase the time available for the vision and actual driving test portions of the driver's license examination.

To maintain intensive traffic enforcement on rural highways, the budget of the Highway Patrol provides 119 more uniformed personnel in the 1959-60 Fiscal Year. This increase in strength will continue the existing ratio of one traffic officer for each 3,533 registered vehicles.

Social Welfare, Health, and Related Activities—\$245,989,000

State activities concerned with general well-being of the people of California have been included in this category. This grouping embraces expenditures for old age security and other public assistance, health services and aid for local hospitals, industrial relations, and veterans' benefits. A number of these functions are financed jointly by the federal, state, and local governments. The \$245,989,000 included in this budget represents the State's share only.

Also falling within this category are the unemployment insurance, disability insurance, and job placement activities of the Department of Employment, and the operation of the Compensation Insurance Fund. Payments for these purposes are made from federal or trust funds, hence the amounts are not included in the budget totals. However, the details of such programs are reported in the Appendix of this document.

Establishment of a new Fair Employment Practices Commission at a cost of \$240,000 is proposed to combat discriminatory hiring in business and industry and to assure equal job opportunities for all.

Expenditures for support of the Department of Public Health will amount to \$7,498,000 in 1959-60. A new program of surveillance of potential radiation hazards to minimize human exposure and an expansion of the present air pollution monitoring system are included in the above total.

Subventions for public health in 1959-60 will total \$22,542,000, a decrease of \$588,000 from the current year. An increase of \$1,157,000 in the program for care and treatment of crippled children is caused by growth in the number of cases handled and increased cost of care. Population growth is also reflected in larger State payments for support of local health departments. Expenditures for tuberculosis control during 1959-60 continue the same level of assistance as in the past. The decrease of \$1,166,000 over the current year for this program is caused by awards to Los Angeles and San Diego Counties under a Supreme Court decision. Subventions for mosquito and gnat control are reduced \$438,000 in 1959-60. For reasons of equity, this assistance program is provided in an amount sufficient to permit State payments only to those districts having a tax rate for this purpose in excess of 40 cents. County boards of supervisors have the authority to levy taxes up to this level. State support for local hospital construction is provided on a basis of matching federal and local funds. This program anticipates approximately the same level of activity as the current year.

Payments to local governments for old age security, assistance to the blind, aid to needy children, and other welfare activities will total \$194,734,000, an increase of \$4,037,000. This change is traceable to

three factors: (1) the medical care features added to existing assistance programs in 1957; (2) the plan for aid to needy disabled adopted two years ago; and (3) normal growth, compounded by the recent recession, which is certain to affect the need for aid to children. Benefits to the needy disabled are estimated at \$2,372,000 during this, the second year of the program, and \$5,044,000 in the 1959-60 Fiscal Year. Expansion of the program for aid to needy disabled to include assistance for medical care is recommended, and \$515,000 is included in the budget.

Mental Hygiene and Corrections—\$178,113,000

While differing in many ways, the mental hygiene and correctional programs of the State are aimed at a common goal—the return of persons committed to the care of the State to useful roles in society. The treatment and rehabilitation programs conducted by the agencies in this field are designed to alleviate the conditions which produce mental illness and crime and to assist their patients and inmates in making the transfer from institutional to normal life successfully.

MENTAL HYGIENE

The State, acting through the Department of Mental Hygiene will be responsible for the care and treatment of an estimated 48,200 patients in 14 hospitals during the coming fiscal year. In addition to this care and treatment, the attack on mental illness is being pressed on other basic fronts: training, research, and the development of facilities for the treatment of the less severe mental and emotional problems at the community level. In the past, the greater part of increases in expenditures in the field of mental health, other than those necessary to merely keep pace with the State's population growth, has of necessity gone into improving the hospital treatment program. Beginning in the 1957-58 Fiscal Year, the State expanded its efforts on this problem to include research, training and development of community mental hygiene resources. In the 1959-60 Fiscal Year, these three areas are again emphasized. In addition, an increase in certain professional, technical, and nursing staffs and additional funds for tranquilizing drugs are recommended to permit a moderate improvement in the level of treatment.

It is anticipated that the new wing of the Langley Porter Neuropsychiatric Institute in San Francisco will be in full operation throughout the 1959-60 Fiscal Year. The Neuropsychiatric Institute at the University of California at Los Angeles beginning operation approximately midway through the budget period. These institutes are primarily teaching and research centers, with but limited provision for the care and treatment of patients with early curable types of mental disorders.

The Department's continuous research program is developing rapidly. The state allocation is used to finance the activities of research teams now being formed and research projects carried out by staff personnel to provide a well-balanced program. The in-service training program has also progressed rapidly during the current year. Additional funds in the 1959-60 Fiscal Year will permit placing greater emphasis on in-service training of the professional staff in psychiatric techniques.

Grand Totals -----	\$217,472	\$242,096	\$245,989	\$3,893	1.6

The development of community facilities for the treatment of mental illness is increasing. The state's share under the Short-Doyle Act is \$1,230,000 in the current year, increasing to \$3,024,700 in 1959-60 to match the city and county funds for the establishment of community facilities. In addition to these, six regional outpatient clinics are under the department's supervision.

Proposed expenditures of the Department of Mental Hygiene for the administration and operation of the 14 state hospitals, maintenance of clinics, and the two institutes during 1959-60 total \$116,999,000, an increase of \$13,054,000 over the comparable figure for the current fiscal period. The principal factors to which this increase is attributable, other than those already mentioned, are: the opening of additional new facilities for the mentally retarded; the opening of new wards for the mentally ill permitting the reduction of overcrowding; and the cost of full year staffing and operation of new facilities opened during the current year.

For the second successive year, it is possible to omit recommendations for the construction of additional bed capacity for the mentally ill. However, appropriations are recommended to provide 700 additional bed capacity and related facilities to care for mentally retarded children. While no additional bed capacity is proposed for the mentally ill, it is necessary to provide the service facilities and equipment for projects nearing completion and for essential improvements at the various hospitals. Capital outlay expenditures in the coming year are estimated at \$9,328,000, of which \$1,273,000 will be provided from current resources and \$8,055,000 will be derived from bond funds.

CORRECTIONS

In protecting the public by imprisoning those convicted of crimes, and by supervising persons released on parole, the State's correctional agencies will be responsible for 40,400 individuals during the budget year. This program will be carried on through eight correctional institutions and 22 honor camps for adult prisoners, and eight correctional schools and five

honor camps for Youth Authority wards. Expenditures for these programs and facilities will total \$51,212,000 for current operations and \$7,957,000 for capital outlay. Of the latter amount, \$1,071,000 will come from current revenues and \$6,886,000 from bond funds. The program of assistance to counties in construction and operation of juvenile homes and camps will require an additional \$4,533,000.

One of the major new items included in the budget for this function is a controlled treatment program for parolees having a narcotic addiction history. This program consists of intensive supervision and physical examinations to prevent a return to addiction and crime. Basic to this program are provisions for and the testing under scientific conditions of the treatment and control of addiction without long periods of confinement.

Facilities for adult prisoners are designed to permit the assignment of inmates on the basis of similar custody and treatment needs. These facilities range from the maximum security type prison to the minimum or open correctional facility. Individual facilities range in capacity from 500 to 5,000. The system includes a psychiatric center to treat the mentally ill inmate or those with severe mental and emotional behavior problems. The Department of Corrections, supervising the adult felons and older more recalcitrant juveniles, will house 20,040 inmates during 1959-60 Fiscal Year. Expenditures for support of all facilities including administration and supervision of the parole caseload are budgeted at \$35,558,000. This is an increase of 8.2 percent over the expenditure of the current fiscal year. This increase is attributable to full-year operation of facilities opened during the current year, to staffing of expanded existing facilities, and to providing additional rehabilitative programs to meet the needs of overcrowded institutions.

Wards of the Youth Authority are assigned to facilities commensurate with their age. The program is directed toward elimination of the reasons for delinquent behavior, correction of deficiencies in education, and development of acceptable work habits. The average daily population of the State's facilities for juvenile offenders during the 1959-60 Fiscal Year will be 3,142, an increase of 233 over the 1958-59 period. Expenditures of the Department of the Youth Authority, including administration, delinquency prevention, parole supervision, and institution operations will total \$15,654,000, or \$2,432,000 more than during the 1958-59 Fiscal Year. The principal factors causing this increase are the opening of a new school and provision for special treatment programs at existing schools for those wards with severe emotional behavior patterns.

Conservation and Development of Natural Resources—\$170,292,000

Combined within this category are the several State agencies dedicated to conservation, development, and beneficial utilization of our natural resources. The activities covered here include water development and conservation; timber and watershed protection; conservation and management of fish and game; acquisition, development and operation of parks and beaches; assistance in the construction of small craft harbors; and assistance to the agricultural and mining industries of the State. The aggregate cost of these diverse

and varied services will be \$171,292,000, an increase of \$31,681,000, or 22.9 percent over the expenditures for like purposes during the 1958-59 Fiscal Year.

Water Development Program

Undoubtedly, water conservation and development is one of the most pressing problems of State Government. It was the subject of special legislative attention in 1958 and has received extensive consideration by both the legislative and executive branches during the intervening months. Approximately half of the amount proposed in the 1959-60 Budget for natural resource purposes relates to some phase of this problem. Included are appropriations totaling \$14,536,000 for the support of the Department of Water Resources, the Reclamation Board, and other agencies concerned with water conservation. This amount includes \$5,979,000 for comprehensive studies directed toward the development of plans to satisfy the rapid and steady increase in the water requirements of the State.

This budget proposes expenditures of \$52,942,000 by the Department of Water Resources, of which \$48,199,000 represents expenditures for Feather River and Delta Diversion projects, Federal-State projects for flood control and conservation purposes, and a sea water conversion plant. The remaining \$4,718,000 provides for administration and design work relating to construction.

Included in the major construction program is the acquisition of rights-of-way for the San Joaquin-Southern California aqueduct system, which will transport surplus water from the Delta service areas to the south and west. Funds also are provided to undertake the initial construction of the South Bay aqueduct to provide urgently needed additional water supplies to Alameda County. In addition, provision is made for the construction of Frenchman Dam and the acquisition of sites for the four remaining dams in the Upper Feather River basin. In carrying on the Oroville features of the Feather River project, funds are provided for construction of the West Branch Bridge to complete the remaining section of the highway relocation.

The Federal-State program for flood control and water conservation includes funds for the State's share of construction of two multipurpose projects—the Black Butte Project in Tehama County, and the New Hogan Project in Calaveras County. Also included is the State's share of the cost of constructing a sea water conversion plant in co-operation with the federal government. The construction of this plant will include consideration of a nuclear reactor as a source of energy.

Beach and Park Program

Growing popular demand for recreational facilities throughout the State and increasing attendance at the beach and park areas operated by the State have compounded the operating problems confronting the Division of Beaches and Parks. The demand for additional development of these recreational areas, coupled with the major acquisition program authorized by the Legislature in prior years, will require expenditures of \$23,670,000 during the budget year. Of this

amount, \$8,126,000 will be required for operation of new and continuing beach and park areas, highlighted by the transfer of Squaw Valley Winter Olympics site upon completion of the winter games. Expenditure of the remaining \$15,544,000 for capital outlay purposes will exhaust the surplus in the special fund by June 30, 1960.

The \$5,000,000 made available from the Investment Fund and the \$10,000,000 provided, under the Harbor Development Law of 1958, for small boat harbor development construction will increase planning and loan analysis activities of the Division of Small Craft Harbors.

Other Natural Resources Programs

The budget of the Division of Forestry includes added staff and facilities to combat the increasing forest and watershed fire problems and provides for the operation of additional forestry conservation camps in co-operation with the Department of Corrections. Capital outlay expenditures of \$1,931,000, including \$1,502,000 from bond funds, are planned for additional facilities during the 1959-60 Fiscal Year.

Although providing no increases in the level of authorized program, the budget of the Division of Soil Conservation is geared to a higher expenditure level based on full-year employment of the authorized staff for planning team operations under the Federal Small Watershed Program. For acquisition of lands, easements and rights-of-way for five projects authorized for construction, \$1,267,300 is included in the local assistance section of the budget.

The budget of the Department of Fish and Game continues existing activities and provides for workload increases principally in the water projects and water pollution fields. The programs administered by the Wildlife Conservation Board and the Marine Research Committee, also concerned with fish and

game resources, are projected at the levels permitted by their respective resources. The latter is supported by a privilege tax on ocean fisheries which under existing law will expire on December 31, 1959.

Fiscal Affairs and General Administration—\$36,664,000

Collection of State taxes accounts for almost two-thirds of the expenditures for this function; the remaining one-third is devoted to management and related services. These include budgeting, disbursing, accounting, auditing and other activities designed to assure the proper discharge of the responsibilities involved in handling public funds. In addition, funds for the support of centralized purchasing, operation of State buildings, and similar services are included within this group. The expenditures for these purposes will decline approximately \$3,700,000, or 9.2 percent, to a total of \$36,664,000 in the coming fiscal year.

Increases involving important new programs which are the subject of proposed legislation, are an economic development agency in the Department of Finance, and a consumer's counsel and a co-ordinator of radiological activities in the Governor's Office. Provision also is made for opening two new State office buildings during the 1959-60 Fiscal Year. A partial offset to the cost of these new programs results from the elimination of existing positions due to raising production standards for building maintenance personnel in the Department of Finance and reducing the intensity of claim auditing in the Controller's Office. The transfer of field auditing for public health and welfare to the budgets for these activities results in more accurate reporting of program costs and permits the State to recover a portion of the cost of this work from the Federal Government.

The tax collection program will cost \$22,910,000, an increase of \$1,528,000, or 7.1 percent. The largest portion of this increase is attributable to the increasing workload of the Franchise Tax Board where the audit of personal income tax and bank corporation franchise taxes produce the greatest return per dollar expended.

Grand Totals	\$36,175	\$40,364	\$36,664	—\$3,700	—9.2

Capital outlay proposals for State office buildings in the coming year amount to \$29,000,000, of which \$1,546,000 will be financed from bond funds, \$27,392,000 from trust funds, and \$119,000 from current revenues. The State office building construction program comprising office building, in eight cities and the State garage in Los Angeles, is anticipated to reach the peak of activity in the 1959-60 Fiscal Year with construction completed or well started.

Other Expenditures—\$191,221,000

While the activities of most agencies of State government may be classified properly within one of the foregoing six categories, several functions do not fall within any of these groups. For this reason, the expenditures for such purposes as operation of the legislative and judicial branches; support of the Department of Justice, the National Guard, the various regulatory agencies; and debt service have been brought together in this final expenditure grouping. Ranked by the amounts involved, apportionments of vehicle license fees to cities and counties is first by a wide margin. Together with apportionments of liquor license fees and other items of assistance to local jurisdictions, these account for \$136,712,000 of the \$191,221,000 total.

The cost of supervising public utilities operations, state banks, building and loan organizations, and the licensing and regulation of most professional and vocational groups aggregates \$21,015,000.

The remaining items within this category amount to \$33,495,000. Of this total, \$8,950,000 represents debt service requirements, \$6,745,000 relates to operation of the Department of Justice, \$5,122,000 covers support of the Legislature, and \$2,337,000 is provided for the judicial branch.

GENERAL ANALYSIS

Expenses of operating the Legislature include salaries of officers and attaches, expenses of the session, expenses of interim committees and cost of operating the 4 legislative offices.

The expenditure program for 1958-59 anticipates that deficiency appropriations will be made by the 1959 Session of the Legislature to make additional funds available for the expenses of Senators in the amount of \$33,120 and for expenses of

Assemblymen in the amount of \$64,040 due to increased length of session.

Transfers to the Contingent Funds have been netted to absorb accumulated surpluses and to provide in 1959-60 sufficient funds for the estimated expenditures. It would be inconsistent to provide for surpluses in view of the deficit facing the General Fund and the consequent need for additional tax revenues.

10					
11	GENERAL ANALYSIS				
12	Objectives				
13	The Legislative Counsel provides legal assistance to the Legis-				
14	lature and state officials in drafting legislative measures, gives				
15	legal advice, acts as counsel for committees of the Legislature,				
16	and represents the Legislature and legislators in litigation. It				
17	maintains indexes, tables and digests of all legislative measures,				
18	and edits, compiles and indexes for the State Printer state legal				
19	publications.				
20					
21	Program and Performance				
22	The Legislative Counsel acts as the legal adviser to the				
23	Legislature. Legal services furnished include opinions, bill draft-				
24	ing, counseling and attendance as counsel at meetings of com-				
25	mittees of the Legislature. The attorney-client relationship is				
26	maintained, and all work is confidential.				
27	In addition, the office maintains an Indexing Section, which				
28	indexes all bills introduced, maintains a statutory record, and				
29	acts as editor and compiler of all state-published codes and the				
30	official publication of the statutes. The work of this section				
31	during sessions is published as the Interim Subject List, Table				
32	of Sections Affected, and Final Subject List.				
33	The overall decrease in expenditures reflects the change from				
34	the 120-day General Session to the 30-day Budget Session.

GENERAL ANALYSIS

Objectives

In conjunction with other states the commission drafts and presents to the Legislature uniform laws deemed desirable and practicable by the National Conference of Commissioners on Uniform State Laws. The commission is composed of 4 members appointed by the Governor, the Legislative Counsel as a member ex-officio, and 2 legislators.

Program and Performance

Provision is made for attendance of the Commissioners at meetings of the national conference and California's contribution to the conference. The program is maintained at the same level as previously authorized.

12	GENERAL ANALYSIS				
13	The Supreme Court reviews cases including appeals in cases				
14	of equity, cases at law involving title or possession of real				
15	estate, taxation and probate matters, and death penalty cases.				
16	It also has jurisdiction to review all cases decided by the several				
17	district courts of appeal. In addition, it has original jurisdiction				
18	to issue writs of habeas corpus, mandamus, prohibition and				
19	certiorari. The court admits to the bar. It must also consider				
20	all executive clemency applications submitted to the Governor				
21	where the applicant has suffered 2 or more felony convictions.				
22	It is proposed to reclassify the legal positions of this court				
23	to properly reflect the organization and duties they are per-				
24	forming. The additional operating expense and equipment is the				
25	result of expanding into the new San Francisco office building				
26	addition during 1959-60.

GENERAL ANALYSIS

The Supreme Court reviews cases including appeals in cases of equity, cases at law involving title or possession of real estate, taxation and probate matters, and death penalty cases. It also has jurisdiction to review all cases decided by the several district courts of appeal. In addition, it has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. The court admits to the bar. It must also consider

all executive clemency applications submitted to the Governor where the applicant has suffered 2 or more felony convictions.

It is proposed to reclassify the legal positions of this court to properly reflect the organization and duties they are performing. The additional operating expense and equipment is the result of expanding into the new San Francisco office building addition during 1959-60.

13	GENERAL ANALYSIS				
14					
15	The Judicial Council surveys the condition of business in the courts with the view of simplifying and improving the administration of justice. Suggestions are submitted to the courts for expediting business and helping to secure uniformity. The chairman also equalizes the work of judges by making assignments to courts with heavy dockets. The council also collects and compiles statistics on all courts and makes many special studies looking to the improvement of the administration of justice, some of which are required by the Legislature and others voluntarily undertaken.

11	GENERAL ANALYSIS				
12	The court has jurisdiction over appeals from superior courts				
13	in Alameda, Contra Costa, Marin, Monterey, San Benito, San				
14	Francisco, San Mateo, Santa Clara, and Santa Cruz Counties.				
15	It has original jurisdiction to issue writs of habeas corpus, man-				
16	damus, prohibition and certiorari. It also handles appeals and				
17	original proceedings transferred from the Supreme Court. The				
18	court consists of 2 divisions of 3 justices each.				
19	Included in this budget is an additional clerical position for				
20	the clerk's office. <i>The impact of the growing workload on the</i>				
21	<i>clerk's office makes it necessary to provide additional manpower</i>				
22	<i>in this area in order to sustain a level of service as rendered</i>				
23	<i>in the past. Also included is additional operating expenses</i>				
24	<i>necessary to complete the anticipated move to new quarters on</i>				
25	<i>approximately August 1, 1959, additional rent, additional equip-</i>				
26	<i>ment for offices not adequately furnished and to provide equip-</i>				
27	<i>ment for two pro tem justice chambers.</i>

DISTRICT COURT OF APPEAL, FOURTH APPELLATE DISTRICT

Headquarters Office at San Diego

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
1	SUMMARY				
2	TOTAL EXPENDITURES				
3	Support (General Fund)-----	\$191,889	\$204,512	\$231,998	\$27,486 (13.4%)
4	Personnel man-years -----	10.5	10.9	13.2	2.3
5	GENERAL ANALYSIS				
6	The court has jurisdiction over appeals from superior courts in Fresno, Imperial, Inyo, Kern, Kings, Orange, Riverside, San Bernardino, San Diego, and Tulare Counties. It has original jurisdiction to issue writs of habeas corpus, mandamus, prohibition and certiorari. It also handles appeals and original proceedings transferred from the Supreme Court. The court consists of 1 division of 3 justices. The court meets in Fresno, San Bernardino, and San Diego for 4 months each year.				
7	Two additional legal research positions are proposed so that each justice will have 1 such position to handle the increased workload that this court has experienced. These positions would provide a staffing pattern comparable to the other district courts of appeal.

41	GENERAL ANALYSIS				
42					
43	Objectives				
44					
45	This activity of the Governor's Office has the responsibility				
46	for planning and co-ordinating a statewide program for emer-				
47	gency relief in the event of natural or war-caused disaster, and				
48	for providing leadership and assistance to local governments in				
49	the development of an acceptable state of operational readiness,				
50	as provided in Chapter 1, Division 7, of the Military and				
51	Veterans Code.				
52					
53	Program and Performance				
54					
55	This office has been organized with a central administrative				
56	staff and a group of specialists who are responsible for specific				
57	services that would be required during an emergency operation.				
58	The State has been divided into 3 regions with a co-ordinator				
59	in charge of the operations in each. The regional co-ordinators,				
60	with their assistants, provide advice and consultation to local				
61	disaster organizations. They act as liaison between the various				
62	local jurisdictions, integrating the individual mutual aid and				
63	disaster plans into the statewide plan. The service specialists				
64	on the state staff assist all levels of the civil defense and dis-				
65	aster organization in pre-emergency planning and they form				
66	the nucleus of the Governor's operations staff in the event of				
67	a major disaster. They assist other state agencies which have a				
68	disaster role and render technical advice and assistance through				
69	the regional co-ordinators to the local agencies.				
70	Under authority of Public Law 655, 84th Congress, which				
71	added civil defense to the programs eligible to receive federal				
72	surplus personal property, the director of this agency has been				
73	designated as the state officer responsible for supervising the				
74	acquisition of such property for civil defense purposes by all				
75	state and local agencies within this State. This supervision re-				
76	quires the review and approval of all requests for items to be				
77	acquired under the new legislation. Approved items are certified				
78	to the State Educational Agency for Surplus Property which				
79	has been designated the agency primarily responsible for dis-				
80	tributing all federal surplus property donated for use within				
81	the State. Due to the increased workload which has resulted				
82					
83					
84					

responsible for advising the Governor on all matters affecting the interests of the people as consumers, and as to methods to increase the competence of the people as purchasers. The Consumer Counsel shall recommend to the Governor the enactment of such legislation as deemed necessary to protect and promote the interests of the people as consumers. The counsel shall make investigations and studies as are necessary to accomplish these functions, and render reports to the people of the State thereon. Advisory committees are to be appointed to assist the Consumer Counsel.

from the rapid expansion of this program, 3 surplus property officers and 3 intermediate typist-clerks have been added to the staff in order to provide technical and clerical assistance at each of the 3 warehouses of the State Educational Agency for Surplus Property. Costs related to this increase in staff are completely reimbursed by the participating civil defense agencies.

The radiological safety program involves supplying radiation detection instruments, both federal- and state-owned, and laboratory facilities to local jurisdictions for training monitors and for use in the event of an emergency. A staff of radiation specialists conduct training courses to train instructors who in turn train volunteers at the local level. The staff also makes environmental tests for radioactivity in water and air samples collected by other state agencies and maintains the technical equipment involved. It is anticipated that 12,390 instruments, 95 radiological trailers, and 15 mobile laboratories will be assigned to the field by July 1, 1959. Improvements in procedures and in laboratory equipment have allowed for an increase in service by this division without, at this time, a request for additional staff.

Federal Reimbursement (Civil Service):

Public Law 606, which was enacted by the 85th Congress, permits the Office of Civil and Defense Mobilization to reimburse states and local governments for 50 percent of the cost of administering civil defense programs. To qualify for such assistance the federal law cites certain minimum standards that must be maintained by the participating agencies. The State Disaster Office must meet these qualifications before local agencies can receive the reimbursement. The Disaster Office now meets all the requirements except for placing its employees under a merit system. Legislation will be proposed by the Department of Finance to bring the employees of this office into the State Civil Service System. If the suggested legislation is enacted and funds are made available to the Office of Civil and Defense Mobilization for reimbursing participating agencies, the expenditures for this office will be reduced accordingly.

GENERAL ANALYSIS

In the absence of the Governor from the State, the Lieutenant Governor must assume the duties of the chief executive. He presides over the State Senate during its sessions. He is a Regent of the University of California, member of the State Toll

Bridge Authority, State Lands Commission, and Commission on Interstate Co-operation.

Offices are maintained in both Sacramento and Los Angeles for the convenience of the public.

GENERAL ANALYSIS

Objectives

The primary purpose of the State Employees' Retirement System is to provide for the orderly retirement of employees who reach an age, or condition of disability, such that they cannot normally be expected to discharge their responsibilities with the desired proficiency, and to provide further that the retirement compensation offered be sufficient to attract and retain personnel of the required caliber. The Board of Administration also administers the Legislators' Retirement System.

Program and Performance

Members of the State Employees' Retirement System, numbering about 202,000, consist of state employees (including most

^a Composed of savings in salaries and wages, \$5; and equipment, \$124.

University employees) and employees of approximately 370 local governmental jurisdictions, participating on a contractual basis. Members of the Legislators' Retirement System consist of legislators and elective state officials who elect membership.

The administration of the retirement systems involves determination of membership; computation, collection, and recording of employer contributions and member contributions, service and compensation; computation and payment of withdrawals of member contributions, and death and retirement benefits, including retirement for service, ordinary and industrial disability, and industrial death; the control and investment of funds; preparation of periodic and special valuations; and the prepara-

STATE EMPLOYEES' RETIREMENT SYSTEM—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
1	GENERAL ANALYSIS—Continued			
2	Program and Performance—Continued			
3	tion of annual and special reports in accordance with the State			
4	Employees' Retirement Law.			
5	Additional expenditures during the 1958-59 Fiscal Year re-			
6	sulted from the normal growth of the system; conversion of the			
7	member contribution accounting to punched card methods, the			
8	quadrennial actuarial valuation and 1957 legislation. 11 posi-			
9	tions were added July 1, 1958, because of the conversion to			
10	punched card methods. However, 34 positions were abolished			
11	on November 30, 1958, upon termination of the bookkeeping			
12	machine operation, a net reduction of 20 positions.			
13	The net decrease in costs in the 1959-60 Fiscal Year reflects			
14	the completion of the quadrennial actuarial valuation and the			
15	conversion to punched card methods and the elimination of the			
16	bookkeeping machine operation. The proposed new positions in			
17	1959-60 include 3 positions established temporarily in 1958-59			
18	and 5 additional positions on July 1, 1959, to handle the in-			
19	creased workload within the agency.			
20	It is also proposed that 2 positions be established to open			
21	a field office in the Los Angeles area as the system's representa-			
22	tive for all of the state members and employers, and the con-			
23	tracting agencies members and employers in the southern por-			
24	tion of the State, and all of the political subdivisions employer			
25	and employee groups in that area seeking information about or			
26	coverage under the State Employees' Retirement System. The			
27	area assigned to this field representative would contain slightly			
28	over 49% of all agencies contracting with the system and			
29	48% of the total membership as of June 30, 1958.

16	GENERAL ANALYSIS				
17	Objectives				
18	Under the State Civil Service Act this agency is responsible				
19	for serving the personnel needs of state agencies as well as				
20	providing leadership for these agencies in improvement of per-				
21	sonnel practices and procedures. Technical personnel services				
22	are provided for political subdivisions on request.				
23					
24	Program and Performance				
25					
26	Under the general policies of the Personnel Board, the ex-				
27	ecutive officer directs the various divisions in recruiting, exam-				
28	ining, certifying, adopting suitable pay rates, co-operating in				
29	training, and establishing standards of health and safety. The				
30	functions of the divisions have become more complex during the				
31	past few years in part due to the continued growth in state				
32	employees and the condition of the labor market. More examina-				
33	tions are being given than ever before and more applicants are				
34	applying for the tests. However, the actual lists of qualified				
35	people last for a shorter length of time than in the past.				
36	More emphasis is being put on research to develop methods				
37	to improve and save on time and staff. New procedures have				
38	been and are being introduced due to this work.

85					

Training courses are being conducted for personnel of various state departments to develop more efficiency and promote better agency training programs.

There is continued utilization of personnel services provided by the Personnel Board on a reimbursable basis.

To appropriately administer and meet the increased examination workload 6 technical positions are proposed for the Personnel Services Division. These positions will be used exclusively for examination construction to bring civil service examinations up to date and strengthen validity of the examination structure.

1 technical position, authorized through June 30, 1959, is proposed on a permanent basis to continue work on special projects in the Standards and Survey Division.

5 permanent clerical positions are added to meet increased workload: 1 each in Recruitment and Field Services, Standards and Surveys, and Training, and 2 in Office Services Divisions. 4.4 man-years of temporary help are provided for examination workload.

BOARD

The board adopts general policies and rules, establishes job classes and pay ranges, and hears and decides appeals from disciplinary and other actions.

The board meets once every 2 weeks for 2 days. The meetings are scheduled at Sacramento, San Francisco or Los Angeles.

The hearing officer presides at hearings on appeals concerning civil service status. The number of these hearings has become too numerous for the Personnel Board and its hearing officer, and assistance from the Division of Administrative Procedure is required.

through the assistant executive officer who directly supervises the chiefs of the Personnel Services Division, Recruitment and Field Services Division and Office Services Division. The chiefs of the staff divisions, and co-operative personnel services report directly to the executive officer.

scope and variety of state programs and functions; labor market conditions; the activity of employee and other organized groups; and changes or additions to law and rules affecting the State Civil Service System.

As state service enlarges, various steps have been and are being taken to streamline and update technical processes to best conserve technical staff time. In recent years, clerical assistance has been added to relieve technicians of certain detail work; changes in procedures have been implemented; continuing effort is being placed in reviewing operating procedures to develop the most effective methods of fulfilling the legal responsibilities vested in the board.

6 additional analyst positions are proposed to provide for the anticipated examination workload. This includes the preparation of new questions for approximately 20 percent of the examination items. The present staff has been able to prepare new questions for approximately 9 percent of the items.

1.9 man-years in temporary help is based on the need for additional outside board members for qualification appraisal boards and proctors for the increased examination workload.

15	RECRUITMENT AND FIELD SERVICES DIVISION						
16	Objectives						
17	The primary functions of the division are to attract qualified applicants to compete for positions in the state service; to provide information concerning state employment; to administer continuous testing programs; and to provide assistance in personnel matters to state agencies in Los Angeles and San Francisco.						
18	Program and Performance						
19	The public information counters in Sacramento, Los Angeles and San Francisco annually give information concerning the state civil service to approximately 250,000 individuals. The number of such contacts is increasing.						
20	The division also supervises the proctoring of state examinations in the metropolitan centers and administers continuous clerical testing. As the result of several studies, a number of other examining programs are being decentralized to the field offices.						
21	The division has programs designed to provide direct and continuing contact with employment sources; such as colleges, labor unions, placement services, technical and professional associations and other organizations, to create favorable long term interest in state employment as a career in schools and colleges, and to advertise and personally recruit at sources of labor supply. Its function of attracting well-qualified applicants to the state service is made difficult by manpower shortages in many occupations and by the organized competition faced by the State for available personnel. Workload has increased with the rise in the number of examinations and the increase in the number of authorized positions in state departments. Recent increases in the staff and funds available for medical and engineering recruiting are producing results in these areas. For these and other occupations the division is attempting to measure the effectiveness of various recruitment media and techniques. It is hoped to offset in part workload increases and improve recruiting by effecting closer co-operation with operating departments and their field offices throughout the State and through extension of the practice of recruitment through employees.						
22	The proposed budget is based on workload considerations and provides for 1.5 additional clerical positions for the field offices

OFFICE SERVICES DIVISION

Objectives

This division performs clerical work; processes applications; arranges, administers, scores, processes examinations and establishes eligible lists; maintains statistical data and the employee roster; and conducts certification activities.

Program and Performance

The highest examination workloads in the agency's history have increased the work of the processing sections.

Processing and operating procedures are constantly being reviewed for simplification and improvement. Certification by

telephone is being used to speed the giving of eligible list information to hiring agencies. Various activities have been decentralized to branch offices and to other departments. Increased use of mechanical aids such as punched cards, mechanized files, photographic reproduction, offset duplication, and microfilming has speeded production.

5 man-years of temporary help are being converted in the budget year to permanent positions. This conversion is based on a continuing flow of work where permanent positions can be better utilized. Based on increased workload, 2 permanent positions and 2 man-years of additional temporary help are proposed.

TRAINING DIVISION							
17	Objectives						
18	The Training Division works with state agencies in the conduct of employee training programs for the purpose of improving the quality of service rendered by persons in the state civil service.						
19	Program and Performance						
20	The division has been instrumental in encouraging and developing continuous training activities in state agencies, resulting in improvement of morale, communications, and productivity. Emphasis has been placed upon the attainment of greater management efficiency by providing training and consultative assistance to agency line officials and their staffs. The division encourages and assists agencies to develop training aimed at improving work methods, increasing skills, and developing knowledge which make possible more economical and efficient operation of departmental programs.						
21	The State Safety Coordinator is assigned to stimulate interest among state agencies in employee safety and accident prevention. An effective safety program is designed to reduce accidents and injury cause and to improve employee morale.						
22	An additional clerical position is proposed based on anticipated workload and existing backlogs.

CO-OPERATIVE PERSONNEL SERVICES							
44	Objectives						
45	This division provides personnel services to local agencies on their request and on a contract basis by which all costs are reimbursed.						
46	Program and Performance						
47	An increasing trend in local government to employ staff through merit selection methods has led to this program serving more than 115 agencies and giving over 1,100 examinations for such agencies during 1957-58. These agencies find this service more effective and economical than providing their own testing service. Methods are being reviewed constantly to lower these costs without sacrifice of quality.						
48	An increasing number of local agencies have turned to the State for experienced help in installing and maintaining modern job classification and standardization plans. During 1957-58, 2 agencies including 5,000 jobs were studied by this division.

27							
28	GENERAL ANALYSIS						
29	Objectives						
30	Examines and files articles of incorporation and amendments						
31	thereto; exercises general supervision of elections; maintains						
32	the Archives of the State and the Central Record Depository;						
33	attests the official acts of the Governor and Legislature; licenses						
34	and supervises collection agencies.						
35							
36	Program and Performance						
37							
38	Before a corporation can operate in California, its articles						
39	must first be reviewed, and if approved, filed with the Secretary						
40	of State. Likewise, all amendments to corporate articles, as						
41	well as dissolutions, agreements of merger and consolidations						
42	must be filed with this office. In the 1957-58 Fiscal Year there						
43	were 32,921 corporate documents reviewed. Of this total 25,637						
44	were filed of which 16,284 represented articles for new corpora-						
45	tions in California. During the past year there was a slight						
46	decrease in the number of documents processed. However, it						
47	is anticipated that the continued movement of industries to						
48	the West Coast and the continuing increase in the population						
49	of California will result in slight but steady increases in the						
50	number of documents processed.						
51	In 1957 changes in the laws governing notaries public re-						
52	sulted in slight decreases in the number of applications pro-						
53	cessed for notary public commissions. Increases in workload						
54	for both the current and budget years are expected to continue						
55	to a moderate degree for all phases of work mentioned under						
56	the objectives of this office.						
57	In the current year approximately 20,000 notices of expira-						
58	tion on trademark registration will be mailed. These notices of						
59	expiration will pertain to trademarks registered prior to Sep-						
60	tember, 1939. The renewal of trademark registration is expected						
61	to add an additional \$70,000 revenue to the General Fund in						
62	the budget year.						
63	The publishing and distribution of election pamphlets occurs						
64	in alternating fiscal years. This document is distributed prior						
65	to each general election and therefore no expenditure is required						
66	in the odd-numbered calendar years. As a result of this alter-						
67	nating pattern there is a large fluctuation in the budget for						
68	this office from year to year. The entire amount of the decrease						
69	in this budget is attributed to this item. The expenditures in						
70	1958-59 for this item anticipate a deficiency appropriation.						
71	The Department of Finance will propose legislation to make						
72	additional funds available in the amount of \$31,701 to cover						
73	the increased cost of the 1958 General Election pamphlet.

CENTRAL RECORD DEPOSITORY

Objectives

This bureau has receipt and custody of all records required or permitted by law to be deposited in the Office of the Secretary of State.

Program and Performance

The Central Record Depository was established in 1947. Modern equipment and the proper use of record center systems, procedures and techniques enable the Central Record Depos-

itory, in many instances, to service records and furnish information therefrom more rapidly than it could have been secured if the records had remained in the depositing agencies' inactive record files. Through the transfer of inactive material to the record center, depositing agencies are able to effect economies due to reduced purchases of filing equipment and the need for less space for records retention.

1 additional position is proposed to assist with servicing of the increasing volume of records on deposit in the record center.

GENERAL ANALYSIS

Objectives

The work of the department is of a regulatory and service nature. It deals with the protection of plants and animals from infectious disease, pest animals, weeds and injurious insects and with prevention of the introduction and spread of crop and livestock pests and diseases. The department administers programs designed to assist in the marketing of agriculture products, and to protect the public by assuring quality controls and preventing fraud and deception.

Program and Performance

The department operates through 4 divisions with headquarters in Sacramento and offices, field crews, advisers and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in co-operation with the 54 offices of county agricultural commissioners. The department gives technical assistance, co-ordinates various county programs and surveys, and assists in training field personnel.

2 man-years of temporary help are provided in the current year and continued in the budget year to intensify activity directed toward the detection and eradication of the pink bollworm. Large numbers of this pest have developed in Arizona and threatens California's \$290,000,000 cotton crop.

During the budget year 4 positions are provided to staff a second border quarantine station at Truckee, required because of a realignment of the highway which would permit inspection-free entry if the additional station is not established. 1 electronics technician is proposed to repair and maintain 150 agtrons utilized in canning-tomato inspection and 1 clerical position is required to process workload generated by the creation of the Beef Promotion Council. Payment of indemnities for cattle slaughtered under the brucellosis program is continued in the 1959-60 Fiscal Year. It is anticipated that payments will increase in number as the testing is extended into the southern part of the State.

DEPARTMENTAL ADMINISTRATION

Objectives

The director and his assistants establish departmental policy, and channel efforts of the operating divisions to insure efficient administration of the agriculture laws.

Program and Performance

The office of administration provides agricultural and related economic information for the Governor and the Legislature. In

addition, it maintains co-operative relations with federal, state, and county agencies and institutions. The accounting office administers all fiscal matters of the department relating to budgets, accounts, collections, payrolls and disbursements. The personnel office conducts job classification studies, salary surveys, and investigates cases requiring disciplinary action.

No program or workload changes are proposed.

DIVISION OF PLANT INDUSTRY

Objectives

This division administers programs designed to prevent the introduction and spread of crop pests. This includes interception of harmful pests at the border, surveys throughout the State to detect new infestations of these pests, and development of procedures to suppress or eradicate pests should they become established. Further assistance is extended through regulations pertinent to agricultural chemicals and to agricultural and vegetable seeds.

Program and Performance

The first line of defense against the introduction of plant pests, including harmful insects, plant diseases, nematodes, and noxious weeds, consists of agricultural inspection stations maintained at 17 border locations for the purpose of inspecting vehicular traffic and enforcing plant quarantine regulations. Stations are also maintained at San Francisco, San Pedro, and San Diego to inspect ships and airplanes. Quarantine enforcement at interior points, consisting largely of the inspection of freight, express and mail shipments, is carried out by county agricultural commissioners.

Leadership, co-ordination, and technical assistance are supplied the counties. Field surveys are conducted in co-operation with the counties to detect crop pests present, but not yet widely distributed in the State. Particular attention is given to the detection of infestations of pests previously known only outside of California but which might have eluded quarantine and inspection barriers. When they are discovered, particularly

in incipient stages, suppressive and eradicated measures are initiated.

This division provides identification and classification of pests intercepted during surveys or quarantine inspections.

Co-operative programs are developed with local governments and landowners to control noxious weeds and rodents harboring diseases transmissible to humans. A joint program is carried on with the United States Fish and Wildlife Service to control predatory animals to protect livestock, poultry, certain crops, such as melons and grapes, and as an aid in the suppression of rabies.

Fruits and vegetables, as well as hays, and fodders, are sampled and analyzed to determine whether they contain deleterious spray residue which would be injurious to persons or animals. In co-operation with county agricultural commissioners, regulations are enforced pertaining to injurious herbicides and other injurious materials requiring a permit to use.

In the 1959-60 Fiscal Year 4 additional positions are necessary at the Truckee station because of the completion of a new section of freeway on U. S. 40, which necessitates the maintenance of 2 border stations. The highway and new border inspection station will be completed by November, 1959, and the positions are scheduled accordingly. The recent finding in western Arizona of pink bollworm, a serious pest of cotton, makes it imperative that greater detection efforts be made to find any incipient infestation in California. Accordingly, provision is made in both the current and budget years for an additional 24 man-months of seasonal help to search for this pest. Other expenditures are continued at the presently authorized level.

2							
3	Objectives						
4							
5	Primary objectives of this division are to protect, preserve						
6	and improve sources of food of animal origin, and to assure						
7	the public of an abundant and wholesome supply of such foods,						
8	as well as to protect the public from fraud and deception when						
9	purchasing these products.						
10							
11	Program and Performance						
12							
13	This division carries on programs aimed at the prevention,						
14	control and eradication of diseases of livestock and poultry.						
15	Prevention is accomplished through the enforcement of state						
16	restrictions and quarantines on livestock and poultry shipped						
17	into the State to prevent the introduction of disease. Control						
18	and eradication are accomplished by veterinarians operating out						
19	of 10 regional offices and by 6 diagnostic laboratories located						
20	throughout the State. Co-operative programs are conducted with						
21	the Federal Government and include the eradication of tuber-						
22	culosis and brucellosis in cattle. Veterinarians conduct tests for						
23	these diseases, vaccinate calves for brucellosis, and appraise and						
24	identify reacting animals.						
25	A further responsibility is the administration of provisions of						
26	the Agricultural Code pertaining to standards of quality for

DIVISION OF MARKETING

Objectives

This service and enforcement function assists in the stabilization of the marketing of crops, provides current daily information with regard to price and movement of important crops, makes forecasts of the production of many important crops and prepares estimates of the quantities and values of most farm commodities, prevents the marketing of commodities that are below standard in quality or in deceptive packages, inspects the classification and marketing of poultry meat, and certifies to the accuracy of weighing and measuring devices used within the State.

Program and Performance

Marketing orders and programs originate upon request of grower or handler groups, or both, and are designed to control surpluses, establish acceptable standards of quality, size, condition or pack, carry on promotional activities and urgently needed research, and to control or prevent unfair practices in the handling of farm products. This function assists farm groups in the preparation of an acceptable form of marketing order, conducts public hearings upon such proposed orders and programs, and supervises the administration of the programs after they become effective. Surveys are also made of marketing and distribution problems for various agricultural groups of the

State to develop new and larger markets. This service reports current price and movement information covering agricultural commodities in intrastate, interstate and foreign markets. These reports are prepared and released daily, semiweekly, weekly, or at other intervals depending upon specific needs. Information gathered in California is assembled and released over leased wire systems to other states and markets, and similar information gathered in Federal offices pertaining to California crops is received on these leased wires and in turn disseminated to California points. In addition to the current daily and weekly summaries, this unit develops and releases, through the Federal Crop Reporting Board, forecasts of production of many of our major agricultural commodities, and also prepares and publishes annual estimates of the acreage, production and value of practically all crops in the State. This information is widely used by producers, processors, dealers, banks and other financial agencies, public carriers, and educational and research institutions. This function also is engaged in carrying on certain survey projects to improve methodology in forecasting the production of certain important crops, principally by means of improving objective sampling procedures.

The enforcement efforts of this Division include enforcement of the minimum standards of the Agricultural Code relating to fruits, nuts, vegetables, honey, eggs, poultry meat, and poultry

2							
3							
4							
5	Objectives						
6	The special fund function of the Division of Plant Industry						
7	protects the consumer and the farmer through the regulation						
8	and inspection of nursery stock, the inspection and grade certi-						
9	fication of field crops products, the control and regulation of						
10	the labeling, composition, and sale of pesticides, fertilizing ma-						
11	terials, commercial feeding stuffs, and livestock remedies, and						
12	the regulation of agricultural pest control.						
13	Program and Performance						
14	The co-ordination of nursery inspection to insure uniformity						
15	of inspection procedures in all counties is accomplished through						
16	the county agricultural commissioners and county inspectors						
17	who are trained by the department in the detection and control						
18	of insects, nematodes, plant diseases, and weeds. Nurseries						
19	meeting minimum plant pest cleanliness requirements are issued						
20	certificates which permit them to ship their stock to 56 of the						
21	58 counties without inspection at destination. During 1957-58,						
22	7,181 nurseries were licensed to sell and ship nursery stock.						
23	This division exercises enforcement in the area of commercial						
24	feeding stuffs, grain warehouse inspection, and agricultural						
25	warehouses. All commercial feeds must be labled to show						
26	analysis and ingredients. Inspection and laboratory analysis						
27	are accomplished for the purpose of maintaining and improving						
28	the reputation of California products. All grain in public ware-						
29	houses is inspected annually to determine and control insect						
30	infestation. Warehouses may be bonded at the option of the						
31	warehouseman and inspection and grading of field crops prod-						
32	ucts is performed for the public upon request. Personnel per-						
33	forming field crop inspections are licensed by the United States						
34	Department of Agriculture and are under its technical super-						
35	vision through a co-operative agreement.						
36	The regulation of livestock remedies is a function which						
37	insures factual labeling through sampling and analysis of prod-						
38	ucts. This work is expected to involve registration of 500						
39	products and the licensing of 550 retailers.						
40	The registration of economic poisons, commercial fertilizers,						
41	agricultural minerals, and auxiliary plant chemicals is to prevent						
42	the sale of ineffective, unsuitable or dangerous products. Ap-						
43	proximately 5,800 samples, drawn each year from materials						
44	offered for sale, are analyzed to check conformity of composi-						
45	tion with accepted standards of labeling and chemical content.						
46	Agricultural pest control operators are licensed for the specifi-						
47	c types of pest control for which they are qualified. During						
48	the 1957-58 Fiscal Year there were 1,370 licensed operators in						
49	this State. A further responsibility is the certification of over						
50	600 aircraft pilots for pest control work.						
51	Expenditures will continue at the currently authorized level						
52	with slight increases occasioned by price adjustments.

18	DIVISION OF ANIMAL INDUSTRY						
19	Objectives						
20	The primary mission of the special fund function of this						
21	division is the protection of the public from the sale of poor						
22	quality dairy products and the protection of cattle owners						
23	through inspection and brand registration.						
24	Program and Performance						
25	The graded market milk inspection program of this division						
26	involves 41 plants and 225 dairies in 26 counties. Over 1,700						
27	plants manufacturing frozen milk products are also under super-						
28	vision. Supervision of the butter grading program involves 70						
29	licensed butter graders and 48 plants licensed to cut and wrap						
30	butter. It also involves the examination of approximately 10,000						
31	samples of butter a year.						
32	The division maintains a system of statewide brand recording						
33	for livestock owners, inspection of cattle for ownership prior to						
34	shipment, sale or slaughter, as well as the inspection of hide						
35	and the licensing of sales yards, horse and cattle slaughterers						
36	and transporters of horses. Inspections are conducted by a force						
37	of inspectors operating in the field and at sales yards as						
38	packing houses located throughout the State. Owners are assiste						
39	in locating stray animals and local officers are assisted in the						
40	investigations and the prosecution of persons charged with the						
41	of livestock. The duty of collecting beef promotion fees is a new						
42	responsibility added by the 1957 Legislature. Increased costs of						
43	livestock identification are reimbursed by the California Bee						
44	Council.						
45	1 additional clerical position, established in the current						
46	year, is continued in the budget year and is reimbursed by the						
47	California Beef Council. Other expenditures are extended at the						
48	current level.

DIVISION OF MARKETING

Objectives

This division assists farmers and handlers of farm products in the solution of their agricultural marketing problems, regulates the market milk industry for the mutual protection of the producers and the consumers, inspects and certifies the quality of tomatoes for canning, and inspects and certifies seed potatoes for production purposes. This division also inspects and certifies the grade and condition of fruits and vegetables in relation to Federal Grades on a service fee basis for producers and shippers.

Program and Performance

This division carries on surveys of marketing and distribution problems for various agricultural industries of the State to develop new and larger markets, and to expand the sales of California agricultural products. Under the Market Enforcement function, all persons who deal in farm products are licensed to insure strict adherence to the provisions of the law.

This service also fixes minimum wholesale and retail prices in each of the marketing areas of the State for fluid milk and cream. Approximately 98% of the fluid milk sold in California is subject to these established minimum prices. The service also licenses milk distributors, and regulates the sale of dairy products. A continuing program of promotion and sales stimulation of fluid milk and dairy products is carried on with the co-operation of the Dairy Industry Advisory Board.

During 1957, 2,083,861 tons of canning tomatoes were inspected for quality and maturity and certified for canning. The division also inspects and certifies fields of seed potatoes to provide potato growers in California and elsewhere with disease-

free stocks of seed designed to produce more tons per acre of high quality potatoes.

The Federal-State Shipping Point Inspection service inspected 164,136 carlot equivalents of approximately 58 different commodities during the 1957-58 season. This service is performed at the request of growers, shippers or other financially interested parties, and advice and assistance are given the growers and packers in connection with proper harvesting, handling, grading, size and packing operations. Certificates issued at shipping point are prima facie evidence of the quality of the product, and are used frequently in resolving claims involving shipments of perishable products. Fees are paid by the applicant. A regular permanent staff is maintained which is augmented from time to time by seasonal help.

The regulation, inspection and control of automotive fuels, antifreeze, and brake fluid products are also administered by this division. Advertising media, dispensing outlets, and labeling are watched carefully to insure compliance with the provisions of the Business and Professions Code. Samples of products to be sold are analyzed to insure that they do not contain injurious materials. Public weighmasters are also licensed by this division. Weighing devices are inspected, and the licensee is instructed in the proper service to be rendered as a public weighmaster.

The continuation of one electronics technician position temporarily established during the 1958-59 Fiscal Year in lieu of temporary help is proposed in order to repair and maintain the State's 150 agtrons, which are electronic devices used to determine the quality of tomatoes.

FEDERAL CO-OPERATIVE MARKETING RESEARCH

Objectives

The matching funds marketing service work being carried on by the State Department of Agriculture, under the authority of the Agricultural Marketing Act of 1946, has these aims: to help marketing agencies at each level of distribution, to put into use the best known marketing practices as they are brought to light by research under the act and by other agencies, both private and public, to provide more timely and better marketing information, and to increase the consumption of farm products.

Program and Performance

Projects in marketing research are conducted by 4 bureaus in co-operation with the United States Department of Agriculture on a matching basis under provisions of Public Law 733 (79th Congress) and Section 1286 of the Agricultural Code.

Activities are concerned with checks of bearing and non-bearing acreages of fruits and tree nut crops and surveys of

ture, who is designated as the administrative and enforcement officer for duties outlined in Division 4, Chapter 14, of the Agricultural Code. The use of dairy products throughout the State is encouraged by providing health education materials to schools and carrying on advertising and research programs. The cost of this program is defrayed entirely from fees paid by producers and handlers of dairy products. *The 1959-60 expenditures and revenue are projected on the same basis as the current year.*

GENERAL ANALYSIS

Objectives

The Poultry Improvement Commission provides California's poultry industry with accurate production data on the various types and strains of chickens and turkeys.

Program and Performance

The work of this commission is divided into 2 distinct areas, the chicken project which is located near Modesto and the turkey project which is located near Keyes. Specific tests, requested

by the poultry industry, are conducted as a means whereby commercial poultrymen may judge the merits of available strains of chicks and poults. A representative sample, randomly collected, of each entrant's stock, is raised on the testing grounds and periodic reports are made to breeders, hatcherymen, poultrymen, and the general public. Measurements of the productivity and efficiency of each sample are biometrically compared with similar data of all entrants and the results recorded and distributed.

Expenditures are continued at the currently authorized levels.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS

Objectives

The protection of society is the primary purpose of the Department of Corrections. Since 98 percent of the prisoners are eventually released, adequate protection not only includes segregation from society by imprisonment but also preparation for release and adequate supervision while on parole. To be most effective, the correctional process must continue throughout both the institutional and parole periods. The aim is rehabilitation of the person in the shortest period possible and restoring him to a constructive life in the community.

Program and Performance

The Department of Corrections, established in 1944, is presently composed of the Director of Corrections, Adult Authority, Board of Trustees, Institution for Women, Correctional Industries Commission, and Board of Corrections.

The Director of Corrections is the chief administrative officer of the department. He is directly responsible for management of the state prisons and for the custody, care, treatment, training, discipline, and employment of the prisoners. He is likewise responsible for administration of the Division of Adult Paroles which supervises adult male parolees.

The Adult Authority is responsible under California's indeterminate sentence law for determining the sentences of male prisoners and granting or revoking parole. Like responsibility for women prisoners is placed in the Board of Trustees, Institution for Women.

The Correctional Industries Commission recommends industrial and agricultural enterprises to eliminate prison idleness by providing work and training. Such enterprises may be started only when authorized by the commission after a public hearing.

The Board of Corrections is composed of the Director of Corrections, members of the Adult Authority, members of the Youth Authority, members of the Board of Trustees, Institution for Women, and 2 public members appointed by the Governor. It is responsible for the correlation of the State's correctional programs, the study of the entire subject of crime, inspection of jails and the provision of advisory services to cities and counties regarding jail and detention facilities.

In 1944, when the correctional agencies for adults were reorganized and the Department of Corrections created, there were 3 prisons for adult males and 1 prison for adult females; 6,000 inmates were overcrowded in facilities for 4,000. During 1959-60, the department will be faced with caring for an estimated average population of 20,040 inmates including 1,453 male Youth Authority wards over 18 and 742 women. This prison population will be confined in 7 institutional facilities for males, highway and forestry honor camps, and an institution for women. Capacity of these facilities and camps will be 16,168. Thus, at year end an excess of 4,442 inmates will be handled by overcrowding existing facilities.

Persons under parole supervision in 1944 numbered about 4,300. This includes over 4,200 males and under 100 females. During 1959-60, an average of 7,250 males and 600 females will be under parole supervision.

The increase in the prison and parole population during the past 15 years is primarily a reflection of the increase in the civilian population of the State rather than an increase in the crime rate.

To date the department has accomplished the development of additional institutions and camps to comprise a diversified correctional system. This means facilities with a planned capacity to allow for varying degrees of custodial control of inmates, providing for special and general programs of training and treatment for different types of prisoner groups.

As maintaining persons under control in prison while treating them until evaluated safe for release is the goal for protection of the public, it is essential to know what the characteristics of these people are, how to control and treat them, and what facilities are required.

The prison population for 1959-60 will represent the most serious behavior problems among the State's felons, since only 25-30 percent of the persons convicted of felonies are committed to the department. The balance serve county jail terms or are granted probation. The prison population may be described in general in terms of the "average" inmate: A white male between 25-29 years old with a prior juvenile, jail or prison record, with about 10 years residence in California, with only a seventh-grade education but normal intelligence, lacking in work skills, and having a serious personality difficulty. In addition to the "average" inmate, groups requiring specialized custody and treatment are included such as the aged, the psychotic, the sex deviate, the tuberculous, the physically defective, the chronic behavior problems, and condemned cases.

The program for handling 27,950 individuals daily either in prison or on parole during 1959-60 will include:

Diagnosis: Study of each prisoner upon receipt to recommend an individualized program for his control and treatment.

Classification: Designation of a degree of custodial control, educational assignment, medical care, psychological therapy, religious training, and avocational training for each inmate.

Care: All inmates must be fed and clothed. A basic food ration is maintained in all institutions under the general supervision of the departmental food administrator. Rations are modified to meet age, activeness and health needs of the inmates. Clothing is now being controlled also on a ration or formula basis in several institutions based on recorded usage and actual experience. Control of housekeeping supplies through a ration system is the subject of a current survey and will be initiated on much the same basis as the food and clothing control.

Treatment: Programs with staff to effect the treatment process. Treatment involves the integrated activities of a number of subsections. Together, and in co-operation with effective custodial control, the treatment programs make possible the operation of a productive correctional process during the time the inmate is confined and prepared for release. The major activities are as follows:

Academic and Vocational Education: 10,000 inmates are in educational programs during the year. Academic education provides elementary and high school courses, by contracting with the local school district. Vocational training, conducted by the institution staff, is available in approximately 30 trades. Educational services include library programs used extensively by inmates.

Medical Care: Hospital facilities exist at all institutions. Any medical or surgical problems can be handled within the department. Complicated surgical procedures are generally performed at San Quentin due to the availability of specialists.

Psychiatric Treatment: Specialized psychiatric service is provided principally at California Medical Facility, secondly, at San Quentin. Psychiatric positions are also authorized at the other institutions and the parole Out-patient Clinic. Psychiatric treatment includes ward management of psychotics and other highly disturbed persons. Extensive programs for individual and group psychotherapy for more than 2,000 inmates are also provided under psychiatric direction.

Counseling Services: Professional staff of correctional counselors at each institution deal with social and personal problems of inmates and families and prepare progress reports for the Adult Authority. 3 specialized units of correctional counselors are engaged in pilot programs of intensive counseling with small caseloads. More than 8,000 inmates currently participate in weekly group counseling sessions conducted by custodial, educational and maintenance staff employees who receive in-service training in counseling.

Religion: The religious program includes full-time Catholic and Protestant chaplains at each institution together with part-time services for the other faiths. In addition to conventional religious activities, chaplains participate in case counseling and in total classification and treatment activities of the institution.

Recreation: Programs of physical and interest-type recreational activities are maintained at each facility under the leadership of persons trained in recreation. Balance is maintained between spectator and participation programs. Such programs boost morale, encourage constructive use of off-duty time, and teach sportsmanship and teamwork.

Employment: The constructive employment of as many inmates as possible is one of the keys to the total treatment program. Prisoners work in factories, maintenance and culinary sections, offices, farms and camps, providing diversified work experience. Constructive use of inmate assignments has economic benefit to the institutions and carry-over value for work placement after release. Idleness, on the other hand, results in low morale, mental and physical degeneration.

Release Procedures: Each of more than 4,500 inmates to be released during 1959-60 will participate in preparole instruction classes to prepare for adjustment after prison. In addition, each releasee will be interviewed regarding release plans and a report prepared to assist with employment and living placements.

DEPARTMENT OF CORRECTIONS—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

Parole Procedure: Of the total number released from the institutions, about 80 percent will be released under parole supervision. The institutional treatment process, which is directed toward successful adjustment on release is continued in the parole program. In addition, the jurisdiction of the Director of the Department of Corrections is maintained while the parolee is serving the remainder of his term as a productive member of society.

A pilot narcotic treatment program is initiated in this budget. It will provide intensive parolee supervision, clinical treatment and custody of addicts and suspected addicts, and experimentation to shorten the length of stay in prison of addicts.

Additional Facilities: The north facility at Soledad, 1,200 capacity, opened in December, 1958. During the 1958-59 Fiscal Year, 600 Youth Authority male wards over 18, and 600 young adults will be placed in this new facility.

Additional state forestry camps scheduled during 1959-60 include:

Institution for Men: 2 camps—160 inmates.

With these additional 160 inmates in camps, the department will have an average population of about 1,300 in year-round camps, plus about 115 in summer United States Forest Service camps.

CURRENT YEAR BUDGET PROGRAM CHANGE

During 1958-59 an unanticipated population increase resulted in the need for personnel and related expenses above the budgeted level including feeding, clothing, and other minor items. Also, some price increases are required throughout the various sections of the department's budget. In the revised fiscal year budget there are 52 positions which are temporarily approved to June 30, 1959 to handle the increased workload re-

lated to the revised total inmate population of 18,625 or 1,200 over the 17,425 originally budgeted. These positions are foot-noted in the various institution sections of the budget, and if budgeted to continue beyond June 30, 1959, are included in the proposed new positions for legislative consideration. The following is a summary of the temporarily approved positions:

Institution	Administrative	Custodial	Classification and Parole	Reception-Guidance Center	Education	Total
Medical Facility	—	—	—	5	—	5
Men's Colony	—	—	1	—	—	1
Institution for Men	—	—	—	1	—	1
State Prison at Folsom	—	5	1	—	—	6
State Prison at San Quentin	—	12	6	—	—	18
State Prison at Soledad	—	5	3	—	—	8
Deuel Vocational Institution	1	9	1	—	2	13
Total	1	31	12	6	2	52

The expenditures for the various institutions for the current year anticipate a deficiency appropriation. The Department of Finance will propose legislation to make additional funds available in the amount of \$1,162,096.

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary by program accounts for the greater part of the proposed increase of \$2,131,341 (6.4%) over the 1958-59 expenditures. These increases provide for the necessary adjustments to meet population changes at the presently recog-

nized standards of staffing and supply. In addition, an improvement is proposed for professional staffing in the adjustment center at the State Prison at Soledad.

Additional personnel for staffing new facilities:		
a. Adjustment center, State Prison at San Quentin (15)	\$55,776	
b. Honor dormitory addition, State Prison at Folsom (5)	18,260	
c. Vocational shops, State Prison at Soledad (12)	30,643	
d. Receiving warehouse, State Prison at Soledad (1)	4,296	
e. Receiving warehouse, Medical Facility (1)	4,296	
		\$113,271
Additional personnel for institutional workload changes:		
a. Increased intake of inmates (12)	\$54,888	
b. Population growth (96)	452,466	
c. Administrative, maintenance, and group counseling overtime (9.7)	44,424	
		551,778
Additional personnel for change in custodial classification of inmates to provide adequate custodial coverage (9)		41,014
Additional personnel for increased number of parolees (17)		48,657
Additional personnel for increased workload in Departmental Administration (4)		19,644
Additional professional personnel for the Adjustment Center, State Prison at Soledad, to improve the counseling and guidance of emotionally disturbed inmates requiring isolation and segregation housing under close custody (2)		10,728
Additional expenditures for new program of controlled treatment for parolees with narcotic addiction		125,000
Net increased cost in authorized positions due to full year costs of positions authorized during the current year, improved employment conditions, and salary changes		445,543
Increase in operating expenses and equipment:		
a. Increases primarily in feeding, clothing, education, and utilities, for price and population changes, and new facilities	\$942,897	
b. Decrease in equipment	—137,806	
c. Increase in reimbursements	—225,270	
		579,821
Increase in inmate pay-work projects for population growth and increased camp operations		66,409
Increase in costs of returning fugitives from justice from outside the State		25,000
Increase in contributions to State Employees' Retirement Fund		104,476
Total		\$2,131,341

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS

The following 183.7 new positions totaling \$785,092 for the prisons and other correctional facilities represent standard classes used in all facilities and are, therefore, discussed by program or function.

Custodial and Personal Care Personnel

Institution Staffing:

1 Program administrator	\$7,728
2 Correctional lieutenants	11,544
5 Correctional sergeants	23,492
1 Correctional counselor I	5,496
1 Intermediate typist-clerk (mail)	3,690
3 Women's correctional supervisors I	12,948
60 Correctional officers	250,262
73 Total	\$315,160

24 positions are included for San Quentin. 1 sergeant and 8 officers are required for the staffing of the isolation and segregation building (adjustment center) which is scheduled for completion in September, 1959. 8 positions are included to handle increased workload to provide the required custodial coverage for the estimated increased population over the programmed amount budgeted, including work crew supervision and yard and study hall coverage. 1 correctional counselor I is included to handle the increased workload related to work assignment and the academic and vocational program placements for the increasing inmate population. 1 sergeant and 5 officers are included for the required relief; and 0.6 correctional sergeant is recognized for full relief of the instructor in recreation and physical education, however funds are not required for this service due to technical adjustments.

10 positions are proposed for Soledad. 1 lieutenant is included for increased workload in custodial management and general administrative duties in the barracks unit. This increased workload is partially due to the increased number of inmates and partially due to a change in type of inmate population as the number of inmates with a medium custody classification have been increased. These inmates require closer custody supervision than the minimum custody classification inmates for which the barracks unit was originally programmed. 3 correctional officers are included to provide 24-hour coverage in the barracks for search, escort, and patrol duties to handle increased workload due to population growth and custody classification change. 3 correctional officers are provided for 24-hour coverage in Wing W to provide minimum coverage for this two-floor wing and to handle increased population of 150 absorbed by "double bunking." 1 lieutenant and 2 officers are included for the required relief.

13 positions are included for Folsom to handle increased workload. 2.5 positions are included for custodial coverage of feeding and evening cleanup activities related to increased population of 300 over the amount originally programmed for 1958-59. 3 positions are to provide 24-hour coverage in the additional wings of the Honor Dormitory scheduled for completion in September, 1959. 3 positions are included to provide some program for the increase of 300 inmates over the programmed population through supervision of inmate work crews. 1 position is proposed to meet increased workload in the mail office due to the increased population. 3.5 positions are included for the required relief; and 0.6 correctional sergeant is recognized for full relief of the instructor in recreation and physical education, however, funds are not required for this service due to technical adjustments.

12 positions are proposed at Deuel. 2 sergeants are included to handle the increased workload in custodial management required on the second and third watches in the housing areas due to the increase of 400 inmates over the amount originally programmed for 1958-59. 1 correctional officer is provided for the third watch coverage in the housing area due to the increased workload in custodial coverage required for the increased population. 3 correctional officers are included for the increased workload in the supervision of additional work crews to provide some program for the increased population. 2 correctional officers are included on a temporary basis for yard coverage during the construction period of the new reception-guidance center which is being constructed on the area that was formerly the reception-guidance center recreation yard. These inmates must, therefore, use a temporary yard which cannot be covered by existing staff. 1 intermediate typist-clerk is included for the increased workload in the mail office due to the increased population. 1 sergeant and 2 correctional officers are included for the required relief.

4 positions are included for Men's Colony. 1 position is proposed to provide the custodial coverage for the visiting gate and the new handicraft sales facility. This increased workload is partially due to increased inmate population and partially

due to the physical dispersion of this temporary facility. 1 position is included for increased workload in supervising an increasing number of inmates assigned to a work crew which is under contract to the National Guard to handle various small work projects at the National Guard facility. 1 position is provided for increased workload to supervise an additional inmate maintenance work crew which provides some useful work for a part of the increased inmate population. 1 position is included for the required relief.

4 positions are proposed at the Medical Facility. 2 positions are included on an increased workload basis for Wing P to provide custodial management of an increasing number of close custody inmates. This means that there will be 1 correctional officer on each floor during the second and third watches which is the usual coverage for this type of inmate during the activity watches. 1 position is included for coverage in the food preparation and serving areas. This position would provide 2-position coverage between 11 a.m. and 7 p.m., for the total feeding area which is consistent with the staffing level authorized for the 6 a.m. to 2 p.m. shift. This position will supervise about 60 inmates in 3 dining rooms. 1 position is included for the required relief.

2 positions are included at Chino for the supervision of additional work crews to provide some useful work for the increased population of 155 over the number originally programmed for 1958-59.

3 positions are included for Institution for Women. 1 position is included to handle increased workload in the clinic and receiving areas, which is partially due to increased inmate population, and an increase in the type of inmates requiring clinical services. These factors have combined to cause increased inmate movement in this area. 1 position is provided for custodial coverage of the educational and industrial area to handle increased workload due to increased inmate movement. This increased movement is caused by the additional program required in this area for the population growth. 1 position is included for the required relief.

1 program administrator is included for the supervision of the second 600-man unit at the north facility at Soledad. This position is one of the two required in the approved organization of this new facility. This new organizational concept combines the custody responsibilities with the care and treatment responsibilities at a new organizational level. One half of each position or 1 full position is budgeted under the classification and parole formula and one half of each position or 1 full position will be budgeted on the post assignment on a 5-day week basis.

Reception-Guidance Center Personnel

5 Correctional counselor I	\$27,480
1 Clinical psychologist II	6,672
6 Intermediate typist-clerk	20,736

12 Total \$54,888

5 positions are provided for Vacaville, 3 positions for Institution for Men, and 2 positions for Deuel are provided to handle the estimated increased intake of prisoners based on established standards. 1 position each for Vacaville and Institution for Men is provided to handle the increased workload in the records section. These positions will provide the clerical duties required to service the workload of the increasing population intake which has grown from about 3,000 in 1951, when the last additional positions were provided, to an estimated 7,085 in 1959-60.

Classification and Parole Personnel

5 Correctional counselor I	\$27,480
5 Intermediate stenographer-clerk	18,150
12 Intermediate typist-clerk	41,472
1 Intermediate clerk	3,456

23 Total \$90,558

2 clerical positions are provided at Men's Colony, 2 clerical positions at Chino, 1 clerical position at Folsom, 2 professional and 6 clerical positions at San Quentin, 2 professional and 5 clerical positions at Soledad, and 1 professional and 2 clerical positions at Deuel based on established formula standards to handle the increases in population and inmate movement.

Adjustment Center Personnel

1 Correctional counselor I	\$5,496
1 Senior occupational therapist	5,232

2 Total \$10,728

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Adjustment Center Personnel—Continued

2 positions are proposed at Soledad to provide counseling and guidance to the more seriously disturbed inmates housed in the 112-man isolation-segregation unit. This will provide some improvement in the level of this specialized type service. This increased level of service is approximately comparable to the similar service authorized at the adjustment center for the similar type inmate at the Deuel Vocational Institution, and is primarily intended to encourage the younger inmates toward successful rehabilitation. Individual and group psychotherapy will be applied to allow these inmates to gain better insight into their problems, to relieve their strong, usually hostile feelings toward authority and thereby grow in self-control. Also, clinical evaluation of occupational experience will be carried out in an effort to find suitable work placement as a tool toward ultimately achieving rehabilitation.

Administrative Office and Business Services Personnel

1 Procurement and services officer ----- \$6,060

This position is included at the Institution for Women to handle increased workload in the business management function due to expansion in physical plant and inmate population growth. Increases in supply ordering, contracting, receiving, inspecting, establishing stocks levels, and distribution due to the addition of the fifth cottage, expansion of existing cottages, laundry expansion, expansion of educational facilities, hospital addition plus the planning for a new sixth cottage have been partially absorbed by the business manager, food administrator, and chief of maintenance with much of the workload being inadequately covered or not covered at all. Centralization of these duties in 1 person is considered necessary as well as the time being diverted by the other positions being required to meet the increased workload in their principal duties.

1 Accounting technician II ----- 4,194

A position is provided at Soledad to handle increased workload in trusts accounts as the number of accounts are directly related to the inmate population build-up in the new 1,200-man north facility unit.

1 Intermediate stenographer-clerk ----- 3,630

This position is included at Men's Colony to meet increased workload in the superintendent's office partially due to the increased inmate population and partially due to the increase in clerical services required for the planning activities in connection with the new 2,400-capacity institution which is scheduled for completion in April, 1961, on the adjoining site.

1 Intermediate stenographer-clerk ----- 3,690

A position is included at Deuel to handle increased workload in the superintendent's office. This position will provide for the increased clerical services to the superintendent which are required due to the increase in correspondence, telephone calls, visitors and routine administrative matters related to the increased inmate population.

4 Total ----- \$17,574

Medical Care Personnel

1 Staff psychiatrist ----- \$11,400

This position is included at the Men's Colony to handle the increased psychiatric workload, particularly in relation to the increased number of psychiatric examinations and reports required by the Adult Authority of those inmates, such as those diagnosed as sexual psychopaths, which might be considered for release. This position represents 0.6 of a man-year increase as 0.4 of a man-year is deleted from operating expenses for psychiatric consultant services. The increasing number of older inmates, who generally require more medical care than the younger inmates, has caused an increase in the general workload of the medical care program. The chief medical officer position has provided some psychiatric service to inmates in the past; however, the increasing medical care program has caused an increasing demand on the time of this position for overall administrative duties which has resulted in less time being available for psychiatric duties.

2 Physician and surgeon ----- \$23,950

1 position is proposed for Folsom to meet increased surgical and medical care workload due in part to increased population and in part to an older group of inmates that requires greater medical care. A considerable backlog in surgical cases indicates a deficiency has existed in this program at Folsom which will logically become more acute with the increased population. This position represents an increase of about 0.8 of a man-year as about 0.2 of a man-year is deleted from operating expenses for medical consultant services. 1 position is proposed for Institution for Women to be extended permanently on a demonstrated workload basis. This position has been authorized temporarily on a 2-year basis which will expire June 30, 1959. Experience has indicated the workload exists for this position and a backlog is developing due partly to population growth and in part to the increasing number of narcotic addicts being received, who generally are in poor physical health through neglect and physical abuse prior to commitment.

1.5 Dentist ----- 16,290

1 position is included for San Quentin to handle increased workload due to population growth. This will provide for the dental service to remain at a ratio of 1 position to about 950 inmates which has been provided at this institution. 0.5 dentist position is included for Institution for Women on a workload basis. This will provide 2 full positions, or an overall 0.3 increase from that now provided as 0.2 position budgeted under operating expenses is deleted.

1 Supervising nurse ----- 4,740

A position is included for Chino to provide 24-hour ward coverage with full relief required to handle increased workload, which is partially related to the opening of the Youth Training School scheduled for completion in January, 1960. Youth Authority wards will receive care at the Chino hospital on a partially reimbursable basis. Also the existing 16-hour coverage is considered substandard to comparable institution hospitals; therefore, it has been necessary to divert other positions to obtain 24-hour coverage to the serious detriment of X-ray and laboratory functions.

2 Graduate nurse ----- 8,808

These positions are provided at Institution for Women. 1 is to handle the increased workload in the clinic functions on a 7-day basis as population growth, outside neglect, and the influence of narcotics have increased the number of inmates requiring clinic-type service. 1 position is included for the required relief.

3 Medical technical assistant ----- 12,996

1 position is included at Men's Colony for X-ray services to handle increased workload due to increased population. An authorized technician has been performing both X-ray and laboratory duties, but due to workload increases in both functions is able only to continue handling 1 of these assignments. 2 technicians are included for Folsom, 1 of which is proposed for surgical assistant duties to handle increased surgical workload which is partially related to an increase in population of 300 over the programmed population for 1958-59. The other is included to supervise the increasing X-ray and clinical laboratory functions which are required primarily for the increased population.

1 Intermediate stenographer-clerk ----- 3,640

A position is included at the Men's Colony to handle the overall increase in the clerical services required for the increasing medical care program. This increase in workload is partially due to increased inmate population and partially due to the factor that experience indicates that the older type inmate being received has generally required more medical attention than the younger inmate.

1 Intermediate typist-clerk ----- 4,296

This position is included on a permanent basis at Institution for Women. This has been authorized on a temporary basis to expire June 30, 1959. Experience has demonstrated the workload need for this position and the workload is increasing due to population growth and the increasing medical needs of the type of inmate being received.

12.5 Total ----- \$86,120

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Education and Religion Personnel

1 Supervisor of vocational instruction (effective January 1, 1960)----- \$3,504
 11 Vocational instructor (effective January 1, 1960)----- 27,139

These positions are included for Soledad to provide the usual staffing for the approved educational program at the new north facility. The 12 additional vocational shops are scheduled for completion January 1, 1960.

4 Vocational instructor----- 20,088

2 positions are included for Institution for Men and 2 for Deuel to partially reduce the idleness in these overcrowded institutions and to provide meaningful training in fields with apparently good release employment opportunity for the increased inmate populations.

0.5 Protestant chaplain----- 3,030

This one-half position is included for Folsom on a workload basis. In addition to providing for the religious needs of the increased institution population, a part of the time of the position will be devoted to the ranch honor dormitory population located outside the security area. This dormitory is being expanded and the construction project is scheduled for completion in October, 1959.

1 Librarian III----- 5,232

A position is included at Men's Colony for increased workload in the library service which has necessarily expanded with the increasing inmate population. Since the activation of this institution, this increasing workload has been absorbed administratively by the supervisor of education. This position now administers the academic education, vocational education and library programs. With the increased population, the supervisor of education can no longer give adequate supervision to the 3 programs.

1 Librarian II----- 4,740

This position is provided at San Quentin for the increased workload required in order to keep the library open additional hours. With the increased population and limited space within the library building, it is necessary to extend the hours of use in order to provide a minimal level of service.

1 Storekeeper I----- 4,404

A position is included for San Quentin to handle increased workload in the academic and vocational education programs. The vocational printing shop at San Quentin produces, stores, and distributes administrative material throughout the department. Increased use of administrative forms and other printed material is directly related to increased population.

19.5 Total----- \$68,137

Group Counseling

0.7 Overtime----- \$3,373

Provides for group counselors at San Quentin on an overtime basis for additional groups that cannot be scheduled during the regular workday because of facilities, availability of counselors, or inmate work schedules.

Culinary Personnel

7 Supervising cook I----- \$30,822

3 positions for Men's Colony are included to provide 2-shift, 7-day coverage to handle an increase in workload from 25 inmates to an estimated 450 inmates requiring special diets as prescribed by the medical personnel. Diets are provided diabetics, peptic ulcer cases, inmates with all their teeth extracted, and hospital patients on soft, salt-free, or high protein diets.

3 positions at Folsom will handle the increased workload in relation to the increasing number of special diets prescribed by the medical personnel. Approximately 135 inmates are on diets and 100 more should be on diets, but are not because of conditions under which the diet feeding is being performed. It is estimated that 400 inmates will be on diets during the budget year.

1 position is proposed to meet the increased workload in food service at Soledad. This position will supervise the feeding program at the barracks which heretofore has been covered by the food manager who is required to handle the increased workload of the food service management at the new 1,200-man north facility and will no longer be able to adequately service the barracks.

Laundry Personnel

1 Laundry supervisor I (effective December 1, 1959)----- \$2,291

This position is proposed at Chino for increased workload in supervising the additional laundry service required for the new 1,200-capacity Youth Training School, which is scheduled for completion in January, 1960. The position is budgeted on a reimbursable basis. This increased workload will be the supervision of inmates receiving, checking, sorting, and then inspecting, bundling and assembling for return of the laundry of the Youth Authority wards in the Youth Training School.

Warehouse Personnel

2 Storekeeper I----- \$8,592

1 position is proposed at Soledad for increased workload in supervising the operation of the new receiving warehouse scheduled for completion during 1958-59.

1 position is included at the Medical Facility for the increased workload in the warehousing activities particularly related to the receiving warehouse which was completed in 1957-58. The delay in recognizing this workload increase has been due to the initial effort to absorb the workload administratively which has not been effective.

Plant Operation Personnel

2 Water and sewage plant supervisor----- \$10,992

1 of these positions is included at Chino to handle increased workload in the sewage plant operation and trash disposal operation. The workload increase is partially the result of servicing the Youth Training School, scheduled to open in January, 1960, and partially due to the required change in the method of trash disposal from burning to cut and fill. This change makes it necessary to separate physically the sewage and trash operations, and consequently makes it unfeasible to have the 1 authorized position continue to service both operations. The other position is included for the Institution for Women to handle increased workload due to expansion of the water and sewage plant. This expansion is required because of continued population and physical plant growth at this institution. Also, this will permit an authorized plumber position, which is diverting one-half time to this function to handle the increased plumbing maintenance program, also resulting from the expanding physical plant.

1 Stationary engineer----- 5,232

This position is included for Institution for Women to handle increased workload related to an additional 13,952 square feet of plant facilities requiring maintenance. There is also increased maintenance servicing of the additional equipment in the laundry, hospital, and the fifth cottage.

2 Correctional officer—truck driver----- 6,552

1 of these positions is included at Chino to provide laundry and bakery delivery service to the new Youth Training School. This position is to be effective upon completion of the new facility presently scheduled for January, 1960, and is financed on a reimbursable basis. The other is provided at San Quentin to handle pickup and disposal of trash. A ban on the present method of burning requires a change to hauling the trash to local dumps, which have the equipment and facilities for proper disposal.

5 Total----- \$22,776

DEPARTMENT OF CORRECTIONS—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Camp Supervision Personnel

1 Correctional lieutenant \$5,772

This position is included at Chino to handle increased workload in the camp supervision function due to the opening of 1 80-man forestry camp in June, 1959, at Puerto La Cruz, San Diego County, and 1 80-man forestry camp in September, 1959, at Pilot Rock, San Bernardino County. With the addition of these 2 camps, this institution will administer a total camp program of 6 year-round state forestry camps and 1 highway road camp, providing useful activity for an estimated average inmate population of 475 during 1959-60.

Administration Division Positions

1 Classification counselor III \$6,672

This position is added on an increased workload basis to assist the existing 3 positions in approving an increasing number of inmate transfers between institutions and to carry out survey and special study assignments relative to inmate classification and departmental classification procedures, policies, and techniques.

1 Assistant research technician \$6,060

As the intensive treatment program approaches 1,000 parolees, it will be necessary to increase analysis of the program results. This increase in workload of this type will be offset by a reduction in the field program. This position, therefore, is added at the headquarters office and a correctional counselor I position at San Quentin has been deleted.

183.7 Totals, Proposed New Positions \$785,092

SUMMARY OF OTHER INCREASED EXPENDITURES

Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions and annual merit salary increases \$445,543

Controlled-Treatment Program for Parolees With Narcotic Addiction

A pilot narcotic treatment program is initiated in this budget. It will provide intensive parolee supervision, clinical treatment, and custody of addicts and suspected addicts, and experimentation to shorten the length of stay in prison of addicts... \$125,000

Operating Expense

Increased average population of 1,415 (7.6%) will necessitate a similar and corresponding increase in operating expense of \$1,067,897 (9.1%) including the \$125,000 for narcotic program. This increase is predominantly for food, clothing and education. Other items of increase include utilities and expenditures relative to operation of new facilities \$942,897

Administration Division Positions—Continued

2 Intermediate clerk \$6,912

These positions are included for the increased workload in the records office, based on an approved staffing formula.

Adult Authority Positions

1 Intermediate stenographer \$3,630

With increasing population, there is a corresponding increase in Adult Authority hearings and a corresponding increase in correspondence with inmates, and friends and families of inmates, all requiring additional stenographic assistance.

Parole Supervision

11 Parole agent I \$33,892

3 Intermediate stenographer-clerk 4,780

1 Women's parole officer II 6,060

1 Intermediate stenographer-clerk 295

16 Total \$45,027

Parole officer positions are included on the basis of increased number of parolees on the overall standard of 55 parolees per professional position. 3 clerical positions are included for the required clerical assistance. 11 agents and 1 stenographer are for Division of Adult Parolees and 1 agent and 1 stenographer are for Board of Trustees, Institution for Women.

Equipment

Equipment decreases are indicated at most institutions and represent a reduction to the approximate annual needs of the department \$137,806

Inmate Pay-Work Projects Reimbursements

Both these items are increased as a result of additional forestry camps opening during the budget year. Inmate pay-work project increases \$66,409 while increased reimbursements from forestry amount to \$225,270 \$158,861

Returning Fugitives From Justice

This uncontrollable reimbursement expenditure is contingent upon apprehension in other states of felons wanted in California \$25,000

Contributions to State Employees' Retirement Fund

This item is related to number of employees... \$104,476

Total, Other Increased Expenditures \$1,346,249

GRAND TOTAL—INCREASES \$2,131,341

GENERAL ANALYSIS

The director is responsible for the establishment and co-ordination of policies and programs to achieve the objectives of the department. These objectives are primarily the confinement and rehabilitation of persons committed to it by the courts. The Board of Corrections and Adult Authority act in an advisory and co-ordinating capacity in policy formulation. The departmental administration is organized primarily to provide the required staff assistance to carry out the established policies and programs. This is accomplished through the activities of the executive and 3 major staff groups. These are the Classification and Treatment Division, headed by a chief; Business Services, headed by a chief; and Special Services, with a deputy director as ex officio chief. These groups are under the supervision of the deputy director of the department. In addition, a chief of research and a special assistant to the director report to the Director of Corrections.

The Classification and Treatment Division includes staff responsibility for medical and psychiatric services, education and library services, inmate classification, casework and other professional disciplines, group counseling, records, recreation, and the chaplaincy services. Each of these is an important treatment activity at the institution level. During the past year, significant progress has been made in the selective reception, classification and assignment processing of an unprecedented high intake. Major progress has been made on a new concept of programing exemplified by the planning for the north facility unit at Soledad and for a new facility at Los Padres. The new concept involves a closer merging of custodial and treatment goals. There has been emphasis on the special treatment and handling of unusually violent individuals in adjustment centers and in the general population in the institutions. There has been a co-operative effort with the Research Division in developing meas-

ures of program effectiveness in pilot treatment programs and in the vocational and educational programs.

The Special Services Division, under the immediate guidance of the deputy director, is staffed by specialists in the fields of public information, management analysis, training and field services. These staff members provide advice and assistance to the director and deputy director and to the institutions and Division of Adult Paroles in the areas of their technical specialties.

The business services staff is responsible for departmental construction and maintenance supervision, the feeding program, budget preparation and control, accounting, personnel, and equipment inspection and control. Steps are being taken to improve and standardize institutional maintenance activities and to develop improved budgetary and accounting practices.

The chief of research heads a program aimed at program evaluation and research in correctional treatment. During the 1958-59 Fiscal Year the Research Division was reorganized, resulting in the transfer of 13 positions from the Bureau of Criminal Statistics of the Department of Justice to this department.

The special assistant to the director is responsible for fostering the development of trade advisory committees composed of representatives of labor and management.

4 new positions are included in the 1959-60 Fiscal Year. 1 professional position is included for increased workload in the Classification and Treatment Division, and 2 positions are included in the records office for increased workload due to population growth; 1 professional position is included to handle increased workload in the Research Division. These positions are discussed in the General Analysis, Departmental Summary (See page 63).

4	GENERAL ANALYSIS						
5							
6	Objectives						
7							
8	The Division of Adult Paroles supervises all adult males re-						
9	leased from state prisons to parole programs in California; and,						
10	in addition, supervises, on a co-operative basis, adult male felons						
11	released from other states to parole programs in California. The						
12	supervision of such persons is to provide for the continuation of						
13	the correctional treatment program as begun in the institutions						
14	and to protect society. The division also administers the pro-						
15	gram planning for California releasees who are going to parole						
16	programs in other states. Pursuant to the provisions of Chapter						
17	2019, Statutes of 1957, the Division of Adult Paroles was trans-						
18	ferred from the Adult Authority to the Department of Correc-						
19	tions effective September 11, 1957. In the interests of clarity						
20	and comparability, expenditures for the full 1957-58 year are						
21	reported in the Adult Authority budget rather than dividing the						
22	fiscal year as of September 11, 1957.						
23							
24	Program and Performance						
25							
26	The Division of Adult Paroles includes a headquarters office						
27	and 16 field offices. For administrative reasons, the State is						
28	divided into 2 parole regions, the Tehachapi Mountains being						
29

86	Totals, Special Study Commission on Juvenile Justice				\$16,463	\$46,910	\$49,680	

This unit will allow the parole agent to make temporary placement of suspected addicts for observation of possible withdrawal distress, for diagnosis as to the extent of addiction, and determination of future action (whether to return to an institution for violation or continue on parole). The unit will provide housing, professional and custodial staff (psychologist, psychiatrist, consultant, correctional officer). In addition, study, evaluation and reporting is planned to determine the effectiveness of this new control and treatment method.

Specialized training for parole agents is part of this pilot project and will embrace intensive orientation training followed by periodic sessions concentrating on special courses in detection, supervision, interview techniques and social factors related to addiction.

The commission consists of 5 outstanding citizens appointed by the Governor. This group gives policy direction to a full-time professional staff named by the Chairman of the Board of Corrections.

The commission will determine the priority to be given to the many facets of the problem. It will make such recommendations as are indicated by staff studies, except advice and testimony at public hearings.

It was anticipated that the commission would be established soon after July 1, 1957; however, the commission first met for organization on November 4, 1957. The project director was not appointed until January 1, 1958. Work of the commission has been delayed by these factors. While the final report was anticipated by June 30, 1959, the delay in starting the study will necessitate the extension of time to June 30, 1960, to complete the commission assignment.

GENERAL ANALYSIS

52	Objectives					
53						
54						
55	The Medical Facility is the psychiatric diagnostic and treat-					
56	ment center of the department. It confines and treats adult male					
57	felons who are mentally ill or who have severe mental and emo-					
58	tional disorders. These include psychotics, psychopaths, sex of-					
59	fenders, and narcotics addicts. A small number of recalcitrant					
60	tuberculars are housed here also.					
61	A reception-guidance center in facilities adjoining the main					
62	institution receives adult male felons from the 47 northern coun-					
63	ties for diagnosis, classification, and recommending institutional					
64	placement. It also receives male parole violators returned to					
65	prison.					
66						
67	Program and Performance					
68						
69	Established in 1950 in temporary rented quarters at the					
70	United States Prison Facility, Terminal Island, the Medical					
71	Facility was moved in 1955 to new permanent facilities located					
72	in Solano County on a 900-acre site near Vacaville.					
73	Construction of reception-guidance center facilities was com-					
74	pleted in the spring of 1957 and began receiving prisoners in					
75	July, 1957. This facility will process 3,665 cases during 1959-60.					
76	Group psychotherapy is the major treatment method at the					
77	Medical Facility.					
78	Programs of academic and vocational education, plant main-					
79	tenance work and training, medical and dental care, library, rec-					
80	reation, and religion are offered to all inmates to the degree to					
81	which they can participate.					
82	a Composed of savings in salaries and wages, \$2,635; operating expenses, \$8,618; equipment, \$2,056; county court costs, \$17,995;					
83	returning fugitives, \$17,790; and transportation of prisoners, \$3,768.					
84	b Composed of savings in salaries and wages.					
85	c Excluding cost of operating reception-guidance center, but includes cost of feeding, housing, and other expenses of the inmates					
86	being processed therein.					

These programs are designed to provide intensive treatment for felons afflicted with major mental illnesses (psychoses) and severe emotional and personality disorders, particularly the latter. A sizeable number of problem cases are also admitted expressly for psychiatric evaluation and recommendation with respect to disposition. Although the overwhelming majority are adult felons, there are small numbers of wards from the Youth Authority and tuberculous recalcitrant misdemeanants from the Department of Public Health.

The prison population in 1959-60 may be described in general as follows: Median age, 32 years; 47 percent prior prison commitments; 21 percent prior escape records; offense groupings will include 22 percent sex offenders, 16 percent burglary, 16 percent robbery, 12 percent forgery and checks, and 6 percent narcotics.

This prison population may also be described in terms of medical classification as follows: 320 psychotics, 120 homosexuals, 30 tuberculars, and 880 men with severe emotional and mental disorders.

Population and release of men from this institution are as follows:

Medical Facility:	1957-58	1958-59	1959-60
Average population-----	1,366	1,370	1,370
Paroled and discharged-----	423	450	455
Reception-Guidance Center:			
Average population-----	532	570	570
Intake for processing-----	3,510	3,675	3,665

GENERAL ANALYSIS

Objectives

The Men's Colony protects the public by confining aged, infirm, and other handicapped male felons and by so treating and training them that they can be safely released, many of them to become self-sustaining members of their communities.

Program and Performance

The Men's Colony (California Medium Security Prison) was authorized by the Legislature in 1949. It was established in 1954 in temporary facilities on a 220-acre site in the hospital area of Camp San Luis Obispo. The post-office address is Los Padres. The institution will house an average of 1,350 men in 1959-60.

The correctional program is designed primarily for the retraining, rehabilitation and replacement in civilian life of the elderly and infirm offender. The institution's 1959-60 population may be described in general by the following characteristics: median age about 54 years, 64 percent with prior prison commitments, 6 percent serving life sentences; offense groupings will include about 21 percent sex offenses, 22 percent forgery and checks, and more than 11 percent homicide. Some will be blind, paralyzed, senile, or lacking limbs.

Construction has begun on permanent medium security facilities of 2,400 capacity which have been designed for erection on an adjoining site. These are the first designed to combine the economy of large institutions with the efficiency of small ones by creating a central unit to serve surrounding housing and treatment units constructed as needed. The first

units will house 1,200 men and are scheduled for completion in April, 1961. The remaining units for the additional 1,200 inmates will be completed in October, 1961.

Population and release of inmates from the Men's Colony are as follows:

	1957-58	1958-59	1959-60
Average population-----	1,185	1,310	1,350
Paroles and discharges-----	430	470	560

14 proposed new positions are included for the 1959-60 Fiscal Year as follows: 1 clerical position for increased workload in the superintendent's office; 1 correctional officer for additional gate, waiting room and handicraft sales coverage; 1 correctional officer for increased workload to supervise an inmate work crew assigned under contract to the California National Guard; 1 correctional officer to supervise an additional inmate maintenance work crew; 1 correctional officer for relief; 1 professional position related to increased workload in the psychiatric section; 1 medical technician for increased workload in the X-ray unit; 1 clerical position for the overall increased workload in the medical care program; 1 professional position related to the increased workload in the library service; 2 clerical positions for increased classification and parole workload; and 3 culinary positions for increased workload in the dietary kitchen.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 60-63.)

^d Composed of savings in salaries and wages, \$11,913; operating expenses, \$39,638; equipment, \$29; inmate pay-work projects, \$1; and excess reimbursements, \$180.

^e Composed of savings in salaries and wages.

GENERAL ANALYSIS

Objectives

The Institution for Men has as its objective the protection of the public by confining for training and treatment the more tractable young male offenders, with the majority under minimum custody.

The Institution for Men is composed of the main institution and reception-guidance center at Chino, a branch institution at Tehachapi, and an extensive honor camp system.

Program and Performance

This institution was established in 1941 on a 2,500-acre tract south of Chino in San Bernardino County. Both temporary and permanent facilities of the main institution will house an average 1,635 inmates during the 1959-60 Fiscal Year.

The reception-guidance center receives all new male commitments from the southern counties. It will operate at a load of 480 during the 1959-60 Fiscal Year, processing an estimated 3,420 cases. It will receive a total of 5,070 individuals including 3,520 Adult Authority inmates, 665 parole violators and 885 Youth Authority wards.

The Tehachapi branch was opened in 1955 after the earthquake-damaged facilities were repaired. It will operate at a capacity load of 515 during the 1959-60 Fiscal Year.

Correctional treatment at the main institution is designed primarily for carefully screened young male offenders capable of profiting by the program and accepting its responsibilities. It covers a broad field of vocational and academic instruction, plus a wide variety of industrial activities, including an extensive agricultural program. A large number of medium security men, however, are held at the Tehachapi branch, a minimum custody facility by design. That this has been successfully accomplished is attributed in large part to the group counseling program which is particularly emphasized at the Tehachapi branch.

The main institution population, excluding camps, in 1959-60 may be described in general by the following characteristics: Median age 29 years; 32 percent prior commitment records; offense groupings will include about 24 percent forgery and checks, 23 percent burglary, 19 percent robbery, and 15 percent narcotics.

The Tehachapi branch population in 1959-60 may be described in general by the following characteristics: Median age 32 years; offense groupings will include about 18 percent burglary,

25 percent forgery and checks, 19 percent robbery, and 19 percent narcotics.

The institution at present also administers 5 year-round honor camps, 4 with the State Division of Forestry, and 1 with the State Division of Highways. 2 additional forestry 80-man camps will be activated in 1959, bringing the average daily camp population total to 475 for 1959-60.

Commencing in January, 1960, the institution plans to provide services including hospital, laundry, bakery, trash and garbage disposal as well as sewage disposal, to the new Youth Training School now under construction on the institution tract.

Population and release of men from this institution are as follows:

Average Population:	1957-58	1958-59	1959-60
Institution, including camps -----	1,737	1,870	2,110
Tehachapi -----	508	510	515
Reception-guidance center -----	480	480	480
Totals -----	2,725	2,860	3,105
Paroles and Discharges:			
Institution -----	1,026	1,100	1,230
Tehachapi -----	240	245	265
Totals -----	1,266	1,345	1,495
Reception-Guidance Center Intake:			
Adult authority -----	2,948	3,100	3,520
Parole violators -----	639	645	665
Youth authority -----	551	610	885
Totals -----	4,138	4,355	5,070
Total Cases Processed—			
Adult Authority -----	2,930	2,925	3,420

A total of 15 additional positions are proposed for the 1959-60 Fiscal Year. 2 correctional officers are included to supervise additional inmate work crews; 1 nurse is included to meet increased workload in the hospital; 2 clerical positions are included for increased workload in the classification and parole function; 2 vocational instructors are included to provide additional program for increased population; 1 laundry supervisor and 1 correctional officer (truck driver) are included on

^a Excludes cost of operating reception-guidance center, but includes cost of feeding, housing, medical, and other expenses of the inmates being processed therein.

GENERAL ANALYSIS—Continued

Program and Performance—Continued

a reimbursable basis to provide laundry and delivery services to the new Youth Training School; 1 position is included to handle increased workload at the water and sewage disposal plant due to additional service being provided the Youth Training School and due to a separation of this function and that of trash disposal required as a result of a mandatory change in the method of trash disposal; 2 professional positions and 1 clerical position are required to handle the increased workload in clinical processing in the reception-guidance center; 1 clerical

position is proposed to handle increased workload in the reception-guidance center records section; and 1 correctional lieutenant is included to meet the increased workload in camp supervision with the opening of 2 new 80-man forestry camps. Positions for supervising the new camps were approved in previous budgets but not established as opening of the camps was delayed because of construction. These positions are discussed in the General Analysis, Departmental Summary (see pages 60-63).

GENERAL ANALYSIS

Objectives

The State Prison at Folsom protects the public by confining those chronic criminals requiring maximum custody and by so treating them as to permit their safe release to the community. A camp program is operated separately from the main prison to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This institution was established in 1880 on a 1,700-acre site in Sacramento County. Designed to house 1,947 men, the institution is expected to confine an average of 2,775 in 1958-59 and an average of 2,700 inmates during 1959-60.

Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, plant maintenance work and training, group counseling, medical and dental care, religious, library, and recreational activities. Because of the forced overcrowding of the

institution some idleness will exist during 1958-59 as well as during 1959-60.

A special unit, the 138-capacity adjustment center, provides control and treatment of the department's most severe behavior problem cases.

The institutional population in 1959-60 may be described in general by the following characteristics: median age 38; 90 percent prior prison commitments; 32 percent prior escape records; 8 percent serving life terms; offense groupings will include over 6 percent homicide, over 23 percent robbery, over 21 percent burglary, and over 11 percent narcotics.

In addition the prison is responsible for the administration of 3 year-round State Forestry Camps as well as 1 which will spend approximately 6 months in Calaveras Big Trees State Park and 6 months at Folsom Lake State Park. In addition the institution currently operates 1 camp for the United States Forest Service. In total these camps will employ 266 inmates during 1958-59 and 286 inmates during 1959-60. These camps, manned by specially selected minimum custody inmates, serve

^c Composed of savings in salaries and wages, \$7,339; operating expenses, \$18,169; equipment, \$4,053; inmate pay-work projects, \$1,119; and excess reimbursements, \$9,419.

^d Composed of savings in salaries and wages.

Objectives

The State Prison at San Quentin protects the public by confining adult male felons under close-medium security and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

San Quentin was established in 1852 on a 400-acre site in Marin County. Designed to house 2,700 men, the institution is expected to confine an average of 4,428 in 1959-60. Correctional treatment designed to rehabilitate the inmate includes academic and vocational education, industrial work and training, group counseling, medical and dental care, and religious, library, and recreational activities. Because of forced overcrowding of the institution some idleness will exist during 1959-60.

A special unit at San Quentin provides custody of inmates sentenced to death and provides for execution of the death penalty.

The institution population for 1959-60 may be described in general by the following characteristics: Median age 29.1; about 47 percent prior prison commitments, about 25 percent prior escape records, about 4.7 percent serving a life sentence; offense groupings will include over 8.5 percent homicide, about 23.7 percent robbery, about 17.3 percent burglary, and about 16.3 percent narcotics.

In addition, San Quentin is responsible for the administration of 6 year-round road and forestry camps and 1 seasonal United States Forest Service Camp bringing the year-end camp population to 424 in the 1959-60 Fiscal Year. These camps,

manned by specially selected minimum custody inmates, serve the public by aiding in the conservation of the state's natural resources through fire fighting and reforestation work. The highway road camps inmates perform highway maintenance and construction work in remote areas of Northern California. This provides valuable work and training experience for the inmates.

Population and release of men from this institution and its camps are as follows:

	1957-58	1958-59	1959-60
Average population	4,471	4,719	4,852
Paroles and discharges	1,124	1,320	1,415

A total of 36.7 new positions are included in the 1959-60 Fiscal Year. 8 correctional officers are included for work crew supervision to handle the increase over the programmed population; 8 correctional officers and 1 correctional sergeant are proposed for staffing of the new adjustment center scheduled for completion in September, 1959; 1 correctional officer is included to drive a garbage disposal truck required due to a mandatory change in the method of disposal; 1 correctional sergeant and 5 correctional officers are included for the required relief; 1 professional position is included for the increase in inmate assignment workload; 1 dentist is included for increased dental workload; 1 storekeeper is included for increased workload in the printing and educational sections; 1 professional position is required for the increased workload in library service; 2 professional positions and 6 clerical positions are included for increased workload in the classification and parole function; and 0.7 overtime for the expanding group counseling program.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 60-63.)

GENERAL ANALYSIS

Objectives

The State Prison at Soledad protects the public by confining male prisoners under medium custody, and by so treating them as to permit their safe release to the community. A camp program is operated to provide useful work in a minimum custody setting for carefully selected inmates who are expected to benefit from this experience.

Program and Performance

This institution was established in 1945 and activated in 1946 at its present 907-acre site in temporary military type barracks. These will remain in use in 1959-60. When materials became available, construction was started on the permanent facilities which were completed in 1951. The new North Facility with 1,200 capacity was completed and activated in October, 1958. An inmate work crew and some inmate population were immediately transferred. The population will be increased until June 30, 1959, when the full population of 600 Youth Authority wards and 600 Department of Corrections inmates in the younger age group will be reached. At that time the institution will operate with full capacity of 3,305 inmates.

Correctional treatment planned for inmate rehabilitation includes vocational and academic education programs, industrial work, plant maintenance training, and one of the largest agricultural enterprises in the department. Group counseling, religious

programs and recreational activities also play an important role.

One cell wing is used as an adjustment center, housing inmates with severe behavior problems.

Institution population in 1959-60 may be described in general by the following characteristics.

Adult felons:

Median age, 27.1 years; around 34 percent prior prison commitments; 21 percent prior escape records; offense groupings will include about 20 percent narcotics, 20 percent burglary, 24 percent robbery, and 13 percent forgery and checks.

Youth Authority Wards:

Median age, over 20 years; 89 percent prior commitments; offense groupings will include 30 percent robbery, 23 percent burglary, around 10 percent auto theft, and over 10 percent narcotics.

In addition the institution is responsible for the administration of 3 year-round state forestry camps with a permanent camp population of 150. A 31-man seasonal honor camp will be operated in the summer of 1959 for the United States Forest Service. These camps, manned by specially selected minimum custody inmates, serve the public in the conservation of the

g Composed of savings in salaries and wages, \$7,487; operating expenses, \$44,857; equipment, \$796; inmate pay-work projects, \$645; and excess reimbursements, \$12,643.

GENERAL ANALYSIS

Objectives

The Deuel Vocational Institution provides custody, care, industrial, vocational, and other training, guidance, and reformatory help for young men too mature to be benefited by the programs of correctional schools for juveniles and too immature in crime for confinement in prisons.

theft, and about 9 percent narcotics. Population and release of inmates from Deuel Vocational Institution are as follows:

Average Population:	1957-58	1958-59	1959-60
Adult felons -----	419	500	825
Youth Authority -----	641	595	595
Reception-guidance center			
(Youth Authority) -----	141	180	180
Totals -----	1,234	1,335	1,600
Paroles and Discharges:			
Adult felons -----	149	175	200
Youth Authority -----	721	850	800
Totals -----	870	1,025	1,000
Reception-guidance center			
(Intake for processing) --	1,270	1,225	1,790

Program and Performance

This institution was created in 1945 as the California Vocational Institution. In 1951 the Legislature changed the name to the Deuel Vocational Institution. The institution originally operated at Lancaster in temporary military quarters and moved to the present permanent 780-acre location at Tracy in 1953. A reception-guidance center for Youth Authority wards is operated within the institution.

Treatment is designed to rehabilitate young offenders committed both to the Youth Authority and the Department of Corrections. Academic and vocational instruction, industrial work, and training are emphasized. A research study is being conducted by the Pilot Intensive Counseling Organization (PICO) to determine scientifically the results of intensive counseling. A special program for young men with severe behavior problems is operated in the adjustment center. A group counseling program staffed generally by volunteer leaders under trained management provides a media wherein the majority of the inmate population have an opportunity to review with their peers the causes of delinquency.

Institution population in 1959-60 may be described in general by the following characteristics:

Adult Felons:

23.2 percent under 21 years of age; median age 23.9 years; 5.2 percent serving life sentences; 33.3 percent prior prison commitments; offense groupings will include 29.8 percent robbery, 18 percent forgery and checks, 15.9 percent burglary, and over 8.4 percent narcotics.

Youth Authority Wards:

Median age approximately 19.5 years; 39.6 percent prior commitments; offense groupings will include over 26 percent burglary, approximately 20 percent robbery, 16 percent auto

A total of 20 new positions are included in the 1959-60 Fiscal Year. 1 clerical position is to handle increased workload in the superintendent's office; 2 correctional sergeants are included to provide custodial supervision in the housing areas due to an increase of 400 inmates over 1958-59 programmed population; 1 correctional officer is included for custodial coverage in the housing areas; 3 correctional officers are included to supervise additional inmate work crews; 2 correctional officers are included on a temporary basis for yard coverage during the construction period of the new reception-guidance center; 1 correctional sergeant and 2 correction officers are the required relief; 1 clerical position is included to handle increased workload in the mail office; 1 professional position and 2 clerical positions are for increased workload in the classification and parole function; 2 vocational instructors are included to provide program for increased population; 1 professional and 1 clerical position are for increased workload in the reception-guidance center function. These proposed positions are discussed in the General Analysis, Departmental Summary. (See pages 60-63.)

GENERAL ANALYSIS

Objectives

The Institution for Women receives and confines all types of female prisoners committed to the Department of Corrections and so treats them as to permit their safe release to the community.

Program and Performance

The Institution for Women was established in 1933 near Tehachapi, in Kern County, and in 1952 moved to its permanent 120-acre site in San Bernardino County northwest of Corona. The present institution is designed to house 681 inmates. The average population in 1959-60 is estimated to be 742.

Correctional treatment designed to rehabilitate the inmate includes courses of academic and vocational instruction, group psychotherapy and counseling, medical and dental care, religious, library, and recreational activities. There is also an active industrial program, mainly the manufacturing of garments, plus such sewing projects as designing, dressmaking, alterations, and tailoring.

Institution population in 1959-60 may be described in general by the following characteristics: median age 32 years; 25 percent prior prison commitments; 3 percent serving life sentences; offense groupings will include 33 percent forgery and

checks, 27 percent narcotics, over 10 percent homicide, and over 10 percent thefts other than auto thefts.

Population and release of women from this institution are as follows:

	1957-58	1958-59	1959-60
Average population-----	655	695	742
Paroles and discharges-----	285	277	322

A total of 10.5 additional positions are included in the 1959-60 Fiscal Year as follows: 1 professional position for increased workload in the business office; 1 women's correctional supervisor for custodial coverage of the clinic and receiving areas; 1 women's correctional supervisor for custodial coverage of the educational area; and 1 women's correctional supervisor for the required relief. The medical programs include 1 physician and surgeon and 1 clerical position, presently authorized until June 30, 1959, on a permanent basis to handle the demonstrated workload; 0.5 dentist for increased dentistry workload; 1 nurse for the clinic operation and 1 nurse for the required relief. 2 maintenance positions are included to service an increased square footage in structures and expanded sewage disposal system. These positions are discussed in the General Analysis, Departmental Summary. (See pages 60-65.)

^e Composed of savings in salaries and wages, \$676; operating expenses, \$1,019; equipment, \$102; inmate pay-work projects, \$8; and excess reimbursements, \$364.

GENERAL ANALYSIS

Objectives

The Adult Authority consists of 7 members, each of whom is appointed by the Governor, with the advice and consent of the Senate, for a term of 4 years.

The Adult Authority is the term-setting and parole-granting agency under the Indeterminate Sentence Law of California for the adult male felons serving terms in the state penal institutions. They are fundamentally concerned with the correctional treatment and rehabilitation of adult male felons.

They serve as members of the State Board of Corrections and as an advisory pardon board to the Governor on matters of executive clemency. In their regularly scheduled meetings with the Director of Corrections, the Adult Authority advises and recommends general and specific policies and procedures related to the diagnosis, classification and treatment of prisoners.

Program and Performance

The Adult Authority meets at each of the state prisons regularly and conducts hearings by dividing into 3 panels meeting simultaneously to set terms, grant paroles, to consider determination and forfeiture of credits, and restoration of civil rights to inmates.

The Adult Authority meets weekly to consider reports and recommendations from the Division of Adult Paroles and makes decisions as to revocation of parole and return to prison, restoration of civil rights, reinstatements, and fixing of terms.

The total number of cases reviewed by the Adult Authority for the Fiscal Year 1957-58 was 15,945, an estimated 16,500 cases during the 1958-59 Fiscal Year and approximately 17,500 cases in 1959-60.

1 clerical position is included to meet the increase in workload. This position is discussed in the General Analysis, Departmental Summary. (See page 63)

GENERAL ANALYSIS

46	Objectives				
47					
48	The Board of Trustees, California Institution for Women, is				
49	responsible under the Indeterminate Sentence Law for fixing				
50	the terms of adult female felons and the granting or revoking				
51	of parole to such women. The board is also responsible for				
52	administration of the Women's Parole Division which super-				
53	vises all adult female felons released on parole from the Insti-				
54	tution for Women and those women released from other co-				
55	operating states to parole programs in California. It also may				
56	advise the Director of Corrections on general policies for the				
57	maintenance and operation of the California Institution for				
58	Women and the care, custody, treatment, training, discipline,				
59	and the employment of women confined at the institution. The				
60	objective of the board is the protection of society by the setting				
61	of appropriate terms, careful selection of those women to be				
62	released on parole and their proper supervision while on parole.				
63					
64	Program and Performance				
65					
66	The Board of Trustees consists of 5 members, 3 of whom				
67	shall be women. They are appointed by the Governor, with the				
68	advice and consent of the Senate, for a term of 4 years. The

DEPARTMENT OF THE YOUTH AUTHORITY

GENERAL ANALYSIS

Objectives

The objectives of the Youth Authority are first, the protection of society more effectively by substituting for retributive punishment, training and treatment directed toward the correction and rehabilitation of young persons declared wards for delinquent causes or found guilty of public offenses; and second, prevention of the occurrence of delinquency. In addition, the department encourages improvements in juvenile law enforcement and probation and increased use of county juvenile homes and camps.

Program and Performance

The department of the Youth Authority was originally conceived as the Youth Correction Authority by the Legislature in 1941. Amendments to the original law in 1943 created the present Department of the Youth Authority and gave it responsibility for the administration of the State's correctional schools and parole program for youths. The law also provided that commitments could be made to the Youth Authority by judges of the superior court sitting in juvenile court or in criminal court and judges of the municipal court after they had determined that the ward was under 21 years of age at the time of apprehension, and that there was no program at the county level to meet the special needs of the individual.

The Director of the Youth Authority is the chief administrative officer of the department and chairman of the Youth Authority board. He is directly responsible for the management of the state correctional schools, reception center-clinics, Youth Authority camps for boys, and for the operation of the field services and branch offices. He is responsible for the custody, care, treatment, training, discipline, welfare, and supervision of wards committed to the Youth Authority, whether in the institutions or on parole in the community.

The Youth Authority board is concerned with acceptance or rejection of wards committed to the Youth Authority, with parole and discharge of wards. It also works with the director in formulation of policies concerning classification, transfer, training, and treatment of wards.

The years between 1941 and 1943 gave the Youth Authority time to develop a plan of organization and a pattern for diagnosis, training and treatment, and community organization. The 3 institutions transferred to the Youth Authority in 1943—Preston School of Industry, Fred C. Nelles School for Boys, and Ventura School for Girls—have increased to 6 institutions, 2 reception center-clinics, and 3 Youth Authority camps for boys. The first 400-bed unit of a new institution for older boys is scheduled for completion and occupancy in January, 1960. This new institution, the California Youth Training School, is located near Ontario. A new Ventura School for Girls is also planned to replace the present school which was constructed in 1917 as a temporary institution. The first 300-bed increment of this new facility is scheduled for occupancy in January, 1961.

The Department of the Youth Authority centralized parole services by shifting the operation from the 3 original institutions into a separate bureau responsible for continuing the treatment and supervision of the ward after his release from a correctional school and return to the community. Branch offices have been opened in a number of the larger cities to provide for more efficiency and better service in this function. Institution and parole operations are carefully co-ordinated in the interest of maintaining 1 continuous program of rehabilitation and training for each ward.

During 1959-60 the facilities of the Department of the Youth Authority will have an estimated average daily population of 3,142. These facilities include 2 reception center-clinics, 5 schools for boys, 2 schools for girls, and 3 Youth Authority camps for boys. In addition, an average of 1,395 wards will be in Department of Corrections facilities. Also, during 1959-60 the Youth Authority will supervise an estimated average parole caseload of 9,269 as compared with 7,306 during 1957-58.

The Bureau of Probation and Delinquency Prevention Services has a program to develop an awareness of the value of local delinquency prevention programs and the need for adequate community services and assists in improving them. Training programs are provided for probation officers, counties are assisted in developing plans for new camps and juvenile halls, the Interstate Compact for Juveniles is administered, and publica-

tions are developed directed toward improving the quality of local services. Increased level of assistance to local governments, including 4 positions, is proposed in the budget year expenditures.

The Department of the Youth Authority's institutional program for handling the wards committed to it by the various counties includes:

Diagnosis: A diagnostic study and evaluation is made of each ward committed to the Youth Authority. This study and evaluation, made during the ward's stay in a reception center-clinic, is for the purpose of diagnosing the cause of the ward's delinquency and making recommendations for a program of individualized education and treatment to correct the ward's behavior pattern. This study and evaluation results in a recommendation of the degree of custodial supervision required, educational needs, medical and dental care, psychological or psychiatric therapy needed to treat the ward's mental and emotional needs, religious training, and other programs that will aid in the ward's return to society as a useful citizen.

Treatment: The correctional programs carried on in the institutions are designed to enable the Youth Authority to achieve the high degree of training and treatment in the institutional setting and to guide the ward in the development of good moral standards.

Special Treatment Program: The 1957 Legislature gave the Youth Authority the responsibility for the custody and treatment of a group of wards who have severe emotional and behavioral problems who are in need of professional, psychiatric-type treatment. The department was not previously equipped to handle both a custodial training program and psychological and psychiatric therapy services. Staff was authorized for the Diagnosis and Treatment Division for the planning, control, and supervision of this program. Preston School of Industry and the Los Guilucos School for Girls have been authorized staff for the first 2 treatment units. Permanent treatment buildings designed to handle this special type of ward are scheduled for completion during the 1959-60 Fiscal Year at these 2 institutions.

Expansion of this program to Fred C. Nelles School for Boys is proposed for the 1959-60 Fiscal Year in the amount of \$93,270, comprising \$72,930 for salaries and \$20,350 for operating expense and equipment. This expansion requires a new building which will not be completed until March, 1960. The full year cost of the special treatment program proposed will be approximately \$120,000.

Facilities being completed during the 1958-59 Fiscal Year for additional population include a 50-boy living unit at Preston School of Industry. Presently financed construction to be completed in 1959-60 includes the following: Youth Training School—the initial 400-bed increment; Preston School of Industry—100-bed special treatment program unit; Los Guilucos School for Girls—40-girl special treatment program unit.

Funded construction scheduled for completion in the 1960-61 Fiscal Year includes the second 400-boy increment at the Youth Training School and the first 300-girl capacity facilities at the new Ventura School for Girls.

Other departmental programs include: assistance to counties for maintenance of juvenile homes and camps. This Youth Authority administered program provides for the State to share in the cost of operating county juvenile homes and camps caring for wards who could otherwise be committed to the Youth Authority. At the end of the 1959-60 Fiscal Year it is expected that there will be 42 county-operated homes and camps. It is estimated that an average of 2,213 boys and girls will be housed in these facilities during this fiscal year. The 1957 Legislature, in order to encourage the construction and operation of county juvenile homes and camps, provided for the State to reimburse the counties for one-half the cost of construction not to exceed \$3,000 per bed. The camps are restricted to a maximum capacity of 100 wards. The Youth Authority is charged with responsibility for establishment of standards and the administration of this state aid. Total funds now available and proposed are sufficient to finance the State's share of 1,330 additional beds.

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

MAJOR PROGRAM AUGMENTATION AND COSTS

The following summary accounts for the \$2,124,833 (15.8 percent increase in 1959-60 expenditures over 1958-59). Increases are mainly for additional workload due to operation of

new facilities and increased parole caseload, and for extension of the special treatment program and improved probation and delinquency prevention program.

Additional personnel for staffing new facilities:

a. New youth training school (187.9)	\$551,678
b. Preston School of Industry—2 additional dormitories (18.5)	45,606
c. Los Guilucos School for Girls—additional dormitory (7)	16,458

\$613,742

Additional personnel for institution workload changes:

a. Increased intake of wards (8.9)	\$37,378
b. Positions in accordance with established workload standards (2)	11,544
c. Administration, housekeeping and plant operation (14)	50,176

\$99,098

Specialized treatment program at Fred C. Nelles School for Boys (21) 72,930

Parole positions for increased parole population (26.5) 90,414

Improved probation and delinquency prevention program (4.5) 23,625

Additional personnel for increased workload in Departmental Administration (10) 46,476

Net cost of authorized positions due to full-year operation of new facilities, merit salary adjustments, and improved employment conditions 320,241

Changes in operating expenses and equipment:

a. Increases in feeding, medical care, education, parole costs, and utilities primarily due to population increases and new facilities	529,935
b. Other items of operating expenses	118,799
c. Increase in equipment	65,159

Decrease in reimbursements 11,191

Increase in contributions to State Employees' Retirement Fund 91,010

Other current expenses reflecting increased number of paroles 42,213

SUMMARY OF PROPOSED NEW POSITIONS

The following 300.3 proposed new positions at a cost of \$946,285 are included in the various institution budgets and Departmental Administration. This includes 187.9 positions at the new Youth Training School which are discussed as a group. The other positions are discussed here in the functional grouping in which they are to be used.

Youth Training School

187.9 Positions \$551,678

187.9 positions are proposed in the areas of custodial and personal care, classification and counseling, education and religion, medical care, food preparation, clothing distribution, plant maintenance, business services and institution administration. Positions are budgeted on the basis of approved staffing formulas, comparability to staffing authorized for similar functions at other institutions, and if not based on either of these, minimum requirements due to considerations of physical plant, type of ward, institution program and organizational structure.

The effective dates of the new positions are based on the availability of the institution in December, 1959, the receiving of wards beginning in January, 1960, and estimated population build-up to the initial 400-boy capacity in April, 1960. Generally, the positions have been phased to permit 1 month minimum time for recruitment, orientation and training prior to the arrival of the wards.

Youth Authority Board

1 Hearing representative \$8,520

This position is included to assist in meeting the growing workload of the Youth Authority Board. The 1957 Legislature provided for this method of hearing cases by amendment to Section 1711.5 of the Welfare and Institutions Code. This position will also provide the basis for developing new policies and methods of operation in anticipation of future workload of the board.

Probation and Delinquency Prevention Services

1 Consultant in juvenile camps \$6,060

This position is included on a workload basis to provide adequate inspection to assure maintenance of standards and to provide advisory services to the counties for the increasing number of juvenile homes and camps which receive both maintenance and construction subsidies from the State. The State expenditures for both these programs in 1959-60 Fiscal Year are \$4,532,960, including funds available from prior appropriations for construction.

1 Consultant in juvenile control 6,060

This position will provide improved services for the encouragement of the establishment and expansion of police juvenile bureaus and improving the practices of existing bureaus. At present there are approximately 192 full-time juvenile bureaus. It is estimated that there are a like number of jurisdictions without full-time juvenile bureaus. It is expected that with a second position more requests for assistance in this area can be met.

2 Field representatives \$12,120

These positions are included in the budget to increase the level of service sufficient to allow each field representative about one-fourth time to devote to community council organization. At present there are 6 field representatives for all the activities of the bureau. The addition of 2 positions will provide the equivalent of 2 man-years for this type of effort, since each of the 8 positions will devote about 25% of its time to this service. At the present time there are over 200 community councils in California. It is expected that 500 could be activated with additional encouragement and support from this bureau.

2 Intermediate stenographer-clerk 7,260

These positions are included for clerical help to the 4 professional positions in accordance with the current staffing formula.

6 Total \$31,500

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Custody

1	Head group supervisor	\$3,030
2	3 Senior group supervisor	7,110
3	15 Group supervisor	32,220
4	2.4 Temporary help (hospital)	10,396
5	21.4	\$52,756

1 head group supervisor is included at Ventura School for Girls to be effective 1 year prior to the occupancy of the new school institution to provide sufficient staff time for planning the operation of the new facility. This will provide staffing comparable to other 300-capacity institutions, the size of the initial development of the new institution.

2 senior group supervisors and 11 group supervisors at Preston School of Industry and 1 senior group supervisor and 4 group supervisors at Los Guilucos School for Girls, together with positions now authorized for use in existing dormitories, will provide 5 post coverage for special treatment living units to be occupied in January, 1960.

2.4 temporary help positions (hospital) will provide coverage at Fred C. Nelles School for Boys in this area during peak population periods. When the population of the school exceeds 317 these positions will be used to provide sufficient coverage to temporarily use vacant beds in the hospital. When the population returns to the institution's normal capacity the positions will be held vacant.

Parole Services

2	Parole agent III	\$11,647
3	3 Parole agent II	16,624
4	15.5 Parole agent I	42,594
5	1 Senior stenographer-clerk	3,079
6	5 Intermediate stenographer-clerk	8,970
7	Parole agent reclassifications	7,500
8	26.5 Total	\$90,414

1 parole agent II is included to meet the increased workload of the Interstate Unit and to reduce to a minimum the number of wards waiting in Youth Authority facilities for out-of-state placement.

0.5 parole agent is required to handle institution parole agent duties at the State Prison at Soledad where 600 Youth Authority wards are housed. 25 positions are included for the Bureau of Paroles to provide for increased parole caseload in accordance with currently authorized caseload ratios.

\$7,500 for parole agent reclassifications is included to provide funds to convert parole agent I positions into parole agent trainee positions on the basis of 1 regular position to 2 training positions. This will provide a method of recruiting and training new parole agents to meet a rapidly expanding workload situation.

Special Treatment Program

1	Psychiatrist II	\$10,860
2	1 Supervisor of special treatment	7,356
3	2 Clinical psychologist II	6,672
4	1 Supervising social worker	6,060
5	7 Senior social workers	18,320
6	3 Group supervisor	10,010
7	1 Senior stenographer-clerk	4,092
8	5 Intermediate stenographer-clerk	9,560
9	21 Total	\$72,930

These positions are included to provide for extension of the Special Treatment Program to the Fred C. Nelles School for Boys. This program is designed to meet the special needs of a group of wards who are regarded as not suited for existing Youth Authority programs because of serious personality problems or because of the need for professional therapy not now provided. This program is now authorized at Preston School of Industry and Los Guilucos School for Girls. This staff is based on the estimated 125 wards at this institution who require this type of treatment. The staff is comparable to that provided at the Los Guilucos School for Girls for the same number of cases. The 3 group supervisors will provide 1 additional post in each of 2 existing living units which will be used to house wards in the special treatment program at the Fred C. Nelles School for Boys.

Administration and Personnel

1	Administrative assistant II	\$7,356
2	1 Intermediate stenographer-clerk	3,630

These positions are proposed to assist the Chief, Administrative Services Division and other division staff in meeting increased workload added in recent years. This includes overall departmental growth and resultant increased administrative services workload, the county juvenile home and camp construction subsidy program and transfer of the department's major construction program responsibility to this division.

1	Intermediate clerk	3,456
---	--------------------	-------

This position for the mail and supply room is included in Departmental Administration on a workload basis due to substantial increases in mail volume and other workload related to mail and supply room operation, and the separation of Sacramento headquarters staff into three floors of one building and another separate building.

1	Intermediate clerk	3,456
---	--------------------	-------

This position, in the accounting office of the ward's trust account section, is included in Departmental Administration on a workload basis to meet anticipated increase in volume due to a 25% increase in the average number of wards on parole. This unit also is responsible for trust accounts of three institutions and trust funds from Social Security, Veterans Administration and other special trusts. A number of other functions in this section are also experiencing increasing workload demands.

1	Intermediate typist-clerk	3,456
---	---------------------------	-------

This position is included in Departmental Administration on a workload basis to meet the growing volume of typing that has developed and is anticipated with the increased volume of accounting work due to increasing number of wards and a new institution.

1	Intermediate typist-clerk	3,456
---	---------------------------	-------

This position is included for the personnel office in Departmental Administration to meet existing workload due to increased number of employees in accordance with the current staffing formula. At present the problem is met by continuous overtime by the existing staff.

2	Temporary help—new school	10,000
---	---------------------------	--------

These funds will be used at the Ventura School for Girls for employment of additional clerical staff, a storekeeper, and paid overtime to present employees to meet the workload of preparing for the opening of a new institution while continuing the operation of the present one.

1	Intermediate stenographer-clerk	3,540
---	---------------------------------	-------

This position for Los Guilucos School for Girls is included on a workload basis to provide clerical assistance for the assistant superintendent, head group supervisor, and occasionally the assistant head group supervisors.

9	Total	\$38,350
---	-------	----------

Research Division

1	Intermediate clerk	\$3,456
---	--------------------	---------

This position is included to meet the increase in workload in the population accounting and reports section due to increased institution and parole population. It is estimated that year-end institution and parole population will increase 25 percent over the 1957-58 Fiscal Year.

Reception Center Diagnosis

1	Senior social worker	\$5,496
---	----------------------	---------

This position is included at the Northern Reception Center and Clinic on the basis of the established workload standard of 6 hours per case processed by the reception center clinics.

Education and Religion

4	Youth Authority teacher	\$14,880
3	Arts and crafts teacher	9,108
1	Instructor in landscape gardening	5,772
1	Instructor in painting	5,772

9	Total	\$35,532
---	-------	----------

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

SUMMARY OF PROPOSED NEW POSITIONS—Continued

Education and Religion—Continued

2 Youth Authority teachers and 2 arts and crafts teachers at Preston and 1 Youth Authority teacher and 1 arts and crafts teacher at Los Guilucos are proposed for assignment to special treatment units. The additional wards in these units and the assigned teachers are excluded from budgeting formulas used in determining other educational program staffing. 1 instructor in landscape gardening and 1 instructor in painting are included at Paso Robles School for Boys in order to provide additional staffing on the basis of the established workload standards for an increasingly younger population and to allow the wards to effectively assist in the painting and grounds maintenance of the institution. 1 Youth Authority teacher at Paso Robles School for Boys is requested on a workload basis, outside the formula, to assist the supervisor of academic instruction in operating a school with a teaching staff of 28 including the 2 new positions in this budget. The present supervisor is not able to provide proper direction to such a large staff and perform other necessary assignments without this assistance.

Classification and Counseling

2	Parole agent I.	\$8,244
0.5	Intermediate stenographer-clerk	1,770
2.5	Total	\$10,014

These positions are included for Preston School of Industry to meet the anticipated workload increase due to population growth in accordance with the current staffing formula.

Transportation Unit

3	Transportation officer	\$9,480
0.5	Intermediate typist-clerk	1,815
3.5	Total	\$11,295

1 transportation officer is included to meet a general increase in workload and is a continuation of a position established in the current year on an emergency basis. The other 2 transportation officers are included on a workload basis largely due to the opening of the Youth Training School, increased use of the State Prison at Soledad and expansion of Preston School of Industry. The additional half-time clerk is included on a workload basis to provide the supervising transportation officer with necessary clerical help to manage the transportation operation and will result in more efficient use of the transportation officers in the movement of wards.

Food Service and Housekeeping

5	Food service assistant	\$14,940
---	------------------------------	----------

The 3 new positions included at Fricot Ranch School for Boys will completely eliminate boy help in the dishwashing and kitchen operations. The av-

300.3 Totals, Proposed New Positions..... \$946,285

SUMMARY OF OTHER INCREASED EXPENDITURES

Additional Cost—Authorized Positions

This increased expenditure is occasioned by full-year cost of positions authorized during the current year, improved employment conditions, and annual merit salary increases..... \$320,241

Operating Expenses

This 21 percent increase results from an 8 percent increase in average annual population and a 12 percent increase in parolee caseload supervision. The major items of increase are feeding, medical care, education, and those items related to parole supervision

Equipment

Increased equipment needs are primarily in Departmental Administration and are applicable to the expanded activities in probation and delinquency prevention, and in department headquarters for new

erage age of the boys at Fricot is approximately 12 years. This additional staff will allow almost all of the boys to attend full-time academic school. The other 2 new positions at Los Guilucos School for Girls will supervise food handling and preparation, and correct waste, equipment damage and unsanitary conditions.

2 Janitor \$6,588

The janitor position at Fricot Ranch School for Boys and the one at Preston School of Industry are proposed due to increased workload and are based on generally accepted workload ratios of area to be cleaned per janitor.

1 Tailor \$4,740

This position is temporarily provided at Preston School of Industry to absorb the workload in the tailor shop created by the continued high turnover and parole release rate in the 1959-60 Fiscal Year. (This position was authorized on an emergency basis in the 1958-59 Fiscal Year.)

0.5 Barber \$1,770

This half-time position is included to provide 1.5 barbers for a year-end population of 820 at Preston School of Industry. This will allow about 11 minutes per haircut on the basis of a haircut each 3 weeks.

1 Group supervisor (effective April 1, 1960)..... \$1,074

This position will provide supervision for the new clothing and linen issue and laundry building at Los Guilucos School for Girls which will be completed during March, 1960. The laundry done at this institution will be limited to the personal clothing of the wards. The flat work will continue to be done at a Mental Hygiene institution. The laundry will provide work experience for the wards of this institution. The present area available for clothing and linen sorting and distribution is being lost due to new construction. The position assigned part-time to these duties will be used full-time on housekeeping duties due to additional areas being constructed which require this service.

9.5 Total \$29,112

Plant Operation

1 Painter \$5,232

This position together with 2 now authorized will provide a minimum painting program at Fred C. Nelles School for Boys. The justification for this position is based on the cyclical painting program that is necessary to protect the State's investment in this institution and painting workload standards used by other state agencies. This school and the Preston School of Industry are the original Youth Authority institutions of this type in the State. Many of the buildings are old and require the protection given by an effective maintenance painting program.

GENERAL ANALYSIS

This division provides for the Youth Authority Board, director, administrative services, and supervision of the diagnosis and treatment, special treatment, and departmental research programs.

The Youth Authority Board is concerned with acceptance or rejection of wards committed to the Youth Authority and with classification, length of institutional training and parole periods, and formulation of policies concerning wards. Membership of the board was increased from 5 to 6 members at the 1957 Regular Session because of the increased caseload of wards committed to the Youth Authority. 1 Youth Authority hearing representative is included to assist the board in handling the increased number of commitments to the Youth Authority and increased institution and parole population.

The executive group is composed of the director, who is chairman of the Youth Authority Board, and his staff. The director is the administrative head of the department and is charged with those duties and responsibilities of the department in carrying out its objectives not specifically assigned to the Youth Authority Board.

The Youth Authority clerk and records office maintains the master files on all wards committed to the Youth Authority. This office is also responsible for recording actions taken and for orders issued by the Youth Authority Board. The workload of this office grows with any increase in commitment rate, institution bed capacity, or in the number of wards on parole.

The Research Division is responsible for research programs being developed and undertaken by the department. Basic research is planned in the fields of human behavior and in the specific field of delinquency, its causative factors, treatment and prevention. 1 additional position is included to handle increased workload in the population accounting section.

Administrative services are furnished in the fields of accounting, budgeting, personnel management, food administration, maintenance and construction, and general administration. The administrative services division also operates as the link between the department and the other agencies concerned with the financial and managerial services of the State Government. 6 additional positions are included to handle the increased workload resulting from increases in parole caseloads, additional branch offices, new or expanded institutions and the necessary planning induced by the population growth of the State. The new county juvenile home and camp construction subsidy program has also resulted in a significant increase in this division's workload.

The Diagnosis and Treatment Division is responsible for supervision and operation of the department's reception centers, institutions, and forestry camps. This responsibility includes the training and treatment program in the institutions, as well as reception, diagnostic evaluation, and transportation of wards between institutions. It also includes supervision and operation of the department's special treatment program which was started during the 1957-58 Fiscal Year. This program is designed to meet the needs of special problem delinquents who, because of emotional disturbances or other severe personality problems, do not fit into nor benefit materially from the regular treatment program. 3.5 positions are included for the 1959-60 Fiscal Year. These positions are required to provide for the increased number of wards to be transferred to and between Department of the Youth Authority facilities. 3 clerical positions are proposed for abolishment during the budget year.

These positions are discussed in the General Analysis, Departmental Summary. (See pages 107-110).

DIVISION OF FIELD SERVICES

GENERAL ANALYSIS

The Field Services Division is composed of the Bureau of Probation and Delinquency Prevention Services, the Bureau of Paroles, and the interstate unit which administers the Interstate Probation Compact and the Interstate Compact on Juveniles. The Bureau of Probation and Delinquency Prevention Services provides assistance, leadership and guidance to the counties and cities of the State in studying youth problems, and encourages them to provide more effective programs to meet their needs. It is concerned with the encouragement of improved juvenile law enforcement and probation. It also administers the program for maintenance of juvenile homes and camps. 6 additional positions are included to provide increased services to local communities in the areas of community council organization and development, juvenile control and supervision of the county camp subsidy program.

The Bureau of Paroles provides direct supervision and case-work counseling for wards of the Youth Authority who are on

parole. Parole officers make use of all available local services in directing wards toward a normal life in the community.

The integration of these 2 Youth Authority functions into the Field Services Division is recognition of the close relationship between delinquency prevention and rehabilitation, as well as the primary importance of the community in all phases of this work.

The increase in parole caseload will require 25.5 new positions which will be established as the increase is realized. This will be in accordance with the overall ratio of 55 parolees per parole officer. 1 position is included in the interstate unit on a workload basis. Actual parole population for 1957-58 and the estimated caseload for the 2 years thereafter are as follows:

	1957-58	1958-59	1959-60
Average parole population-----	7,306	8,267	9,269
Parole population end of year----	7,637	8,589	9,619

GENERAL ANALYSIS

Objectives

The Northern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Northern California. The purpose of the reception center is to receive, examine, and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

during the 1958-59 Fiscal Year. The existing administration building will provide for expansion of hospital bed space, laboratories, and office space necessary for the anticipated increase in ward population and clinical staff personnel.

Ward movement and average population at this institution are as follows:

Program and Performance

Average Daily Population:	1957-58	1958-59	1959-60
Boys -----	133	160	160
Girls -----	48	54	54
Totals -----	181	214	214

This institution's program is centered in the reception and diagnostic evaluation of boys and girls committed to the Youth Authority. A diagnostic study is made on each boy and girl to determine his delinquency characteristics, mental attitude, and abilities. Recommendations based on such study are made to the Youth Authority Board regarding type of training, treatment, and custodial program best suited to correct the causes of delinquent behavior and to return the boy or girl to society as a useful citizen. Remedial medical, dental, and initial psychiatric treatment is provided if necessary. Wards from nearby Youth Authority institutions are transferred to this facility for major surgical and limited psychiatric treatment. Limited use is made of ward help in the reception center because of the short length of stay and the intensive diagnostic evaluation program.

Parole Releases and Processed Cases

Transferred:			
Boys -----	1,132	1,280	1,280
Girls -----	286	345	345
Totals -----	1,418	1,625	1,625

1 senior social worker is included on a workload basis. This position was temporarily authorized during the 1958-59 Fiscal Year and is shown under proposed new positions for 1959-60. The position is discussed in the General Analysis, Departmental Summary. (See pages 107-110.)

A new administration building will be completed and occupied

GENERAL ANALYSIS

Objectives

The Southern California Reception Center and Clinic is a reception and diagnostic center for boys and girls committed to the Youth Authority from Southern California. The purpose of the reception center is to receive, examine and classify boys and girls for transfer to the training and treatment program best suited to correct the causes of their delinquency.

is made of ward help in the reception center because of the short length of stay and intensive diagnostic evaluation program.

Ward movement and population at this institution are as follows:

Average Daily Population:	1957-58	1958-59	1959-60
Boys -----	293	290	300
Girls -----	45	45	48
Totals -----	338	335	348

Parole Releases and Processed

Cases Transferred:			
Boys -----	2,017	1,850	1,940
Girls -----	320	345	345
Totals -----	2,337	2,195	2,285

Except for an increase in 90 processed cases, no change in workload is proposed in this budget.

GENERAL ANALYSIS

Objectives

The Youth Authority camps for boys are forestry honor camps operated jointly by the Youth Authority, for the rehabilitation of older delinquent boys, and the Division of Forestry, for the suppression of forest fires, reforestation, road construction, and general maintenance of the State's forests. Selected boys primarily in the 17 to 21 age group are sent to these camps as an intermediate step between training in an institution and return to society. These wards include both criminal court commitments from Deuel Vocational Institution and State Prison at Soledad, and juvenile court commitments from Youth Authority facilities.

Program and Performance

3 camps are operated emphasizing a work program both in the forest and in the camp. A few boys are held in each camp for operation of the kitchen, dining room, laundry, general housekeeping and building maintenance. A recreation program is conducted after working hours including activities

ranging from sports to arts and crafts. A counseling program to aid in removing the causes of delinquent behavior is conducted concurrently with the work and recreation program.

The camps are Pine Grove, located east of Jackson; Ben Lomond, in the mountains near Santa Cruz; and Mt. Bullion, near Mariposa. Mt. Bullion is a new camp which was completed and occupied during 1957. 3 small 20-boy spike camps are operated as branches of the main camps, 1 from Pine Grove and 2 from Mt. Bullion.

Ward movement and average population are as follows:

	1957-58	1958-59	1959-60
Average daily population-----	260	265	265
Parole releases-----	543	600	600

The current authorized expenditure program is continued for these camps with no proposed new positions or other significant changes.

^a Composed of savings in salaries and wages, \$24,372; operating expenses, \$15,232; equipment, \$2,080; and excess reimbursement, \$823.

GENERAL ANALYSIS

Objectives

The Fricot Ranch School for Boys is a correctional school for training, re-education and rehabilitation of delinquent boys primarily between 8 and 13 years of age. The purpose of the school is to provide a residential treatment center for the youngest and most immature boys committed to the Youth Authority, designed to return them to society as useful citizens.

Program and Performance

This institution places major emphasis upon a program of academic education and counseling. Minimum custodial standards are maintained as part of the treatment program. Because of its location in the mountainous Mother Lode country the

school is able to carry on a program of scouting, hiking, and outdoor living as part of its total rehabilitation program.

Ward movement and average population at this institution are as follows:

	1957-58	1958-59	1959-60
Average daily population	171	175	175
Parole releases	132	150	150

3 additional food service assistants are included to provide an additional post on each shift in the kitchen and 1 janitor is included on a workload basis. These positions are discussed in the General Analysis, Departmental Summary (See pages 107-110). Psychiatric services, on contract basis are provided, primarily to screen out the most disturbed wards.

^a Composed of savings in salaries and wages, \$15; operating expenses, \$11,739; equipment, \$2,173; inmate pay-work projects, \$2,236; and a loss in reimbursements of \$12,778.

GENERAL ANALYSIS

Objectives

The Fred C. Nelles School for Boys is a correctional school for the rehabilitation of delinquent boys, primarily between 13 and 16 years of age. The purpose of the school is to return the youths to society as useful citizens.

Program and Performance

The Fred C. Nelles School conducts a program of education, training and treatment designed to guide the delinquent youth into accepted behavior patterns. The educational program covers the elementary and lower high school grades and is remedial in nature. Academic and general shop programs similar to public school programs are conducted to enable the ward to return to the Public School System at the grade level commensurate with his age. A small farm and garden project is conducted to train youths who will benefit from this training.

Wards are used to help in the operation of the kitchen, dining room, and laundry, and work in the maintenance program. Training and supervision are given in these areas as a part of the total training program.

Ward movement and average population at this institution are as follows:

	1957-58	1958-59	1959-60
Average daily population	317	325	325
Parole releases	521	500	500

21 positions are included to provide for extension of the Special Treatment Program. This program is designed to meet the special needs of a group of wards who are regarded as not suited for existing Youth Authority programs because of serious personality problems or because of the need for professional therapy not now provided. This staff is based on the estimated

a Composed of savings in salaries and wages, \$556; operating expenses, \$1,481; equipment, \$963; and excess reimbursements, \$608.

15	GENERAL ANALYSIS				
16	Objectives				
17	The Paso Robles School for Boys is a correctional school for				
18	the rehabilitation of delinquent boys primarily between 15 and				
19	17 years of age. The purpose of the school is to rehabilitate these				
20	boys and return them to society as useful citizens.				
21					
22	Program and Performance				
23					
24	The Paso Robles School for Boys was established in tempo-				
25	rary buildings on the old Estrella Army Air Base in 1947. The				
26	first units of permanent construction were occupied in 1954. 2				
27	50-bed dormitories, vocational shops and other related buildings				
28	were completed and occupied during the 1957-58 year. This com-				
29	pletes currently authorized expansion at this institution.				
30	The rehabilitation process is carried out through a program				
31	of education, training, counseling, and treatment designed to				
32	guide boys into acceptable behavior patterns. The education pro-				
33	gram is both academic and prevocational. It is remedial in				
34	nature and covers junior and senior high school subjects with				
35	provision for graduation from high school for those who success-				
36	fully complete the required courses. The prevocational phase of				
37	the program was expanded during the 1957-58 year with the				
38	completion of additional shop units.

A small farm and garden operation is conducted as part of the education program to train boys interested in this field. The farm program furnishes eggs, poultry, and pork to the school as well as a limited amount of fresh vegetables. Boys are used to help in operation of the kitchen, dining room, laundry, shop repair, and maintenance of the institution. Training and supervision is given in these areas by tradesmen as part of the total rehabilitation program.

Ward movement and average daily population at this institution are as follows:

	1957-58	1958-59	1959-
Average daily population-----	349	445	445
Paroles-----	585	650	650

New positions include 1 Youth Authority teacher and 2 instructors in vocational education based on increased workload. Increases in the blanket positions include 0.4 man-years over time for supervision of visiting room. These positions are discussed in General Analysis, Departmental Summary. (See page 107-110)

GENERAL ANALYSIS

Objectives

The Preston School of Industry is a correctional school for the custody, training and treatment of delinquent boys, primarily between the ages of 17 and 21 years. The purpose of the school is to rehabilitate these youths and return them to society as useful citizens.

Program and Performance

The Preston School of Industry conducts an educational program in three general areas. These are:

1. Academic instruction for wards that are educationally retarded from 3 to 5 years behind the educational level commensurate with their chronological age. The program is of elementary and high school level, including graduation from high school for those successfully completing the necessary courses.
 2. Vocational training program giving training in various trades, such as printing, auto mechanics, cabinet work, electrical work, sheet metal, and others.
 3. Farm program with basic education in operations of a dairy, poultry unit, hog ranch and field crops.
- Wards are used to help in the operation of the kitchen, dining room, laundry and maintenance program. Training and

supervision are given in these areas as a part of the total program.

A program of counseling to understand and remove the causes of delinquent behavior is conducted concurrently with the education and custodial program.

A program for special treatment of wards with serious personality problems or in need of psychiatric-type therapy was placed in operation in temporary quarters during the 1957-58 Fiscal Year. Permanent quarters including 2 special treatment dormitories are scheduled for completion during 1959-60.

Average ward population and paroles at this institution are as follows:

	1957-58	1958-59	1959-60
Average daily population-----	701	753	800
Released on parole-----	1,337	1,250	1,300

New positions include 13 custodial positions and 4 teachers for the psychiatric treatment unit which will be occupied January 1, 1960. 2 classification counselors, a half-time stenographer-clerk, 1 tailor, a half-time barber and 1 janitor are included, based on increased population and workload. These positions are discussed in the General Analysis, Departmental Summary. (See pages 108-110.)

^a Composed of savings in salaries and wages, \$12,279; operating expenses, \$8,259; equipment, \$2,905; and excess reimbursements, \$1,145.

^b Composed of savings in salaries and wages.

^c Includes apportionments to the local school district of \$121,089 in 1957-58 and \$114,000 estimated in 1958-59 for Waterman High School program.

GENERAL ANALYSIS

Objectives

The Youth Training School is a correctional facility for the rehabilitation of delinquent boys primarily between 17 and 21 years of age. The purpose of the school is to rehabilitate these wards through an emphasis on vocational training with meaningful work experience and return them to society as useful citizens.

Program and Performance

The Youth Training School is located near Ontario, California. The first units of permanent construction are scheduled for completion and occupancy on January 1, 1960. The construction program is planned in 3 phases. Phase I provides for one 2-story, 400-bed housing unit, administration and hospital building, vocational shops, academic school, kitchen and commissary, boiler plant and other related buildings. Phase II provides for the second 400-bed housing unit and expanded facilities for the vocational shops and academic classrooms. Phase III is included for funding in the 1959-60 Capital Outlay Budget and provides for the third 400-bed housing unit, expanded facilities for office space in the administration building, and additions to the commissary. Phase IV will provide the balance of the buildings necessary for the full 1,200 capacity program. The remaining necessary buildings have short construction periods and will be included for funding in the 1960-61 Fiscal Year Budget.

The rehabilitation process is carried out through an intensive program of education, training, counseling and treatment designed to guide young adults into acceptable behavior patterns. The program is designed to give wards pre-employment training in the various vocational fields and to provide an opportunity for completion of the requirements for high school graduation. The vocational training program consists of 2 major divisions: formal vocational instruction; and related work experience in maintenance and operation of the institution. The work experience program will be conducted in 2 major areas: plant maintenance and operation, and food service. The auxiliary functions vital to institutional administration will be performed by wards under close supervision of journeyman instructors in a program generally consisting of one-half day vocational training in the shops and one-half day related work experience.

End of the quarter population at this institution is as follows:

1959-60 FISCAL YEAR			
1st Quarter	2d Quarter	3d Quarter	4th Quarter
-	-	350	400

A total of 187.9 new positions are included in the 1959-60 Fiscal Year related to activation of the new institution. These positions are discussed in the General Analysis, Departmental Summary. (See pages 108-110.)

GENERAL ANALYSIS

Objectives

The Los Guilucos School for Girls is a correctional school for the rehabilitation of the younger delinquent girl. The school resident population includes girls between the ages of 10 and 17. The purpose of the school is to rehabilitate these girls and to return them to society as useful citizens.

Program and Performance

The Los Guilucos School for Girls was established in October, 1943, in The Pythian Home for the Aged near Santa Rosa. This was a wartime expedient with plans for a permanent school to be located eventually on this site. The first increment of permanent construction was occupied in May, 1952. Construction and remodeling is still in progress at the school. Special Treatment Program Units are being constructed with completion and occupancy scheduled in January, 1960.

The program is primarily educational and stresses academic instruction, home economics, and arts and crafts. A counseling program to remove the causes of delinquent behavior is conducted concurrently with the education and custodial program. The academic course is remedial in nature and includes elementary, junior high and high school subjects, with provision for graduation from high school for those who successfully complete the required courses.

Girls are used to help in operation of the kitchen, dining room, hospital, and dental unit as part of the total program. Girls are responsible for housekeeping in the dormitories and also assist the housekeepers in maintenance of less critical areas of the school.

Organization and operation of a Special Treatment Unit Program to treat girls suffering from severe personality disturbances or in need of psychiatric-type therapy was authorized beginning November 1, 1957. The treatment staff is being housed in temporary quarters during construction of permanent units.

Average ward population and releases at this institution are as follows:

	1957-58	1958-59	1959-60
Average daily population-----	208	210	223
Parole releases-----	271	300	300

Staffing for the new Special Treatment Units includes 5 group supervisors and 2 teachers.

Workload positions included in this budget are: 2 food service assistants to provide proper supervision in the kitchen and to provide adequate assistance to the cooks, 1 group supervisor for the new laundry unit, and 1 stenographer-clerk for the assistant superintendent and the head group supervisor's clerical workload. These positions are discussed in the General Analysis, Departmental Summary. (See pages 108-110.)

GENERAL ANALYSIS

Objectives

The Ventura School for Girls is a correctional school for rehabilitation of the older delinquent girls, primarily in the 16 to 21 age group. The purpose of the school is to rehabilitate girls and return them to society as useful citizens.

Program and Performance

The Ventura School for Girls conducts a program of educational training and counseling to treat the causes of delinquent behavior. The education department offers a remedial program at the junior and senior high level, with graduation from high school for those who successfully complete the required courses.

A vocational training program is emphasized to prepare girls for employment when paroled. Training is given in practical nursing, laundry operation, production sewing, stenography, accounting and related clerical work. A co-operative effort with the State Department of Employment, directed by a vocational counselor, seeks to make the educational program fit these girls for work when paroled.

The girls at this school live in cottage-type dormitories which are equipped with individual kitchens and dining rooms, the cooking being done by girls under supervision, instead of the central kitchen standard in other Youth Authority institutions.

The present plant is old and in very poor condition requiring continuing maintenance. Custodial costs are high because of the relatively small capacity of the dormitories. A new institution is in the planning stage and will be under construction during the 1959-60 Fiscal Year.

Paroles and average ward population at this institution are as follows:

	1957-58	1958-59	1959-60
Average daily population	187	187	187
Paroles	294	275	275

1 head group supervisor is included to permit planning in regard to the new institution. \$10,000 is included for temporary help to provide for preparation of the opening of the new school. These positions are discussed in the General Analysis, Departmental Summary. (See page 108.)

A vocational testing program initiated in 1955 has been completed. The final report is being prepared and will be evaluated prior to July, 1959. The 2 positions related to the vocational test are included subject to a favorable evaluation of the test report.

a Composed of savings in salaries and wages, \$31,558; operating expenses, \$9,650; equipment, \$2,463; and excess reimbursements, \$219.

GENERAL ANALYSIS

The Department of Education, under the direction of the Board of Education, seeks to insure that all children of the State have an opportunity to attend the Public School System, and that once enrolled, they receive adequate instruction by qualified teachers. The department also operates a statewide system of colleges to offer qualified students instruction leading to careers in teaching and vocations. Preliminary training in the professions is also offered. Physically handicapped children and adults may receive an education, physical rehabilitation services or sheltered employment through the special schools and institutions operated by the department.

The department also administers joint federal-state programs dealing with the distribution of surplus commodities for educational purposes as well as administering jointly financed educational programs.

The department is divided into 6 divisions to handle specific areas of responsibility; Departmental Administration, Public School Administration, Instruction, State Colleges and Teacher Education, Special Schools and Services and the Division of Libraries which for budgetary purposes is a separate unit. The program of each division is discussed in conjunction with its detailed budget presentation.

DIVISION OF DEPARTMENTAL ADMINISTRATION

GENERAL ANALYSIS

The primary function of the Division of Departmental Administration is to furnish executive, accounting, personnel, research and legal services to the Department of Education, and to administer the program of teacher certification for the public schools. The Division of Departmental Administration is administered by a deputy superintendent of public instruction.

All applicants for credentials must file fingerprints with this division, and reports are furnished by the Bureau of Criminal Identification on those applicants who have an arrest record. This record is reviewed by a field representative to determine if the applicant's record is such that he cannot hold a California Teaching Credential. Since the reports generally indicate only the arrest record of an applicant, it is necessary to secure reports of the disposition of the case. In addition, the division is responsible for the investigation of noncertificated personnel, which has increased the regular investigative assignments.

To perform the clerical work in connection with investigation of noncertificated personnel, a clerical position was added during 1958-59, and this budget requests continuation of the position.

An additional responsibility of this division is the program to assist and advise local school districts in problems relating to racial, religious, or other discrimination in connection with the employment of certificated personnel, created pursuant to Section 187 of the Education Code.

The Accounting Office of the division administers certain trust funds, and provides the usual budgetary, purchasing, and internal auditing services. The accounting functions for the state colleges, special schools and California Industries for the Blind are performed by those respective agencies. The expenditures of the State Board of Education are included in and administered through the departmental budget.

The Personnel Office administers the personnel program of the Department of Education. That section of the Personnel Office dealing with the state colleges and special schools is staffed at a level of 1 clerk per 1,500 employees. It is estimated that the number of employees in the special schools and state colleges will reach 10,500 by January 1, 1960.

^a Expenditures from bond funds not included in budget totals.

The Administrative Advisor's Office acts as legal advisor to the Superintendent of Public Instruction and his staff, the State Board of Education, and to the staffs of the state colleges, special schools and special service agencies in the department. It represents these agencies and officers in disciplinary actions, both contested and uncontested, involving disciplinary action against public school teachers and employees of the department and the state colleges. During general sessions of the Legislature, the office prepares departmentally-sponsored legislative bills, and prepares recommendations to the Governor on those bills of concern to the department. It drafts and passes on the legal adequacy of contracts, including those for the purchase of state-adopted textbooks, leases, deeds, easements, and probate documents affecting the department and the agencies under its jurisdiction.

The Bureau of Education Research is responsible for studies in the evaluation of public school curriculum, educational measurements, and in the area of school administration, such as finance, teacher preparation, class size and enrollment data. It also furnishes consultant services to school districts in advising and planning test programs. The tabulating machine section renders services to the various bureaus and divisions of the department. In the annual apportionment, the bureau assumes responsibility of the mechanical computations for the school apportionment.

The Credentials Office evaluated 129,500 applications for credentials during 1957-58. It is estimated that 142,800 evaluations will be made during 1958-59, and 156,100 evaluations will be made during 1959-60. 2 technicians and 3 clerical positions added temporarily on a workload basis during 1958-59 are requested to be continued in the 1959-60 Fiscal Year. The department's request for additional positions has not been included because it is believed that any additional workload can be absorbed by reduction in the multiplicity of types of credentials authorized. The reimbursement for this unit has been increased by \$158,000 to make it self-supporting through the 1959-60 Fiscal Year. Legislation will be introduced by the Department of Finance to increase the fee from the present \$4 to \$6.

DIVISION OF PUBLIC SCHOOL ADMINISTRATION

GENERAL ANALYSIS

The Division of Public School Administration assists school districts by rendering assistance in noninstructional areas. The services furnished include school planning, school district organization, school lunch, free textbooks, surplus federal property, the child care program, approval for veterans' training and advisory service in school finance and attendance and federal financial assistance under Public Laws 874 and 815.

The Administrative Services Bureau advises school districts on financial and administrative matters including child care centers. The bureau also reviews the audit reports of all school districts and takes appropriate action as indicated by the review. Bureau staff members average 148 days per year in the evaluation or investigation of state-controlled programs, 12 days in working with school districts on workshops and training pro-

grams, and 20 days in the preparation of manuscripts and materials.

The Bureau of School Apportionments and Reports verifies reports of school districts and compiles data for use by the public schools. The apportionments are made in 5 major stages to local jurisdictions by this unit. The bureau prepares for publication such materials as are necessary to establish and maintain uniformity of practices and procedures throughout the State in public school financial accounting. (See Local Assistance Section of the Budget for the apportionment of public schools.)

The school lunch program and the school milk program are federal grant-in-aid programs in which cash reimbursement and commodities are allocated to participating schools. The expenditures in the school lunch program and the school milk program are as follows:

Year	Federal Cash Disbursements	School Lunch Program		School Milk Program	
		Local Matching Funds	Federal Commodities	Federal Cash Disbursements

The Bureau of Textbooks and Publications is responsible for the editorial policy of all department bulletins and for administration of the free textbook program.

The increased workload experienced by the textbook distribution program during recent years has resulted in a similar increase in the clerical work of this unit relative to textbook adoptions and preparation of publication lists. It is proposed that 1 clerical position be added to the staff to keep pace with the workload. An additional change in this bureau shows the transfer of a stock clerk position from the free textbook program budget to this support function to reflect proper distribution of costs.

The Bureau of Readjustment Education approves and supervises veteran training. Federal Law (P-L 550) requires that each course for which reimbursement from the Veterans Administration is sought must be specifically approved. In return for performing this service, the bureau of readjustment education is reimbursed by the Veterans Administration for a portion of

its salary and travel expense. In addition, Sections 24201 through 24220 of the Education Code require that investigations be made to determine compliance with the requirements for authorization to issue specified diplomas as well as investigations that are necessary to determine whether or not there has been compliance with the provisions of the law in order that reports can be made to the Attorney General. 2 field representatives and 2 clerical positions were provided by Chapter 13, Statutes of 1958 (First Extraordinary Session) and are continued into the 1959-60 Fiscal Year.

The Bureau of School Planning assists and advises school districts in regard to acquisition of sites and construction of school buildings.

Due to a law change during the 1957 Legislative Session, School Building Aid Funds are now available to purchase non-fixed equipment for school districts. One field representative, added on a temporary basis during 1958-59 to accomplish this

DIVISION OF INSTRUCTION

GENERAL ANALYSIS

The Division of Instruction is the operating division through which the Department of Education co-ordinates the instructional program in the State's Public School System. In addition, the department's services for upgrading and improving the statewide instructional program are provided through this division. Although the 2 major functions of this unit are the co-ordination and improvement of instruction, its functions in specific fields vary widely. In the field of adult education, the division, as required by law, approves all adult courses offered by local districts. In connection with special education programs and in certain vocational fields, the division provides classroom supervision services and in 2 programs, police officer training and fire training, division staff members regularly organize and conduct classes.

The Bureau of Elementary education is responsible for the co-ordination and improvement of instruction in the elementary grades of the 1,505 elementary and unified districts in the State. The efforts of the bureau staff are concentrated on working with key personnel in state and regional meetings and on

the preparation of instructional materials such as teachers' guides and similar publications. Each bureau staff member averages 34 working days each year on the preparation of manuscripts and materials, 80 days in participating in state and regional meetings, 31 days in working with state and regional curriculum committees and councils, and 81 days working with the California State Central Committee on social studies. No staff time is required for programs of inspection and approvals, for accreditations, or for direct instructional services.

The Bureau of Secondary Education is responsible for the co-ordination and improvement of instruction in high schools and in this capacity works with the county superintendents and the 333 high schools and unified school districts maintaining junior, senior, and 4-year high schools. In addition, the bureau is required by law to approve the courses of study of all secondary schools. It collects and analyzes annual reports from high schools and represents the department in the accreditation of high schools. Each bureau staff member averages 31

DIVISION OF INSTRUCTION—Continued

GENERAL ANALYSIS—Continued

working days each year in programs of inspections and approvals, 30 days in working with reports, 20 days in participating in summer workshops, 29 days in working with state and regional curriculum committees and councils, 20 days in working on driving education and training, and 64 days working on the accreditation of high schools.

The Bureau of Junior College Education was established July 1, 1957, and is now in its second year of operation. The work of this unit was formerly carried on by the Bureau of Secondary Education. The bureau is responsible for the co-ordination and improvement of instruction in the public junior colleges.

The Bureau of Adult Education has the responsibility for co-ordinating and improving programs of adult and continuation education. In addition, this unit is required to approve more than 20,000 adult classes annually and to approve forum and lecture series, continuation high schools and special and evening classes and summer sessions in elementary schools. Staff members spend an average of 120 working days per year on programs of inspection and approvals, 35 days in working with lay groups and professional organizations, 36 days in meetings with state and regional committees and councils, and 15 days on the preparation of manuscripts and materials.

The Bureau of Audio-Visual Education is responsible for the co-ordination and improvement of programs of audio-visual education in counties and school districts. The bureau is also a service unit for the department and for other state agencies and maintains materials and equipment to be used on a loan basis by departmental staff members and other state agencies where necessary. Bureau staff members average 87 working days each year in work with lay groups and professional organizations, 27 days in the preparation of manuscripts and materials, and 98 days in participating in state and regional meetings and to organize in-service training of teachers in the use of audio-visual materials.

The Bureau of Guidance is responsible for the co-ordination and improvement of guidance programs in counties and school districts and represents the department in working with other state agencies that provide services related to the guidance and placement of school pupils. Members of the staff average 98 working days each year in participating in state and regional meetings, 58 days in the preparation of manuscripts and materials, 27 days in working with professional organizations, and 30 days in research and evaluation activities.

The Bureau of Physical Education, Health Education and Recreation is assigned the responsibility for the co-ordination of physical and health education and recreation programs in counties and districts. This includes responsibility for athletic services, medical and nursing services and school district co-

operation in community recreation programs of various types. Bureau staff members average 90 working days each year in the preparation of manuscripts materials and other projects, 55 days participating in state and regional meeting, including curriculum committees and councils, 25 days working on in-service education programs, and 18 days on junior college and high school accreditation.

The Bureau of Special Education is the unit through which the department co-ordinates, improves and supervises the various programs for pupils with special needs. These include programs on speech difficulties, hearing losses, sight limitations and crippling conditions. Because such programs carried by counties and school districts must meet specific requirements in order to qualify for special state reimbursements, this bureau has certain responsibilities for program approvals. Many of the counties and districts are unable to provide qualified supervisors for such specialized programs and in these cases, members of the bureau staff engage in classroom supervision. Also, instructional materials available to blind pupils through the American Printing House for the Blind are requisitioned and made available to California school districts by this unit. Bureau staff members average 54 working days annually on programs of inspections and approvals, 20 days in participating in state and regional meetings, 38 days in the preparation of manuscripts and materials, 36 days working with key groups and professional organizations, and 23 days in specialized teacher training activities.

4 bureaus responsible for carrying on the joint federal-state program of vocational education constitute a section of the Division of Instruction under the administration of an assistant division chief who is also the State Director of Vocational Education. These units are the Bureau of Agricultural Education, the Bureau of Industrial Education, the Bureau of Homemaking Education, and the Bureau of Business Education. The financial support for these 4 bureaus comes from the special vocational education budget.

However, certain of the general co-ordination activities in the fields of industrial arts and business education cannot be financed with federal funds and 2 positions on the vocational staff have been included in the general support budget. These staff members have worked in the "nonvocational" industrial arts and business education fields and spend most of their time in working with state and regional curriculum committees and councils, in preparing manuscripts and instructional materials, in research and evaluation, and in activities related to teacher training.

In order to more accurately present the total vocational education program these consultant positions and their supporting clerical staff have been transferred to the Vocational Educational Budget in the 1959-60 Fiscal Year.

20	GENERAL ANALYSIS						
21							
22	DIVISION OF STATE COLLEGES AND TEACHER EDUCATION						
23	The primary functions of the Division of State Colleges and Teacher Education are: (1) to provide headquarters administrative services and co-ordination for the 12 state college campuses, 2 off-campus centers, the 2 new state college campuses, and 2 new sites authorized by the 1957 Legislature; (2) to provide leadership to all teacher education institutions of the State, both public and private, in the preparation of more and better qualified teachers; (3) to carry forward, through the specialist in higher education and joint staff member, the planning and reports necessary to the development of an adequate but economical system of higher education in California; and (4) to provide administrative services to the California Maritime Academy, whose policies are determined by its own board of governors.						
24	The Division of State Colleges and Teacher Education is administered by an associate superintendent as division chief. The staff provides central administrative services to the State College System employing over 7,500 persons and serving 53,530 full-time and 27,570 part-time students in fall, 1958. This division provides predominantly administrative rather than consultant services to the state colleges, but through the office of the specialist in teacher education leadership and consultant services are provided the 39 public and private teacher education institutions presently accredited by the State Board of Education. Assistance is also given to institutions which seek accreditation for the first time. The acute need for large numbers of teachers in California justifies a significant state interest, and participation in the recruitment activities of this office. 1 intermediate stenographer-clerk has been added to the administrative typing pool because of increased workload.						
25	Within the division there is provision for participation in the study of the immediate and long-range problems of higher education in California. The specialist in higher education is the Department of Education's representative on the Joint Staff of the Liaison Committee of the California State Board of Education and the Regents of the University of California. The 2 joint staff members continuously appraise, study, and document California's present and future needs in higher education. Their reports and recommendations are presented to the University Regents, the State Board of Education, and the Legislature and						
26	they have made a significant contribution to the orderly and efficient development of public higher education as expressed in numerous legislative and board actions.						
27	The balance of the staff functions of the division are co-ordinated by the assistant chief of the division. These functions are grouped under 4 offices.						
28	(1) The educational planning office, in charge of the specialist in state college curricula, assists state colleges to develop educational programs, curricula, instructional standards, and in other related matters.						
29	(2) The facilities planning office, under the direction of a specialist in college facilities planning, assists state colleges and special schools to plan campuses and buildings; to develop building space, utilization, and maintenance standards; to prepare budgets for Capital Outlay projects for the State College System and the special schools.						
30	(3) The fiscal officer is responsible for reviewing all fiscal matters affecting the State College System and to insure operational adherence to approved expenditures, divisional standards, and conformance with good business practice. The total 1958-59 support budget for the State College System is nearly \$51,000,000. With increased workload, as evidenced by higher enrollments and additional colleges, an addition to the staff of 1 accountant-auditor is proposed to enable the office to perform its proper functions.						
31	(4) Proper administration of both the Division of State Colleges and the State College System is based on the assembly, analysis, and interpretation of reliable and appropriate data. The Administrative Planning Office provides such data to the state college administrators, the joint staff, the Legislature and Legislative Analyst, the Department of Finance, and other units of the division. An additional function of this unit concerns the study and assistance in the management problems described in Department of Finance Management Survey 855. To provide staff for this latter purpose, this budget proposes the establishment of a senior and assistant administrative analyst to provide for the increased workload in this area.						
32	For State College Program see Summary, pages 167-170.

blind persons were receiving service. Vacancies in the staff reduced the number of areas served. Of the total number of persons served during the year approximately one-half reside in rural areas.

The opportunity centers for the blind exist to give work opportunities of nonstandardized type to the blind. The co-ordinating Council on State Programs for the Blind recommended in March, 1957, that only productive workers be retained in the California Industries for the Blind workshops and that less productive workers should be given work opportunities in the opportunity centers. During the current year, the center at San Bernardino will be closed due to lack of sufficient participation and a center will be opened at Los Angeles. During the budget year, therefore, there will be Opportunity Work Centers located in San Jose, Visalia, Oakland, and Los Angeles.

The program of vocational rehabilitation is to assist disabled persons to achieve the maximum degree of self-support. It is based upon a co-operative plan between the State Department of Education and the United States Office of Vocational Rehabilitation and is administered by the Bureau of Vocational Rehabilitation through its 2 regional, 9 district, and 14 branch offices. The total program is financed by state and federal funds. Expenditures for this program are reported in the budget for vocational rehabilitation.

33	GENERAL ANALYSIS				
34	Objectives				
35	The purpose of vocational education is to provide training to				
36	develop skills, attitudes, working habits, and to impart knowl-				
37	edge and information needed by workers to enter and make				
38	progress in employment on a useful and productive basis.				
39					
40	Program and Performance				
41					
42	The vocational education program for California is based				
43	on a plan, co-operatively approved and financed by local school				
44	districts, the State Department of Education, and the United				
45	States Office of Education. The available funds are expended				
46	for supervision and teacher training at the state level and as				
47	reimbursements to those local districts which meet the estab-				
48	lished qualifications of the approved program. These reimburse-				
49	ments are based on the magnitude of the excess costs to the				
50	school districts in meeting the prescribed standards.				
51	Federal funds available for vocational education under the				
52	Smith-Hughes and George-Barden Acts must be matched on an				
53	equal basis by local or state funds. The George-Barden funds				
54	may be used for the reimbursement of salaries, traveling ex-				
55	pense and instructional equipment while the Smith-Hughes				
56	funds allow for reimbursement of salaries only.				
57	In addition to an administrative unit the state agency for				
58	vocational education is divided into 4 services which offer				
59	assistance and guidance to the local districts. These services				
60	include:				
61					
62	1. Agricultural education which assists persons who are plan-				
63	ning to enter, or have already entered the occupation of				
64	farming. In 1957-58 a total of 16,875 persons enrolled in				
65	such courses.				
66	2. Industrial education designed to help the person who is				
67	contemplating entering a trade or has already done so. The				
68	1957-58 enrollment in this activity totalled 117,872.				
69	3. Homemaking education which operates a program of help-				
70	ing local school districts to assist persons engaged in the				
71	duties and responsibilities of the home. Enrollment in				
72	these courses for 1957-58 totalled 134,159, the largest of				
73	the 4 services.				
74	4. Business education deals only with the distribution oc-				
75	cupations phase of business education. This program is				
76	limited to part-time and evening classes but the 1957-58				
77	enrollment totalled 64,461.				
78					
79	A summary of the 1957-58 enrollments in each phase of				
80	the program is shown in the table below.				
81					
82					
83					
84	^a Federal grants and expenditures therefrom are not included in the overall budget totals.				
85					
86					

VOCATIONAL EDUCATION

GENERAL ANALYSIS

	Evening	Part-time	All day	Total
Agricultural education --	4,372	—	12,503	16,875
Business education ----	61,364	3,097	—	64,461
Homemaking education --	72,896	19,447	41,816	134,159
Industrial education ---	75,361	25,505	20,234	121,100
Practical nurse training	—	1,975	—	1,975
Totals -----	213,993	50,024	74,553	338,570

In addition to the basic vocational education program, there are 2 state-financed programs which augment the joint federal-state local program. These are the Fire Training Program and the Apprenticeship Instructional Materials Program. In the Fire Training Program, there are 8 itinerant instructors to provide service to local departments by in-service training. In addition several institutes are held each year as a means to train officers in modern fire fighting techniques. During 1957-58, 255 schools were held and in the classes taught by itinerant instructors 6,095 men were registered. A total of 5,017 class hours of instruction were given. In addition, 1 workshop and 1 arson seminar were held. *A positions and necessary operating expenses in the fire training program have been transferred from the state supported Fire Training Program to the shared federal-state program.*

The Apprenticeship Instructional Materials Program prepares instructional materials for use by apprentices in trades where there are a minimum of 100 apprentices. There are currently 27 such trades. The materials prepared include, in addition to textbooks, such instructional aids as examinations, progress charts and teacher handbooks. These publications are sold to the apprentice at a price calculated to recover the direct costs of such publications.

The 1959-60 Budget is a consolidated presentation of the Vocational Education Program. 2 consultant positions in industrial arts and business education, 1 clerk and related equipment, formerly contained in the Department of Education General Activities Budget are transferred to this Vocational Education Budget.

Program changes include the termination of the Veterans-on-Farm Training Program by the Federal Government because of the lack of qualified participants, thereby reducing the number of professional positions in the Bureau of Agricultural Education by 1. The Practical Nurse Training Program was instituted in 1956-57 with the purpose of developing curriculum and programs in this field. No expenditure for this function is shown in the budget year. Otherwise this program is budgeted at the same level of service as the 1958-59 Fiscal Year.

^a Federal grants and expenditures therefrom are not included in the overall budget totals.

GENERAL ANALYSIS

Objectives

The Bureau of Vocational Rehabilitation encourages and assists physically and mentally handicapped persons to achieve the maximum degree of self-support.

Program and Performance

The bureau offers vocational guidance and placement services throughout the State. In many cases this takes the form of corrective surgery, the furnishing of prosthetic devices as well as psychological tests and placement. Other specialized activities include the business enterprise program for the blind which sets up vending stands for qualified blind persons, a research program on the rehabilitation of the industrially injured, and a federally reimbursed program dealing with incapacitated persons under the Social Security Law.

Administration

Central program direction and housekeeping functions are carried on by this unit. All increases in this function are caused by rises in price of services and commodities. This is the first year in which the so-called "bridge provisions" of the

financing formula in Public Law 565 become effective. The agency is presently budgeted on a ratio of roughly 58 percent federal and 42 percent state funds. Beginning in 1959-60 the State has 4 years in which to adjust to the new financing formula which will be very close to 50-50 federal-state funds. The "bridge provisions" allow for a progressive reduction in federal support between approximately 58 percent and 50 percent over a 4-year period on the basis of 25 percent reduction of the difference each year.

Vocational Guidance and Placement

This unit comprises the main body of the program. It is divided into 9 district and 14 branch offices throughout the State.

For several years the emphasis on cases accepted has been those most clearly in need of services and those whose rehabilitation represents the greatest social and economic benefit to the State. Other priority cases include the industrially injured worker and referrals from the Federal Old Age Survivors Insurance Program.

^a Distribution of these funds by program is shown in the Local Assistance Section.

^b Neither federal grant or expenditures therefrom are included in the overall budget totals.

GENERAL ANALYSIS—Continued

Vocational Guidance and Placement—Continued

In line with this general priority an effort has been made to reach and rehabilitate handicapped recipients on the public relief rolls who have a good opportunity to become self-supporting for a number of years after treatment.

In the past 5 years a total of nearly 4,000 cases were removed from the public assistance rolls through the provision of vocational rehabilitation services. The estimated savings in public assistance costs each year is close to \$5,000,000.

The following table presents the movement of the active caseload during the 1955-56 through 1957-58 Fiscal Years.

	1955-56	1956-57	1957-58
Active caseload at beginning of year	5,316	4,919	5,554
Accepted for service in year	3,225	3,787	5,151
Total Active Caseload	8,541	8,706	10,705
Closed, rehabilitated	1,724	1,567	1,528
Closed after rehabilitation plan initiated	640	507	615
Closed before rehabilitation plan initiated	1,258	1,078	1,436
Total Closures	3,622	3,152	3,579
On Hand, End of Year	4,919	5,554	7,126

While the number of rehabilitations accomplished by the Bureau of Vocational Rehabilitation is numerically low compared to results in other states, evidence indicates that in many states the emphasis is placed upon serving only those disabled applicants who may be brought to employment most quickly and cheaply, often at the expense of more severely involved cases which have a greater need for service. The past experiences of the California program, when primary emphasis was placed on numbers served, created a condition where all staff efforts were directed toward bringing into the caseload persons whose needs were superficial and who might have been served through agencies such as the public employment service or community health services. California's present program gives priority to those cases whose need, broadly defined, is greatest and who, without assistance from the State, would become permanent public charges. Although such a policy is incompatible with the present national trend of serving large numbers of undifferentiated cases, the ultimate returns to this State are much greater.

The staff is being provided on the basis of an adjusted formula of 1 vocational rehabilitation counselor for each 82,500 members in the population within the age group 16 to 64. It is felt that this formula is more definitive than that used previously. On the basis of population growth this would entitle the program to an additional 4 counselors in the budget year. An additional 3 clerical positions are allowed on the existing ratio of 2 clerical positions to each 3 professional positions. 3 vocational psychologists are provided to improve the guidance and testing program, offset by a reduction in case service funds. 1 medical consultant is also added on a formula basis to complete the staffing required.

Case service funds have been increased to reflect advancing costs of materials and nonmedical services. Increased level of guidance and placement service has not been provided after consultation with the agency.

Business Enterprise Program for the Blind

This program assists qualified blind persons to become self-supporting by providing equipment for the establishment of vending stands, snack bars, and lunch rooms in office buildings and industrial plants. Assistance and advice is also furnished by a staff of business enterprise officers to see that they are properly established and operated.

The bureau has established a maximum allowance of \$4,000 of bureau funds to install such a stand. The program anticipates that 25 new stands will be established during 1958-59, requiring \$100,000. This is an increase of 5 stands or \$20,000 over the level of the program in recent years. This increase is included as a recognition of the growing value of the program as a means of helping blind persons become more nearly self-supporting. 1 additional business enterprise officer and intermediate stenographer-clerk have been added to the staff because of the increasing shift from the vending stand type of operation to the snack bars and cafeteria type which require more time on the part of the business enterprise officers. Also, the total number of stands is increasing, thereby requiring additional supervision.

Industrially Injured Project, Chapter 1738, Statutes of 1955, provided funds for the purpose of conducting a research and demonstration project in connection with problems relating to rehabilitation of industrially injured workers. For the past 3 years the section has been carrying on this project. If the findings are to be significant it will be necessary to extend this program through the Fiscal Year 1959-60. However, the extension is being carried on by absorbing the project into the regular financing pattern of the section.

Disability Freeze Program

This program is completely financed from the Federal Social Security Trust Fund. It involves the disability certification program connected with the Old Age and Survivors Insurance.

While the budget for 1959-60 proposes 33.5 new positions to be added to the staff, these positions were authorized by the Social Security Administration after the 1958-59 budget was approved by the Legislature. The program for 1959-60 is at the same level as in the current year.

Objectives

The State Library has several responsibilities in addition to maintaining a collection of books. These include: furnishing basic reference services to the State Legislature and the executive branch of the State Government; assisting and stimulating the development of public library facilities throughout the State; and representing the interests of the State in the accumulation and preservation of historical material regarding the State.

Program and Performance

The State Library is composed of 3 operating bureaus, in addition to the Administration Section. These are Field Services, Reader Services, and Technical Services.

The Field Services Bureau is responsible for the stimulation and development of public library facilities and service throughout the State and certain delegated responsibilities in relation to supervision of the county libraries.

In 1957-58 assistance was given by the field office staff to county and municipal libraries in the field of management improvement.

In the same year this bureau also planned and carried out 2 institutes. Standards of Library Service to Children and Problems of Library Service in Metropolitan Areas, attended by selected groups of librarians and officials, 20 and 40 respectively. The proceedings of the meeting on Library Service in Metropolitan Areas has been printed and constitutes a guide to libraries in fast growing areas of the State.

The Field Services will continue its program of workshop and advisory services. The entire field program has been accelerated by the enactment in 1956 of the Federal Library Services Act through which 5 completely reimbursed projects are demonstrating improved library services and systems in these rural areas: Butte County; Amador County; Santa Barbara County; Lassen and Plumas Counties; and 16 Northern California counties in which 11 libraries or systems will have their books cataloged and prepared for use at a co-operative processing center.

The supervisors of Butte County after only 6 months of demonstration voted to support locally the bookmobile project

in that county. The supervisors of Amador and Santa Barbara Counties voted to continue their projects for another year. The supervisors of San Diego County submitted a project which was selected from several submitted to the State Library for a demonstration for 1959-60. An exhibit bookmobile was purchased for the purpose of demonstrating bookmobile service in areas without libraries or with inadequate service. An institute was held in February for all personnel working on federal projects under the Library Services Act in California.

In 1958-59 the Reader Services Bureau is carrying on a program of development along several lines. A feature of importance is the establishment of a Capitol Branch of the State Library to provide library service to the Members of the Legislature. To facilitate this service 2 half-time positions of librarian II and intermediate typist-clerk are being added to the staff during 1958-59 and will be continued into 1959-60. To carry on the cataloging project within the government publications section, 1 librarian II and a half-time clerical position are continued into 1959-60. The intermediate typist-clerk authorized on a temporary basis in 1957-58 for the Law Section classification project is also continued in 1959-60 with the addition of a 0.25 intermediate clerk position justified by workload.

This budget proposes that the Suto Branch of the State Library be transferred to the University of California in order that it may become more useful as part of a larger reference collection maintained by the university in San Francisco. This will allow a reduction in staff of 2 professional librarian positions and 2 clerical positions. The total reduction in the State Library budget will amount to \$25,387 for the budget year as a result of this transfer. No addition to the university's budget.

In the Technical Services Bureau during the Fiscal Year 1957-58 several policy changes were made simplifying cataloging procedures and planning for the organization of the cataloging of serial publication was begun. The Union Catalog put into effect its Last Copy Preservation Plan to prevent final discarding of any title represented in the Union Catalog of the State Library catalog. 1 intermediate clerical position is provided for the Periodicals Section to accomplish the periodicals cataloging being transferred from the cataloging unit and for paging purposes.

GENERAL ANALYSIS

Objectives

The 11 state colleges, with 12 campuses located strategically throughout the State, offer 4 and 5-year programs in teacher education, liberal arts, occupational, technical and preprofessional curricula.

The California Maritime Academy, controlled by an autonomous board of governors, is a technical-vocational institution of higher education. The Maritime Academy, supported in part by the Federal Government, trains merchant marine and naval reserve officers.

Program and Performance

Enrollment Trends

The growth in the number of students enrolled in the state colleges from 1951 to 1958 is shown in the following table. The number of regular students has doubled in a period of seven years while the enrollment of limited students has increased fourfold.

Enrollment of Regular and Limited Students ^c (Individuals)
in California State Colleges, Fall, 1951 Through 1958

(Exclusive of California Maritime Academy)				
Year	Regular students	Limited students	Total students	Per Cent limited
1951	24,220	7,007	31,227	22.4
1952	24,896	8,693	33,589	25.9
1953	27,178	11,406	38,584	29.6
1954	32,017	13,189	45,206	29.2
1955	37,570	15,373	52,943	29.0
1956	42,988	19,797	62,785	31.5
1957	47,795	24,288	72,083	33.7
1958	54,832	28,703	83,535	34.4

Teacher Education

The state colleges are the most important source of trained teachers in the State of California. The following table illustrates the pre-eminence of the state colleges in the field of teacher education.

Comparison of Credentials Issued on Institutional
Recommendations by Types of Accredited Institutions in
California, 1951-52 Through 1957-58

Year	State colleges percent	Univ. of Calif. percent	Private colleges and Univ. percent
1951-52	46.4	17.5	36.1
1952-53	52.3	15.3	32.4
1953-54	49.7	18.5	31.8
1954-55	53.6	14.9	31.5
1955-56	59.8	13.5	26.7
1956-57	57.5	14.5	28.0
1957-58	59.8	13.0	27.2

It is apparent that a large portion of the program of the state colleges is oriented toward teacher training. This is corroborated by a comparison of the number of students securing credentials with the total number of students securing degrees and/or credentials through the state colleges, as shown in the table following:

Number of Students Securing Credentials in California
State Colleges, 1951-52 Through 1957-58

Year	Total students securing degrees and/or credentials	Total students securing credentials	Percent with credentials
1951-52	7,358	3,172	43.1
1952-53	6,926	2,640	38.1
1953-54	7,285	2,726	37.4
1954-55	8,110	3,182	39.2
1955-56	9,968	3,848	38.6
1956-57	11,634	4,173	35.8
1957-58	13,063	4,546	34.8

Pilot internship programs have been inaugurated in several of the state colleges with the objective of recruiting into the teaching profession persons without preparation for teaching, but who hold a baccalaureate degree. These internship programs are designed to prepare persons as either elementary or secondary school teachers. Individuals are first enrolled in a summer

^a Student enrollment for colleges represents full-time equivalent students which are computed on the basis of 15 semester units of instruction representing 1 student equivalent.

^b Includes contributions to State Employees' Retirement Fund. Does not include the costs covered by student fees or reimbursements.

^c Regular students are those enrolled for over 6 units of credit; limited students are those enrolled for 6 or less units of credit.

Department of Education

STATE COLLEGES—Continued

GENERAL ANALYSIS—Continued

Teacher Education—Continued

session for the purpose of orientation to the job of teaching. Following this, the candidate is placed in a regular teaching position, during which time he also attends a weekly seminar at a college or university. A second summer session consists of work in professional education. At the end of the second summer session, the candidate is issued a regular teaching credential. San Francisco State College and San Diego State College have had several years of experience in carrying on programs of this nature.

Degrees Granted and Graduate Programs

There has been a marked growth in graduate offerings at the state colleges. The growth in graduate programs which is measured by the numbers of students securing advanced degrees from the state colleges, as well as the total number of degrees granted is shown in the table that follows.

Number of Bachelor's and Master's Degrees Granted in California State Colleges, 1951-52 Through 1957-58

Year	Bachelor's degrees	Master's degrees	Total degrees	Percent masters
1951-52	5,691	434	6,125	7.1
1952-53	5,272	653	5,925	11.0
1953-54	5,423	752	6,175	12.2
1954-55	5,840	975	6,815	14.3
1955-56	6,878	1,270	8,148	15.6
1956-57	8,709	1,447	10,156	14.2
1957-58	9,737	1,761	11,498	15.3

The 1958 Legislature, through changes of law, directed the state colleges to provide broadened services to the state's economy and industry in the field of engineering and related sciences. The State Board of Education has approved graduate courses in engineering at San Jose State College and San Diego State College with the progress of these programs to be carefully evaluated in relationship to offerings of the University of California and the several leading private colleges and universities.

Programs Offered

The following table indicates the scope of the programs offered in the state colleges in the spring semester of 1958 and their relative size is expressed as full-time equivalent enrollment.

Full-Time Equivalent Enrollment by Subject in California State Colleges, Spring, 1958

Subject	Full-time equivalent Enrollment	Percent ^a
Agriculture	1,140	2.2
Biological sciences	2,708	5.2
Business	4,728	9.0
Education	8,089	15.5
Engineering	2,517	4.8
English and literature	3,915	7.5
Fine arts	5,067	9.7
Foreign languages	576	1.1

MAJOR PROGRAM AUGMENTATIONS AND COSTS

The total increase in 1959-60 over amounts budgeted for the state colleges in 1958-59 is \$7,011,941, or 13.9 percent. The major portion of this increase results from increased workload arising from an estimated enrollment growth of 12.8 percent

Salaries and Wages:

Merit salary adjustments for existing positions	
Additional teachers	\$1,994,000
a. For enrollment growth in accordance with accepted staffing standards	2,225,000
b. Implementation of approved curricula	644,000
Administrative positions and related clerical assistance required to strengthen the colleges' administrative organization because of increasing enrollments (AN 828)	129,000
Technical and clerical personnel for enrollment growth in accordance with accepted staffing standards	1,689,000

^a Sum of parts may not add to 100 percent due to independent rounding.

Full-Time Equivalent Enrollment by Subject in California State Colleges, Spring, 1958—Continued

Subject	Full-time equivalent Enrollment	Percent ^a
Health	887	1.7
Home economics	516	1.0
Industrial arts	873	1.7
Journalism	282	0.5
Law enforcement	352	0.7
Mathematics	2,482	4.7
Military science	151	0.3
Natural resources	90	0.2
Nursing	223	0.4
Occupational therapy	44	0.1
Philosophy	988	1.9
Physical education	1,786	3.4
Physical sciences	3,407	6.5
Psychology	2,925	5.6
Recreation	178	0.3
Social sciences	8,206	15.7
Totals	52,310	100.0

New Colleges

The 1957 Legislature established Alameda County State College and Orange County State College. The 1959-60 Budget includes funds for the planning staff. (See pages 171 and 193 for the detailed budgets for these colleges.)

State College Faculty

The increase in numbers of full-time and part-time faculty members needed to carry on the instructional programs of the state colleges from the years 1951-52 through 1957-58 is shown in the table below:

Teachers in California State Colleges, 1950-51 Through 1957-58

Year	Individuals			F. T. E. Teachers	
	Full-time	Part-time	Total	Total	Increase over prior years
1951-52	1,306	406	1,712	1,436	—43
1952-53	1,343	505	1,848	1,494	58
1953-54	1,553	539	2,092	1,674	180
1954-55	1,689	566	2,255	1,845	171
1955-56	2,037	726	2,763	2,231	386
1956-57	2,501	833	3,334	2,729	498
1957-58	2,991	665	3,656	3,197	468

In addition to the new faculty needed each year to handle enrollment increases and new programs, additional faculty members are needed to compensate for normal turnover which runs 6 to 8 percent per year. A total of 235 new full-time faculty members were appointed in 1954-55; 416 in 1955-56; 580 in 1956-57; 606 in 1957-58, and 496 for the fall term of 1958. According to a recent study of the demand for new faculty in the existing state colleges, it will be necessary to recruit an average of over 900 such new full-time equivalent faculty members per year throughout the period 1959 to 1970.

and the addition of approximately 2 million square feet of plant facilities. The major changes in the expenditure program for the state colleges are summarized below.

Department of Education

STATE COLLEGES—Continued

MAJOR PROGRAM AUGMENTATIONS AND COSTS—Continued

Salaries and Wages—Continued

Professional, technical, and clerical positions for the student health service program in accordance with accepted staffing standards	\$282,000
Maintenance personnel for new facilities in accordance with accepted staffing standards	662,000
Increase in estimated salary savings	—305,000

Operating Expenses:

a. To provide limited support for student and faculty receptions	14,300
b. Increase student health services expense	81,600
c. Increase instructional expense	330,150
d. For price increases, growth of enrollment, growth of staff, and opening of new facilities	1,220,000

Equipment:

a. Purchase of electronic data processing machines for administration purposes	31,500
b. Change in support equipment needs due to Capital Outlay expenditures for equipment	—82,700

Increase in contributions to State Employee's Retirement Fund	516,000
---	---------

Included in the above tabulation are the expenditures required for a new off-campus center in Imperial County (\$47,400) and planning staffs for Alameda and Orange County State Colleges (\$218,300).

As an offset against the above increases, the amounts collected as reimbursements have been increased by \$2,412,000. This is composed of increases due to growing enrollments and a proposed change in student fees as discussed below and a decrease in services rendered to other agencies.

The budgets for each of the state colleges includes increased reimbursements due to proposed increases in the basic student fees from the existing \$40 to \$65 as compared to the \$50 proposed by the department. These increased fees are designed to cover the noninstructional expenses of state college students, such as medical services, counseling and testing services, placement services and student activities.

The fees proposed to cover these services are as follows:

a. Full-time regular students (more than 6 units)	\$65
b. Limited Students:	
1. From 4 to 6 units	42
2. Less than 4 units	26

In addition, nonresident student fees are proposed at \$250 rather than the present \$180. This increase will bring such charges more in line with charges made at comparable institutions throughout the United States. It is also proposed that the college catalogs be sold at a nominal (25¢) charge.

Of the major program augmentations requested, the following have not been included: (a) Faculty allowance for research (\$258,000). This represents a major policy change in state college operations, and is inappropriate to start at this time. (b) Instructional television (\$155,000). Present program is in an experimental status at two colleges, and must await definitive report. (c) Recruitment moving expense (\$90,350). Not included because of lack of positive showing of necessity. (d) State support of summer session (\$300,600). This represents a major departure from the historical self-supporting status. (e) Rental of electronic computers for instruction (\$171,000). Demonstration methods at surrounding installations can meet the needs temporarily.

Proposed New Positions:

The budget includes a total of 1,238.4 additional permanent and temporary positions. The following table shows the distribution of these positions by colleges and by principle function:

PROPOSED NEW POSITIONS FOR STATE COLLEGES

STATE COLLEGES—Continued

PROPOSED NEW POSITIONS FOR STATE COLLEGES—Continued

Positions are budgeted on the basis of staffing formulas and standards. Workload units are applied to the formulas and standards and all resulting increases are presented as proposed new positions.

INSTRUCTION FUNCTION

Teachers:

a. Teachers Required for Enrollment Growth

The need for additional teachers because of enrollment growth is determined by application of a faculty staffing formula which was first adopted as a budgeting tool in 1953-54. The formula, which recognizes both instructional and noninstructional load, shows a need for 428.2 additional teachers for enrollment growth.

b. Teachers for Implementation of Approved Curricula

These 126.5 additional teachers are needed to implement for the first time curricula that have had approval by the State Board of Education. The need for the teachers has been justified by the application of the approved faculty staffing formula. The various curricula to be implemented are described in the instructional college budgets.

Supervision:

a. Major Deans

The increasing enrollments require strengthening of the administrative organization of the colleges with supervisory positions as follows:

Fresno State College—dean of instruction

Long Beach State College—dean of college, dean of instruction

San Francisco State College—dean of college, dean of instruction

San Diego State College—dean of instruction

b. Division Chairman, Curriculum Supervisor and Co-ordinator

These positions have the responsibility of supervising various aspects of the instructional program. The need for division chairman is measured by the number of teaching positions within a homogeneous grouping of curricula. Curriculum supervisors are fractional teaching positions released from instructional responsibilities in order to develop a new curricula or supervise the offerings in a large existing curriculum. Curriculum co-ordinators, also fractional teaching positions released from instructional responsibility, supervise students doing internship work away from the college. These are used primarily for the supervision of practice teachers. 40.8 new positions are required based on existing staffing standards.

c. Technical and Clerical

Technical and clerical positions are budgeted on a ratio to teachers, the need for clerical positions by supervisory positions, and the positions required by the accepted audio-visual staffing formula. 161.6 new positions are required for these responsibilities.

LIBRARY

The 86.4 new positions include 34.5 professional positions. The need for these positions is determined by the application of an accepted formula and are required either because of increased acquisitions or because of additional public service points added by new facilities. One minor change in the staffing formula has been allowed to permit an increase in staff for the task of discarding volumes not required for use by the student and faculty.

ADMINISTRATION

a. The increasing enrollments require the strengthening of the administrative organization of the colleges with the addition of supervisory positions as follows:

Fresno State College—executive dean

Los Angeles State College—assistant to the president

In addition, an admissions officer is added to Long Beach State College and San Diego State College, based on the

a Los Angeles State College and San Fernando Valley State College are excluded because they were operating in temporary or rented quarters in the 1957-58 Fiscal Year.

workload of a matriculation program of all regular and limited students. 1 clerical position has been approved to provide clerical assistance for the Admissions Officer at Long Beach State College.

b. In addition to the above, 56.1 new positions are required for administration and business management.

HEALTH SERVICES

50.1 new positions including doctors, nurses, laboratory technicians and clerks are required by increased enrollments and the addition of a full health service program in 1959-60. All the colleges will have full health programs with the exception of Los Angeles State College which does not have the physical facilities for this program. Student fees will reimburse the State for the cost of health services.

STUDENT PERSONNEL

50.4 new positions are required based on increased enrollments for the activities of student counseling, activities, placement, admissions, and records. These positions are composed entirely of technical and clerical positions.

MAINTENANCE AND OPERATION OF PLANT

During 1959-60 a total of 55 new buildings are scheduled to be put into operation at the various state colleges. This large increase of an estimated 2 million square feet in physical plant requires an increase of 219.3 positions to maintain the buildings. The largest portion of the staffing can be attributed to custodial positions which are allowed on a ratio of 1 custodian to 15,000 square feet of building space.

The state colleges had 5.3 million square feet of building space in the 1957-58 Fiscal Year and spent \$5,012,943 for plant operation and maintenance. The costs per square foot of buildings averaged 93.6 cents based on a preliminary breakdown of costs. These costs are summarized below:

Total Maintenance and Operation of Physical Plant Costs
(Per Square Foot of Buildings)
1957-58 Fiscal Year

Outside gross square feet of building a	5,355,583
Superintendence	3.7¢
Building maintenance	16.9
Grounds maintenance	15.9
Janitorial	29.9
Security	3.3
Utilities and refuse disposal	19.4
Major repairs and alterations	2.6
Fire protection	0.8
Miscellaneous	1.1

Total Cost per Square Foot. 93.6¢

COLLEGE FARM

1.5 positions added to the Chico farm are based on the enrollment increase at that college. Enrollments of the other 3 college farms remain at the current year's level.

SUMMER SESSION AND EXTENSION

These programs are fully financed by student fees. The 6.5 new positions for Long Beach State College are offset by increased reimbursements.

OFF-CAMPUS CENTERS

The major part of the increase is due to the proposed establishment of a new off-campus center in the Imperial Valley to be operated by San Diego State College. Other increases reflect increased enrollments and activities in presently operated centers. The positions required for the operation of these centers are included in the discussions of the various categories above.

5	GENERAL ANALYSIS				
6	Objectives				
7	Alameda County State College is scheduled to become a fully				
8	accredited 5-year state college with programs designed to meet				
9	the needs of the area which it will serve.				
10	Program and Performance				
11	Although Alameda County State College was scheduled to				
12	open for the fall semester of 1959 in rented facilities, it is pro-				
13	posed that the opening of this new college be deferred.				
14	Alameda County State College was established by Chapter				
15	1681, Statutes of 1957. An appropriation of \$100,000 was con-				
16	tained in the Budget Act of 1958 for a nucleus staff to plan				
17	and organize the program of the college including the building				
18	program.				
19	As the opening of this college is proposed for deferment, only				
20	the president and 4 other positions are included from January				
21	1, 1959, in the 1958-59 Fiscal Year. The 1959-60 Budget in-				
22	cludes a position of business manager, effective July 1, 1959,				
23	and 17 positions January 1, 1960. These positions will prepare				
24	for the opening of this college.

GENERAL ANALYSIS

Objectives

Program and Performance

Chico State College is a 4-year, fully accredited college, with programs in teacher education, occupational and preprofessional curricula designed to meet the needs of 7 counties in the upper Sacramento Valley and in the contiguous mountain regions.

Chico State College was founded as a normal school in 1889 and is the second oldest of California's state colleges. It has as a primary responsibility, the providing of teacher training. As a secondary function the college provides training in liberal arts

^a Composed of savings in salaries and wages of \$44,785; operating expenses, \$14,984; and equipment, \$11,829.

Department of Education

CHICO STATE COLLEGE—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60
GENERAL ANALYSIS—Continued				
Program and Performance—Continued				
1	and occupational and preprofessional subjects. The best measure			
2	of the college's success in fulfilling these obligations is the			
3	number of credentials issued and the degrees conferred by the			
4	college. Approximately 60 percent of the students are working			
5	toward a teaching credential. This information for the years			
6	1955-56 through 1957-58 is shown in the table below:			
7		1955-56	1956-57	1957-58
8	Students securing teaching credentials	204	202	258
9	Degrees granted	177	223	480
10	Other programs which occupy an important place in the			
11	offerings of the college include business, industrial arts, nursing,			
12	and social science. Approximately 40 percent of the graduates in			
13	1957-58 received degrees for concentrations in these areas. Chico			
14	was one of the first state colleges to offer a degree program in			
15	nursing.			
16	Of future importance among the offerings of the college will			
17	be the degree program in agriculture. Chico offered a 2-year			
18	terminal program in agriculture until 1957-58. In that year they			
19	began offering a full 4-year degree program. Funds for a farm			
20	with the necessary animals and equipment have been appropri-			
21	ated and it is planned that the farm will be in operation in			
22	1959-60.			
23	The total of 50.6 proposed new positions for the 1959-60			
24	Fiscal Year are required for the estimated enrollment of 3,200			
25	FTE and the completion of the new library. 4.2 of these posi-			
26	tions are proposed to strengthen the student personnel and busi-			
27	ness management functions.			
28	31.4 positions are required for the instruction function. These			
29	include 21.7 teachers based on faculty staffing needs, together			
30	with the necessary technical and clerical staff. 8 positions are			
31	required for the library and 5 positions for the maintenance			
32	and operation of the physical plant. The agriculture program			
33	requires 2 new positions.			
34	Operating expense allowances reflect increased enrollments,			
35	increases in physical plant and price rises where applicable. A			
36	new item of operating expense is a provision for faculty and			
37	student receptions in an amount of \$800. Student fees are in-			
38	creased in accordance with the schedule in the State College			
39	General Analysis. (See page 169.)

GENERAL ANALYSIS

Objectives

Fresno State College is a 5-year, fully accredited college, with programs in teacher education, agriculture and other occupational and preprofessional curricula designed to meet the needs of the counties in the San Joaquin Valley.

Program and Performance

Fresno State College, established in 1911, is now located on its new 1,100-acre site on the outskirts of the City of Fresno. At this new site the college will continue to carry out its traditional function of teacher training, and also continue its programs in agriculture and other occupational and preprofessional curricula. The performance of the college in fulfilling its responsibilities toward the area it serves is best illustrated by the number of successful teacher training candidates produced by the college and the number of degrees conferred. This is shown below :

	1955-56	1956-57	1957-58
Students securing teaching credentials--	273	381	407
Degrees Granted:			
General and professional-----	545	606	1,027
Agriculture -----	71	73	80

While the agriculture program at Fresno carries a very high cost per student, the single most important program at Fresno State College, from the standpoint of enrollment, is teacher education. Approximately 30% of the total enrollment of the college can be attributed to teacher education programs.

Other programs of significance in the total offerings of the college include biology, business, engineering, fine arts, industrial arts, physical education and social science. In excess of 40% of the degrees granted in 1957-58 were granted to students who concentrated in these areas.

Fresno State College is one of the 3 state colleges which has been authorized to conduct an off-campus resident center. The off-campus center administered by Fresno is located in Bakersfield and offers programs for resident credit in teacher education only. The enrollment anticipated at the center for the 1959-60 Fiscal Year is 220 FTE.

The 1958-59 Governor's Budget estimated an enrollment of 5,130 FTE in 1958-59. It now appears that the enrollment will approximate 4,590, a loss of 540 FTE. 5 teacher positions approved by the Legislature have been deleted in the current fiscal year, salary savings have been increased by an additional \$75,000, instructional expense has been reduced by \$9,000 and library expense by \$5,000. \$35,823 of the savings made at this school have been used to finance enrollments at other schools where enrollments exceeded original estimates. The enrollment estimate for 1959-60 is 5,450 FTE, of which 200 is for agriculture. The Fresno campus requires 347 proposed new positions based on workload. 11.5 positions are required in the administrative, business management, and student personnel functions including an executive dean.

Based on the faculty staffing formula, which takes into account shifts in enrollments from lower division to upper division and graduate work as well as changes in subject matter offerings, an additional 13.4 positions are required for instruction. 7.8 of these are teachers and 1 position is a dean of instruction. Enrollments of regular students at Fresno are forecast for 1959-60 on the basis of 41.7 percent in lower division, 53.1 percent in upper division and 5.2 percent in graduate work. 0.8 positions are required for curricula being implemented for the first time.

Other requirements are 8.3 positions for the main library and the music library and 1 position for the maintenance and operation of plant function.

The agriculture program will require 0.5 positions and the Bakersfield Off-Campus Center with an enrollment of 220 will require 4.9 positions including 4 teachers based on the faculty staffing formula.

A new operating expense item for student and faculty receptions is included for \$1,200. Other operating expense items are based on enrollments, price levels and needs of the physical plant.

Student fees are increased in accordance with the schedule in the State College General Analysis. (See page 169.)

GENERAL ANALYSIS

Objectives

Humboldt State College is a 5-year, fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of the northwestern counties of the State.

Program and Performance

Humboldt State College was established in 1913 as a state normal school to carry out the function of teacher training. Although since 1935 Humboldt has been a state college it still has as its primary function the training of teachers. The success of the college in performing this function is seen in the number of teaching credentials recipients the college has produced. Its total performance in educating the youth of California is best measured by the number of degrees conferred by the college. A tabular representation of this performance is as follows:

	1955-56	1956-57	1957-58
Students securing teaching credentials	80	105	89
Degrees granted	98	106	170

The college has active programs in the social services, fine arts, English and literature, and business.

Among its occupational curricula, Humboldt State College, because of its unique location, has offerings in fish and game

management. These programs occupy an important place in the offerings of the college.

The 42.7 proposed new positions for the 1959-60 Fiscal Year are required for the estimated enrollment of 1,850 FTE and the maintenance of additional buildings which will be added to the physical plant including the Speech-Little Theater, the Administration and Business Education Building and the Student Health Center.

5.3 positions are required for student personnel, student health, and business management functions.

27.1 positions are required for the instruction function including 20.1 teachers based on the accepted faculty staffing formula with the balance accounted for in technical, clerical and other supporting staff. 3.1 of the teacher positions are added for approved courses being implemented for the first time. These courses are in the fields of industrial arts, physical education, English, chemistry and nursing.

2.3 clerical positions are added to the library staff and 8 positions for the maintenance and operation of plant function.

Increases in operating expenses reflect growth in enrollment and price rises. Also included is an increase in the allowance of instructional expenses to \$29 per FTE. An amount of \$750 is proposed to defray the cost of receptions for faculty and students.

Student fees are increased in accordance with the schedule in the State College General Analysis. (See page 169.)

^e Composed of savings in salaries and wages, \$9,436; operating expenses, \$1,567; equipment, \$2,613; and a loss in reimbursements of \$544.

^f Composed of savings in salaries and wages, \$537; and operating expenses, \$978.

GENERAL ANALYSIS

Objectives

Long Beach State College is a 5-year fully accredited college with programs in teacher education, occupational, and pre-professional curricula designed to meet the needs of southeast Los Angeles County and Orange County.

Program and Performance

1 of the newest of the state colleges, Long Beach State College was established in 1949 to meet the demand for a teacher training institution in the Long Beach area. Since its establishment, Long Beach has grown to one of the largest of the state colleges and now offers a variety of courses, not only

in teacher training, but also in occupational and preprofessional fields. The performance of the college in meeting the needs of the area it serves is best illustrated by the number of teacher training candidates produced by the college and the number of degrees conferred. This is shown below:

	1955-56	1956-57	1957-58
Students securing teaching credentials	358	388	496
Degrees granted	551	758	1,310

Long Beach State College is next to San Francisco State College, in the number of master degrees granted during 1957-58 with a total of 330.

^a Composed of savings in salaries and wages, \$10,115; operating expenses, \$9,002; equipment, \$2,601; and loss in reimbursements, \$4,308.

^b Composed of savings in salaries and wages, \$20,663; and operating expenses, \$1,718.

^c Does not include pro rata costs for services by Long Beach State College or employees' retirement charges.

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
GENERAL ANALYSIS—Continued					
1					
2					
3	Program and Performance—Continued				
4					
5	Though a relatively new college, Long Beach State has				
6	already developed areas of emphasis in occupational programs.				
7	These areas include biological science, business, English, indus-				
8	trial arts, music, physical education, social science, and sociology.				
9	The college operates an off-campus center program in Orange				
10	County offering teacher training subjects for both prospective				
11	teachers and those seeking to better themselves.				
12	The enrollment of this college for 1958-59 exceeds the original				
13	estimates by nearly 300 FTE. It is necessary to provide				
14	instructors for these additional pupils. <i>Consequently an addi-</i>				
15	<i>tional 16 teaching positions</i> are to be employed at the beginning				
16	of the second semester. These are in addition to those approved				
17	in the budget and will be financed from savings and additional				
18	reimbursements through student fees.				
19	<i>The 194.6 proposed new positions</i> for the 1959-60 Fiscal Year				
20	are required for the estimated enrollment of 7,470 and the				
21	opening of new buildings including a classroom building, outdoor				
22	physical education facilities and the Industrial Arts Building.				
23	22.5 proposed new positions are required for the student				
24	personnel and business management functions including an				
25	admissions officer.

The instruction function requires 126.5 new positions including 92 teachers based on the faculty staffing formula. 6.6 of these teachers are required for courses being offered for the first time. A dean of the college and a dean of instruction are required to strengthen the administrative organization of this rapidly growing college.

14 positions are included for the library based on the library staffing formula.

24.1 positions are required in the maintenance and operation function based on additional physical facilities. 6.5 positions are included for summer session which is completely reimbursed from student fees.

1 additional teacher is required for the off campus center based on an enrollment of 140 FTE.

A new operating expense item for student and faculty receptions in an amount of \$1,500 is included. The increase in level of the student health services, both salaries and wages and operating expense, is paid for from increased student fees. Other operating expenses are based on enrollments, price levels, and needs of physical plant.

Student fees are increased according to the schedule and for the reasons outlined in the State College General Analysis. (See page 169.)

GENERAL ANALYSIS

Objectives

Los Angeles State College of Applied Arts and Sciences is a 5-year fully accredited college with programs in teacher education, occupational, and preprofessional curricula designed to meet the needs of Los Angeles County.

Program and Performance

Los Angeles State College has the largest teacher training program of any single institution in the State. Established in 1947, the college was given the double responsibility of training students to become teachers and training students for gainful occupations in the arts and sciences as related to business and industry. The extent to which the college has fulfilled these responsibilities can be seen in the number of teaching credential recipients the college has produced and the number of degrees conferred by the college. This is shown below:

	1955-56	1956-57	1957-58
Students securing teaching			
credentials-----	769	725	823
Degrees granted-----	904	1,054	1,904

A unique aspect of the occupational programs at Los Angeles State College is the work-study program. In order to provide training which relates practical work experience with classroom instruction, co-operative arrangements with business and industry have been established to give a student the opportunities for work experience in his major.

Other than teacher education, important programs at the college include business, English, government, music, nursing, police science, psychology, social science, and sociology.

Enrollments at Los Angeles State College for 1958-59 have exceeded original estimates by 540 FTE. To meet this added

workload it has been necessary to employ 28 teachers more than the number originally budgeted. These additional positions will be financed from the student fees and by the transfer of savings from colleges where enrollments have not reached anticipated levels.

The enrollments for 1959-60 are based on the admission of 500 FTE in the freshman class. This will be the first year that this college has admitted a freshman class.

The 180 proposed new positions for the 1959-60 Fiscal Year are required for the estimated enrollment of 7,970 FTE and additional physical facilities including a health service building and outdoor physical educational facilities.

9 positions are required for the administrative student personnel and business management functions including an administrative assistant to the president of the college. The student health program requires the addition of 3 new positions.

The instruction function requires 137.1 new positions including 103 teachers based on the faculty staffing formula. 41 of these teachers are required to staff for new courses and curricula. The majority of these are connected with the new freshman enrollments.

11.5 positions are required to staff the library based on the library staffing formula and 19.4 positions are required for the maintenance and operation of plant.

A new operating expense item for student and faculty receptions in the amount of \$1,200 has been added. Other operating expenses are based on enrollment requirements, price projections and needs for physical plant.

Student fees are increased in accordance with the schedule and for the reasons discussed in the State College General Analysis. (See page 169.)

^b Composed of savings in salaries and wages, \$41,067; operating expenses, \$29,604; equipment, \$6,299; and excess reimbursements of \$6,577.

^c Composed of savings in salaries and wages, \$37,954; and excess reimbursements of \$16,060.

GENERAL ANALYSIS

Objectives

Sacramento State College is a 5-year fully accredited college, with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of the 17 counties in the South Sacramento Valley and Central Mountain regions of California.

Program and Performance

Sacramento State College, established in 1947, has as a primary responsibility the providing of teacher training. The success of the college in carrying out this responsibility is seen in the number of teaching credential recipients the college has produced. As a secondary responsibility the college provides training in liberal arts and technical subjects that meet occupational and preprofessional needs. The single best measure of the performance of the college in fulfilling these responsibilities is the number of degrees conferred by the college. A tabular representation of the performance of the college is shown below:

	1955-56	1956-57	1957-58
Students securing teaching credentials	226	249	270
Degrees granted	470	723	730

Of special importance among the occupational offerings at Sacramento State College, are the programs in business administration, biological sciences and the social sciences.

^a Composed of savings in salaries and wages, \$44,785; operating expenses, \$14,984; and equipment, \$11,829.

The 60.3 proposed new positions are based on an enrollment estimate of 4,200 FTE for the 1959-60 Fiscal Year and new facilities including classrooms in the cafeteria addition.

5 positions are required for the student personnel and business management functions. 1.9 positions are included for student health services, a program which is financed from student fees.

31.4 positions are required in the instruction function including 23.3 teachers, the balance being made up of professional, technical and clerical supporting staff. 1.7 of these teacher positions are added for curricula being implemented for the first time.

The library requires 7 additional positions based on the library staffing formula.

15 new positions are budgeted for the maintenance and operation of the plant function. A new operating expense item for student and faculty receptions is included for \$1,000. The remaining operating expenses are based on enrollment, price levels, and needs for the physical plant.

Student fees are increased in accordance with the schedule in the State College General Analysis (see page 169).

GENERAL ANALYSIS

Objectives

San Diego State College is a 5-year fully accredited college with programs in teacher education, occupational, and pre-professional curricula designed to meet the needs of the southern counties of the State.

Program and Performance

San Diego State College, first established in 1897, has a long history of providing teachers for the public schools of the State of California. More recently it has met the needs of the southern counties for people trained in various occupational programs. The performance of the college in fulfilling these responsibilities is best illustrated by the number of successful teacher training candidates produced by the college and the number of degrees conferred. This is shown below.

	1955-56	1956-57	1957-58
Students securing teaching credentials	390	445	488
Degrees granted-----	689	812	1,166

Other than teacher training, the important offerings at San Diego include accounting, business administration, liberal arts, physics, psychology, and social science.

The 1958-59 Governor's Budget estimated an enrollment of 7,300 FTE in 1958-59. It now appears that the enrollment will approximate 6,720 FTE, a loss of 580. 10 teacher positions approved by the Legislature have been deleted in the current fiscal year and \$37,495 of the savings made at this school have been used to finance enrollments at other schools where enrollments exceeded original estimates. Based on the loss in enrollment a greater number of teaching positions would have been deleted except for the fact that most of the teachers had executed valid contracts for the 1958-59 school year.

There are 55.5 proposed new positions, based on the estimated enrollment of the San Diego campus of 7,200 FTE and

the completion of new facilities including the additions to the Science Building, the Physical Science Building, the Education Building, and the Health Service Building.

2.5 positions are required for the student personnel and business management functions. 2.3 new positions are for the health services function which is reimbursed from student fees.

Based on the faculty staffing formula, which takes into account shifts in enrollments from lower division to upper division and graduate work as well as changes in subject matter offerings, an additional 25.9 positions are required for instruction. 18.9 of these are teachers while the balance includes one dean of instruction and the staff necessary to support the teachers. Enrollments of regular students at San Diego are forecast for 1959-60 on the basis of 44.7 percent in lower division, 49.4 percent in upper division and 5.9 percent in graduate work. In addition, the science and engineering fields show a marked increase.

4 positions are added to the library, and 20.8 positions to the maintenance and operation of plant based on accepted standards in those areas.

A new off campus residence center in the Imperial Valley is proposed to be administered by San Diego. Like similar centers at Santa Rosa and Bakersfield it will be operated in the teacher training field to encourage persons to undertake a teaching career and to make them better qualified once they are in the occupation. The estimated cost for 1959-60 is \$47,420 and includes 4.8 positions of which 3 are teachers. An estimated enrollment of 50 FTE is expected in the first year of operation.

As at the other colleges, a new operating expense item for student and faculty receptions \$1,500, is included. Other operating expenses are based on enrollment, price levels, and needs of physical plant. Student fees are increased in accordance with the schedule in the State College General Analysis (see page 169).

^b Composed of savings in salaries and wages, \$10,709; operating expenses, \$11,778; equipment, \$5,921; and loss in reimbursements, \$837.

^c Composed of savings in salaries and wages, \$16,887; and operating expenses, \$4,768.

14	GENERAL ANALYSIS				
15	Objectives				
16	San Fernando Valley State College is a 5-year institution				
17	offering programs in teacher education, occupational and pre-				
18	professional curricula designed to meet the needs of the San				
19	Fernando Valley portion of Los Angeles County.				
20	Program and Performance				
21	The San Fernando Valley State College, as the result of Chap-				
22	ter 2265, Statutes of 1957, became a separate state college on				
23	July 1, 1958. Until that time it was operated as a campus of				
24	Los Angeles State College of Applied Arts and Sciences.				
25	Like the other state colleges, this college emphasizes				
26	teacher training, and also offers occupational and prepro-				
27	fessional programs. During 1957-58, while operating on the Los				
28	Angeles State College Campus, 164 degrees and 110 creden-				
29	tials were awarded.				
30	Continued rapid growth is being experienced. The 1959-60				
31	Fiscal Year estimate of enrollment is 3,000 FTE, an increase				
32	of 50 percent over the current year.				
33	The 162.3 proposed new positions are based on enrollment				
34	estimates and the completion of new physical facilities includ-				
35	ing the Music, Science, and Fine Arts Buildings.				
36	15 positions are required for the administrative, student per-				
37	sonnel and business management functions. 6.8 positions				
38	are required for the student health program.				
39	95.5 positions are required for the instruction function in-				
40	cluding 73.4 teachers based on the faculty staffing formula. Of				
41	this number 22.8 are required for curricula being implemented				
42	for the first time. 6 positions are included, based on the library				
43	staffing formula.				
44	39 positions are required for the maintenance and operation				
45	of plant function, including 12 groundsman and 19 custodians.				
46	These positions are to become effective only when the buildings				
47	and grounds requires their service.				
48	A new operating expense item for students and faculty recep-				
49	tions, is included for \$800. The increases in the level of health				
50	services, both salaries and wages and operating expense, is paid				
51	for from student fees. Other operating expenses are based on				
52	enrollments, price levels and needs of physical plant.				
53	Student fees are increased in accordance with the schedule				
54	in the State College General Analysis (see page 169).

25					
26	GENERAL ANALYSIS				
27					
28	Objectives				
29	San Francisco State College is a 5-year fully accredited				
30	college with programs in teacher education, occupational, and				
31	preprofessional curricula designed to meet the needs of the				
32	counties in the San Francisco Bay and peninsula area.				
33					
34	Program and Performance				
35	San Francisco State College, originally established in 1899				
36	as the San Francisco Normal School, has been operating on its				
37	present Lake Merced Campus since 1954. This college, like				
38	the majority of the state colleges, has 3 principal responsi-				
39	bilities. The first is the providing of teacher training; the				
40	second is the offering of preprofessional and occupational pro-				
41	grams; and the third is the offering of general liberal arts				
42	programs. The success of the college in fulfilling these responsi-				
43	bilities is seen in the following:				
44					
45	Students securing teaching	1955-56	1956-57	1957-58	
46	credentials -----	747	955	824	
47	Degrees granted -----	928	1,156	1,677	
48					
49	Of the state colleges that have had full 5-year programs, San				
50	Francisco State College has granted the largest number of				
51	master degrees. In 1957-58 the college granted 336 master				
52	degrees. This was 19 percent of the total of such degrees				
53	granted by the state colleges. A downtown center is operated				
54	as an administrative center for its extension programs and as				
55	a teaching center for the School of World Business.				
56	The college has assumed leadership in programs in art,				
57	biological science, business, English, industrial arts, music,				
58	physical education, psychology, social science and social welfare.				
59	The college operates an off campus center program in Santa				
60	Rosa. This center is designed to offer residence credit for				
61	courses in teacher education only, and is projected for an en-				
62	rollment of 140 FTE in 1959-60.				
63	San Francisco State College is also unique in its development				
64	of programs for the training of teachers of exceptional children.				
65	The budget includes an allocation of \$100,000 received from				
66	the Federal Government for the development of programs for				
67	training teachers of the mentally retarded. The college has the				
68	additional advantage of being located adjacent to the School				
69

GENERAL ANALYSIS

Objectives

San Jose State College is a 5-year, fully accredited college with programs in teacher education, occupational and pre-professional curricula designed to meet the needs of Monterey, San Benito, Santa Cruz, Santa Clara and San Mateo Counties.

Program and Performance

San Jose State College, established as the California State Normal School in 1862, was the first institution for higher education established by the State and was given the responsibility of teacher training.

While still retaining its importance in the field of teacher education, the college can no longer be characterized as solely a teacher training institution. The college now has some 25 departments offering programs in various occupational and pre-professional curricula suited to the needs of the area it serves.

The performance of the college in carrying out its responsibilities is best illustrated by the following:

	1955-56	1956-57	1957-58
Students securing teaching credentials	767	856	825
Degrees granted	1,270	1,369	2,045

^a Composed of savings in salaries and wages, \$135,956; operating expenses, \$2,892; equipment, \$37,605; and a loss in reimbursements, \$30,025.

^b Composed of savings in salaries and wages.

In 1957-58 this college granted 211 master's degrees, 112 in education. The college has concentrations in business, engineering, fine arts, physical education and social science.

The 152.8 proposed new positions for the 1959-60 Fiscal Year are required for an estimated enrollment of 10,900 FTE and the opening of new facilities including an art building, health building, industrial arts building, additions to the music building and speech-drama building and remodeling of the art wing for journalism. These 152.8 positions are distributed as indicated in the paragraphs below.

12.5 new positions are required in the student personnel and business management functions. 5.2 new positions are added for the student health program. This program is reimbursed by student fees.

96.6 new positions are added to the instruction function. These include 75.1 teachers based on the teaching staffing formula. 20 of these teachers are required for the newly ap-

GENERAL ANALYSIS

Objectives

California State Polytechnic College is a 4-year fully accredited college with programs in agriculture, engineering, liberal arts and teacher education. Because of the unique programs offered by the college and the location of the 2 campuses, the college is considered to be a statewide institution.

Program and Performance

The campus of California State Polytechnic College at San Luis Obispo has the largest agriculture and engineering programs of any of the state colleges. These programs are designed to meet the needs of the entire State and emphasize the learn-by-doing approach. The Kellogg-Voorhis campus has similar programs. Throughout its occupational education, the college uses the "upside down" curriculum in which the student begins work in his major department in his freshman year and is given instruction in the practical phases of his field of specialization during the first 2 years of his course.

The performance of the college can be demonstrated by the number of degree and credential recipients in the various areas of specialization. This is shown below:

	1955-56	1956-57	1957-58
Degrees Granted:			
Agriculture	221	236	254
Engineering	132	194	341
Other	71	216	168
Students securing teaching credentials	34	59	66

Unlike most of the other state colleges, California Polytechnic also provides 2-year technical programs in all agricultural fields. Enrollments for the San Luis Obispo campus in 1958-59 failed to meet original estimates by 411 FTE. Reductions were made in the number of teachers and operating expenses to reflect these lower enrollments.

Financing available from the Fair and Exposition Fund has proven to be \$141,643 less than originally estimated. The savings realized from the decreased enrollments, together with

a transfer from another college of \$26,748, have made it possible to meet the financial requirements for 1958-59.

The 57.5 proposed new positions for the San Luis Obispo campus are required for the estimated enrollment of 4,940 FTE and new facilities including the agriculture classroom building, men's physical education building, student health building, and home economics building.

Of the 57.5 new positions 3.4 are required for the student personnel, and business management functions. 8 positions are included for student health services.

The instruction function requires 23.3 new positions including 18.5 teachers which are allowed based on a need expressed through the faculty staffing formula. 2.3 positions are required for the library based on the library staffing formula. The new physical facilities require 20.5 new positions for the maintenance and operation of plant function.

The 75 proposed new positions for the Kellogg-Voorhis campus are based on a workload estimate of 1,800 FTE and new physical facilities including a business classroom building, agriculture engineering building, outdoor P. E. facilities, and a health service building.

These 75 positions are broken down as to function with 8.2 positions required for the student personnel and business management functions and 2 positions for student health services. 40.3 new positions are included for the instruction function including 32.8 teachers based on the faculty staffing formula. 23 of the additional positions are for new courses in agriculture.

The new library will require 8.7 new positions based on the library staffing formula. New physical facilities will require 15.8 positions for the maintenance and operation of the physical plant.

A new operating expense item of student and faculty reception expense, is included for both campuses. Other operating expenses are based on enrollment, price levels, and needs of physical plans.

Student fees are increased in accordance with the schedule in the State College General Analysis (see page 169).

19	Objectives				
20					
21	This school provides for the education of blind children				
22	in order that they may gain knowledge of, and the confidence				
23	to cope with, their environment.				
24					
25	Program and Performance				
26					
27	This residential school offers general education to blind,				
28	partially blind, and deaf-blind children through the elementary				
29	and high school levels. Besides special teaching methods and				
30	techniques, special equipment such as Braille writers, Braille				
31	books, embossed maps and globes, geometric models, models				
32	for nature study, audio and various types of other equip-				
33	ment are also used. The Helen Keller deaf-blind unit is the				
34	only one in the Western United States where these doubly				
35	handicapped children may receive an education.

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from the elementary through the high school grades with special emphasis on the development of language concepts.

Program and Performance

The California School for the Deaf, Berkeley, is a residential school admitting mentally normal deaf children from 5½ to 21 years of age. Students are given elementary and high school general education, with special emphasis on development of language concepts. Students are given special speech instruction using oral techniques as well as finger spelling and lip reading. Opportunities are provided for learning a trade in one or more of the following fields: home economics, commercial art, printing, cabinetmaking, shoe repair, baking, business techniques, and metal shop. Opportunity is provided for the students to qualify for attendance at Gallaudet College in Washington, D.C., the only college in the United States providing collegiate instruction for deaf people. Of the 49 students from California attending this college, 42 are graduates

of this school. Other graduates have been placed in business firms, construction, printing and allied trades, shoe repair, bakeries, and in self-employed business ventures.

While academic and vocational subjects constitute the main program at this school, the problem of teaching these handicapped children to adjust to society and everyday problems is met to a large extent by the use of psychologists and counselors.

The 1959-60 Budget includes an additional teacher to staff the new metal shop which will be completed in the 1959-60 Fiscal Year. Expenses for students attending Gallaudet College will no longer be reflected in the budgets of the 2 deaf schools. These expenses will be in the budget of the Vocational Rehabilitation Section of the Department of Education where requests will be screened for the possibility of using matching federal funds for this purpose. *Otherwise the school is offering the same level of service as that budgeted during the 1958-59 Fiscal Year.*

GENERAL ANALYSIS

Objectives

This residential school educates mentally normal deaf children from elementary through high school grades with special emphasis on language concepts.

Program and Performance

The curriculum of this relatively new school is similar to that found in public day schools but with special instruction for all students using oral techniques as well as lip reading and finger spelling.

The vocational education program is an important part of the curriculum. A student may receive a certificate of proficiency in any one of the following fields: home economics, commercial art, printing, cabinetmaking, body and fender repair, spotting and pressing, business education, baking, electric motor re-winding and electric appliance repair.

The school also offers a college preparatory course for students to compete for entrance in Gallaudet College in Washing-

ton, D. C. 10 students from this school are expected to attend Gallaudet College in 1959-60.

In addition to the academic and vocational programs offered, the problem of teaching these handicapped children to adjust to society and its everyday problems is met to a large extent by the employment of psychologists and counselors.

The capacity of the school was increased at the beginning of the 1958-59 school year by the occupancy of 2 new dormitories with a capacity of 32 each, and 2 new classroom buildings.

0.5 man-year of clerical temporary help is being added to the administrative unit of this school because of workload caused by the increased enrollments for which no staffing was provided in 1958-59. Expenditures for students attending Gallaudet College have been transferred to Vocational Rehabilitation Section of the Department of Education to take advantage of matching federal funds, thereby decreasing the overall state expenditure for this program. The program budgeted in 1959-60 is otherwise at the same level as the 1958-59 Fiscal Year.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and treatment of children afflicted with cerebral palsy or other similar handicaps and the determination of educational programs for these children. It serves also as a demonstration laboratory school for the training of teachers of handicapped for the education department of the San Francisco State College.

Program and Performance

The program of diagnosis, treatment, and educational planning at the school served a total of 116 children for varying periods during the fiscal year of 1957-58. Of these 45 were enrolled for approximately 10 days each, 71 for longer periods. Complete reports covering all aspects of the childrens' stay were forwarded to the local agencies concerned with each of the 87 children discharged during the year. 6 physical therapists received clinical training and approximately 30 student teachers did classroom observation and practice. In addition, 15 nursing students spent 2 weeks each at the school, plus visits from the nursing classes of 6 San Francisco hospitals.

The children served included the neuromuscularly involved (61) of whom 25 were also either visually or aurally impaired, and those whose primary problem was neurological impairment

leading to language retardation (55). Of the total group 16 were also evaluated as to vocational possibilities since they were 15 or more years old. The evaluation was in addition to the usual program of education and therapy, and was often at the request of the local community. 1 is now a client of the Bureau of Vocational Rehabilitation.

Average cost per student served is approximately 27 percent of the unit cost shown above for student year.

Average length of enrollment:

Short term diagnostic evaluation: 8.3 days

Aurally or visually impaired cerebral palsied children: 12 months

Aphasic children: 8.3 months

Prevocational training program:

Trial enrollment: 1.7 months

Training enrollment: 6.1 months

Typical cerebral palsied children, regularly enrolled: 5 months

A new position of accounting officer is proposed in lieu of contracting for accounting services.

No increase in enrollment is anticipated for the budget year. Unit costs are expected to rise slightly due to price increases, but the same general level of service will continue.

GENERAL ANALYSIS

Objectives

This is a residential school designed for the diagnosis and treatment and the determination of an educational program for children from Southern California crippled by cerebral palsy or other similar handicaps. It serves also as a demonstration laboratory school for the training of teachers of handicapped children for the educational department of Los Angeles State College of Applied Arts and Sciences.

Program and Performance

The children enrolled at this school are referred primarily from the Crippled Children Services of the Department of Public Health and from the local school districts of the 13 Southern California counties. The students are enrolled for an average of 1 year, depending upon the severity of the handicap, the degree of difficulty in establishing an educational, medical,

and therapy program, and the response to parent education and counseling. Upon completion of the residential program, the child is either returned to his local community for continued medical supervision, treatment, and special education, or is referred to a state hospital for the mentally retarded or for the emotionally disturbed. During 1957-58, a total of 65 children were enrolled, a 14 percent increase over the 1956-57 Fiscal Year, and 37 discharged.

In the 1958 summer session, Los Angeles State College taught 6 courses at this school in which 74 students were enrolled.

The program for 1959-60 is a continuance of the existing level of service. A new position of school psychologist is offset by the deletion of a position of medical social worker and reducing existing contract arrangements for psychological services.

GENERAL ANALYSIS

Objectives

The Oakland Orientation Center for the Blind serves a dual purpose: a training center for the orientation of newly blinded adults and a permanent home for those persons in residence in 1951.

Program and Performance

In meeting its objectives, the agency offers a program designed to deal intensively with central problems arising from blindness. First of all, a blind person must learn new means of performing the various tasks and functions connected with the whole range of living, including new techniques of travel, communication, habits of daily living and the use of one's senses other than sight in orienting oneself to the physical world about him. To accomplish these ends, the center offers courses in travel, Braille and typing, shop, home economics, daily living, physical conditioning, and the like.

The program is designed to help the enrollee regain a feeling of competence and self-confidence, to the end that he may return to the pattern of life which he would have followed in the absence of blindness. Almost without exception, all of the 85 students admitted or discharged during the fiscal year ending June 30, 1958, gained a confidence for self-help, many becoming entirely self-supporting, others returning to their functions as homemakers, and still others enrolling in courses of further training leading to vocational or professional goals.

The center also provides a residence for blind persons admitted prior to the separation of the orientation functions and the workshop manufacturing functions in 1951. The number of such blind persons being cared for is now reduced to 45.

The program for 1959-60 is extended at the same level as in 1958-59.

GENERAL ANALYSIS

Objectives

This center provides sheltered employment to blind, visually handicapped, and physically handicapped persons in the Oakland area to enable them to contribute to their own support.

Program and Performance

This center specializes in the manufacture of domestic and industrial type of corn brooms. Other products manufactured at this Center are staple set street brooms, pillowcases, mailing bags, sewn domestic cotton items, sanitary brushes, rubber mats and commissary items for the Federal Government.

The California Industries for the Blind Manufacturing Fund is charged with all manufacturing costs and the General Fund is charged with administration costs not directly related to the manufacturing process.

The financial transactions of the Manufacturing Fund for this center, excluding administrative costs which are borne by the

General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handi- capped workers	Total other operative costs	Net profit
1954-55-----	\$865,000	\$209,174	\$625,877	\$29,949
1955-56-----	712,624	200,967	489,587	22,070
1956-57-----	909,452	228,263	649,579	31,610
1957-58-----	861,182	205,988	652,564	2,630

In keeping with recommendations of the Co-ordinating Council on State Programs for the Blind, an attempt is being made to make the California Industries for the Blind more competitive. This will be done by placing the less productive workers in the opportunity work center program.

This program is budgeted for the same level of service as in 1958-59.

this center, excluding administrative costs which are borne by the General Fund, are summarized in the table below:

Year	Sales	Total wages paid to blind and handi-capped workers	Total other operative costs	Net profit
1954-55	\$474,465	\$54,261	\$407,265	\$12,939
1955-56	641,698	68,107	535,240	38,351
1956-57	650,549	69,346	525,284	55,919
1957-58	375,579	57,928	292,779	24,872

The marked decrease in sales during the 1957-58 Fiscal Year was due primarily to a smaller volume of purchases by the Federal Government which is the largest single customer of this shop. The program as proposed contains no increased level over that authorized during 1958-59.

GENERAL ANALYSIS

Objectives

The State Scholarship Commission administers a statewide system of competitive scholarships that enables a group of qualified students to attend the college of their choice. These students, because of financial considerations, would be unable to attend the particular college without the scholarship assistance. The program terminates on July 1, 1962.

Program and Performance

The program provided 640 scholarships in 1955-56, 1,280 in 1956-57, 1,920 in 1957-58, and 2,560 in 1958-59 and thereafter.

Tests are given and the awards made in the spring of each year while the payment of the awards is made after July 1st and is a charge against the subsequent fiscal year. In 1958-59 tests were given and awards made for 2,560 scholarships, payments for which will be made in 1959-60.

The awards are made both on the basis of scholastic ability and the need for financial assistance for the student to attend the college of his choice. This is done by means of a standardized aptitude test administered by the Educational Testing Service and an evaluation of financial need, by teams of analysts employed on a temporary basis by the commission.

14					
15	GENERAL ANALYSIS				
16	Objectives				
17					
18	The function of this system is to provide monthly allowances				
19	to public educational personnel who are qualified to retire for				
20	services or disability in accordance with the provisions of the				
21	Teachers' Retirement Act and policies established by the State				
22	Teachers' Retirement Board.				
23					
24	Program and Performance				
25					
26	The system maintains personal records for each member of				
27	the system and accounts for member, employer and state con-				
28	tributions and for the investment of such contributions which				
29	are kept in trust to finance the accumulation of member credits.				
30	On July 1, 1958, there were 212,845 members in the retire-				
31	ment system of whom 18,824 were retired, with a substantial				
32	but undetermined number qualified to retire. The rapid growth				
33	in membership is due to the increasing number of professional				
34	personnel required in the public school system. In the past

year over 29,000 new members were added to the rolls. This number was unusually large because of the amendments to the law effective July 1, 1956, which now permits all part-time teachers to become members. However, the number of withdrawals has also increased unusually so that the total increase in retired membership continues approximately at the same rate as in the past.

Because the growth of the system is continuing at a rapid rate, it is necessary to add 3 new permanent positions. The proposed increase in temporary help is to relieve a backlog that has developed in processing the applications for membership and to meet peak workloads associated with the concentration of retirements at the end of the school year in June.

An additional 4 positions are provided for verification of out-of-state service for teachers who were members of the system on June 30, 1944, and for speeding up the process of refunding money to members who leave the system.

GENERAL ANALYSIS

31 **Objectives**

32 This commission was formed to study and investigate the

33 public libraries in the State with reference to: (a) their

34 organizational structure, (b) their operations, (c) needed im-

35 provements to make their services available to all members

36 of the public and (d) methods of financing public libraries,

37 with particular reference to whether there is a need for state

38 participation in such financing in view of their relationship

39 to the educational program.

40

41 **Program and Performance**

42

43 The commission was created for a 2-year period by Chapter

44 2328, Statutes of 1958. The commission is composed of 9 per-

45 sons, appointed by the Governor, and 4 members of the

Legislature, who also comprise a Joint Legislative Investigating Committee.

Four reports: (1) General; (2) Titles added in 1951 to California Public Libraries; (3) Personnel Utilization, California Public Libraries; and (4) Laws and Government of California Public Libraries are all required to be completed by December 31, 1958, and the commission staff will be disbanded at that time. The commission is required to report its findings and recommendations to the Governor and the Legislature on or before January 10, 1959. In order to assist the Legislature and its committees in considering its findings and proposals, the commission will continue in existence until the final adjournment of the 1959 Regular Session of the Legislature, *after which it will cease to exist.*

^a Lump sum provisions subject to allocation (for salary increases, academic promotions, contingencies, etc.).

^b Current funds available for general and specific purposes, including endowments and donations for support of continuing activities; does not include funds for services under contracts. Neither the revenues nor the expenditures of University funds are included in the overall budget totals.

^c Net current expenditures (including contributions to the State Employees' Retirement Fund) after deducting current revenue from sources other than state appropriations. Excludes expenditures, income, and enrollment, if any, for the following activities and functions, together with the proportionate amount of general administration, general expense, maintenance and operation of plant and statewide expenditures attributable thereto:

(1) Summer sessions, extension, vocational education.

(2) Organized research activities, such as the Agricultural Experiment Station, the Scripps Institution at La Jolla, Lick Observatory, the Institute of Experimental Biology, etc. However, expenditures for research and investigation carried on by academic personnel under departmental auspices are included; these are particularly significant in the medical centers at San Francisco and Los Angeles.

(3) Auxiliary enterprises, such as dormitories and dining halls.

(4) Organized activities of educational departments, such as the University Creamery at Davis, and the Optometry Clinic at Berkeley, which are supported out of their own income. However, teaching hospital expenditures in excess of their income are included in computing expenditures per student.

(5) Student aid.

^d The 1958-59 budgetary savings held by the University are carried forward as available funds and are applied to the financing of the 1959-60 program. The 1959-60 program is estimated to have overall savings of \$2,725,000 thereby reducing the net General Fund appropriation required.

GENERAL ANALYSIS

Objectives

The University of California is a statewide institution of higher learning which has 4 major functions.

These are:

1. Research directed toward advancing the understanding of the natural world and the interpretation of human history and of the great creations of human insight and imagination.
2. Instruction of able young people, not merely by transmitting to them established knowledge and skills, but by helping them to experience with their teachers the actual processes of developing and testing new hypotheses and fresh interpretations in many fields.
3. Training for professional careers—a training not merely routine, but grounded in understanding of relevant sciences and literature, and enlightened by some experience in the methods by which the boundaries of knowledge are pushed back.
4. Various sorts of expert public service.

Program and Performance

In keeping with these general purposes admission requirements at the University of California are more selective than those of the junior colleges and state colleges, even though the

content of introductory courses at the freshman and sophomore levels may be closely comparable for students planning to go on to a bachelor's degree, by transfer or otherwise. The program of the University of California develops greater differences in the upper division, and goes on to levels of professional or general scholarly training not duplicated in other public institutions.

The University operates on 8 major campuses and a number of experiment stations. Major campuses are situated at Berkeley, San Francisco, Davis and Mt. Hamilton in Northern California, and at Los Angeles, LaJolla, Riverside and Santa Barbara in Southern California. Its full-time resident enrollment has been the largest in the country for a number of years. It reaches the people directly in all parts of the State through its Agricultural Extension Service, including 4-H clubs, and through university extension classes, correspondence courses and conferences. It maintains off-campus services through which practicing doctors, lawyers, dentists, engineers, etc., may renew and deepen the value of their services to the public throughout life; a University Press for the publishing and distribution of scholarly books; and diagnostic and treatment centers to which doctors may refer citizens of the State suffering from particularly dangerous or obscure ailments.

In carrying out these programs the University has attained a ranking that places it among the greatest institutions of learn-

UNIVERSITY OF CALIFORNIA—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
1	GENERAL ANALYSIS—Continued				
2					
3					
4	Program and Performance—Continued				
5					
6	ing in the world. As a natural part of this development the				
7	University has tended to devote its energies to advanced studies				
8	and large amounts of fundamental research. As a consequence				
9	the student body is heavily weighted in the upper division and				
10	graduate schools.				
11	One measure of this is the number and type of degrees granted.				
12	The table below shows the number of degrees granted in 1950-51				
13	and 1957-58. This table also illustrates the growing trend				
14	toward the more advanced types of work.				
15					
16					
17	YEAR	UNDERGRADUATE DEGREES	GRADUATE DEGREES		
18	1950-51	84.0%	16.0%		
19	1957-58	75.6%	24.4%		
20	Another measure of this shift to advanced standing and grad-				
21	uate work can be shown by considering the composition of				
22	the enrollment. The table below shows the trend for the years				
23	1955-56 through 1959-60.				
24		1955-56	1956-57	1957-58	1958-59
25	Lower division (%)	34.9	33.3	31.8	31.2
26	Upper division (%)	41.3	42.2	43.4	42.1
27	Postgraduate (%)	23.8	24.5	24.8	26.7
28	The budget for 1959-60 contains provision in recognition of				
29	these trends in enrollment both as to size and shifts between				
30	lower and upper divisions. The allowances for academic posi-				
31	tions have been made on the basis of a weighted teacher-student				
32	ratio which recognizes the differences in requirements for in-				
33	structing at the lower division, upper division, and postgraduate				
34	level. The weighting so used is an interim standard that will be				
35	reviewed upon the development of additional information.				
36	The budget is a continuation of the present level of service				
37	and provides generally for workload increases only. The only				
38	exception to this is an increase of \$28,224 in the astronomy				
39	department at Berkeley for operation of a radio telescope. (See				
40	page 244, line 29, col. 2.)				
41	Further details concerning the budgetary provisions are con-				
42	tained in the discussions of the various campuses below.				
43					
44					
45					
46					
47					
48	This part of the budget includes the statewide and adminis-				
49	trative expenditures for the University as a whole. In addi-				
50	tion, it also contains the operating budgets for units which				
51	function on several campuses or outside of the jurisdictions of				
52	chief local administrative officers. These include statewide				
53	Agricultural Sciences, Public Health, Graduate Division, Uni-				
54	versity Extension, etc. The statewide budget is also the tempo-				
55	rary resting place for miscellaneous lump-sum provisions for				
56	contingencies and salary changes, which will later be allocated				
57	to appropriate detailed budgets on the various campuses.				
58	Experience over the last several years has indicated that				
59	savings in the approximate amount of \$2,700,000 accrue each				
60	year in the University budget. These savings usually have been				
61	applied as a source of financing in the second year subsequent				
62	to their accrual. A savings of \$2,000,000 from the 1958-59				
63	expenditure program (see note d, page 240), in addition to the				
64	\$724,765 already anticipated from increased nonresident student				
65	fees (as noted above on this page), is therefore proposed. This				
66	\$2,000,000 therefore becomes another source of financing for				
67	the 1959-60 program.				
68	In addition, a reduction from the 1959-60 program of				
69	\$2,725,000 is also contained in this budget in anticipation of				
70	such savings (see note d, page 240). This is based on the premise				
71	that this budget was prepared on the same basis as previous				
72	budgets and such savings will undoubtedly accrue. By anticipat-				
73	ing these savings in advance state funds will be conserved to				
74	decrease anticipated General Fund deficiencies.				
75	In general, the budget increase requested divides function-				
76	ally as follows:				
77	Administrative Workload Increases:				
78	These principally include:				
79	Controller's Office (\$95,273; 6.4%): The increase will main-				
80	tain existing level of financial services; augment internal audit;				
81	serve the needs of the expanded residence halls program; and				
82	provide accounting services for the growing statewide construc-				
83	tion program.				
84	Office of the President (\$30,558; 4.6%): Provides continua-				
85	tion of budgetary support for the newly activated position of				
86					

Revenue to the University is estimated to increase \$8,765,054, or 25.7 percent, and bring in a total of \$42,859,168. Significant changes are for the following:

Auxiliary Enterprises ----- Increases \$3,383,907

The principal increase in auxiliary enterprises is largely made up of additional income from new residence and dining halls that will come into operation in 1959-60.

Student Fees ----- \$3,037,189

Student fees will increase \$1,309,189 as the result of increased enrollment in regular sessions, summer sessions and extension programs. The incidental fee is assumed to remain at its current level of \$60 per semester, and the \$10 increase made effective in 1958-59 will provide some allowance for further increases in costs and intensity of usage of the student services provided from these fees.

Nonresident tuition fees are increased \$550,000 on the basis that these fees will be increased from \$400 to \$500 per year, which is the maximum sum authorized by Section 20003 of the Education Code. This will recover a greater portion of costs per student which are now in excess of \$1,500 per year.

University extension fees are increased \$1,178,000 to a total of \$7,281,600 on the basis that fees will cover the total estimated expenditures for University Extension.

Sales and Service. ----- \$1,996,650

Income from sales and services will increase by \$1,966,650 (22.1%) due primarily to the scheduled reopening of University Hospital at the San Francisco Medical Center as an acute general hospital, plus a more favorable income outlook for the teaching hospitals.

STATEWIDE

vices president of the university, supported this year from contingency funds. Also covers 2 additional positions for additional workload in connection with statewide public information and handling of gifts and grants to the University.

Staff Benefits (\$288,250; 10.7%): A 12.3 percent increase (\$290,250 in the regents' contributions to the Pensions and Retiring Annuities System is for inclusion of "acting" titles in the system; and an estimated 8 percent increase in payroll for new positions, merit increases and promotions. This total is partially offset by a reduction in supplemental pensions of \$22,000.

General Institutional Services and Expense (\$81,281; 6.1%): This includes a slightly higher level of support for the All-University Faculty Conference to meet rising costs; increased printing funds keeping pace with increased demand for official publications (catalogs, etc.) and by a greater number of faculty members publishing research papers in the Scientific Series at University Press; and workload increases in Office of Relations with Schools.

Operational Workload Increases:

Department of Instruction and Research (\$109,360; 20.8%): Increases will be devoted to the Graduate Division (\$29,360), made necessary by expanding graduate enrollment (estimated to increase 7 percent at Berkeley; 7.6 percent at Los Angeles); and the School of Public Health (\$13,764), to replace a staff loss at Berkeley, for which budget support had been reduced because the post was occupied by a retired faculty member without pay, and to permit development of the graduate program in occupational health at Los Angeles.

Allowance is made for an additional \$25,000 for sabbatical leave replacement, necessitated by the combined effects of an increased faculty and higher salary scales.

Organized Research (\$37,046; 1.8%): Small workload increases are provided for several of the units included in this group, such as Cancer Research (\$2,060), Institute of Geophysics (\$9,441), Institute of Industrial Relations (\$2,570), and the Institute of Marine Resources (\$6,723); other in-

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	
1					
2					
3					
4	creases are financed principally from endowment fund income				
5	or from special funds.				
6	University Extension (\$973,987; 19.2%): This increase will				
7	come from fee income. (See page 242, line 32, column 2.) It is				
8	proposed that the University Extension become a self-support-				
9	ing activity. Therefore the operating subsidy from the General				
10	Fund is terminated in this budget. Previously this subsidy				
11	approximated 18% of total costs (15.9% proposed by the Uni-				
12	versity in 1959-60). Many extension courses are for the benefit				
13	of employed adults who should be able to pay the costs of such				
14	education. In addition the University limits the number of				
15	credits a person may use toward securing a degree when the				
16	courses have been taken through extension. The various state				
17	colleges also offer extension courses and in general have been				
18	required to conduct these programs on a self-supporting basis.				
19	The increase proposed for the Real Estate Program which				
20	is financed from the State Real Estate Education and Research				
21	Fund will permit improvement of instructional materials and				
22	will support courses in outlying areas that are needed but				
23	which cannot support themselves.

STATEWIDE—Continued

The increase for Lake Arrowhead will all be realized from increased income and will continue a small reserve for renovation and capital improvement.

Statewide Miscellaneous Provisions \$1,141,265 (218%)

This includes lump-sum miscellaneous provisions budgeted at the outset of each year under Statewide and then transferred to campus and departmental budgets as costs are ascertained.

The increase largely represents the estimated cost of 1959-60 promotions and merit increases within presently established salary scales.

Business Affairs \$704,289 (6.8%)

The budget proposes no increase in the cost-level of the University's plant housekeeping and maintenance activities, but reflects only the impact of expanded space.

BERKELEY								
<p>The Berkeley campus is the oldest and most populous of the University's campuses. In 1873 the first classes met on the Berkeley campus, which covers more than 900 acres on the eastern side of San Francisco Bay.</p> <p>The 1959-60 Budget will provide for the maintenance of student-related programs in light of increased enrollment and enlarged facilities; and allow the campus to begin a relatively small but significant new program.</p> <p>The total workload increase is assigned by function as follows:</p> <p>Departments of Instruction and Research: \$622,215, of which slightly more than half of the increase is recommended for additional academic positions and the balance is generally needed for their support. Academic FTE increases, to meet enrollment increases, are assigned to the areas where these increases have been largest. In some cases total enrollment has increased; in others, the enrollment of advanced students has increased with consequent heavier proportional increase in teaching load.</p> <p>In addition, these points are pertinent to the Berkeley academic FTE increases:</p> <p>In languages, they will meet the demand for instruction in Near Eastern languages and in Slavic languages and literature. In English, sharp class enrollment increases will result from the new post-entrance requirements in composition and reading; necessary to deepening of the liberal arts education.</p> <p>Organized Research: \$68,851 increase principally to meet enlarged research programs involving increased workloads in the Computer Center (\$7,582), Institute of International Studies (\$26,039), the Institute of Human Relations (\$12,798), and the Bureau of Public Administration (\$7,333). To increase the budget for the Committee on Research (\$19,800) in line with the larger faculty and cost increase; and to increase Research-Travel (\$7,280) to meet the research needs of an</p>								
<p>expanded faculty and for travel in connection with research activities.</p> <p>Libraries: \$62,715, the major part representing a 14 percent increase in the book budget, to keep up with rapidly increasing prices and to meet increasing needs for reserve duplicates (greater library usage).</p> <p>Organized Activities-Educational Departments:</p> <p>The largest element of increase is for Supervised Teaching (\$15,388) to enable the department to maintain its student-staff ratio in the face of increased enrollments and the demand for accelerated preparation of credential candidates. The Museum of Anthropology (\$9,648), which has been marking time for some years, will move into a new building, where its notable collection can be better utilized in the department's teaching and research program. A play production supervisor will be added to the University Theater (\$8,785) in order to make more effective use of this laboratory-type activity which is partially supported by ticket-office receipts from student play productions.</p> <p>General Administration:</p> <p>Budget additions of \$17,710 in the Chancellor's Office are needed for continuation of 2 new Vice Chancellors (each half-time) and a part-time secretary. Increases for Business Affairs cover purchasing office activities for residence halls.</p> <p>Radio Astronomy Laboratory: The increase proposed (\$28,224) is the University's portion of the support for operation and maintenance of the 85-foot, \$368,000 radio telescope financed by the Office of Naval Research, for studies in a relatively new and revolutionary field of astronomy which is yielding information about the universe that cannot be obtained by visual observation. This is the 1 new program that is not added on a strictly workload basis.</p>

1	DAVIS								
2	The 3,000-acre Davis Campus, 13 miles west of Sacramento,								
3	is the northernmost of the University's statewide system. Estab-								
4	lished in 1905, about two-thirds of the campus acreage is								
5	devoted to crops and farm animals for teaching and research								
6	in the College of Agriculture and as an agricultural experiment								
7	station. Other major units are the College of Letters and								
8	Science and the School of Veterinary Medicine.								
9	Of the workload increase, \$160,032 is accounted for by								
10	maintenance and operation of plant, and is the result of a								
11	16 percent increase in the area to be maintained. Of the								
12	remainder, \$178,746, an increase of 2.2 percent, is allocated to								
13	the departments of instruction and research in the College of								
14	Agriculture (\$88,442; 1.4 percent) and in the College of Letters								
15	and Science \$90,304; 5.6 percent).								
16	Enrollment and Student-Faculty Ratio:								
17	Enrollments in the College of Letters and Science will have								
18	increased since 1956-57, as shown in this table:								
19		1956-57	1957-58	1958-59	1959-60				
20	Total campus	2,105	2,280	2,350	2,634

LA JOLLA

The La Jolla campus in the City of San Diego has been a center of research in oceanography since the Scripps Institution of Oceanography became a part of the University in 1912. Activities include the Scripps Institution of Oceanography, which has sent its ships over the Pacific Ocean in quest of detailed scientific information about the ocean; and the Institute of Technology and Engineering established in 1957-58 to provide graduate instruction and research in mathematics, physics, chemistry, the earth and biological sciences, and engineering.

The factors influencing the \$186,625 workload increase in the budget for the La Jolla campus are:

a. The national need for greatly increased effort in scientific education and research and the potential of this campus to

make a wider contribution to this need. In addition, due regard has been given to proper support of Scripps Institution so as to permit maximum advantage from available federal assistance.

b. The continued development at La Jolla of an Institute of Technology and Engineering which will later be converted into departments of instruction and research to include undergraduate instruction as the need arises.

The increase includes \$29,868 for Business Affairs for expanded plant, \$113,342 for the Institute of Technology and Engineering for additional staff and books for the library; and the balance is principally assigned to the progress of the Scripps Institution of Oceanography (\$24,489), the research support shops (\$8,796), and the Scripps Library (\$9,000).

Organized Research:

Increases of \$26,497 for the Research Division and the Western Data Processing Center of the Graduate School of Business Administration are needed to continue the present level of program following a period of initial development. Reorganization of the Bureau of Governmental Research (\$4,997) requires a modest increase, and modernization of the SWAC computer (Numerical Analysis Research \$12,150) needs some budget implementation in 1959-60.

Research and Research Travel:

As is the case elsewhere in the University, an expanded faculty, an accelerating pace of scientific and scholarly achievement, and greater costs require better budget support. In 1959-60 it is proposed to equalize the average faculty grant at Los Angeles with that budgeted at Berkeley.

Medical Center:

The increase for the medical center is more than offset by additional hospital income of \$338,190, resulting in a slight reduction in state support requirements in the coming year.

Continuing increases in enrollment of 48 for the School of Medicine and 28 for the School of Nursing are anticipated.

MOUNT HAMILTON

The Mount Hamilton campus, atop 4,209-foot Mount Hamilton, overlooking Santa Clara Valley, has the world-famous Lick Observatory which is the center for the astronomical research of the University.

The budgetary increase provides for continuation of the present program and for expense in connection with the development of the new 120-inch telescope. It includes price increases and some deferred maintenance.

RIVERSIDE

The Riverside campus since 1913 has been the site of the Citrus Experiment Station conducting research and graduate instruction in agriculture. In addition, since 1954 a College of Letters and Science has operated to meet the educational needs for undergraduate facilities offering a 4-year liberal arts curriculum.

With the opening of the first residence hall, it is expected that enrollment will increase 42 percent; 1,387 students over 977 during the current year. The budget proposes adding 16 FTE teaching staff. The ratio of students to teaching staff on an unweighted basis nevertheless shows a sharp increase—from 9.17 to 11.32—as the campus approaches a more nearly efficient size.

Student Services: This budget allocation will provide for an increasingly resident campus: supervisor of housing and dean of men, and a larger student health service (offset by students' fees).

College of Letters and Science: The principal areas for staff increases are the humanities and physical sciences. The increase in physical sciences is needed to meet the largest percentage of enrollment growth: at least one-third of the students on campus are majoring in some aspect of the physical sciences, and all data indicate that this abnormal distribution will continue.

DETAIL BY OBJECT

ANALYSIS BY FUNCTION

SAN FRANCISCO

The San Francisco Campus, devoted exclusively to the medical sciences, offers instruction in the Schools of Dentistry, Medicine, Nursing, and Pharmacy. In addition the Hooper Foundation for Medical Research is a renowned center of investigation in epidemiology. The new Medical Sciences Building, University Hospital, Medical and Dental Clinics offer facilities for teaching, research, and service.

Of the workload increase recommended, \$1,376,224 is for hospitals, more than covered by increased income, leaving the increase for all other activities at \$321,759, or 4.6 percent.

The workload budget recommended is based on:

1. An overall enrollment gain of 7.1 percent (10.3 percent increase in postgraduate and graduate students).
2. Partial reopening of the University of California Hospital (\$1,251,541, all offset by income).

School of Medicine (\$212,271; 6 percent): This increase will provide for:

- a. Enrollment increases in the second-year class from 84 to 100 students and in postdoctoral work from 240 to 258 students.
- b. Strengthening the Departments of Pediatrics (\$12,119) and Anesthesia (\$11,004) to meet workload, including professional service to the reopened University Hospital.
- c. Additional resident staff in connection with the reopening of the University Hospital (\$15,660).
- d. General correction of deficiencies in other departments, brought about by enrollment and workload increases.
- e. Augmentation of departmental and unallocated research funds (\$47,517) from additional endowment income accruing in the budget year.

Increases in the School of Nursing of \$24,478 or 8.4 percent will allow for an enrollment increase estimated at 27.6 percent and for small increases in research, in connection with expanded graduate enrollment. The increase in the School of Pharmacy of \$16,825, or 3.9 percent, will provide for nominal enrollment increase, but no new programs of instruction.

SANTA BARBARA

The Santa Barbara campus is situated on a 408-acre seashore site, adjacent to the community of Goleta, 7 miles northwest of the City of Santa Barbara. A 4-year liberal arts undergraduate program leading to bachelor of arts degree, and graduate work in certain specialized fields are offered.

This budget represents increases to accommodate a conservatively estimated 16.8 percent increase in enrollment for 1959-60.

The most significant aspect of the enrollment situation is that student housing shortage will no longer constitute an unnatural ceiling over student population growth.

Major elements of increase:

General Administration (\$32,176; 22.1%): This increase relates almost entirely to the Chancellor's Office, which is being re-organized and strengthened incident to the advent of the new Chancellor recently appointed by the regents.

Student Services (\$56,181; 17.4%): About half of this increase (\$27,104) is assigned to the student health service to accommodate workload increase that will result from a larger enrollment and more students resident on campus. Also associated with both increased enrollment and more resident students are workload increases for the dean of men, counseling center, student housing office, and registrar.

Departments of Instruction and Research (\$239,188; 12.1%): This increase will be devoted to augmentation of the teaching staff to meet enrollment increases and also will provide for conservative continuation and implementation of the master's degree program already authorized in 9 disciplines.

Library (\$41,476; 21%): This increase remedies past deficiencies and will provide books to meet the present and future demands of graduate work.

19	Objectives				
20					
21	Hastings is a fully accredited institution offering systematic				
22	and thorough instruction in those branches of law which will				
23	best prepare the student for the practice of the profession				
24	of law.				
25					
26	Program and Performance				
27					
28	Hastings College of Law is the largest publicly supported				
29	law school in California. While it has its own board of directors,				
30	it is designated by statute as the law department of the				
31	University of California, and degrees are issued in the name of				
32	the Regents of the University of California.				
33	The college was founded in 1878 by S. C. Hastings with a				
34	grant of \$100,000 to the State through the Regents of the				
35	University of California. By stipulation in the original agree-				
36	ment the State must pay to the school the sum of 7 percent				
37	interest on the grant or repay the \$100,000 in full to a Hastings				
38	heir.				
39	For several years following World War II the \$7,000 pay-				
40	ment was the only state appropriation received by the college.				
41	During the immediate postwar years a large reserve had been				
42	built up from the nonresident fees paid by resident veteran				
43	students. The main support of the college was paid from this				
44	source. Since 1954-55 additional appropriations of \$42,000 have

GENERAL ANALYSIS

Objectives

The board makes rules and regulations governing the presentation and auditing of claims, allowances for reimbursement for traveling on official business, and making of merit awards. Other functions include considering, auditing, and recommending to the Legislature claims against the State for which no appropriation has been made, and hearing appeals in accordance with the purchasing procedure under the provisions of Section 13391 of the Government Code.

Program and Performance

Each year the board considers approximately 800 claims arising because no appropriation is available or because the

settlement of the claims was not otherwise provided for by law. Claims approved by the board are, with the sanction of the Governor, referred to the next session of the Legislature with a recommendation that an appropriation be made in payment thereof. The board subsequently pays all claims for which funds have been provided and the Governor has approved. The board meets semimonthly to conduct business, consider appeals, establish rules and regulations concerning state travel and per diem expenses, and hear claims.

The board appoints members to the Merit Award Board on a 2-year basis and monthly considers the recommendations for awards of that board.

GENERAL ANALYSIS

Objectives

The State Controller is the accounting and disbursing officer of the State. As the State's fiscal officer he maintains the accounts of all funds and appropriations, which involves determination of the legality of all receipts of moneys by the State and all payments withdrawing moneys from the Treasury; makes various apportionments of state revenues; administers the state payroll system, including the United States Savings Bond program; he accounts agency trust moneys in the custody of the Treasurer; supervises the administration of state inheritance and gift taxes; collects motor vehicle fuel license tax, motor vehicle transportation license taxes, petroleum and gas assessments and insurance premiums tax; administers the tax refunds to nonhighway users of motor vehicle fuel; collects state and county sales and use taxes on fuel not used on a public highway; administers laws concerning county budget procedures; reports state, county, city, district, and street and highway financial transactions; prescribes the scope and content of the annual audit made of all California special districts; supervises the general procedures concerning delinquent property taxes and administers property tax-deeded to the State; and, field audits expenditures by local governments for programs involving state subventions.

Program and Performance

The Controller's general administrative staff is responsible for administering and supervising the work done by the entire Controller's office, and for staff services in assisting the Controller in respect to the 16 boards and commissions on which he serves.

In addition to the Administration Division, there are 7 other major divisions which assist the Controller in carrying out his duties and responsibilities as State Controller:

1. Accounting Division maintains the control accounts, makes financial analyses and apportionments and prepares the annual report of the Controller, and administers unclaimed property. A more accurate method of determining actual interest yield of securities, using punch-card methods, will be started in the current year.

2. Audits Division audits all claims and conducts a field audit program related to claims. The proposed budget reflects a realignment of the audit function involving a reduction in the intensity of claim review. In addition field auditing relating to public health and welfare activities is being reassigned to the respective departments for better functional assignment and to take advantage of federal funds on a cost-sharing basis.
3. Disbursements Division makes all disbursements, administers the state payroll system and performs electrical machine accounting services for the entire office and other agencies.
4. County Budgets and Reports Division prescribes forms for county budgets, is responsible for reviewing and reporting on the use of state gas tax funds, consolidates and publishes the annual reports of transactions concerning cities, counties, and special districts. A new position is proposed to develop a uniform classification of accounts for all the counties in the State. This position is included for an 18-month period beginning January 1, 1959.
5. Tax Collection and Refund Division makes tax collections for 4 different taxes and audits claims for refund of fuel taxes paid for nonhighway use of fuel. On such fuel, state and county sales and use taxes are collected.
6. Inheritance and Gift Tax Division administers inheritance and gift tax laws and controls the flow of inheritance and gift tax moneys into the State Treasury.
7. Tax-deeded Land Division has general supervision over the procedures for collection of property taxes, including sales and deeds to the State for delinquent taxes, redemptions from such sales, and sales of tax-deeded property.

Relocation of offices accounts for the major portion of the increase in operating expenses in the 1959-60 Fiscal Year. The Accounting and Disbursements Divisions are anticipated to vacate their space in the State Capitol by June 1, 1959, and move into rented space. The branch office in Oakland will move into the new state building in January, 1960.

ADMINISTRATION DIVISION

Objectives

This division provides general administration of the Controller's office and staff assistance to the Controller pertaining to his responsibilities as a member on boards and commissions. It also performs the auxiliary services for the entire Controller's office.

Program and Performance

The Controller's general administrative staff includes the deputy controllers, administrative adviser, administrative assistant and accounting officer and his staff. These people are responsible for the general administration of 8 divisions, including the claims file, personnel and accounting, and miscellaneous auxiliary services. They also assist the Controller with his duties on boards and commissions.

a Expenditures from bond funds not included in overall budget totals.

30	ACCOUNTING DIVISION						
31	Objectives						
32	The principal functions of the Division of Accounting are to						
33	maintain the control accounts covering the receipts, disburse-						
34	ments, resources, liabilities and balances of all state funds, to						
35	audit and designate the fund of all deposits into the State						
36	Treasury; to prepare various financial statements and reports						
37	covering the State's condition and operations; to make various						
38	apportionments of revenues to local government; to administer						
39	the unclaimed and escheated property laws; and to administer						
40	the Judges' Retirement Fund.						
41	Program and Performance						
42	In addition to the administrative staff, there are 3 bureaus						
43	within the division. They are the Bureau of Control Accounts,						
44	the Bureau of Financial Analysis, and the Bureau of Unclaimed						
45	Property.						
46	The Bureau of Control Accounts maintains the accounting						
47	records of receipts, disbursements, resources, liabilities and						
48	balances for 168 funds in the State Treasury. This involves						
49	maintenance of approximately 24,000 accounts. It is also re-						
50	sponsible for the auditing of all deposits into the State Treasury						
51	to determine the legality of the receipt of the money and its						
52	proper disposition. It also maintains accounts for bond invest-						
53	ments held by the various state funds for the pooled money						
54	operation and for interest-bearing bank accounts. It maintains						
55	accounts for all agency funds deposited in trust with the State						
56	Treasurer. It superintends the collection of the State's share						
57	of fines and forfeitures levied by judges under various state						
58	laws.						
59	SALARIES AND WAGES

The scientific method of amortizing bond premium, discount, and accrued interest is being initiated in the current year. This procedure, utilizing punched card accounting methods, will provide the most accurate distinction between corpus and income for all funds, resulting in more accurate operating statements and balance sheets.

The Bureau of Financial Analysis has, as its major responsibility, the preparation of the annual report of the State Controller. This bureau also publishes a preliminary annual report; a monthly statement of collections of all major taxes, receipts and expenditures of the General Fund, reserve funds and school construction funds; and several other periodic reports of a topical nature. It also compiles data and makes computations for the apportionment to local agencies of various revenues, such as the motor vehicle license fees, highway users taxes, and moneys received from the Federal Government. It compiles estimates of future cash receipts and expenditures which are used in connection with the Pooled Money Investment Program. In addition to the above functions, the bureau administers the Judges' Retirement Fund and makes computations of the annual repayments due from school districts on loans made to them under the school building aid programs.

The Bureau of Unclaimed Property administers the Controller's duties relating to unclaimed money or property received from dormant bank accounts, abandoned property, and unclaimed estates of deceased persons.

Funds are provided for rent for movement of the division to new quarters in Sacramento.

24							
25	AUDITS DIVISION						
26	Objectives						
27	This division audits all claims against the State for correct-						
28	ness, legality, and for sufficient provisions of law for payment.						
29	It field audits expenditures by counties, cities, and other local						
30	governmental agencies, for programs involving state subventions						
31	to determine the State's share of the costs of the programs.						
32	Program and Performance						
33	The auditing activity is divided between the Bureau of Claim						
34	Audits and the Bureau of Field Audits.						
35	Bureau of Claim Audits: The realignment of the audit func-						
36	tion involving changes in the procedure for claim review will						
37	eliminate 18 positions from this bureau resulting in a savings						
38	of approximately \$80,000.						
39	Bureau of Field Audits: Field auditing relating to public						
40	health and welfare activities is being reassigned to the 2 oper-						
41	ating departments (Public Health and Social Welfare) and						
42	results in a shift of 20 positions. This will result in a better						
43	functional assignment and take advantage of federal funds on						
44	a cost sharing basis.						
45	2 limited term auditor positions have been established in						
46	the Bureau of Field Audits to provide for audits necessary						
47	under an emergency storm and flood damage repair program.						
48	1 performs a review of federal assistance projects under Public						
49	Law 875. The second position is auditing the expenditure of						
50	state funds under the Flood Relief Program of 1958. The over-						
51	all workload of this division will increase in the 1959-60						
52	Fiscal Year. However, it is anticipated that the increased						
53	workload will be absorbed by improvements of procedures and						
54	shifting of staff between programs to meet changing needs.						
55

Schedule of Selected Workload Indicators by Fiscal Year

Fiscal Year	Warrants Issued Number	U. S. Savings Bonds Issued Number	Warrants Mailed Directly to Payees (New Program 7-1-58)	
			Volumes	
1955-56	2,459,147	65,958	—	—
1956-57	2,663,196	96,755	—	—
1957-58	2,890,249	110,212	—	—
1958-59	3,200,250	116,000	1,703,000	
1959-60	3,376,000	122,000	1,864,500	

2 clerks involved in direct mailing of warrants which were budgeted to expire June 30, 1959, are proposed as permanent positions. The workload involved in direct mailing indicates the need for budgeting these positions on a permanent basis. Funds are provided for increased rental due to the division's moving into new quarters in Sacramento.

Schedule of Selected Workload Indicators by Fiscal Year

2 clerks involved in direct mailing of warrants which were budgeted to expire June 30, 1959, are proposed as permanent positions. The workload involved in direct mailing indicates the need for budgeting these positions on a permanent basis. Funds are provided for increased rental due to the division's moving into new quarters in Sacramento.

INHERITANCE AND GIFT TAX DIVISION					
Objectives					
This division administers the state inheritance and gift tax laws.					
Program and Performance					
The staff in this division works out of offices in Sacramento, San Francisco and Los Angeles. Their basic functions are to represent the State's interests at the local level and, through centralized supervision, to control the flow of inheritance and gift tax moneys into the State Treasury. This division affords the taxpayer an opportunity to have his case heard at home in the local courts.					
During the year, procedural improvements and economies were achieved, reflecting strong management effort to achieve greater effectiveness and efficiency. During the year, a new series of inheritance and gift tax examiner classes were established in the civil service for this division as an aid toward

WORKLOAD DATA					
	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60
Gift tax returns	4,771	5,401	5,319	5,850	6,500
Inheritance tax returns (taxable)	18,480	20,157	20,790	21,800	23,000
There has been an overall workload increase in this division. Along with the growth in number of returns, inheritance tax revenues have increased. In 1957-58, the last completed fiscal year, inheritance tax revenues for the State were \$42,551,126 and gift tax revenues for the State were \$2,779,644, with the combined total being \$45,330,770.					

COUNTY BUDGETS AND REPORTS DIVISION

Objectives

This division administers the laws relating to county budgets and the reporting of county, city, and district financial transactions, and provisions of the Collier-Burns Highway Act requiring local jurisdictions to report street and highway financial transactions.

Program and Performance

This division's staff gathers the data and reports on the financial transactions of counties, cities, school and special districts, irrigation districts, and street and roads of California. The Controller prescribes forms for the use of county auditors in compiling county budgets and certifies irrigation and water district bonds. County municipal and district officials send their financial reports to the Controller, who consolidates and publishes them annually.

Under the Collier-Burns Highway Act of 1947, the Controller

a better examining program and an administrative assistant was employed to assist in improvement of business practices of the division on a continuing basis.

WORKLOAD DATA

	Actual			Estimated	
	1955-56	1956-57	1957-58	1958-59	1959-60
Gift tax returns	4,771	5,401	5,319	5,850	6,500
Inheritance tax returns (taxable)	18,480	20,157	20,790	21,800	23,000

There has been an overall workload increase in this division. Along with the growth in number of returns, inheritance tax revenues have increased. In 1957-58, the last completed fiscal year, inheritance tax revenues for the State were \$42,551,126 and gift tax revenues for the State were \$2,779,644, with the combined total being \$45,330,770.

is responsible for reviewing and reporting on the use of state gas tax funds apportioned to local government to insure an adequate accounting from the cities and counties. Twice a year, the division makes a settlement of financial accounts between the State and the counties. Assisting the division is a 7-man advisory committee. Members, all of whom represent local government, serve without pay.

A new position of supervising governmental auditor I is proposed effective January 1, 1959. This position is required to perform the work involved in a new program for developing a uniform classification of accounts for all counties, uniform accounting practices, uniform county reporting, and uniform budgeting by counties. This program results from a 2-year study by the County Auditors' Association of California relative to the need for and feasibility of developing a uniform chart of accounts for California counties and the subsequent development of uniformity in accounting, reporting and budgeting.

TAX COLLECTION AND REFUND DIVISION

Objectives

This division enforces the collection provisions of the Motor Vehicle Transportation License Tax Act, the Motor Vehicle Fuel License Tax Act, the tax on insurance companies, and the petroleum and gas production assessments; and administers the refund of motor vehicle fuel license taxes to nonhighway users, collecting, in the process, state and county sales and use taxes on the purchases subject to such taxes.

Program and Performance

Through this division, the Controller carries out 2 major functions:

1. Collecting 4 major classes of revenue to the State which are assessed by other agencies—the motor vehicle fuel license tax and the motor vehicle transportation license tax, assessed by the State Board of Equalization; the insurance companies tax, assessed by the Board of Equalization based upon data received from the Insurance Commissioner; petroleum and gas assessments, levied by the Department of Natural Resources. Under these tax laws the Division of Tax Collection and Refund enforces the collection provisions, keeping an account with each individual taxpayer. The motor vehicle fuel license tax is 6 cents per gallon gasoline tax imposed on distributor. This revenue is earmarked for construction of state highways and roads.

2. Refunding fuel taxes paid for off-highway use of fuel. This unit investigates the supporting records of claimants and carries on a program of education and enforcement. In processing such refunds the amount of sales tax on the gasoline involved is computed and deducted therefrom on behalf of the Board of Equalization.

The division maintains offices in Sacramento, Los Angeles, Fresno, and San Francisco.

TAX-DEEDED LANDS DIVISION

Objectives

This division administers the general procedures for tax sales, tax deeds, and redemptions of lands sold or deeded to the State for nonpayment of taxes; administers property tax-deeded to the State; advises county officials regarding the levying and collection of taxes on property, and renders services to the counties relative to delinquent tax accounting.

Program and Performance

This division has offices in Los Angeles, Riverside, Fresno, Oakland, Eureka, and Santa Barbara.

Due to an anticipated reduction of abstracts of tax-deeded property to be prepared, the division abolished 1 district manager position, effective July 1, 1958.

BOARD OF EQUALIZATION—Continued

Headquarters Office at Sacramento

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
------	------------------------------	-------------------	----------------------	---------------------	------------------------

GENERAL ANALYSIS

Objectives

The State Board of Equalization administers the following General Fund revenue sources: the sales and use taxes, the alcoholic beverage excise taxes, and the private car tax. It participates in the administration of the insurance company taxes. It administers 3 Highway Users Fund revenues—2, the motor vehicle fuel (gasoline) license tax and the motor vehicle transportation license tax with assistance from the Controller, and the third, the use fuel (diesel) tax in its entirety. It licenses and regulates itinerant merchants. It hears appeals from the Franchise Tax Board on personal income and bank and corporation franchise taxes. In addition, it administers or assists in administration of the major local government revenues—the property tax and sales and use taxes. Its local property tax responsibilities include the assessment of state-assessed properties, supervision of the assessment of all locally taxable properties, and equalization of the average assessment levels in the counties.

Program and Performance

The board's administration of state taxes involves the licensing of 310,000 sellers of tangible personal property operating at 329,000 outlets, and of 37,000 highway-users and members of the petroleum products industry. Tax return forms are distributed to, and tax remittances are received from, these licensees and from 1,700 licensed manufacturers and wholesalers of alcoholic beverages. 45,000 taxpayers are audited each year, and collections are enforced when not voluntarily tendered (with assistance from the Controller in the case of the motor vehicle fuel license and motor vehicle transportation license taxes). The board appraises the railroad rolling stock of 98 car lines and other nonrailroad owners of cars, assesses this property, computes the tax rate that is applied to it, and collects the tax. It receives recommendations from the Insurance Commissioner for assessment of taxes on the State's 675 admitted insurance companies, makes the official assessments, and hears appeals from its actions. It handles 70 appeals a year from

actions of the Franchise Tax Board. Exclusive of the personal income and bank and corporation taxes, in which the board's participation is limited, these state taxes yielded in excess of a billion dollars in the last completed fiscal year.

In the local tax field, the board is now administering for 49 counties and 299 cities sales and use taxes that are yielding \$190,000,000 a year; it assesses property that produces property taxes and ad valorem special assessments amounting to \$220,000,000 a year; and it assists county assessors who are responsible for the distribution among property owners of an additional \$1,617,000,000 of taxes and ad valorem special assessments. It also makes some 6,000 appraisals of secured and unsecured property holdings each year, involving over 5,000 parcels of real property and 3,000 personal properties, to test the assessment levels of approximately one-third of the counties and estimates the assessment levels of the remaining counties by reference to the results of prior-year appraisals.

Major increases in expenditures during 1958-59 resulted from increased responsibilities in the local sales and use tax field as the result of additional contracts to serve cities and counties under the Bradley-Burns Uniform Local Sales and Use Tax Act.

A relatively small increase in expenditures during 1959-60 will result from normal growth of the agency's workload, salary increases for employees who have not yet reached the top steps of their salary ranges, and the higher level of rents and of materials prices.

Of the 4 additional positions proposed in this budget, 3 are for the Research and Statistics Division. These 3 positions are necessary to meet the workload for the intercounty equalization program. These positions represent a continuation of 3 out of 6 positions which expire June 30, 1959. The additional position in the Division of Highway Taxes is needed due to law changes.

23 authorized positions are being eliminated in the Retail Sales Tax Division. 3 are related to improved efficiency and 20 are offset by a corresponding reduction in salary savings.

ADMINISTRATION

Objectives

This division includes the board with its hearing and legal staffs. In addition it provides the administrative and service functions for the agency.

Program and Performance

The initial steps in a reorganization of the Board of Equalization are being put into effect during the current year. An assistant executive secretary position has been reclassified from assistant chief, assessment standards. This position is to re-

lieve the executive secretary by assuming responsibility for directing the line activities of the agency. The assistant to the executive secretary position has been reclassified to administrative service officer III with the accounting, administrative analysis, tabulating and general services units under his supervision. In addition, a budget officer position has been reclassified from assistant chief, service division, to provide fiscal assistance to the administrative service officer. The administrative analysis function has been strengthened and unified by the transfer of 4 analysts from the Sales Tax Division.

RESEARCH AND STATISTICS

Objectives

This division accumulates and disseminates statistics and conducts research on state and local tax matters.

Program and Performance

Its largest task is to supply the board with an estimate of the ratio of total locally assessed value of property to total market value of locally assessable property in about one-third of the counties each year, and these appraisals provide the bench marks on which estimates of total market value are predicted by the statisticians. Since definite workload criteria had not been established when this activity was changed from a 4-year to a 3-year cycle, 6 appraiser positions are to terminate

on June 30, 1959. Sample appraisal work accomplished during 1957-58 indicates that 2 appraiser and 1 junior research technician positions must be continued if the division is to make an effective minimum sample on a 3-year cycle. This is on the same program basis as approved by the Legislature in the 1957 session.

To better cover the State, 2 additional offices have been established in Redding and Fresno. This decentralization of staff will enable the division to handle appraisals from these offices for the northern counties and the lower San Joaquin Valley and will result in a reduction of the amount of travel required.

DIVISION OF ASSESSMENT STANDARDS

Objectives

This division acts as a general staff organization to coordinate the work of the assessors and to promote uniformity of assessments throughout the State, to develop the most efficient and acceptable procedures for the performance of the assessment task and to instruct, advise, and direct the assessors in the performance of this task.

Program and Performance

The emphasis for the 1959-60 year will be placed on appraisal instruction in response to the many requests from the counties for assistance.

Mapping work for counties on a reimbursable basis is continued at approximately the same level as in the current year although somewhat below the 1957-58 level.

VALUATION DIVISION

Objectives

This division administers the assessment of state-assessed taxpayers, consisting principally of public utilities, and the Private Car Tax Law. It prepares and keeps current tax code area maps showing the boundaries of all revenue districts in the State.

Program and Performance

The current level of service will be continued in the budget year with no changes anticipated.

RETAIL SALES TAX DIVISION

Objectives

This division administers the Sales and Use Tax Law and the Bradley-Burns Uniform Local Sales and Use Tax Law.

Program and Performance

The comparatively slight increase in gross expenditures is due to increased cost of salaries and to the increased cost of materials and supplies. On October 1, 1958, 49 counties and 299 cities had contracted for the collection of the local tax. The State is completely reimbursed for the latter program.

A total of 23 auditor positions are being abolished in the budget year. 20 are being eliminated based on actual use of available positions. These vacancies have resulted in additional salary savings in past years while the elimination of these positions will result in approximately the same net expenditure in future years. The other 3 positions are being abolished based on the use of additional adding machines which will increase the auditors' production.

GENERAL ANALYSIS

The State Department of Finance has general supervision over all matters concerning the financial and business policies of the State. In addition, numerous services are performed centrally for the various other departments, offices, boards, and commissions.

The director is immediately responsible to the Governor, acts as his adviser on fiscal matters, assists in the formulation of administrative policies, and is charged with responsibility for the execution of the State Budget. In addition, the department performs services for other state agencies, such as centralized purchasing, real property acquisition, automotive management, printing, and office building maintenance.

The Director of Finance is a member of 19 boards and commissions. He is Chairman of the State Board of Control, the State Public Works Board, the State Allocation Board, the State Lands Commission, and the California State Communications Advisory Board.

Under the executive office of the director, the department is organized into 11 major divisions. 4 of these—Audits, Budget, Fairs and Expositions, and Local Allocations—supervise the expenditure of state funds, acting as staff agencies for the Director of Finance in the discharge of his responsibilities in the execution of the Governor's fiscal policies. 7 divisions—Administrative Service Office, Buildings and Grounds, Communications, Organization and Cost Control, Printing, Property Acquisition and Purchasing—are essentially service units assisting other state agencies in such matters as procurement of property, equipment and supplies; building management and space utilization; organization and operating procedures; and other management matters.

The budget for the Printing Division appears in the Appendix.

Legislation will be proposed by the Department of Finance to establish within this department the Economic Development Agency to promote and encourage the development of business, industry and commerce in California. (See page 280.)

Due to completion of, or in preparation for moving into new state office buildings, 99.3 additional positions have been provided. The remaining positions are due to increased workload of the divisions concerned. A summary of the new positions and the amounts involved are shown below:

New Positions:

Buildings and Grounds Division (See page 276):		
Sacramento	1 position	\$3,372
San Francisco	67.9 positions	184,054
Los Angeles	2 positions	4,360
Oakland	26.4 positions	58,277
Fresno	3 positions	4,377
Organization and Cost Control Division (See page 281):		
Property Acquisition Division (See page 282):	2 positions	8,520
Purchasing Division (See page 283)	3 positions	14,088
Totals	110.3	\$311,236

Readjustment of staffing patterns result in the proposed abolishment of 68 positions in the Buildings and Grounds Division. (See page 276.)

EXECUTIVE OFFICE

Program and Performance

This unit provides a number of specialized advisory services to other divisions of the department and agencies of state and local government. The director, and, as delegated by him, the deputy director and two assistant directors, assign and co-ordinate their work.

Under the law, the Director of Finance is responsible for approval and execution of many types of contracts, property transactions, and other legal documents. An administrative adviser assists with this function, and provides advice in legal matters involving the department.

The director is also charged by law with responsibility for investment of certain funds and for approval of transactions in securities by designated state agencies. He is assisted in this function by an investment officer. The portfolios supervised

consist of over \$1,800,000,000 in bonds, and income from investments supervised approximates \$48,000,000 annually. Consultative service is rendered on state bond issues and investment matters of other state agencies.

In a similar manner, the Director of Finance assumes responsibility for the conduct of the State's insurance program. This involves the procurement of insurance and public official bonds for the State's protection. He is assisted in this function by an insurance officer.

There is also a Local Planning Office to provide planning assistance to local agencies. Carefully co-ordinated with other facilities of this nature that have been serving planning agencies throughout the State, the service is available to all local planning agencies in the carrying out of their responsibilities.

SALARIES AND WAGES

(See page 143, Salary Supplement)

Director's Office:						
Director	1	1	1	\$26,236	\$27,500	\$27,500

49	Program and Performance						
50							
51	The service and control functions affecting budgetary activ-						
52	ities in all state agencies are performed by this division through						
53	its preparation and administration of the annual budget. Each						
54	state agency prepares detailed estimates of proposed expendi-						
55	tures and anticipated revenues for the coming fiscal year which						
56	are analyzed by the division staff in terms of policies set by the						
57	Governor and the Director of Finance. After legislative action						
58	on the budget, this division continuously reviews and approves						
59	each agency's financial operations. The budgetary process and						
60	the operations of the division receive continuing management						
61	review from a policy viewpoint by a procedures unit established						
62	within the Budget Operations Section.

AUDITS DIVISION

cies on a contract basis. There is continuing co-ordination between the Audits Division and the Auditor General in order to avoid duplication.

Reimbursements have been reduced by the amount formerly received for services performed for the State Lands Commission, Fresno Agricultural Foundation, Division of Real Estate and California Polytechnic College. Time formerly spent on these audits will be applied to performing an annual audit, rather than biennial audit, of district and county fairs. The additional time will be charged to the Fair and Exposition Fund.

BUDGET DIVISION

Another unit of the division conducts economic and population research, prepares the budget estimates of revenue from major taxes and licenses, and provides the basic data on population and income essential for long-term financial planning. Beginning last July a new service was extended to local governments under the provisions of Section 194.2 of the Streets and Highway Code. In lieu of special censuses, cities may request the Department of Finance to prepare estimates of population and pay the minor expenses incidental to this work. The resulting population estimates are certified to the State Controller and used as a basis for future distribution of motor vehicle fuel and vehicle license fee revenue.

21	Program and Performance						
22							
23	This division is responsible for maintaining and operating						
24	all state-owned buildings under the jurisdiction of the De-						
25	partment of Finance, in addition to other privately owned build-						
26	ings in which the State has rented office space for the several						
27	agencies in connection with the various operations involved.						
28	Currently it is responsible for maintaining and operating 48						
29	buildings with a total floor space of approximately 5,010,840						
30	square feet, including some 60 acres of grounds in Sacramento,						
31	Oakland, San Francisco, and Los Angeles. In addition, there						
32	are a number of other locations both state-owned and leased						
33	where the division is called upon from time to time to perform						
34	miscellaneous services. This division also operates maintenance						
35	shops covering all phases of building maintenance and operation						
36	in San Francisco, Los Angeles, and Sacramento—the main						
37	shops being located in the City of Sacramento.						
38	A professional staff in the Space Utilization Section of this						
39	division analyzes and determines space requirements including						
40	types, amounts, and special facilities; studies space require-						
41	ments for state agencies for long-range building programs and						
42	prepares programs for design and construction of state office						
43	buildings; co-ordinates space needs, allocates and assigns space						
44	to state agencies occupying state buildings; prepares lease						
45	exhibit plans and specifications for construction of new leased						
46	facilities and also for alteration and improvement of existing						
47	leased office areas.						
48	There is also provided through this division a California State						
49	Police service which provides protective service in the various						
50	locations set forth above. Additional police service is provided						
51	upon request.						
52	The division also has responsibility for an interdepartmental						
53	mail service, maintenance of the Governor's Mansion, and the						
54	telephone exchanges in state buildings in Sacramento, San						
55	Francisco, and Los Angeles.						
56	A total of 100.3 additional positions have been provided in						
57	this division to meet the expanded workload anticipated during						
58	1959-60. During this fiscal year new state-owned office buildings						
59							
60	SALARIES AND WAGES

83	Temporary help	4.5	4	4.1	15,672	13,888	14,130

will be completed or near completion for which additional positions must be established. The estimated completion date of these buildings are as follows:

San Francisco State Building Annex	August 1, 1959
New Compensation Insurance Building	January 1, 1960
Oakland State Building	January 1, 1960
Fresno State Building	July 1, 1960
Los Angeles Office Building	October 1, 1960

A 10 percent reduction is being made in the number of janitors required since this division has been developing a new system of assigning janitors. This new method calls for assigning janitors to a cleaning group for an entire building rather than have 1 janitor do all portions of a cleaning job in an assigned area.

A study of the State Police made by the Organization and Cost Control Division recommended a reduction in the Sacramento unit. The division is abolishing 16 positions of which have been abolished in the current year.

There are now certain elevators equipped to operate automatically without an operator. It is proposed to make the main bank of elevators in the east wing of the Capitol and the elevators in Office Building No. 1, Sacramento, completely automatic. Upon the completion of these 2 projects plus the completion of the annex in San Francisco, the elevator positions will be abolished. Temporary help money has been provided to man the elevators in the east wing of the Capitol Building during the time the Legislature is in session.

3 elevator operator positions are being dropped January 1, 1960, at which time the Agostini Building, Oakland, will be deactivated and the existing Compensation Insurance Building, San Francisco, will be closed for alterations. 11 janitor positions from these 2 buildings are being applied against proposed new positions for 1959-60 for the new buildings in these cities.

30	COMMUNICATIONS DIVISION						
31	Program and Performance						
32	This unit provides technical assistance relative to the co-ordination and operation of communications systems used jointly by public agencies in the State, as well as those systems operated by individual state agencies. Arrangement for adequate representation of these agencies before the Federal Communications Commission in matters affecting them is a further responsibility of the division.						
33	An important part of the division's work is to assist in solving engineering and technical problems relating to installation and operation of publicly owned radio, telephone, and teletype systems. The findings and recommendations of the staff are made available both to the board and to the public agencies concerned.						
34	The division also provides, on a reimbursable basis, centralized maintenance service for most state agencies utilizing radio equipment. The budget for this activity appears in the appendix under the Purchasing Revolving Fund. The 1959-60 Budget continues the same level of service as in the current year.

ORGANIZATION AND COST CONTROL DIVISION

Program and Performance

This division provides consultation services on management problems and makes studies of organization, procedures, administrative policy, records management, and accounting systems, as requested by any state agency or is determined by the director. Results of its surveys are usually submitted to the requesting agency as a written report with recommendations for improvements. Over 100 surveys are made annually to find better ways to do the government's work.

In the field of accounting, the division prescribes the State's uniform accounting system based on studies of methods and procedures ranging from relatively simple accounting systems applications to large and complex automated data processing systems.

The division prepares and maintains the *State Administrative Manual* which serves as a reference source for policies, procedures, regulations, and information on management responsibilities.

It exercises the approval powers of the Department of Finance to fix and adjust salaries and establish class titles for certain positions exempt from the Civil Service System.

Some of its staff are assigned full time under contract to other state agencies to provide them management research and advisory services.

The staff of the Merit Award Board is also a part of this division. Employees' suggestions received by the board are processed for evaluation. Awards are given to employees for suggestions that are adopted.

5 additional positions are included in the budget for the increased workload of this division. Since it has been impossible to perform two major surveys of state agencies per year, as in the past, an additional 2 associate administrative analyst positions are included. The tabulating system technician and the 2 assistant administrative analysts are provided for the backlog in the tabulating and system workload respectively.

85							
86	Totals, Operating Expenses-----				\$27,701	\$37,190	\$37,207

Properties acquired by the State in anticipation of later building activity are managed by the division. When such property is needed for a construction project, the unit arranges for termination of tenancies and for the sale by bid or auction of improvements on the site.

The division also is responsible for implementing the surplus real property disposal program. State-owned properties no longer needed are reported to the Legislature, and when authority to sell them has been obtained, the division supervises their sale and return to local tax rolls.

2 temporary positions are being extended to June 30, 1960, due to the workload related to acquisition of new state college sites.

GENERAL ANALYSIS

Objectives

This agency conducts the annual State Fair and Exposition and during the interim period makes full utilization of the grounds for other activities.

Program and Performance

The Agricultural Code directs that the State Fair Board, subject to the approval of the Department of Finance, shall "Provide for and manage an annual fair or exposition at Sacramento of the industry and industrial products of this State and

of the commercial products exported and imported through the ports of this State." There is a 12-day fair held for this purpose in the latter part of August and the first part of September each year.

Since the inception of the State Fair in 1854 there has been continuous growth. At the present time exhibits are shown from 12 foreign countries and 44 of the State's counties. In addition these economic interests are represented: livestock exhibits, poultry, rabbits, dairy products, and other agricultural products, floriculture, forestry and lumber, textiles, minerals and mining,

^c Expenditures from bond funds are not included in overall budget totals.

3					
4	the arts, home economics, junior division, horse show, fashions,				
5	wines, horseracing, and many others. This fair portrays Cali-				
6	fornia as a whole and shows its economic, governmental, and				
7	social life and its relationship with the world.				
8	The use of the fairgrounds for nonfair activities is growing				
9	and conventions, dances, roller rink, auto racing, cattle sales,				
10	winter quartering of race horses, and storage use contribute to				
11	the fair's revenues and helps affect the maintenance and upkeep				
12	cost of the fairgrounds.

The proposed expenditures for 1959-60 continues the same programs as previously authorized. *The increased costs* are attributable mainly to salary increases of tradesmen who are hired at fair time plus normal price increases in operating expenses. A new accounting system was installed on July 1, 1958, which gives a more realistic presentation of expenditures by activity. Further refinement during the current year will provide better program information in future budgets.

GENERAL ANALYSIS

Objectives

Administer, maintain and operate the facilities of the association including the State Museum of Science and Industry, Exposition Park, parking lots and an industrial and trade fair. The district was formed under the provisions of Chapter 69, Statutes of 1880 (now incorporated into the Agricultural Code).

Program and Performance

The State Museum of Science and Industry contains permanent exhibits and temporary displays of the natural industries and industrial enterprises of the State. During the 1958-59 Fiscal Year, there will be 24 temporary exhibits ranging in tenure from 5 days to 5 weeks. Commitments to date indicate that the temporary special exhibit program for the 1959-60 Fiscal Year will be equal or greater in scope.

In January, 1959, the Omnibus Room will open to the public. This room will feature small compact exhibits representing industrial and scientific areas. These exhibits are being furnished by private industry and will consist of a telephone exhibit, a steel exhibit, an electricity exhibit, a gas exhibit, a closed circuit television exhibit and a physics exhibit.

The Aviation Exhibit, to be financed one-half by the State and one-half by industry is in the planning stage. Future programming is being carried on to develop other exhibits with similar financial arrangements.

In excess of 687,000 persons visited the museum during 1957-58 and it is estimated that the attendance will increase to

727,000 during 1959-60. Over one-half of these visitors are school age children.

Exposition Park, consisting of 104 acres, is primarily under lease to the Coliseum Commission, the City of Los Angeles, and the County of Los Angeles. These leases are 1 of the sources of revenue for support of the association. On this property are located the Coliseum, the National Guard Armory, the County Museum, Municipal Swim Stadium and the sunken Rose Garden. The Sports Arena is now under construction.

The association owns approximately 25 acres surrounding Exposition Park now being used or soon to become available for parking lot purposes. The lots were acquired by appropriations from the General Fund and the State Beach and Park Fund. These appropriations, together with interest, are being repaid from receipts from the use of the parking lots. A substantial increase in use was experienced during the last part of the 1957-58 Fiscal Year. This increased use required the conversion of part-time help to full-time staffing.

The first International Trade Fair and Industrial Exposition, authorized by Section 19622 of the Business and Professions Code, will be held April 1 to 12, 1959, in the facilities of the 48th District Agricultural Association. The second fair to be held in 1960 is planned for the new Sports Arena.

The 1959-60 Budget provides for continuing the present program level. The increased workload of the agency will require 1 additional clerical position for use jointly in public relations and exhibit functions.

^a Consists of \$250,000 allocation as provided by paragraph (i), Section 19622, of the Business and Professions Code, \$15,000 as provided by Section 19622.5 of the Business and Professions Code, and \$124,000 proposed by the Budget Act of 1959 from the remainder in the Fair and Exposition Fund allocated by Section 19626(c) of the Business and Professions Code.

GENERAL ANALYSIS

Regional agricultural societies first received financial assistance from the State in 1861. After the adoption of the new Constitution of 1879, the regional agricultural societies were succeeded by district agricultural associations authorized by the Legislature of 1880 as state agencies. Section 80 of the Agricultural Code fixes the boundaries of 52 agricultural districts. There are 51 districts organized and holding fairs in addition to the Sixth District which maintains a permanent exhibit in Los Angeles.

Each of the district agricultural associations is a state institution administered by a board of 8 directors appointed by the Governor. The organization and operation of district agricultural associations are governed by Sections 80 to 93 of the Agricultural Code. District agricultural associations are subject to the laws and administrative regulations which apply to state agencies generally and to specific rules and regulations which apply only to district agricultural associations or to district and county fairs. District fairs are conducted under budgets approved by the Department of Finance and practically every action taken by an agricultural association requires depart-

mental approval. The Audits Division of the Department of Finance audits the premium awards made at the fairs and makes post-audits as well.

Revenues received by the Sixth District Agricultural Association, Los Angeles, are deposited in a special fund in the State Treasury and this association operates out of this special fund under appropriations by the Legislature. This district does not receive an allocation under the provisions of Section 92 of the Agricultural Code.

The 1-A District Agricultural Association, San Francisco, receives an annual appropriation of \$250,000 and the 48th District Agricultural Association, Los Angeles, receives an annual appropriation of \$125,000 under the provisions of Section 19622 of the Business and Professions Code. Neither of these associations receives an allocation under the provisions of Section 92 of the Agricultural Code.

The remaining 49 district agricultural associations receive annual allocations on the basis of premiums paid at their respective fairs.

GENERAL ANALYSIS

Objectives

Administers the public lands belonging to the State, consisting of school land, swamp and overflowed land, salt marsh, tide and submerged lands, and other sovereign lands. Principal revenue-producing function is the leasing of the public lands for extraction of oil, gas and minerals.

Program and Performance

The State Lands Commission has jurisdiction over approximately 3,000,000 acres of tide and submerged lands and approximately 700,000 acres of school lands.

Activities in the administration of state lands have increased in scope and value with passing time, ranging from the original activity of selling and leasing proprietary lands to the present expanded duties which include oil, gas, mineral, grazing, agricultural, commercial and recreational leases and leasing for the use and occupancy of swamp, overflowed marsh, tide, and submerged lands.

Chapter 3, of Part 2, Public Resources Code as amended in 1955 and 1957, opened the State's tide and submerged lands for unrestricted leasing, and provided for leases to be let on either a cash bonus or a royalty bid factor basis, whichever returns the greater revenue to the State. Under the provisions of this legislation, the State Lands Commission awarded 4 leases on July 25, 1958, the cash bonus payments for which amounted to \$54,785,000.

There are currently 699 wells in production, of which 28 were added during the past year. Revenues from this source averaged \$1,000,000 monthly.

Under the provisions of Chapter 29, Statutes of 1956 (First Extraordinary Session), the commission accounts for the oil and gas revenues derived from tide and submerged lands granted to the City of Long Beach, \$15,340,000 in oil and gas revenues

were accounted from this source during the past fiscal year, and it is estimated the State will receive \$9,000,000 in the current year and \$8,500,000 in 1959-60. Under the provisions of Chapter 2005, Statutes of 1957, the Legislature appropriated \$50,000 from the Investment Fund to determine the boundary line between the tide and submerged lands and lands belonging to the City of Long Beach so that revenues, which are now being impounded, can be distributed. This appropriation will be exhausted at the end of the current year. It is estimated that an additional \$50,000 will be required to complete this project which amount is proposed for 1959-60.

Land sales and records activity has increased as the interest in vacant state and federal lands has increased the demand for this type of property over the past 4 to 5 years. In 1957-58 the revenues from the sales of these lands totaled \$785,354 compared to \$99,100 in 1954-55. Lands presently under application for purchase are estimated to have a value of \$6,038,000.

The commission is involved in 2 important and complicated litigatory actions in which millions of dollars are involved. On August 15, 1958, an additional suit was filed by the United States, naming the State, the City of Long Beach, and 295 other defendants. The United States is claiming damages in an amount upwards of \$70,000,000.

The proposed 1959-60 Budget includes the addition of 3 auditing positions. The proposed positions represent the substitution of staff work for services that have heretofore been contracted in auditing the City of Long Beach operations in connection with distribution of tideland oil revenues. A petroleum geologist is also added to keep the commission fully informed as to the possibilities of oil and gas production from both existing leases and from undeveloped areas. The major portion of the increase in operating expenses for 1959-60 as compared with 1958-59 is attributable to legal services.

GENERAL ANALYSIS

Objectives

This agency receives all personal income, and bank and corporation franchise taxes, audits and assesses additional taxes where deficiencies occur, and collects delinquent taxes in accordance with the Bank and Corporation Tax Law and the Personal Income Tax Law. Members of the board are the State Controller, Director of Finance, and chairman of the State Board of Equalization. Direction of the agency's affairs is assigned to the executive officer.

Program and Performance

There is a continuing upward trend in the number of returns filed and in the overall workload of the agency as indicated above. There was a smaller increase in the 1957-58 Fiscal Year than previously experienced. It is estimated that there will be approximately a 250,000 increase in returns in both the current and budget year.

For a general comparison of staffing to overall workload it is noted that in 1957-58 the average number of returns per man-year was 3,345 as compared to an estimated average of 3,734 per man-year in 1958-59 and 3,790 in 1959-60.

The 1959-60 Budget provides for workload increases in statistics, accounting, and return processing as well as additional auditing. 30 additional auditor positions are based on the increased number of returns plus the fact that net recovery of \$7.22 per dollar expended for auditing during 1957-58 justified additional effort to recover this revenue.

Additional temporary help of 21.1 man-years is based on increased volume of returns to be processed and additional accounts receivable.

Provision is also made to continue the second Federal Comparison Project into its final year. This project produced \$1,481,659 in revenue in its first year for a net return of \$2.04 per dollar cost plus the added benefit of obtaining better future compliance.

Increases in operating expenses are attributable, in addition to workload, to postage rate increases effective August 1, 1958 and January 1, 1959, moving expenses and rental for new office space in San Francisco and Oakland.

ADMINISTRATION DIVISION

Objectives

This division performs the cashing and accounting, the statistical analysis, bank tax computation, legal functions, hearings on appeals by taxpayers from staff decisions, and special investigations as well as overall supervision of the activities of the board.

Program and Performance

The Accounting Section keeps the fiscal records for the agency, performs the cashing function, maintains the corporate and individual taxes receivable ledgers, and performs the service and supply function. A bookkeeping machine operator, an intermediate clerk and 2.8 man-years of temporary help are proposed to help the division cope with an expected increase in workload. 6 man-years of temporary help are being converted in the budget year to permanent positions. This conversion is based on a continuing flow of work where permanent positions can be better utilized.

The Statistical Section is charged with the responsibility of computing annually the rate of tax applicable to banks and

financial corporations. The number of bank and corporation franchise tax returns filed in 1957-58 was 87,720; it is expected to increase to 93,915 in 1958-59; and 100,008 in 1959-60. For the 2-year period the increase is 12,288 returns—or 14 percent. An additional clerical position at the intermediate level is proposed for this increased workload.

The Legal Section is composed of the chief counsel and staff of 6 attorneys in Sacramento and 1 in San Francisco who prepare briefs for cases on appeals, opinions and propose measures to be submitted to the Legislature. Appeal cases have increased from 152 in 1957 to 194 cases received in the first 10 months of 1958.

The Appeals and Review Section consists of an appeals and review officer and 4 attorneys. This unit handles the protest on notices of proposed assessment. During the 1957-58 Fiscal Year 961 protests were decided.

The Special Investigations Section consists of a tax counsel supervising the unit and 3 agents. They are involved in handling fraud, evasion, and illegal activity concerning state income and franchise taxes.

OPERATIONS

Objectives

This division performs the line functions relative to the responsibilities of the board including the clerical processing of tax returns and related reports, desk and field auditing of such returns, and collection of delinquent taxes.

Program and Performance

The Drawer Audit Section performs a general audit on personal income tax returns and trains new auditors. This section returned a net revenue of \$2.58 per dollar of cost in 1957-58. *9 additional auditor positions* are proposed to keep pace with expanding workload in this area and to reduce the lag between filing time and notification of taxpayers of the audit adjustments.

The in-state personal income tax field audit program recovered \$4.62 in net increased assessments for each dollar spent in 1957-58 while the bank and corporation tax audit recovered \$14.04. *11 additional auditor positions* are proposed for the in-state field auditing programs to keep pace with anticipated growth in the number of taxpayers. These positions are to be assigned to the field offices, 8 to the Los Angeles region and 3 to the San Francisco region, where the last audit staff augmentations were granted in the 1955-56 Fiscal Year.

Included in the bank and corporation tax audit program is the out-of-state auditing, which includes 18 auditors and 2 clerks divided evenly between the Chicago and New York offices. Each of these offices is concerned with the audit of corporations located within a 1,000-mile radius of such office. This program involves a field type audit of the corporation's tax base for state purposes and the application of the allocation formula thereto.

The average recovery over the past 6 years has been in excess of \$20 for each dollar of cost. *10 additional auditor positions* are proposed for expansion of this profitable program.

A comprehensive compliance program is carried out by the 599 Unit which involves comparison of employer information returns with the income reported by the respective employees. This activity returned a net revenue of \$3.11 for each dollar spent in 1957-58.

The second three-year Federal Comparison Project is now in its second year. The first Federal Comparison Project resulted in a return of \$3.78 for each dollar of cost. The present program is not far enough advanced to project the ultimate return per dollar of cost. It is anticipated, though, that like the previous program, it will result in increased compliance in that those taxpayers who formerly failed to file a state return will be required to do so in the future.

The Preliminary Examination Unit checks the computations and scans the personal income tax returns for completeness, and also checks the computation of tax on all corporation returns.

18.3 additional man-years of temporary help, 17 in Sacramento, 0.7 in Los Angeles and 0.6 in San Francisco, are proposed in this budget to keep pace with the 1959-60 Fiscal Year workload, which is primarily based on the receipt of returns, the receipt and processing of information at source reports and the carrying on of the Federal Comparison Project.

In addition to the headquarters office in Sacramento, the division maintains several offices throughout the State for the convenience of taxpayers, and to provide greater efficiency in field audit of returns. The district offices are grouped under the 2 regional offices, 1 in San Francisco and the other in Los Angeles.

GENERAL ANALYSIS

Objectives

The State Treasurer is charged with the responsibility for the custody of all moneys and securities belonging to or held in trust by the State; investment of surplus General Fund moneys, other designated surplus funds together with funds of the State and public agencies deposited in court under condemnation proceedings; administration of the sale of state bonds, their redemption, and interest payments; and pays warrants drawn by the State Controller.

Program and Performance

Chapter 1703, Statutes of 1955, established the Pooled Money Investment Program which was in operation by the 1956-57 Fiscal Year. It is supervised by the Pooled Money Investment Board and administered by the Treasury cashier. During the Fiscal Year 1956-57 interest earnings on pooled money investments was \$14,189,043 and in 1957-58 increased \$2,970,687 to \$17,159,730. Addition in the current year of an accountant and a clerk facilitated development of information of cash receipts and needs enabling scheduling of investment of funds to provide a maximum yield.

Increased bond sales will occur in the current and budget year; \$370,000,000 of bonds are being sold in 1958-59 and \$400,000,000 are authorized in 1959-60. This results in increased operating expenses involved in the redemption of coupons.

Redemption of warrants and checks issued by the State Controller and state agencies is estimated to increase from an actual in 1957-58 of 3,510,449 to an estimated 3,879,250 in 1958-59 and 4,097,908 for 1959-60.

The Treasury Deposit and Vault staff is engaged in trust activities in safeguarding securities deposited with the State of California to secure bank deposits plus those owned by the State, which increased \$923,830,040 in the 1957-58 Fiscal Year. On June 30, 1959, they are estimated to be \$3,597,000,000 and \$4,100,000,000 by June 30, 1960.

This budget reflects legislation to be proposed by the Department of Finance which would affect savings as follows:

1. An amendment to Government Code Section 12304 would eliminate the statutory requirement that the State Treasurer maintain 24-hour watchmen. This will eliminate 3 guard-clerk positions and temporary help at a savings of \$15,036 per year.
2. Amendment to the Government Code to permit recoupment of costs of paying matured bonds and coupons which are payable from dedicated revenues. This will result in \$71,079 in additional reimbursements in the budget year.

The local Sacramento area banks have been processing matured bonds and coupons of the State. Due to the increased volume the banks are finding the process is becoming burdensome. Rather than continue the present process, which would result in eventual charges by the banks, a more simplified procedure has been adopted for the banks. This new procedure shifts much of the sorting work to the Treasurer's office. The Treasurer is anticipating absorption of this additional workload without additional staff by further procedural changes in his own office.

---------------------	---------	---------	-------	-------

GENERAL ANALYSIS

Objectives

The California Highway Patrol is charged with the responsibility of providing adequate patrol of the highways at all times of the day and night for the prevention of accidents, control of traffic, and all laws regulating the operation of vehicles and the use of the highways.

Program and Performance

The department is headquartered in Sacramento and has 1 or more field offices in all but 3 of the State's 58 counties. Traffic in the 3 counties where no office is maintained is patrolled by resident officers. A fleet of approximately 1,500 mobile units will operate in excess of 50,000,000 miles annually for patrol, enforcement of weight, height, length, brakes, lights of commercial vehicles, school bus inspection, school crossing guard supervision, removal of abandoned vehicles, supervision, service, administration, and training.

The Field Operations Division is responsible for attaining the objectives of the department and is supported by the Administrative and Technical Services Divisions, and all operate within policy established by the commissioner.

The Administrative Division discharges the business affairs of the department; prepares the departmental budget; conducts studies to develop cost data; administers the personnel program; provides general file, messenger and reproducing services; leases real property and co-ordinates capital outlay and maintenance projects; prepares specifications for and develops prototype mobile equipment, records data relative to mobile equipment operations; tests accessories and tires used on mobile equipment; maintains an inventory of all equipment; and supplies all materials used from a central stores system.

The Technical Services Division determines the distribution of budgeted uniformed strength; co-ordinates disaster planning with the disaster office; prepares statistical data; develops and distributes radio and television programs, traffic safety information, and news releases; supervises radio and wire communica-

tions; controls permits for emergency equipment; issues light and brake station licenses; tests accessories for compliance with state law; issues orders and bulletins; analyzes new techniques; and conducts cadet and inservice training for uniformed personnel.

An additional 2 lieutenants, 11 sergeants and 106 traffic officers are included to maintain the same ratio of positions to registrations authorized in the 1958-59 year. 14 additional clerks and 2.7 janitors in field offices have been included in accordance with a workload formula. Additional supporting staff is proposed in the motor transport office, garage, the Stockton and San Jose dispatching centers. The combined Valley Zone, District 4, and Sacramento Area Office requires a receptionist-clerk for efficient operation. Workload in research and development activities justifies the addition of 1 stenographer and 2 typists. Maintenance of the academy grounds, including those of the disaster office, requires a full-time groundsman to prevent a loss to the State of investment in lawns and shrubs.

By Federal Communications Commission ruling the patrol has recently been assigned additional radio frequencies which will allow operation with a minimum of interference. Adaption of the additional frequencies to patrol operations is being accomplished over a 2-year period. The proposed budget provides funds to complete the conversion.

The coming Olympic Winter Games will result in the need for a task force of traffic officers to cope with expected vehicle traffic. To meet this situation \$12,500 has been provided in the current year and \$113,930 is proposed during the budget year to house, feed and otherwise support the officers temporarily assigned to the area.

Increasing automobile operation has made it necessary to allocate \$54,765 of the \$100,000 contingency reserve for this purpose in order to insure maximum operating capacity. Automobile operation has been increased from 56,000 to 63,000 miles per road patrol vehicle in 1959-60 to provide for more effective use of manpower.

GENERAL ANALYSIS

Objectives

It is the objective of this department to promote and develop the welfare of the wage earners of the State, improve their working conditions, and advance their opportunities for profitable employment.

Program and Performance

The department through its 7 line division and 21 field offices, negotiates with parties in disputes when a work stoppage is threatened; adjudicates claims under the Workmen's Compensation Law; establishes, enforces and promotes standards of safety for all phases of industrial activity; enforces labor laws and issues and enforces orders relating to men, women and minors; promotes opportunities for apprentices; and enforces laws relating to housing. The Divisions of Administration and Labor Statistics and Research service the line divisions.

The Los Angeles Metropolitan Transit Authority Act of 1957 requires the Conciliation Service to settle any jurisdictional disputes in the Los Angeles Metropolitan Transit Authority. This service was used during the current year with the cost being reimbursed by the authority.

During 1957 the work injury rate dropped to a record low, and fatalities dropped about 5 percent.

Wage complaints during the first part of the current fiscal year have increased 17 percent over the number of complaints received during the period in 1957-58.

It is expected that continued increases in productivity will meet the industrial accident workload increases in the current and budget years.

The 1959-60 Budget provides for the following significant changes to maintain the existing level of service because of workload increases.

	Positions	Cost
1. Administration, increased duplicating work--	0.5	\$1,728
2. Boiler inspections -----	7	50,823
3. Elevator inspections -----	1	8,793
4. Industrial welfare area supervision -----	1	8,339
5. Increased wage claims and complaints -----	5	29,200
6. Research publications and statistical tables--	2	13,951
7. Administrative statistics -----	1	1,950

DIVISION OF ADMINISTRATION

Objectives

To carry out the administration's policy and provide effective, economical administration of the laws affecting this department.

Program and Performance

This division performs policy making, housing, procurement, accounting, personnel and duplicating functions for the department.

The efforts of the operating divisions are guided through formulation and administration of the budget. The work of the duplicating unit has gradually increased during recent years to the point where an additional 0.5 man-year of help is required in 1959-60.

Objectives

To obtain for the injured workman and his dependents with the least possible delay all the benefits they are entitled to by law.

Program and Performance

The Industrial Accident Commission in its judicial function is a court of limited jurisdiction to adjust litigated cases arising under the workmen's compensation laws. A staff of 67 referees assists the commission in deciding claims brought before the commission. Original decisions are made by the referees, except for a few special types of cases. If a party is dissatisfied with the referee's decision, he may then petition the commission or one of its panels for a reconsideration, or the commission, itself, on its own motion, may grant a reconsideration. Following are the anticipated number of claims to be filed, disposed of, and pending:

DIVISION OF INDUSTRIAL ACCIDENTS

The proposal for additional personnel for the Industrial Accident Commission for the 1957-58 Fiscal Year was based on an estimated 7 percent increase in filings. The actual increase for the last completed year over the previous year (1957-58 over 1956-57) was 16.9 percent. Despite this unprecedented increase in filings, the pending caseload was reduced from 9,913 on June 30, 1957 to 9,849 on June 30, 1958. This highly satisfactory result was obtained by a sizeable increase in the average disposition per referee during the past year. The main reasons for the large increase in production is due to the following 3 factors:

(1) Pretrial, (2) Decentralization, and (3) Adequate staffing at lower levels.

The pretrial method of disposing of certain selected cases was emphasized and expanded during the last year. Cases suitable to the pretrial process are being heard and decided with less time in hearing and less hearing reporter and senior stenographer paper work. The results of decentralization are also becoming apparent. Production is increasing throughout the State because of a substantial decrease in time lost in referee and hearing reporter travel, and the more efficient use of time formerly lost because of cancellations of hearings on the road. The additional stenographers and hearing reporters in each panel office, and the clerical help allocated for the clerk's office in Los Angeles, has added materially in expediting and fully utilizing the full production capacity of the referee staff. This division is asking for no additional personnel for 1959-60, in anticipation of further workload absorption by existing staff.

DIVISION OF INDUSTRIAL ACCIDENTS

The proposal for additional personnel for the Industrial Accident Commission for the 1957-58 Fiscal Year was based on an estimated 7 percent increase in filings. The actual increase for the last completed year over the previous year (1957-58 over 1956-57) was 16.9 percent. Despite this unprecedented increase in filings, the pending caseload was reduced from 9,913 on June 30, 1957 to 9,849 on June 30, 1958. This highly satisfactory result was obtained by a sizeable increase in the average disposition per referee during the past year. The main reasons for the large increase in production is due to the following 3 factors:

(1) Pretrial, (2) Decentralization, and (3) Adequate staffing at lower levels.

The pretrial method of disposing of certain selected cases was emphasized and expanded during the last year. Cases suitable to the pretrial process are being heard and decided with less time in hearing and less hearing reporter and senior stenographer paper work. The results of decentralization are also becoming apparent. Production is increasing throughout the State because of a substantial decrease in time lost in referee and hearing reporter travel, and the more efficient use of time formerly lost because of cancellations of hearings on the road. The additional stenographers and hearing reporters in each panel office, and the clerical help allocated for the clerk's office in Los Angeles, has added materially in expediting and fully utilizing the full production capacity of the referee staff. This division is asking for no additional personnel for 1959-60, in anticipation of further workload absorption by existing staff.

Dispositions

Fiscal Year	Filings	Number of Referees	Rate of Production	Number Disposed	Cases Pending
<i>Actual:</i>					
1956-57	37,923	52	713	37,097	9,913

DIVISION OF INDUSTRIAL SAFETY

Objectives

The primary purpose of this division is to reduce work injuries in employment and places of employment.

Program and Performance

The division has jurisdiction over all employments—except for household domestics, federal employees, operating employees of

interstate railroads, and seamen—and it covers some 400,000 places of employment in such industries as agriculture, construction, mineral extraction, manufacturing, trades, services, transportation, and utilities. The division promulgates, after public hearings, standards of safety for all employments and conducts educational programs, including the preparation and distribution of educational materials.

DIVISION OF INDUSTRIAL SAFETY—Continued

Program and Performance—Continued

The work injury rate in California for 1957 dropped to a record low of 32.4 disabling injuries per 1,000 employees. This was over 6 percent below the rate of 34.6 recorded the previous year. From 1951, when the rate of disabling injuries was 41 per 1,000 workers, to 1957 there has been a gradual reduction in the rate of approximately 20 percent. Between 1950 and 1957 employment in California increased 40 percent, while disabling injuries increased 8½ percent. Fatalities for 1957 went down 5 percent to 786, compared to 827 in 1956. The division investigated 2,136 disabling or fatal work injuries; surveyed 73,610 employments for hazards; 95,651 requirements were issued for correction of unsafe conditions, with 75,659 unsafe conditions corrected. In addition to these original surveys, 26,421 reinspections or followups were made; 3,473 calls were made answering requests and complaints; and 35,318 special calls provided consultation services. 60 prosecutions were instigated, which resulted in 33 convictions and 4 acquittals during the calendar year. Others are still pending. In accordance with statutory schedules, a total of 22,040 elevators and 100,602 pressure vessels, including nuclear reactors, were inspected by the division staff and by qualified personnel employed by insurance carriers and local jurisdictions, certified by and under the supervision of the division.

This budget makes provision for 5 additional boiler engineers and 2 clerks, the second increment of 12 engineers and 3 clerks needed to meet the provisions of law requiring field and shop inspections of pressure vessels. An additional engineer to inspect an increasing number of elevators is budgeted for 1 year. The need to continue inspecting all elevators annually as required by law will be studied.

DIVISION OF INDUSTRIAL WELFARE

Objectives

Administration and enforcement of the minimum wage and labor standards for women and minors.

Program and Performance

The jurisdiction of the Division of Industrial Welfare extends to the administration and enforcement of all laws and regulations for women and minors which pertain to their minimum wage, the maximum hours, and the standard conditions of labor as prescribed by the Labor Code and the regulations adopted by the Industrial Welfare Commission. Currently all employments are covered except agriculture and domestic service. Responsibilities of the division are to license and regulate industrial homework for men and women; license and regulate the employment of handicapped women and minors at special wage rates; investigate requests for defense production permits and administer their operation; issue special exemptions from the Industrial Welfare Commission regulations and enforce the equal pay law for women.

During the 1957-58 Fiscal Year 9,178 complaints were registered compared to 7,480 in 1956-57. \$121,533 was collected, representing minimum wages and penalty overtime pay under the hours regulations. \$70,005 was collected in 1956-57. Investigations and hearings totaled 9,460 for the 1957-58 Fiscal Year with the result that 16,111 violations were found and corrected, 115 homework licenses were issued to employers and 884 permits to individual homeworkers, 1,438 special minimum wage permits (768 in 1956-57) and 146 exemption permits (109 in 1956-57) were processed and issued.

The proposal for 1959-60 is to maintain this work at the current authorized level of service, which requires an additional position in the southern area at the area supervisor level. The traveling required to cover 5 district offices from Bakersfield south to San Diego precludes adequate supervision with the 1 existing supervisor.

DIVISION OF LABOR LAW ENFORCEMENT

Objectives

To protect the rights of the employee under provisions of the Labor Code.

Program and Performance

This division has responsibility for enforcement of all labor laws not specifically delegated to other agencies. The greater part of its work consists of investigating complaints of unpaid wages and enforcing payment of claims which it finds to be valid. Other major groups of laws enforced by the division include those relative to payments to health and welfare funds, employment of minors, employment on public works, bonding of employers in certain industries, workmen's compensation insurance, registration of unloaders of farm products, and regulation of private employment agencies and farm labor contractors. Complaints during the first 4 months of the current fiscal year have been far above those during the same period in the previous fiscal year, with an average increase for the 4-month period of 17 percent. Investigations are made after reviewing complaints. In 1957-58 the division received 28,060 wage claims and collected \$2,225,864 in unpaid wages compared to 26,093 claims and \$1,765,492 collected in 1956-57. Complaints in other categories totaled 5,333. 22,535 investigations for compliance with the workmen's compensation insurance law were made by the division in 1957-58. More than 11 percent of those investigated were found to be without the necessary insurance and were brought into compliance. 490 child labor

law complaints were investigated during the year, and 2,122 permits were issued for employment of minors in theatrical occupations. The division issued 1,341 employment agency licenses, heard and determined 3,215 controversies relative to fees, and investigated 373 complaints, many of which had to do with misleading advertising, as well as issuing 1,341 licenses to farm labor contractors in 1957, continued its program of patrolling fields to detect unlicensed farm labor contractors, and investigated 167 violations of farm labor contractor laws.

As against a reasonable workload of between 600 and 700 complaints per deputy, and a statewide average in 1957-58 of 832, the average in the division's Los Angeles office was 1,026 per deputy. The average in the San Bernardino office was 918, and was 1,169 in San Jose. Even with reallocation of territory and positions which has been made in an effort to absorb workload increases where they have been heaviest, projected workload for all of the above 3 offices will be well in excess of 1,100 per deputy in 1959-60. 3 additional deputy positions are provided, 1 for each of these 3 offices.

Workload averaged 945 cases per clerical worker in Los Angeles, and 1,169 per clerical worker in San Jose, as compared with a statewide average which over a period of years has ranged between 700 and 800 claims per clerical worker. Projected increases would bring the load well above these figures in the budget year. 2 additional clerical positions are provided, 1 for each of these offices.

under the voluntary provisions of the apprenticeship law, provides consultative service and assists employers, employees, and their organizations.

The downward trend in apprentice registration was reversed in July, 1958, and an uptrend is now in progress. On October 31, 1958, there were 19,116 active apprentices with every indication that the November 30th total will be even greater.

On July 1, 1958, 4,816 motels and 3,327 trailer parks were operating under division permit. The division is not initiating maintenance inspections except for labor camps.

Construction supervision under provisions of the Earthquake Protection Law and State Housing Act in counties having no local enforcement agency.

Enforcement of plumbing, electrical, and heating standards and issuance of insignia of approval, applicable to all trailer coaches sold in California manufactured after September 1, 1958, in accord with Section 18370, Health and Safety Code.

Increased efforts towards adoption and enforcement of city and county building codes and trailer park ordinances. As of November 1, 1958, 30 of the 58 counties have building codes and 18 cities and 3 counties have adopted comparable trailer park ordinances.

18	Objectives				
19					
20	The principal function of the State Fire Marshal is fire pre-				
21	vention and protection.				
22					
23	Program and Performance				
24					
25	A co-ordinated program for administering state fire safety				
26	laws, rules and regulations has been established between				
27	the Office of the State Fire Marshal and local city, county, and				
28	district fire officials. This co-ordinated program was made possi-				
29	ble by the creation of the State Fire Advisory Board in 1945.				
30	The State Fire Marshal, with the assistance of this board,				
31	develops fire safety standards and administers and enforces				
32	these standards. Through the board, it has been possible to				
33	develop uniform statewide standards of fire safety and provide				
34	for their administration and enforcement without creating				
35	overlapping authority and duplication of effort, and at the				
36	same time preserve local autonomy. It is the general policy

GENERAL ANALYSIS

Objectives

The purpose of the proposed Fair Employment Practices Commission is to protect and safeguard the right and opportunity of all persons to seek, obtain, and hold employment without discrimination or abridgment on account of race, religious creed, color, national origin, or ancestry.

Program and Performance

Subject to the passage of proposed legislation, the commission's objectives are to be accomplished through programs of

conciliation, education, and enforcement. The commission will formulate policies, adopt rules and regulations, investigate and hear complaints, enforce its decisions, and publicize the results of its activities in such a way as to promote fair employment practices by peaceful means. Advisory and conciliation committees are to be created to assist the commission in the study, promotion, regulation and recommendation of policies in respect to fair employment practices.

GENERAL ANALYSIS

Objectives

The Department of Justice, under the direction of the Attorney General, is the senior law office of the State. The department interprets laws, renders opinions, and represents the State in civil and criminal proceedings. To assist in law enforcement, the department maintains a fingerprint file for identification purposes, compiles statistics pertaining to crime, assists peace officers in civil and criminal investigations, and participates in direct enforcement in use, possession, and sale of narcotics.

Program and Performance

Under the direction of the Attorney General, the Department of Justice provides legal advice and assistance to the various state departments, boards and commissions. The department passes on the constitutionality of each law passed by the Legislature for the final consideration of the Governor, and represents the State on all criminal matters before the Appellate and Supreme Courts. Another important function is the identification of criminals through current fingerprint and criminal record files and by related technical aid and assistance to local agencies. Closely allied with this service is the co-ordination of requests from local enforcement agencies, and assistance in the location of deserting parents.

The State Narcotics Act is enforced through offices located in San Francisco, Sacramento, Los Angeles, Fresno, and San Diego. Agents operating from these offices investigate known and suspected persons for illegal possession, use, and sale of narcotics. Prosecution of violators is accomplished through the district attorney in each county.

During the budget year, new positions include 7 legal positions and 5 stenographers to provide adequate representation on civil and criminal cases. Charitable trust activities will require 2 attorneys, 1 stenographer and a clerical position. These 4 positions are contingent on further extension by the Legislature of the Uniform Supervision of Trustees for Charitable Purposes Act (Sections 12580 to 12595, Government Code). 3 additional positions are needed in the Los Angeles and San Francisco offices to provide necessary clerical assistance. Workload increases in the Bureau of Criminal Identification and Investigation has necessitated the addition of 21 positions. 2 positions are added to the Bureau of Criminal Statistics because of the increase in tabulating time anticipated to provide services to the new research division in the Department of Corrections and Youth Authority. The Bureau of Narcotic Enforcement headquarters office requires 1 clerk to process new prescription blanks and assist the chief in processing work relative to the administration of the bureau.

DIVISION OF GENERAL ADMINISTRATION

Objectives

This division carries out the administrative responsibilities of the Attorney General, maintains the general services necessary to the operating divisions of the department and operates the State Teletype System.

Program and Performance

This division, through the Accounting Office, maintains fiscal control and internal management, budget preparation, purchasing, and personnel administration. The State Teletype System is a communication service primarily for police offices with secondary use by governmental agencies. Departmental control centers are located in Sacramento, Los Angeles and San Francisco.

cisco. Temporary help in the amount of 0.5 man-years is proposed to assist in the compilation of traffic study material required to revise and improve procedures of the teletype system.

Stenographic assistance for the legal staff is provided through this division. On the basis of 9 additional attorneys included in the 1959-60 Budget, 6 additional stenographers are provided. 1 additional stenographer is required in condemnation matters in Los Angeles. 2 typist-clerks are needed as receptionists and for other clerical work in the new offices in Los Angeles and the new state building in San Francisco. 1 stenographer is included to maintain charitable trust records in Sacramento.

An administrative analyst, on a contractual basis, is proposed for the review of organization and procedures.

DIVISION OF CIVIL LAW

Objectives

This division is responsible for handling the civil and administrative legal problems of state departments, boards and commissions.

Program and Performance

Attorneys, operating out of San Francisco, Los Angeles, and Sacramento, represent the State of California in federal and state courts at all levels and represent officers, boards and commissions before administrative tribunals. Cases of maximum importance currently being litigated involve water and oil. The water law problems are exceedingly complex and require the knowledge and experience of senior deputies. Condemnation matters are continuing to multiply requiring full-time services

from this division. Cases involving recovery of taxes and property in escheated matters are continuing to increase. A new case has been filed by the Federal Government against the State of California concerning subsidence in the Long Beach area. 5 additional deputies attorney general are provided to meet the increasing demand for legal assistance in the area of civil law in Los Angeles. Three of these positions will be engaged entirely in litigations involving the Long Beach and Orange County cases and their cost will be fully reimbursed. Additional operating expense and equipment are required for the move into the new building in San Francisco. Other operating expenses and equipment are increased proportionate to the additional personnel.

DIVISION OF CRIMINAL LAW AND ENFORCEMENT

Objectives

This division insures criminal justice in California through periodic meetings with local law enforcement agencies. Prosecution is assumed when local enforcement is negated.

Program and Performance

The legal staff of this division represents the State on all criminal proceedings when appealed from trial courts, prepares documents for extradition of fugitives, and processes forfeiture of vehicles for violation of State Narcotics Act. The compilation of crime statistics is a responsibility of this division. This is accomplished by a bureau located in Sacramento which maintains detailed statistics of all crimes committed in California, records of turnover rate of prisoners, and juvenile delinquency figures.

This division functions as a clearing house for information concerning criminals and as a source of technical aid and assistance in the investigation of crime and the apprehension of criminals. Fingerprint files are maintained on a 24-hour basis to provide maximum service to local police jurisdictions. A laboratory and a staff of qualified technicians including specialists in the operation of the polygraph provide assistance to local agencies and other state agencies when requested.

Special training is given local law enforcement personnel in the aspects of narcotic enforcement. Since this program was inaugurated this division has given basic training to over 9,000 enforcement personnel. Specially trained inspectors, operating

under cover, contact known informers and purchase evidence or information leading to the arrest of narcotic users and suppliers. Pharmacist inspectors insure the legitimate use of drugs by professional people. The headquarters for this bureau was moved to Sacramento from San Francisco in 1958.

For the budget year, 2 attorneys are proposed on the basis of increased case filings and 2 are provided in anticipation that the Legislature will extend the provisions of the Uniform Supervision of Trustees for Charitable Purposes Act. 2 positions are proposed for criminal statistics due to anticipated increases in workload. During the 1958-59 Fiscal Year 13 positions were transferred to the Department of Corrections and 8 positions were transferred to the Department of the Youth Authority to staff research units in each of those departments. A narcotics field office was established in Fresno on July 1, 1958, in order to give better enforcement in the Central Valley area. 1 clerk is proposed in the headquarters office to assist the Chief of the Bureau of Narcotic Enforcement. The Bureau of Criminal Identification and Investigation will require 21 permanent positions to process the anticipated volume of work. The areas of increase are 8 positions for fingerprint identification and 3 positions to record criminal reports for modus operandi, reports on lost, stolen and pawned articles and firearm reports. 9 positions are required in the record section to conduct name searches through Soundex and prepare rap sheets or no-record replies for enforcement agencies. Due to the large staff on night duty, a night supervisor is proposed.

SERVICES RENDERED COLORADO RIVER BOARD

GENERAL ANALYSIS

Active trial proceedings in the Arizona vs. California case were concluded in August, 1958, and resulted in a small reduction in operating expenses. It is anticipated that the Special Master will convene further proceedings in New York for arguments bearing on the Special Master's report. Exceptions will be filed to the Special Master's report in the Supreme Court of the United States, and several trips to Washington, D. C., will be necessary. Operating expenses for 1959-60 are below that of the 1958-59 Budget as it is anticipated that expenses will be less due to completion of the trial.

Legal action in the suit Arizona vs. California before the United States Supreme Court has required intensive legal service as well as extensive engineering studies and research since

the initial step in the long legal process was taken by the State of Arizona in August, 1952. This suit has involved both the Department of Justice and the Colorado River Board. Estimates of expenditures by both agencies directly related to this legal action follows:

	1957-58	1958-59	1959-60
Department of Justice	\$521,095	\$630,173	\$650,276
Colorado River Board	109,330	78,500	45,321
Totals	\$630,425	\$708,673	\$695,597

A more detailed statement of the related program is shown in the budget of the Colorado River Board.

DEPARTMENT OF MENTAL HYGIENE—Continued

Objectives

The objectives of the Department of Mental Hygiene are to care for, treat and rehabilitate mentally ill, mentally retarded and emotionally maladjusted patients in order that they may return to society as productive citizens, and to prevent mental illness through an active program to foster mental health.

Program and Performance

The Department of Mental Hygiene was established as such in 1945, and has developed a diversified program of care and treatment, research and training, and mental health education. The program that today provides treatment specifically designed for the clinic patient, the mentally retarded patient and the mentally ill patient has been a gradual and uphill process, in which the old custodial concept has been abandoned.

2 institutes are operated by the department in conjunction with the University of California as teaching and research centers and provide care and treatment for patients with early curable types of mental disorders. In this regard, they care for and treat a limited number of in-patients and operate a large out-patient program as part of the teaching and research programs.

In the 4 hospitals for the mentally retarded, the program is based on the knowledge that mental retardation alone does not produce a socially unacceptable person, and that many of the mentally handicapped can be integrated into society. With treatment, habit and character training in this controlled environment, the patient develops to the fullest of his intellectual capacities, and many are capable then of returning to their homes and communities as self-supporting, or partially self-supporting citizens.

The progress in the treatment programs in the 10 hospitals for the mentally ill has shown a marked emphasis on active therapy, bringing more treatment to more patients. In modern receiving and treatment units, newly admitted acutely ill patients are provided the intensive treatment most effective during the onset of mental illness. Increasingly, active therapy has reached the so-called "back wards."

Juvenile units at Camarillo and Napa State Hospitals provide the special type of care needed by children suffering from mental disease or severe behavior disorders. They also operate as facilities for observation and treatment requested by the State's juvenile courts or Youth Authority.

Special treatment and facilities for tuberculous patients, as well as special treatment for alcoholics and drug addicts are also provided in the hospitals. Patton State Hospital has been designated as the special tuberculosis center for Southern California, and Napa for Northern California. Alcoholics and narcotics addicts are provided special treatment throughout the hospitals for the mentally ill. Great care is taken to correctly diagnose both these types of patients since their difficulty is frequently symptomatic of some more deep-seated disorder.

Special treatment for the rehabilitation of sexual psychopaths is maintained at Atascadero State Hospital. Persons diagnosed as criminally insane are also committed to this maximum security hospital. Some of the patients at Atascadero are committed for observation by the courts.

The department's new continuous research program has developed rapidly. Thus far, state appropriations have amounted to \$700,000 and these have been supplemented by more than a million dollars in federal funds granted by the National Institute of Mental Health. The state allocation for research, recognized as part of the "efficient start" originally recommended to the Legislature, is being divided equally between hospital level and project support phases to insure a comprehensive program that includes both applied and basic research. A research team at each of the hospitals is ultimately called for, and the nuclei of the first 5 teams are being formed. All hospital research teams would both carry out their own research projects in the hospital and assist other staff members with their investigations. The balance of the funds will be used to support research investigations undertaken by departmental, hospital, and clinic staff personnel.

Results of the department's public information program continued to be apparent in growing public interest in the field of mental health. The educational program uses almost every communication medium: newspapers, television, speakers, films, public meetings and forums, exhibits, pamphlets, magazine articles, publications and reports. The section also acts in an advisory capacity to community groups when requested.

One of the important developments in the mental health program was legislation establishing the Short-Doyle Act for community mental health services, making California the second state in the Nation with such a law. Under the act, cities and counties can set up local programs with practical assistance from the State that includes reimbursement on a matching basis for local money expended. Ultimately, these local mental health services are expected to prevent large numbers of citizens from ever having to leave their home communities because of mental illness or handicap. 11 counties and 1 city now have approved programs.

A significant development indicative of a sound dollars and cents investment toward the cure of mental patients became clear when the number of mentally ill patients treated and released increased to a point of balance with admissions. The end of fiscal 1957 saw the first small but significant drop in patient population in the hospitals for the mentally ill. This occurred despite the increasing rate of general population in the State, and increasing admissions to the hospitals and this same balance between admissions and releases has been estimated to continue in the 1958-59 and 1959-60 Fiscal Years. The admission and release factors are a measure of the total performance of the department and are set forth in tabular form as follows:

MENTALLY ILL HOSPITAL POPULATION MOVEMENTS PER FISCAL YEAR

	1952-53	1953-54	1954-55	1955-56	1956-57	1957-58	Estimated 1958-59	Estimated 1959-60

The all-out modern attack on mental illness is made on 4 basic fronts—treatment, training, research and prevention. By far the greater part of past increases in the department budget, that is, increases other than those necessary just to keep up with state population growth, have of necessity gone into improving the treatment program, essentially by providing additional numbers of physicians, therapists, social workers, nurses, technicians and psychologists, food personnel and others. Last year the financial

position of the State indicated that available moneys could be more wisely expended on the other 3 methods of attacking the problem—research, training and community development of mental hygiene resources. These 3 areas are again emphasized, and, in addition, another increase in certain professional, technical, and nursing staffs and additional funds for tranquilizing drugs are proposed to improve the level of treatment. They are discussed in detail in the appropriate sections of the budget.

^b Previously hospitalized in a California State Hospital for Mentally Ill.

DEPARTMENT OF MENTAL HYGIENE—Continued

1 The major construction capital outlay program reflects the
2 continuation of the leveling-off of the mentally ill patient popu-
3 lation in the various hospitals, and for the first time in many
4 years, overcrowding on a department-wide basis will have been
5 eliminated. Thus, no funds for additional capacity at the
6 mentally ill hospitals are included. However, the mentally
7 retarded population is estimated to continue increasing and
8 additional beds and facilities are proposed to provide for a
9 major share of those deemed eligible for state institutional
10 care. The main items in the construction program are 700 addi-
11 tional beds at Fairview State Hospital; a professional building
12 at Stockton State Hospital; an addition to the administration
13 building and replacement of the rehabilitation therapies build-
14 ing at Napa State Hospital.

15 Other projects are proposed to provide: initial complements
16 of equipment for major projects now under construction; to
17 remodel and modernize ward facilities at Agnews, Patton,
18 Napa, and Metropolitan State Hospitals; to enlarge the
19 physical therapy annex at Pacific State Hospital; and to pro-
20 vide utility and service facilities at the various hospitals.

21 The new receiving and treatment building at Agnews State

Hospital will be completed near the end of the current year
and will be available for occupancy beginning in July, 1959.
A 432-bed ward building at Atascadero is now under construc-
tion, and will be available for admission of additional patients
in September, 1959. Two new wards with a capacity of 1,072
beds will be completed in July, 1959, at Patton State Hospital.
It is planned to deactivate buildings containing 276 beds at
Modesto State Hospital in January, 1960, because of their
deteriorated condition. The new Fairview State Hospital for
mentally retarded patients is scheduled to open in January,
1959, and will have a total of 1,945 beds available by January,
1960. These beds will be filled at the rate of about 100 per
month. The Neuropsychiatric Institute at the University of
California at Los Angeles has a 196-bed in-patient facility under
construction and it is estimated that this facility for teaching
and research will be available for occupancy about December,
1960. The new 4-story addition at the Langley Porter Neuro-
psychiatric Institute in San Francisco will be completed in the
latter part of the current year, and should be in full operation
by July 1, 1959.

MAJOR PROGRAM AUGMENTATIONS AND COSTS

26 The following summary by program accounts for the major
27 part of the proposed increase of \$10,545,383 (10 percent)
28 over the 1958-59 expenditures. These increases provide the
29 workload adjustments required to meet the opening of new

facilities, population and price changes at presently recognized
standards of staffing and supply; also, they provide for im-
provements in the level of service primarily in the areas of
treatment, training and research.

Additional personnel (other than nursing) for staffing new facilities:		
a. The new Fairview State Hospital (99)		\$360,984
b. The new receiving and treatment building, 512 beds, administration building, boiler plant, and food service building, Agnews State Hospital (38)		131,178
c. The new ward building, 432 beds, Atascadero State Hospital (2)		9,636
d. 2 new ward buildings, 1,072 beds, Patton State Hospital (42)		128,331
e. The new 4-story addition at the Langley Porter Neuropsychiatric Institute, 1 new ward and research facilities (14)		65,976
		<hr/>
		\$696,105
Additional personnel (other than ward nursing) for workload changes:		
a. Proposed new positions (148)		\$865,521
b. Positions to be abolished (—83)		—367,030
	(65)	<hr/>
		\$498,491
Additional ward nursing personnel to provide for staffing of new hospital facilities and ward reclassifications resulting from changes in type of patients and prescribed treatment:		
a. Proposed new positions (865)		\$2,471,182
b. Positions to be abolished (—50)		—149,400
	(815)	<hr/>
		\$2,321,782
Additional personnel for diagnosis and treatment (other than ward nursing) to improve the level of service (81)		<hr/>
		\$548,634
Additional ward nursing personnel to improve the level of service (84)		<hr/>
		\$212,742
Increased cost in authorized positions for salary adjustments and for the full year cost of those positions delayed in establishment until the latter part of the current year to coincide with the availability of new facilities which they will operate		<hr/>
		\$2,936,621
Additional man-years of personnel from fuller employment in authorized positions (277.9)		<hr/>
		\$503,029
Increased staffing for the Neuropsychiatric Institute at U. C. L. A. and Langley Porter Neuro-psychiatric Institute (43)		<hr/>
		\$140,903
Additional departmental and central office personnel:		
a. Proposed new positions (50)		\$234,960
b. Positions to be abolished (—9)		—43,720
	(41)	<hr/>
		\$191,240
Change in operating expense and equipment:		
a. Increases primarily due to population and price changes		\$1,069,969
b. To provide increases in the professional in-service training program		137,675
c. Increase for special (tranquillizing) drugs		287,069
d. Increase in leave and discharge allowance		45,000
e. To provide administrative analysis services		20,000
		<hr/>
		\$1,559,713
Additional funds for expansion of family care program		<hr/>
		\$216,900
Increase in funds for research		<hr/>
		\$107,642 *
Increase in contributions to State Employees' Retirement Fund		<hr/>
		\$646,082

* Actually an increase of \$302,000 over the 1958-59 appropriation. See discussion under Psychiatric Research, page 332.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED

EXPANDED PROGRAMS

In attacking the problem of mental illness, it was decided that an increase in program funds could best be spent in the areas of research and in accelerating the training of the professional staff to increase their efficiency and effectiveness. Also, it is believed that another increase in professional and nursing staff and an increase in special drugs should be authorized in order to continue the progress in the treatment area.

Departmental Training Program ----- \$137,675

The 1958-59 Budget provided additional funds in order that emphasis could be placed on the in-service training of the professional staff in psychiatric techniques. This addition included provision for a chief of professional education in each hospital to administer the program, a stenographer-clerk, consultant funds to hire psychiatric specialists to teach on a part-time basis; additional books and journals, and a nucleus of training aids and equipment. This program has progressed rapidly during the current year.

It is now proposed to augment the consultant funds by \$116,580, and to provide additional funds for books and journals by \$6,570, training aids and equipment by \$12,275, and specialized training by \$2,250. This represents an additional increment in the total program planned.

The career residency phase of the training program has not yet been implemented.

Psychiatric Research ----- \$302,000

The 1956-57 Budget provided funds for employment of a chief of research only, and amounts of \$200,000 and \$500,000 were made available in 1957-58 and 1958-59 Fiscal Years respectively. The program started slowly in order to establish a firm foundation, and now is in a position to expand. An appropriation in the amount of \$802,000 is proposed for this budget, or an increase of \$302,000 over the 1958-59 appropriation. All appropriations for this program are for a 3-year duration, and a summary by year of project encumbrances and actual expenditures combined is set forth below.

	Actual 1957-58	Estimated 1958-59	Estimated 1959-60
Research team (5) -----	-	\$200,000	\$200,000
Research team (2) -----	-	-	\$0,000

POSITION CHANGES

The following 1,224 net additional positions totaling \$4,119,465 for the mentally ill and mentally retarded hospitals represent standard classes used at all of the hospitals and are, therefore, discussed functionally as groups. They are also reflected in the budgets of the various hospitals, but are not explained there. Most of the classes of positions are budgeted on accepted workload formulas, previously related to the overcrowding of patients, the number of patients admitted and/or the estimated year-end population. Due mainly to these workload factors, 133 presently authorized positions are

	Actual 1957-58	Estimated 1958-59	Estimated 1959-60
Research psychologist -----	-	\$10,000	\$10,000
Editorial assistant (2) -----	-	12,000	12,000
Pilot programs -----	\$25,175	60,000	150,000
Programs 6-18 months -----	36,120	105,575	200,000
Programs over 18 months -----	85,130	166,000	150,000

Totals ----- \$146,425 \$553,575 \$802,000

Increase in Professional, Technical and Nursing Staff ----- \$761,376

Another increase in the level of diagnostic, treatment, and nursing staff is proposed. This includes 17 psychiatrist, 15 clinical psychologist, 20 social worker, 8 neuropathology technologist, 1 nurse anesthetist, 17 clerical, 3 supervising psychiatric nurse, and 84 psychiatric technician—trainee positions. The distribution of these positions at the 14 hospitals is set forth in the section on "NEW POSITIONS" under the appropriate functional subsection.

Increased in Special Drugs ----- \$287,069

It is proposed to provide special drugs such as tranquilizers for an additional 10 percent of the hospital population. The amount now authorized is based on an average patient participation of 15 percent. The increase will provide a more adequate program in recognition of the usage requirements of the newer drugs for both mentally ill and mentally retarded patients, and is based on favorable medical experience with this type of treatment.

Administrative Analyst Services ----- \$20,000

It is proposed to obtain administrative analyst services on a contractual basis from the Department of Finance. The department has become so large and complex that it urgently needs specialists in the analysis of administrative operations. The program should result in considerable saving in time and effort by simplifying clerical and procedural processes and in a better co-ordinated program through correction of administrative deficiencies.

being discontinued. A complete list of positions to be abolished and proposed new positions with their effective dates can be found in the budgets of the various hospitals.

Position changes for Departmental Administration, Outpatient Clinics, Langley Porter Neuropsychiatric Institute and the Neuropsychiatric Institute at U.C.L.A. are explained and listed in the individual budget for each of these agencies. The position changes in the various hospitals are explained below in chart and narrative form.

SCHEDULE OF WORKLOAD ADJUSTMENTS IN MAJOR POSITION CLASSIFICATIONS

HOSPITAL	Psychiatrist and Physician	Clinical Psychologist	Dentist	Dental Assistant	Clinical Laboratory Technologist	Rehabilitation Therapist	Hospital Social Worker
Agnews -----	3	1	-	-	1	-	2
Atascadero -----	4	1	-	-	-	1	2

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued
SCHEDULE OF INCREASED SERVICES PROVIDED IN MAJOR POSITION CLASSIFICATIONS

Hospital	Psychiatrists and Physician	Clinical Psychologist	Neuropathology Technologist	Hospital Social Worker
Agnews	1	2	1	2
Atascadero	1	—	—	—
Camarillo	3	2	—	4
DeWitt	—	—	1	1
Mendocino	1	—	1	—
Metropolitan	1	1	—	2
Modesto	—	1	1	1
Napa	3	1	—	4
Patton	2	2	—	4
Stockton	1	1	—	2
Fairview	1	1	1	—
Pacific	1	2	1	—
Porterville	1	1	1	—
Sonoma	1	1	1	—
TOTALS	17	15	8	20

Medical and Laboratory Personnel

34 Staff psychiatrist	\$428,400
25 Clinical psychologist	166,800
3 Clinical laboratory technologist	14,460
8 Neuropathology technologist	39,840
70 Total	\$649,500

The foregoing schedules indicate (1) staffing adjustments necessary to maintain the presently authorized level of service in accordance with existing workload standards, and (2) those positions proposed to increase the overall level of diagnostic and treatment service. Workload standards are applied to admission and/or resident population forecasts for the various state hospitals. This primarily accounts for the differences in the numbers of positions between hospitals. Significant workload position adjustments are noted at Agnews, Atascadero, Modesto, Patton, and Fairview. Several additional positions are included for Agnews to provide for a substantial increase in admissions concurrent with activation of the new receiving and treatment building. Added staff at Atascadero is due to the increase in population to fill the new ward addition of 432 beds. The discontinuance of positions at Modesto reflects the deactivation of certain ward buildings and the consequent decrease in population. The additional positions at Fairview are based on the population buildup at this new institution which was activated in January, 1959.

14 Psychiatric resident II (effective June 1, 1960) 88,582

These 14 positions are proposed to expand the residency program. The positions are part of the psychiatrist workload staff and are proposed on a 1-month basis in order that prior authorization may be obtained to make resident appointments the previous fall. Included are 3 positions for Mendocino, 3 positions for Metropolitan, 3 positions for Stockton, 3 positions for Pacific and 2 positions for Porterville.

1 Surgical nurse II 84,740

This position is for Atascadero State Hospital and was discontinued in the 1958-59 Budget because of an inability to recruit a qualified individual over a period of time. It is proposed to renew the authorization in order to provide this hospital with the 1 supervisory surgical nurse position which is a like complement authorized the other hospitals.

1 Nurse anesthetist 85,496

This position is proposed for Modesto State Hospital because of the increased surgical activity and the current backlog of patients that could benefit from this service. All of the hospitals except Atascadero and DeWitt will then have such a position. These positions are authorized on the basis of working 3 to 4 days a week in surgery and 1 to 2 days a week in the dental department.

1 Public health nurse 85,364

1 Chiropodist 6,360

1 Psychiatric technician (chiropodist assistant) 3,456

3 15,180

These positions are proposed for the new Fairview State Hospital and will provide the same

staff as budgeted for other hospitals for the mentally retarded. The public health nurse is primarily concerned with enteric disease control and the chiropodist and assistant are standard positions at the various hospitals for treatment of defective feet and foot disorders.

Other Treatment Personnel

2 Chaplain 12,120

It is proposed to provide 1 Protestant and 1 Catholic chaplain for the new Fairview State Hospital which is estimated to have a patient population of 1,665 by June 30, 1960. All other hospitals are authorized a like complement of positions.

1 Industrial therapist 4,626

1 Occupational therapist 4,626

2 Recreational therapist 9,252

4 Total 18,564

The above rehabilitation therapy positions indicate the net adjustment by class necessary to maintain the presently authorized level of service in accordance with existing workload standards. The individual position adjustments by hospital are shown on the preceding "Schedule of Workload Adjustments in Major Position Classifications" chart.

1 Senior psychiatric social worker 5,496

1 Graduate nurse 4,404

1 Intermediate typist-clerk 3,456

3 Total 13,356

These positions are proposed as additions to the Preadmission and Diagnostic Clinic personnel at Sonoma State Hospital, and will provide this hospital with a staff comparable to those authorized at the three other hospitals for the mentally retarded. The primary functions of this service are to examine and classify all prospective admissions in order to maintain a realistic priority type waiting list, to assist and counsel parents in this difficult period, and to aid in the actual admission of patients. The positions are requested to pro-service for the overall increase in patient population.

3 Supervising psychiatric social worker I 18,180

32 Senior psychiatric social worker 175,872

35 Total 194,052

15 of the above senior psychiatric social worker positions are for net adjustments, by class, necessary to maintain the presently authorized level of service in accordance with existing workload standards. The individual position adjustments by hospital are shown on the preceding "Schedule of Workload Adjustments in Major Position Classifications" chart. 3 supervising psychiatric social worker and 17 senior psychiatric social worker positions are to improve the level of service and are explained in the "expanded program" portion of the summary. The individual position assignments by hospital are shown on the preceding "Schedule of Increased Services Provided for Major Position Classifications" chart.

NEW POSITIONS

Nursing Personnel

Ward Staffing:	
18 Senior psychiatric nurse	\$83,745
81 Psychiatric nurse	347,056
18 Senior psychiatric technician II	71,610
36 Senior psychiatric	124,620
796 Psychiatric technician—trainee	2,056,893
-50 Psychiatric technician—trainee	-149,400
899 Total	\$2,534,524

This budget includes adjustments in ward staffing to meet the anticipated workload changes, ward classification changes, and overcrowding. Provision is also made for improving the level of service by correcting deficiencies in borderline ward classification areas.

Hospital Nursing Administration

1 Psychiatric nursing education director	\$5,772
This position will provide overall direction of the in-service training program at Mendocino comparable to that provided at other state hospitals.	

Area Supervision

9 Supervising psychiatric nurse	\$47,088
1 Supervising psychiatric technician	4,740
10 Total	\$51,828

This addition provides for 8 supervising psychiatric nurses, 5 at Porterville and 3 at Sonoma, to bring the nursing staff in the acute areas up to a level more comparable to other state hospitals.

1 supervising psychiatric nurse and the 1 supervising psychiatric technician, abolished by the 1958 Legislature because of an extended vacancy period, are needed to provide coverage in each of the nursing areas at Sonoma and Mendocino.

Administrative and Business Services Personnel

1 Administrative assistant I	\$6,060
This position is proposed at Fairview as a part of recognized staffing complements of all	

hospitals, and assists the superintendent. It was not budgeted previously pending the 1959-60 population increase, which is estimated to reach 1,665.

2 Service and supply officer II \$13,344

1 position each is proposed for Fairview and Atascadero due to estimated increased population during 1959-60. Fairview is estimated to attain a population of 1,665 and Atascadero, 1,540. With this increase in size, the job of supervising the various industries becomes quite complex, justifying the services of such a position. All hospitals, except these two, are authorized a service and supply officer II, the larger ones having a service and supply officer I in addition.

General Medical Records and Clerical

1 Intermediate stenographer-clerk \$3,630

This position is proposed for the Chief of Professional Education at Fairview and is comparable to those authorized at the other hospitals for chiefs of professional education.

37 Intermediate typist-clerk \$13,310

-1 Intermediate typist-clerk -3,630

36 \$130,680

These positions are proposed for central medical clerical pools at the various hospitals. They are required for the workload relating to the proposed new and deleted positions in the budget and are based on a standard of 1 typist for each 3 professional staff members.

-2 Senior clerks -8,388

These positions, 1 at Stockton and 1 at Napa, were assigned to the statistical evaluation programs under departmental administration and are proposed for deletion.

8 Intermediate typist-clerk \$27,648

4 positions at a cost of \$13,824 are proposed for the personnel sections at Patton, Pacific, Porterville, and Sonoma because of workload increases relating to new positions in the budget. The workload standard is based on 1 clerk for each 250 positions.

1 position at a cost of \$3,456 is included for the additional area nursing office proposed at Porterville. The accepted staffing standard is 1 intermediate typist-clerk for each area office.

^a Re-establishment of 1 position abolished by Legislature.

^b Re-establishment of 4 positions abolished by Legislature.

^c Net reduction in positions realized by June 30, 1959, reflected in 1959-60.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

NEW POSITIONS—Continued

General Medical Records and Clerical—Continued

1 position at a cost of \$3,456 is proposed for Metropolitan to bring the area nursing typist staff up to standard. At present this hospital has 5 nursing areas, with only 4 intermediate typist-clerks authorized for this function.

1 position at a cost of \$3,456 is proposed for the Patients' Accounts Section at Patton. The estimated increase in excess of 500 patients during 1959-60 will place this hospital on a population level which will justify 1 additional position.

1 position at a cost of \$3,456 is proposed for the Patients' Trust Section at Atascadero due to an estimated increase in population to 1,540 by June, 1960. All other hospitals are authorized at least 1 typist for this function. 1 additional position will bring Atascadero's staffing to this minimum authorization.

Food Service Personnel

1 Food administrator I ----- \$4,980

This position is proposed for Agnews to direct a corrective diet program in the east area. With the activation of a new receiving and treatment facility, the corrective diet workload is estimated to be large enough to warrant the establishment of a second diet kitchen at this hospital.

1 Food service supervisor I ----- \$3,630

The position is required for Atascadero to provide dining room supervision for 7 days which is not presently possible with the 1 grade II position authorized. 2 additional congregate dining rooms are to be opened and staffed in 1959-60 which will increase the supervisory workload.

1 Supervising cook I ----- \$4,404

The position is proposed for Fairview to provide relief for the 2 supervisory posts presently authorized in order to meet the increased patient population load.

15 Cook ----- \$59,940

4 Assistant cook ----- 13,176

19 Total ----- \$73,116

4 cooks and 1 assistant cook are proposed for Agnews to staff 2 posts in the new diet kitchen and 1 post for employee cooking in the east area plus providing adequate relief for total cook positions.

1 assistant cook is proposed for Modesto to provide adequate relief to cover the 9 cook posts.

10 cooks are proposed for Fairview to staff 6 posts plus relief. These additional positions are required to meet the workload entailed by the increased population of approximately 1,065 during 1959-60.

1 cook is proposed for Napa to correct a shortage in the relief factor for the cook staffing. 12 cook posts are authorized requiring 7 relief positions while only 6 are available.

1 assistant cook is required at Porterville because of the increased work caused by the varied types of menus needed at this hospital for mentally retarded.

1 assistant cook is proposed for Sonoma to staff an additional post for general patient cooking. An increase in workload will result from the activation of 700 new beds during the second half of the current year.

2 Butcher-meat cutter I ----- \$7,992

1 position is required at Patton to meet the increased workload anticipated in the butcher shop due to the activation of the 2 ward buildings of 1,072 capacity in 1959-60.

1 position is proposed for Fairview to meet the workload caused by the increased population.

6 Baker I ----- \$23,976

1 position is required at Atascadero to enable the bakery operation to expand and provide the additional bakery goods needed for the larger population in 1959-60.

1 position is proposed for Metropolitan to meet the increase in workload of approximately 1,100 patients which has developed since the last adjustment in staff was made in the baking operation.

1 position is proposed for Patton to adequately staff the bakery in order to provide the bakery goods necessary for the increased population.

2 positions are required for Fairview to meet the workload increase due to the expanded patient population.

1 position is proposed for Sonoma to cover the increased workload that will result from the activation of the new 700-bed ward buildings.

123 Food service assistant ----- \$329,418

Distributed by hospital as follows:

	Dining rooms	Kitchen
Agnews -----	18	5
Atascadero -----	5	—
Camarillo -----	3	—
DeWitt -----	1	—
Modesto -----	—5	—
Patton -----	35	5
Fairview -----	44	10
Porterville -----	—	1
Sonoma -----	—	1
Totals -----	101	22

Agnews requires 18 positions on a post assignment basis, 11 posts plus 7 relief positions, in order to staff the 4 congregate dining rooms and the connecting serving pantries in the new receiving and treatment building; the industrial patients dining room in the new food service building, and the employee dining room, all located in the expanded east area. 5 positions are required in the kitchen of the new food service building to staff 3 posts plus 2 relief positions. 1 post is for vegetable preparation, while 2 posts are for sanitation.

Atascadero requires 5 positions to staff 2 congregate dining rooms which will serve the additional population resulting from the activation of the new ward building addition of 432 beds in 1959-60.

Camarillo requires 3 positions to increase the minimum staffing now authorized of 2 posts plus 1 relief position for a congregate dining room which serves 675 patients per meal. These additional positions, together with those now authorized, would provide adequate staffing coverage consisting of 4 posts or 2 for the morning shift and 2 for the afternoon shift daily.

DeWitt requires 1 position to correct a shortage in relief for the staff in the congregate dining rooms.

Modesto proposes the elimination of 5 positions because of a workload decrease resulting from the deactivation of a congregate dining room.

Patton requires 35 positions. 22 posts plus 13 relief positions are needed to staff 6 congregate dining rooms in the 2 new 1,072-bed capacity ward buildings.

5 posts daily are required in each building for the first floor dining room, while 6 posts daily are required in each building for the second floor's 2 dining rooms. 5 positions, 3 posts plus 2 relief positions, are required for the kitchen to meet the increased workload. 1 post will assist in the preparation of general patients' food and 2 posts will be needed for sanitation duties.

DEPARTMENT OF MENTAL HYGIENE—Continued

STATE HOSPITALS FOR THE MENTALLY ILL AND MENTALLY RETARDED—Continued

NEW POSITIONS—Continued

Food Service Personnel—Continued

Fairview requires 44 positions, 28 posts plus 16 relief positions, to completely staff the congregate dining room areas, serving pantries, and dishwashing areas in Wards I, J, K, N, and O. Wards I, J, and K were only partially staffed in the current year because of partial occupancy of these buildings. Wards N and O are new wards planned for activation in 1959-60. 10 positions, 6 posts plus 4 relief positions, are required for the kitchen areas.

Porterville requires 1 position for the kitchen area to implement new sterilization procedures necessary to maintaining an effective amebiasis control program.

Sonoma requires 1 position in the sanitation area of the main kitchen. The activation of the 700-bed ward buildings has increased the workload significantly in the washing and sterilization of food carts.

—46 Food service assistant —\$137,448

Distributed by hospital as follows:

	Dining Rooms
Agnews	—26
Metropolitan	—1
Patton	—9
Stockton	—10

The foregoing positions are proposed for abolishment because of a change in the standard for staffing congregate dining rooms.

Clothing, Laundry, and Housekeeping Personnel

1 Laundry supervisor I	\$3,900
—4 Laundry assistant	—11,952
2 Laundry assistant	5,976
4 Laundress	13,176
3 Total	\$11,100

1 laundry supervisor I is proposed for Atascadero to meet the increased workload which will result from 6 additional wards. All hospitals, except Atascadero, are authorized both a supervisor II and a supervisor I. This additional position will give Atascadero equivalent supervisory laundry personnel. 2 laundry assistants are proposed for abolishment at Modesto and 2 at Stockton due to decreased patient population. 2 laundry assistants and 4 laundress positions are proposed for Patton due to the estimated increase in patient population occasioned by the activation of the two new ward buildings containing 1,072 beds. The laundry plant has been enlarged to accommodate the increase in population.

7 Janitor	\$21,411
—5 Janitor	—16,470
2 Total	\$4,941

2 janitors at Patton and 3 janitors at Agnews are proposed to take care of 36,800 sq. ft. and 66,000 sq. ft., respectively, of floor space requiring janitorial maintenance which will be added during 1959-60. 2 janitors are proposed at Camarillo for the new recreation and therapy centers which will be completed during 1958-59, but for which janitorial staff was not authorized in the 1958-59 budget. 24,250 sq. ft. of floor space, requiring 7-day cleaning, will be added with the completion of this building. 5 janitors are proposed for dele-

tion at Sonoma. These 5 positions are assigned to the T.B. unit which will be deactivated during the current year.

Plant Operation Personnel

3 Carpenter	\$15,690
3 Electrician	15,690
2 Plumber	10,462
2 Building maintenance man	8,808
2 Groundsman	7,620

12 Total \$58,280

1 carpenter, 1 electrician, 1 plumber, and 1 groundsman are proposed for Agnews State Hospital to meet the additional workload added by the expansion of the East Area of this hospital. The activation of the new receiving and treatment unit with a capacity of 512 beds, a new food service building, a boiler plant and a new administration building in the 1959-60 year will require the above 4 positions to augment the present maintenance staff.

1 carpenter and 1 building maintenance man are proposed for Atascadero State Hospital and are needed to meet the workload added by the activation of a new ward building with a capacity of 432 beds in the 1959-60 Fiscal Year.

1 carpenter, 1 electrician, 1 plumber, 1 building maintenance man, and 1 groundsman are proposed to provide maintenance service for the expanded physical plant at Patton. Activation of 2 new ward buildings with a total bed capacity of 1,072, a new food service building, new maintenance shops, expansion of laundry and boiler plants, as well as an expansion of the hospital utilities network to service these new facilities, will require the addition of the above 5 positions to the hospital maintenance staff.

1 electrician is proposed for Fairview to service the 500-unit telephone system and to assist the existing electrician position in the maintenance of the rapidly increasing workload added by the activation of facilities at this new hospital.

11 Automotive equipment operator I \$48,44

2 positions are proposed at Agnews State Hospital to augment the present staff on a post-assignment basis in the operation of the food cart delivery truck at the new food service building and to pick up laundry at the new receiving and treatment building.

4 positions are needed on a post-assignment basis at Patton to provide food cart and laundry pickup and delivery service at the two new ward buildings to be completed and activated in 1959-60.

3 positions are proposed at Fairview State Hospital to augment the authorized 6 positions on a post-assignment basis. The admission of patients will begin on January 1, 1959, and the population is expected to increase to 1,665 by June 30, 1960. The above positions will provide food and laundry pickup and delivery service, disposition of trash and garbage, transportation of patients, and various services to the maintenance functions.

2 positions are proposed at Sonoma State Hospital on a post-assignment basis to provide food and laundry delivery service to the increased population housed in the 700 new beds activated in the 1958-59 Fiscal Year.

ADMINISTRATION

GENERAL ANALYSIS

The central office Administration Division of the Department of Mental Hygiene performs the primary functions of policy formulation, co-ordination and direction of the overall activities of the department including its hospitals, clinics and other facilities. Services are provided in the following areas: research, community mental health activities, public information, business and fiscal management, co-ordination of the nursing and rehabilitation service programs, personnel management and training, food administration, statistics, engineering, guardianships, deportation and institution transfers, and inspection and licensing of private institutions. Also, the department is responsible for the administration of National Mental Health Act funds for California, and the outpatient clinic program.

The new community services program authorized by the Short-Doyle Act is in the process of being implemented. Local jurisdictions have submitted operational plans for the current year. These plans are eligible for 50 percent reimbursement upon approval. Research projects at the various hospitals have been approved, and this program is explained in detail in the departmental general summary.

stenographer-clerk to process the training and recruitment secretarial work. 1 typist-clerk is added in the general transactions office to process the workload caused by the enlarged staffs at the various state hospitals.

2 tabulating machine operators are required to maintain the present workload level in the reporting unit.

1 stenographer-clerk is provided in the Nursing Services Section to meet the increased clerical workload which has developed because of the increased nursing programs work in the hospitals.

3 positions are required in the Guardianship Section to process the legal services work and to meet the increased account and estate work. Revenues to the State are directly attributable to the staff time available in the Guardianship Section and have been estimated to increase \$180,000 by the addition of these positions. The positions provided are: 1 assistant counsel, 1 patients' estates and accounts specialist, and 1 stenographer-clerk.

Additional funds are provided to contract with the Department of Finance to study the forms, records and procedures used in the department.

11 positions originally added in 1957-58 to provide a program evaluation by statistical analysis are proposed to be abolished as the purposes for which added have not been carried out. In this group of 11 positions, 2 senior clerks are shown for abolishment at the 2 hospitals where they are assigned, Napa and Stockton.

The following changes are proposed for 1959-60:

1 additional intermediate stenographer-clerk in addition to the 3 clerks now authorized in the community services unit will provide each of the 3 consultants and the chief with the necessary clerical assistance.

2 additional clerical positions in the Personnel Section will provide a training officer and a personnel analyst with 1

BUREAU OF PATIENTS ACCOUNTS

GENERAL ANALYSIS

The Bureau of Patients Accounts assesses and collects charges for the care and treatment of the mentally ill patients within the ability of the patients or their responsible relatives to pay. In addition, reviews are made for the purpose of determining possible benefits to which patients are entitled. The effectiveness of the bureau's program is indicated in the following table of annual collections for patients' care and treatment:

Actual 1955-56	Actual 1956-57	Estimated 1957-58	Estimated 1958-59	Estimated 1959-60
\$7,327,980	\$8,341,236	\$9,467,833	\$10,432,600	\$11,569,300

Admission increases, changes in the Social Security Law, and other federal procedural changes have greatly increased the service and collection potential of this bureau. In order to realize more of these potential collection increases, 10 additional positions are proposed for 1959-60. 3 patients' estates and accounts specialist and 7 intermediate typist-clerk positions are to augment the present staff. It is estimated that the addition of these 10 positions will increase revenues by \$524,700.

21	BUREAU OF SOCIAL SERVICE							
22	GENERAL ANALYSIS							
24	The Bureau of Social Service conducts preleave investigations, arranges placements to permit hospital leaves for mentally ill and mentally retarded patients, and assists in re-establishing the patients as responsible members of the community. Determining and arranging for employment opportunities and living accommodations, developing the most healthful family relationships, and frequent patient contact to effect a firm and lasting adjustment are all important elements of the overall leave program of the department. In this regard, the department arranges home leaves, industrial leaves, and family care home leaves.				The program changes include the addition of 3 supervising psychiatric social workers, 19 senior psychiatric social workers and 9 intermediate typist-clerks which are required at the currently authorized level of service of 1 case worker to 70.5 cases to meet the increased workload of 1,367 cases; an increase from 9,700 cases estimated for the 1958-59 Fiscal Year to an estimated 11,067 cases for the 1959-60 Fiscal Year. The following schedule indicates the measure of performance for the social service program:			
36	SOCIAL WORKER CASELOAD AND UNIT COST							
37	Year-end number of active assigned leave of absence cases				9,756	9,700	11,067	1,367 (14.1%)

Objectives

The outpatient mental hygiene clinics provide for the prevention, early diagnosis, and treatment of mental illness, retardation or disorder, and are established to assist persons not requiring hospitalization.

Program and Performance

The programs provided by the 6 state-supported clinics and the 1 federally supported clinic at Berkeley operate in local metropolitan and rural areas. The Department of Mental Hygiene acts as administrator of National Mental Health Act funds for California and is responsible for allocation of such funds to other agencies as well as setting and maintaining required levels of service. In addition to the general services, the Berkeley Clinic conducts a training program for social workers, psychologists, and psychiatrists.

These clinics provide service comparable to that authorized under Chapter 1989, Statutes of 1957, known as the Community Services or Short-Doyle Act. This act provides matching state support for the operation of local government facilities extending mental health services, and makes psychiatric outpatient service available on a statewide basis. The subvention part of this budget estimates an expenditure of \$1,230,000 in the 1958-59 Fiscal Year and proposes an appropriation of \$3,024,700 for 1959-60 for State matching of local expenditures for mental health programs.

GENERAL ANALYSIS

The total performance of the clinics is indicated by the following schedule which shows the number of hours spent by professional employees in interviews with patients (on either an individual or a group basis), and in preventive services to communities. The hours spent by patients in individual and group therapy are also shown. Of the professional time allocated to all services, 87 percent was directed toward treatment of clinic outpatients and 13 percent toward preventive work in the community in the year 1957-58. It is estimated that the percentages will remain the same for both the 1958-59 and the 1959-60 Fiscal Years. The chief factors responsible for the variation in cost per service hour from clinic to clinic are: (1) the duration of normally occurring vacancies (e.g., in areas remote from metropolitan centers, recruiting is more difficult); (2) the proportion between children and adults in the caseload of patients (e.g., a child's case takes two to three times more staff time than does an adult case); (3) the ratio between group psychotherapy and individual psychotherapy offered in a given clinic (e.g., 10 hours of professional staff time may produce 100 patient-hours in group therapy but only 10 patient-hours in individual treatment interviews); (4) other extraneous factors.

1 psychiatric social worker position is added at Los Angeles and Sacramento clinics respectively to restore the level of service to 1957-58 authorization. The staffs at the clinics are balanced in order to act as a complete treatment team, and the restoration of these 2 positions will allow standard operating complements at all of the mental hygiene clinics.

a Federal grants and expenditures therefrom are not included in the overall budget totals.

b Hours spent in direct services, excluding time spent in case review and administration.

c Cost of treatment services (total cost prorated on basis of employee service-hours), divided by patient-hours.

d Excludes Langley Porter and Los Angeles Neuropsychiatric Institutes.

e Includes full-time services of 3.8 psychiatric residents.

f Includes full-time services of 4 psychiatric residents.

Department of Mental Hygiene

LANGLEY PORTER NEUROPSYCHIATRIC INSTITUTE

Located at the University of California, School of Medicine, San Francisco

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
------	------------------------------	-------------------	----------------------	---------------------	------------------------

SUMMARY

TOTAL EXPENDITURES

Support (General Fund) -----	\$1,440,012	\$1,616,514	\$1,868,454	\$251,940 (15.6%)
Average population (inpatient cases ^a) -----	94	97	105	8 (8.2%)
Personnel man-years -----	219.5	233.7	266.5	32.8

GENERAL ANALYSIS

Objectives

The Langley Porter Neuropsychiatric Institute is a teaching and research center and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research program.

Program and Performance

The statistics presented in the following summary are indicative of the performance of this institute as reflected by inpatient and outpatient caseloads. The number of hospital inpatients is expected to increase significantly from the 1957-58 Fiscal Year level.

	1957-58	1958-59	1959-60	Change
Caseload:				
Hospital inpatient days -----	24,534	25,400	27,500	2,100
Outpatient annual interviews ^b ----	16,925	17,000	17,000	-
Allocation of Costs: ^c				
Inpatient department -----	\$1,080,009	\$1,212,386	\$1,401,341	\$188,955
Outpatient department -----	360,003	404,128	467,113	62,985
Average Cost Per Patient:				
Inpatient (daily) -----	44.02	47.73	50.96	3.23 (6.8%)
Outpatient (per interview) -----	21.27	23.77	27.48	3.71 (15.6%)

The current program of the institute includes training programs for psychiatric residents, medical students, psychology fellows, social work students, occupational therapy students, graduate and undergraduate student nurses, state hospital physicians and fellows in psychiatry. Clinical and basic research projects of various kinds are under way. The facilities include an outpatient department, a 95-bed inpatient service, plus 15 day/night program beds which accommodate 30 patients. The latter program, which is of the demonstration type, is now developing, and will be operating at a maximum level in the 1959-60 Fiscal Year.

With the activation of the new 4-story addition late in the 1958-59 Fiscal Year, training and research facilities will be expanded, and bed capacity will be increased by 10. This new facility together with planned remodeling of the existing building will provide 2 floors of research laboratory space, an addi-

tional ward for clinical work in neuropsychiatry, a new library area, and additional office space and auxiliary treatment rooms. It is estimated that there will be an additional 2,100 days of inpatient care given over the current year estimated workload of 25,400 days. The University medical school will increase each class from 80 to 100 students, all of whom receive courses in psychiatry at this institute as part of their medical training. Also, it is anticipated that increasing demands will be made on staff related to the expanding Department of Mental Hygiene research and training programs.

The major changes to effect this program are:

- (1) For the additional ward devoted to neuropsychiatry, comparable ward staffing is proposed and includes 1 staff psychiatrist, 1 clinical psychologist, 1 psychiatric social worker, 1 occupational therapist, 10 psychiatric nurses, and 5 psychiatric technicians. In addition to patient care, these positions participate in training and research. The clinical psychologist will serve the neurosurgery ward as well.
- (2) For the increased laboratory facilities, 2 clinical laboratory technologists and 2 laboratory helpers are proposed as the basic staff for these facilities. While experience must be gained, it is anticipated that other laboratory staff will be provided from research projects as needed.
- (3) For increased workload in the business function due to the new 4-story addition, 1 senior clerk is proposed for procurement of supplies and will permit centralization of this function, 1 building maintenance man and 4 janitors for the maintenance of the additional structure as well as to provide more adequate care for existing space, 1 librarian for the increased workload in training, and 2 stenographer-clerks on the currently authorized ratio of 1 clerical to 3 professional positions.
- (4) 1 clinical psychologist for the new day-night program to make evaluations of patients coming to and leaving the program.
- (5) For general workload increases due to increased training of medical students, increased research in psychiatry made possible by the new facilities, and to provide proper supervision for proposed new staff as well as to comply with the recommended reorganization plan outlined in Management Survey No. 868, the following positions are proposed: 1 senior psychiatrist to head up the children's service, 1 chief psychologist to assume administrative responsibility for the clinical psychology program, and 1 supervising psychiatric social worker to supervise the social service of the inpatient department.

Objectives

GENERAL ANALYSIS

The Neuropsychiatric Institute at University of California, Los Angeles, is a teaching and research center and provides care and treatment for patients with early curable types of mental disorders as a part of the overall teaching and research program.

Program and Performance

The Neuropsychiatric Institute is to be built as a part of the Medical School of the University of California at Los Angeles and is scheduled for completion by October of 1960. The actual opening, as yet unpredicted, will probably not occur prior to December of 1960.

In the 1956-57 Fiscal Year a limited program was initiated, which included an outpatient clinic. In 1957-58 the institute was authorized to assume full support of an expanded outpatient clinic program to meet the teaching needs of the medical school and to prepare for the ultimate opening of the permanent institute.

Major program changes for 1959-60 are summarized in two parts as follows:

(1) *Early establishment of personnel for the new facility.* These 4 positions are proposed for the planning and implementation of various functions in preparation of the institute's opening. 1 supervising clerk is proposed in the personnel department to handle the many applications and documents which will be caused by the heavy hiring in early 1960-61. 1 accounting officer and 1 accounting technician are proposed in order that the accounting operations can be established prior to the opening of the institute. 1 intermediate stenographer-clerk is proposed in the accounting office to assist the accounting officer and technician.

The following medical and nursing positions are proposed for establishment on June 1, 1960, which will provide ad-

equate time for planning and setting up the various medical care functions prior to the initial influx of patients.

1 chief of clinical services to direct and co-ordinate all of the clinical services functions and to assist the associate medical superintendent in overall planning and administration. 1 chief psychiatrist (inpatient service) to administer the adult and child psychiatric units, the day-night hospital, the somatic therapy section, neurology and neurosurgical services, nursing and rehabilitation therapy departments and the dental department. 2 senior psychiatrists, 1 each for the Adult and Child Psychiatric Services, directly responsible to the chief psychiatrist for the supervision of all activities in each of the respective areas. 1 superintendent of nursing services to prepare and become familiar with the functioning of the nursing services. The duties of the above 5 positions are similar to those of the same positions at the Langley Porter Institute.

1 chief of institution maintenance is proposed for establishment June 1, 1960, in order that he may become acquainted with the plant and assure that it is in proper functioning order.

(2) *Personnel for increased workload.* 10 psychiatric resident II positions are provided to insure an orderly buildup in the resident training program which will guarantee the training of a maximum number of psychiatrists. 8 of these positions will not be needed until July 1, 1960, but an effective date of June 1, 1960, is proposed in order that necessary commitments can be made in the preceding fall. 1 psychiatric resident III position is proposed for advanced residents specializing in specific fields of psychiatry. A position at this level has been recognized as a part of a basic resident staff.

No equipment is proposed because new position complements will be provided for by the capital outlay equipment list for the new building.

GENERAL ANALYSIS

Objectives

Agnews State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts and epileptics without mental retardation, and primarily serves the Counties of Santa Clara, San Mateo, Santa Cruz, San Francisco, Alameda, San Benito and Monterey.

Program and Performance

The level of care and the treatment utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1955-56	1956-57	1957-58
Total admissions -----	3,275	3,402	3,657
Total net releases -----	3,292	3,304	3,763
Net transfers to other hospitals-----	123	76	135

It is planned to activate the new receiving and treatment building in July, 1959. This unit provides 512 additional beds and will completely eliminate the current overcrowding of 12.8 percent.

The major program changes proposed are to provide another increase in the professional, technical and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other costs are due to workload factors primarily caused by the activation of the new facility mentioned above. A total of 26 positions are to be abolished and 193 new positions are listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

This is a relatively new hospital, being activated in the 1954-55 Fiscal Year. Funds for additional capacity of 432 beds were provided in the 1957-58 Budget and it is planned to open these facilities in September, 1959, which will completely eliminate the present overcrowding.

The major program changes proposed are to provide another increase in the professional and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other costs are due to workload factors, primarily caused by the activation of the new facilities mentioned above. A total of 108 new positions are included, and are listed below under "proposed new positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

GENERAL ANALYSIS

Objectives

Camarillo State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, and minors and juvenile court observation cases committed under Section 740.5 of the Penal Code. It primarily serves the Counties of Los Angeles, Ventura, Santa Barbara and San Luis Obispo.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. A juvenile unit is located on the hospital grounds where a specialized treatment program is conducted for minors.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1955-56	1956-57	1957-58
Total admissions -----	3,690	3,697	4,190
Total net releases-----	3,471	3,698	4,141
Net transfers to other hospitals-----	13	447	16

The major program changes proposed are to provide another increase in the professional, technical, and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other increased costs are due to workload factors. A total of 33 new positions are included, and are listed below under "Proposed New Positions." These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

3 psychiatrist positions are to be abolished in order to maintain the overall authorized level of service based on estimated workload factors.

14					
15	Objectives				
16					
17	DeWitt State Hospital provides care and treatment for				
18	mentally ill patients, alcoholics, narcotic addicts, and a limited				
19	number of mentally retarded patients. It primarily serves the				
20	Counties of El Dorado, Yolo, Sutter, Yuba, Placer, Nevada,				
21	Sierra, Butte, and Plumas.				
22					
23	Program and Performance				
24					
25	It is planned that the average population at this institution				
26	will consist of 2,324 mentally ill and 550 mentally retarded				
27	patients during the 1959-60 Fiscal Year. The level of care and				
28	the treatment techniques utilized at this hospital are comparable				
29	to those employed at other state hospitals caring for the				
30	mentally ill and/or mentally retarded, and emphasize treatment				
31	rather than custody.				
32	The total performance of the hospital is best measured by				
33	the number of admissions and net releases, which is set forth				
34	in tabular form as follows:				
35					
36

Mentally Retarded:			
Total admissions -----	—	—	—
Total net releases -----	19	6	18
Net transfers to other hospitals -----	2	—	—23

The major program changes proposed are to provide another increase in the professional, technical and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other costs are primarily due to the addition of 23 psychiatric technician trainees because of ward reclassifications resulting from changes in types of patients and from overcrowding. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

GENERAL ANALYSIS

65	Objectives							
66								
67	Mendocino State Hospital provides care and treatment for					1955-56	1956-57	1957-58
68	mentally ill patients, alcoholics, narcotic addicts, and epileptics					727	873	98
69	without mental retardation, and primarily serves the Counties					877	965	98
70	of Marin, Sonoma, Mendocino, Humboldt, Del Norte, Siskiyou,					—170	—18	—25
71	Modoc, Trinity, Shasta, Lassen, Tehama, Glenn, Colusa and							
72	Lake.							
73								
74	Program and Performance							
75								

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

The major program changes proposed are to provide another increase in the professional, technical and nursing staff, increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other costs are primarily due to the net addition of psychiatric technician trainees because of ward reclassification resulting from changes in types of patients. These programs at the total of 53 positions involved, are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

^a Composed of savings in salaries and wages, \$14,669; operating expenses, \$21,106; equipment, \$9,874; and excess reimbursements, \$1,849.

^b Composed of savings in salaries and wages.

METROPOLITAN STATE HOSPITAL

Located at Norwalk, Los Angeles County

SUMMARY AND GENERAL ANALYSIS		ACTUAL 1957-58	ESTIMATED 1958-59	PROPOSED 1959-60	CHANGE FROM 1958-59
SUMMARY					
TOTAL EXPENDITURES					
Support (General Fund)-----		\$5,692,364	\$7,268,310	\$7,797,565	\$529,255 (7.3%)
Average population-----		2,525	3,750	3,753	3
Per capita costs-----		\$2,254	\$1,938	\$2,078	\$140 (7.2%)
Personnel man-years-----		1,238	1,155.5	1,224.6	69.1
GENERAL ANALYSIS					
Objectives					
Metropolitan State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts and epileptics without mental retardation, and primarily serves the Counties of Los Angeles and Orange.					
Program and Performance					
The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasize treatment rather than custody. Also, an after-care facility is operated by this hospital, and extends psychiatric, medical and therapy treatment during the day at periodic intervals as necessary, allowing the patients to return to their homes at night.					
The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:					
	1955-56	1956-57	1957-58		
Total admissions-----	1,517	1,633	1,992		
Total net releases-----	1,543	1,462	1,763		
Net transfers to other hospitals--	57	-35	-290		

2 new ward buildings with a capacity of 1,600 beds were activated in June, 1958. Funds for an additional ward with a capacity of 200 have been appropriated, and it is estimated that this building will be completed in the latter part of the 1959-60 Fiscal Year, with patient occupancy in July, 1960. The present overcrowding of 3 percent will be eliminated completely by the end of the budget year.

The major program changes proposed are to provide another increase in the professional, technical and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other increased costs are due to workload factors. 1 position is to be abolished and a total of 25 new positions are included and are listed below under Proposed New Positions. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

^a Composed of savings in salaries and wages, \$14,257; operating expenses, \$30,412; equipment, \$13,571; and excess reimbursements, \$3,781.

^b Composed of savings in salaries and wages.

Personnel man-years-----	937.6	933.6	932.5	—1.1

GENERAL ANALYSIS

Objectives

Modesto State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics, and for a limited number of mentally retarded patients. It primarily serves the Counties of Stanislaus, Tuolumne, Mono, Mariposa, Merced, Madera, Fresno, Kings, Tulare and Kern.

Program and Performance

It is planned that the average population at this hospital will consist of 2,505 mentally ill and 271 mentally retarded patients during the 1959-60 Fiscal Year. The level of care and the treatment techniques utilized at this hospital are comparable to those employed at other state hospitals caring for the mentally ill and/or mentally retarded, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1955-56	1956-57	1957-58
Mentally Ill:			
Total admissions-----	471	415	778
Total net releases-----	623	516	946
Net transfers from other hospitals-----	212	231	18

	1955-56	1956-57	1957-58
Mentally Retarded:			
Total admissions-----	—	—	—
Total net releases-----	12	8	8
Net transfers to other hospitals-----	161	1	1

A total of 3 2-story ward buildings with a capacity of 214 beds were deactivated in September, 1958, due to the fire hazard involved. Additional buildings with a capacity of 276 beds are planned for deactivation in January, 1960, because of their deteriorated condition. These deactivations will leave the hospital with a rated capacity of 2,625 on June 30, 1960.

The major program changes proposed are to provide another increase in the professional, technical and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other cost changes are due to workload factors, and include the deletion of 34 positions. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

^a Composed of savings in salaries and wages, \$34,572; and loss in reimbursements, \$11,350.

^b Composed of savings in salaries and wages.

Per capita costs -----	\$1,784	\$1,867	\$2,008	\$141 (7.6%)
Personnel man-years -----	1,494.9	1,562.6	1,669.5	106.9

GENERAL ANALYSIS

Objectives

Napa State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, epileptics without mental retardation, minors and juvenile court observation cases committed under Section 740.5 of the Penal Code and primarily serves the Counties of Marin, Solano, Contra Costa, San Francisco, Alameda, Sonoma, and Napa.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasizes treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the northern part of the State suffering with this disease; a juvenile unit is located on the grounds where a specialized program is conducted; and a special program for the treatment of alcoholics is available.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1955-56	1956-57	1957-58
Total admissions	3,012	3,320	3,625
Total net releases	3,204	3,306	3,558
Net transfers from other hospitals	69	251	—26

It is now estimated that the new juvenile unit with a capacity of 216 beds will be completed near the end of the 1959-60 Fiscal Year with occupancy scheduled for July, 1960.

The major program changes proposed are to provide another increase in the professional, technical, and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other costs are primarily due to the addition of 64 psychiatric technician trainees because of ward reclassifications resulting from changes in types of patients and from overcrowding. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

3 psychiatrist positions are to be abolished in order to maintain the overall level of service based on estimated workload projections. 1 clerk is also to be abolished.

^a Composed of savings in salaries and wages, \$950; operating expenses, \$60,511; equipment, \$4,167; and loss in reimbursements, \$2,112.

^b Composed of savings in salaries and wages.

GENERAL ANALYSIS

Objectives

Patton State Hospital provides care and treatment for mentally ill patients, alcoholics, narcotic addicts, and epileptics without mental retardation, and primarily serves the Counties of Inyo, San Bernardino, Los Angeles, Riverside, San Diego, and Imperial.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally ill operated by the department, and emphasizes treatment rather than custody. A large tuberculosis treatment unit is maintained and cares for all mentally ill patients in the southern part of the State afflicted with this disease.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1955-56	1956-57	1957-58
Total admissions	2,757	2,878	2,954
Total net releases	2,754	2,710	2,861
Net transfers to other hospitals	210	109	218

^a Composed of savings in salaries and wages, \$48,480; equipment, \$4,825; and loss in reimbursements, \$10,319.

^b Composed of savings in salaries and wages.

2 additional ward buildings are now under construction with a capacity of 1,072. It is planned to activate these buildings in July, 1959. The total rated capacity of the institution will then be 4,906. A new food service building was activated in June, 1958, and will be used to full capacity as the population is increased to fill the additional beds.

The major program changes proposed are to provide another increase in the professional, technical, and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other costs are primarily due to the increased workload involved in activating the 2 new wards. A total of 355 additional positions are proposed and these are listed below under proposed new positions. 9 positions are to be abolished. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

2							
3	Objectives						
4							
5	Stockton State Hospital provides care and treatment for						
6	mentally ill patients, alcoholics, narcotic addicts, and epileptics						
7	without mental retardation, and primarily serves the Counties						
8	of Sacramento, Amador, Alpine, Alameda, Contra Costa, San						
9	Joaquin, and Calaveras.						
10							
11	Program and Performance						
12							
13	The level of care and the treatment utilized at this hospital						
14	are comparable to those employed at the other state hospitals						
15	for the mentally ill operated by the department, and emphasize						
16	treatment rather than custody. Also, an after-care facility is						
17	operated by this hospital, and extends psychiatric, medical, and						
18	therapy treatment at periodic intervals as necessary, allowing						
19	the patients to return to their homes at night.						
20	The total performance of the hospital is best measured by						
21	the number of admissions and net releases, which is set forth						
22	in tabular form as follows:						
23		1955-56	1956-57	1957-58			
24	Total admissions -----	2,700	2,673	2,487			
25	Total net releases -----	2,492	2,835	2,586			
26	Net transfers to other hospitals -----	29	91	160

GENERAL ANALYSIS

The rated capacity has been reduced by 428, which is primarily due to the complete deactivation of the old main male building. This building was a fire and safety hazard, being one of the oldest ward buildings in the department. Patients have been transferred to other hospitals, and negligible overcrowding is planned in the 1959-60 Fiscal Year. The farming and food processing activities will be completely eliminated by June 30, 1959.

The major program changes proposed are to provide another increase in the professional, technical, and nursing staff, to increase funds for training the professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other cost increases are due to workload factors. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

50 positions are discontinued due to change in workload which affects their functions. Most of the workload reduction is due to the deactivation of the old main male building and the resultant decline in population.

GENERAL ANALYSIS

Objectives

Fairview State Hospital provides care and treatment for mentally retarded patients, and serves the southern counties of the State.

Program and Performance

It is planned to activate this hospital in the current year, with the first patients admitted in January, 1959. The program calls for patients to be admitted at the rate of about 100 per month, which will provide a resident population of 600 on June 30, 1959, and 1,665 on June 30, 1960. At the latter time, the hospital will have a rated bed capacity of 1,945. The level of care and the treatment techniques at this hospital will be comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and will emphasize treatment rather than custody.

730 positions are now authorized, and most of them will be established in the latter part of the current year to coincide with the number of resident patients. A total of 281 additional positions are proposed in this budget for all the various hospital functions which are necessary to care for the size of patient population planned. This hospital will participate in the same increases in the level of service in professional, technical and nursing staff being proposed for all of the hospitals, as well as increases in training for the professional staff in psychiatric techniques, and additional funds for tranquilizing drugs. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

The major program changes proposed are to provide another increase in professional, technical and nursing staff; to increase funds for training the professional staff in psychiatric techniques; and to provide additional funds for tranquilizing drugs. Other increases are due to workload factors and include 2 psychiatric technician—trainee positions for ward classification changes. These programs and positions are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

GENERAL ANALYSIS

Objectives

Sonoma State Hospital provides care and treatment for mentally retarded patients, and serves the northern counties of the State.

Program and Performance

The level of care and the treatment techniques utilized at this hospital are comparable to those employed at the other state hospitals for the mentally retarded operated by the department, and emphasize treatment rather than custody.

The total performance of the hospital is best measured by the number of admissions and net releases, which is set forth in tabular form as follows:

	1955-56	1956-57	1957-58
Total admissions	401	188	175
Total net releases	213	174	141
Net transfers to other hospitals	48	10	20

700 additional beds were activated early in the 1958-59 Fiscal Year. Also, during the current year, the tuberculosis unit was

^a Composed of savings in salaries and wages, \$19,408; operating expenses, \$52,861; equipment, \$6,270; and loss in reimbursements, \$810.

^b Composed of savings in salaries and wages.

completely deactivated because of the small number of remaining patients, which were transferred to the tuberculosis unit at Napa State Hospital. The space they formerly occupied has been converted to regular ward use.

The major program changes proposed are to provide another increase in the professional, technical, and nursing staff, to increase funds for training professional staff in psychiatric techniques, and to provide additional funds for tranquilizing drugs. Other position increases are due to workload factors, and include 56 psychiatric technician positions for ward reclassifications and 9 additional positions of this kind for overcrowding. These programs and all new positions involved are explained in detail in the section titled "State Hospitals for the Mentally Ill and Mentally Retarded" which follows the departmental summary and general analysis. Changes in price and population have been reflected where appropriate.

6 positions are discontinued due to the deactivation of the tuberculosis unit.

GENERAL ANALYSIS

Objectives

The Military Department includes: the California National Guard, to help guarantee internal security of the State and provide an organization prepared in an emergency to become a part of the active federal military forces; and the California National Guard Reserve, to provide for defense and security of California while the California National Guard is in active federal service.

Program and Performance

The 2 primary programs of the Military Department are the operation of the California Army National Guard and the California Air National Guard. Within these 2 programs the State provides a personnel procurement program which enters the field of selection and appointment of officers and warrant officers and recruitment of enlisted personnel; maintains records of the military history of individuals, recording personnel actions, verification of service or deeds, and points for federal retirement; publishes orders and directives on policies and procedures affecting the military; determines locations of organizations and units allocated to the State; provides for training, in conformance with the discipline prescribed by the Department of the Army and Department of the Air Force; operates an Army Officer Candidate School at Sacramento, Alameda, Fresno, Ontario, and San Diego; prepares plans for usage of National Guard as state military forces and uses such forces as required for emergency situations, such as flood duty; participates in the air defense program of the United States both in missiles and aircraft facilities required for maintenance and operation of equipment and facilities for units of the Air National Guard; maintains and operates armories, airfields, rifle ranges, supply points, repair and other facilities; establishes priorities for the use and distribution of federal funds, equipment, and supplies; and administers federal funds in excess of \$27,000,000 allocated to California, covering pay, schools, uniforms, equipment, material, and supplies.

The California National Guard Reserve program encompasses all the activities of the California Army National Guard, except for those activities financed from federal funds and the officer candidate school. All activities are conducted at a reduced level due to the cadre nature of the organization.

The following tables show personnel strength, units, and installations of the state military forces:

	Actual 1957-58	Estimated 1958-59	Estimated 1959-60
National Guard:			
Ground Forces:			
Personnel	23,112	23,441	22,190
Units	312	325	338
Air Force:			
Personnel	4,500	4,575	4,825
Units	41	41	41
Reserve Forces:			
Personnel	650	680	722
Units	32	33	33
Installations:			
Ground Forces:			
State-owned	99	108	114
Leased	43	34	28
Air Force:			
Flying bases	4	4	4
Other bases	3	3	3

Included in the budget are 2 additional armory custodian positions for additional facilities at Hayward and Ontario Air National Guard Bases. 75% of the cost of these positions is reimbursed to the State by the Federal Government. Provision for uniform allowance has been deleted, except for those persons not eligible for the federal uniform allowance. Also deleted is provision for continuance of the California Cadet Corps (see page 399).

GENERAL ANALYSIS

Objectives

This regulatory and tax collection agency issues the license which is required for each motor vehicle operated in California, issues the license to the qualified individual to operate motor vehicles on public roads, and ascertains the financial responsibility of individuals involved in motor vehicle accidents.

Program and Performance

The department operates through 4 divisions headquartered in Sacramento. Branch offices are maintained in principal cities of the State and part-time service is provided to many communities by traveling crews. Through these media the department's basic functions are: the registration and titling of vehicles; the examination of applicants for and the issuance of drivers' licenses; the collection of fees; the maintenance of records in accordance with the laws; the administration of the driver improvement program; the administration of the Financial Responsibility Law; the licensing and control of driving schools and driving instructor services; the licensing of motor vehicle dealers, salesmen, wreckers, manufacturers and transporters; the investigation and enforcement of law pertaining to the registration of vehicles and of driver licensing.

Approximately 200 of the positions authorized for the current year have been eliminated from the budget due to a lesser workload than was anticipated for the current year, revised procedures, and more efficient management.

Provision has been made in both the current and budget

years for the placement of photographs on drivers' licenses. This is in accordance with the provisions of Section 272(a) of the Motor Vehicle Code.

The following are major workload factors for this department:

	Actual 1957-58	Estimated 1958-59	Estimated 1959-60	Increase over 1958-59
Registrations	7,678,052	7,877,960	8,253,650	375,690 (4.8%)
Drivers' licenses	2,270,800	2,433,052	2,856,818	423,766 (17.4%)

For the 1959-60 Fiscal Year, normal workload will require an additional 275.7 positions to process an estimated 8,253,650 vehicle registrations and issue an estimated 2,856,818 drivers' licenses, and to accomplish other related transactions.

Expansion of the driver improvement program will require an additional 29 positions to provide for more effective and thorough handling of problem drivers.

An additional 50 driver license examiners are proposed as the third increment of a 4-year program to increase the time available for vision tests and the driving portion of the driver's license examination.

New branch offices are proposed in the following locations: Orland, King City, San Clemente, and Mill Valley.

DEPARTMENTAL ADMINISTRATION

Objectives

The director is responsible for the administration of all sections of the California Vehicle Code not delegated to the Department of California Highway Patrol. He establishes departmental policy and directs the work of the 4 divisions.

The Division of Administration plans, organizes and co-ordinates the administrative functions of the department.

Program and Performance

The Division of Administration provides the director with information on fiscal expenditures; develops budget planning for current and long-range fiscal requirements; accounts for all revenues derived from the department's fee-collection activities and all property owned by the department. Department-wide service activities consist of assisting the director and the division chiefs in personnel matters, including in-service training and providing legal counsel and representation when required. Real property rentals are located, negotiated, and executed for

the department. Supplies, including license plates and tabs, are purchased, stored, and distributed. Departmental programs and procedures are analyzed toward effecting more efficient and economical administration. Information is prepared for release through appropriate media, with particular emphasis on laws, rules, and regulations requiring compliance by certain deadline dates. Departmental communication is co-ordinated among the divisions both in Sacramento Headquarters and field offices.

Budget year increases are as follows: 1 business service officer I to supplement the heavy workload in the leasing and building maintenance inspection functions. This position will be assigned to the southern area. 2 clerical positions and 0.7 man-year in temporary help are required in the Accounting Section to meet increased workload in the Revenue Control Unit.

Operating expenses are increased in accordance with added positions and anticipated workload. The major increase occurs in printing due to the contemplated recodification of the Vehicle Code.

14							
15	This division is charged with the registration of over 8,000,000 vehicles in the State during the 1959-60 Fiscal Year. Accomplished through the processing and service units, vehicle registration affords a system of ready identification and control, provides a means of establishing ownership of vehicles, and provides the mechanism for collecting motor vehicle fees. This division maintains in its Sacramento files a history of every motor vehicle registered in California. The records are maintained under the registered owner's name in alphabetical order, under the license number in numerical sequence, and by engine or identification number in numerical sequence.

the fees are changed from year to year, the mechanical equipment is used to rerate the vehicles, and prepare potential registration cards which are mailed in advance of the renewal period.

The investigation of automobile dealers and wreckers as pertains to fees due the State and improper practices is accomplished by this division through the use of trained investigators. They also serve briefs for the department, collect fees in the event of improper or inadequate payments, and perform other allied investigative functions, among them being the licensing and regulation of salesmen.

Additional personnel are required to process projected increased registrations in the following functions: 34 man-years of temporary help for the vehicle license and title section; tabulating machine operators and 3 intermediate clerks plus 1.4 man-years of temporary help for the automation section and 4 investigators for the investigation section which is partially off-set by a reduction of 2.6 man-years in temporary help. \$933,000 has been provided in the budget year as the third installment of the cost of the 1963 license plates.

Other operating expenses are increased in accordance with added positions and anticipated workload.

DIVISION OF DRIVERS LICENSES

Objectives

This division is responsible for the issuance of all original drivers' licenses, the renewal of expiring licenses, the maintaining of driving histories of all drivers, the direction of the driver improvement program, and the administration of the State's financial responsibility laws.

Program and Performance

The total number of licensed drivers in California is expected to be in excess of 8,000,000, and it is estimated that approximately 3,000,000 original and renewal licenses will be issued during the 1959-60 Fiscal Year. The drivers license file contains more than 30,000,000 driver record documents. The 1957 Session of the Legislature enacted broad changes in the licensing function. The expiration date of all licenses hereafter issued will be the birth date of the applicant. Other amendments in the law provided that the term not exceed 3 years for original licenses where the driving record was good; not to exceed 2 years for either original or renewal licenses where the applicant had 2 or more traffic convictions (4 or more in the case of chauffeurs) in the 2-year period immediately preceding application; and 5 years for regular renewal licenses with satisfactory records provided the license is renewed within 30 days of its expiration.

Another law requires the issuance of a driver's license containing the photograph of the applicant in addition to other descriptive material.

Driver Improvement includes the general function of post-licensing control of drivers with problems that cause their records to show that they are a hazard to themselves or the general public. Mandatory actions are those requiring automatic action after certain specific convictions, such as drunken driving and other offenses including felonies. Discretionary actions are those involving habitual violators. Discretionary

actions also involve physical or mental disabilities which could result in danger to the drivers or to the general public. In order to carry out these functions the division uses re-examinations, interviews, investigations, warnings and hearings before a referee. Under the discretionary program the division endeavors to improve poor driving habits and attitudes to increase the number of safe drivers rather than to reduce the number of drivers on the road. To this end liberal use is made of the authority to place drivers on probation rather than to suspend or revoke if it appears that the driver shows promise of improvement.

This division is also responsible for the administration of the financial responsibility laws. It is the purpose of this function to provide reasonable assurance that persons suffering bodily injury or property damage in motor vehicle accidents are compensated by those responsible for such injury or damage. Drivers who fail to meet their financial obligations are deprived of the privilege of operating a motor vehicle. Their vehicle registration may be suspended for the same reason.

An additional 38 clerical positions are proposed for general operations to meet increased workload. An increase of 16.3 man-years of temporary help are required for the driver license information service function and will be fully reimbursed from the fees received for the service rendered.

6 driver improvement analyst positions and 17 clerical positions are required in order to maintain the existing level of service in the driver improvement function.

An additional 10 driver improvement analyst and 19 clerical positions are proposed to deal more effectively and thoroughly with problem drivers, both negligent operators and physically or mentally handicapped drivers.

Workload increases in the Financial Responsibility Section require 5 additional positions.

GENERAL ANALYSIS

Objectives

Fundamental objectives of the department are the protection, propagation, preservation, and investigation of the State's fish and game resources, including ocean fisheries and marine products, for the utilization of and general benefit and recreation of the people of California.

Program and Performance

The director, under general policy established by the Fish and Game Commission and as prescribed by statute, administers the department and its program. Included in the department are the Wildlife Conservation Board and the Marine Research Committee.

For purposes of administration and operation the department is organized into several functions corresponding to its major activities. General policy direction is provided by the Fish and Game Commission. The commission is composed of 5 members appointed by the Governor. Besides establishing general policy they regulate the taking of fish and game by promulgation of regulations establishing open and closed seasons; bag and possession limits; and areas for the taking of fish and game. The commission also regulates commercial fishing to insure the taking and delivery of fish in a wholesome and sanitary condition and to prevent deterioration and waste of fish.

1 clerical position is added to the commission staff in lieu of temporary help borrowed from various departmental sections. The clerical position will assist in meeting commission workload needs which have increased since the revision of the Fish and Game Code in 1957.

1 clerical position is added in the stenographic and typing pool of the Administration Section for workload increases generated by programs expanded during the past several years. This workload has been created by several factors such as the increased services to the various water project activities, the 40 additional wardens which were assigned in the wildlife protection function during the 1956-57 Fiscal Year, the expanded agency training program and others. No clerical staff has been authorized for these program areas in the past.

The 1959-60 Fiscal Year Budget provides for the initial phase of the departmental participation in a radioactive surveillance and monitoring program. For this purpose 1 pollution bioanalyst position is added as well as funds for contractual services. It will be the purpose of this activity to evaluate and consider the radioactivity problem in the State and to recommend adequate safeguards for the fish and wildlife resources of the State.

The 1959-60 Fiscal Year program also provides for continuation and expansion of a salmon and steelhead program which was established in the current year by transfer of 7 positions from the marine resources operations function to Headquarters. This reorganization centralizes into 1 unit personnel responsible for widely scattered steelhead and salmon projects. Related to this reorganization is the addition of 50 man-months of fish and game seasonal aids to initiate a large-scale fingerling marking program and assessment of the downstream migration of salmon fingerlings.

The headquarters water projects staff is strengthened by the addition of a fisheries biologist position. This addition is neces-

sary because of workload needs arising from accelerated development of the State's water resources by federal, state, and local agencies. It should also be noted that recent federal legislation in the water projects area requires that consideration be given to the possible enhancement of the fisheries resources where a federally financed project is being considered. This review responsibility represents an added departmental workload.

In addition, the budget makes provision for continuation of the coastal lagoon development program through June 30, 1960. This program which is being conducted at Big Lagoon in Humboldt County under contract with Humboldt State College was initiated by the Wildlife Conservation Board in December, 1956, for a 2-year period. The budget anticipates the continuation of the contract by the Department of Fish and Game during the current year as well as during the budget year to permit further analysis of the program to establish a fishery in the numerous coastal lagoons.

Provision is made in the 1959-60 Fiscal Year Budget for the replacement of a small single-engine aircraft which is used much of the time at low elevation over rough terrain. It is estimated that the plane will have been flown approximately 4,000 hours at time of replacement.

The following changes are reflected in the various field operations activities: additional temporary help is provided for the marine resources operations function to assist in the collection of specimens for bioassay work related to various pollution problems; in Region I additional temporary help is proposed for the inland fisheries function for work on the Klamath River to determine the feasibility of the construction of a regulating dam and hatchery on the river; the increased temporary help in the Region II headquarters function is related to workload in the licensing function; and additional temporary help in the inland fisheries function of Region II is for the Nimbus Hatchery and is fully reimbursed by the Federal Government; additional temporary help for Region III, inland fisheries function is for egg collection activity and represents increased workload.

The remaining staffing changes for the 1959-60 Fiscal Year are all related to either water pollution problems or water project problems. All staff additions will be for the inland fisheries function. In Region II a position of pollution bioanalyst has been added because of workload created by increased water pollution problems and participation in water rights hearings. In Region III a position of fisheries manager is added for increased workload created by additional water developments and flood control projects. Likewise in Region IV it is proposed to add a fisheries manager for increased workload and to assist with pollution problems concerning the maintenance of the proper quality and quantity of water in tributaries to all major drainages in the region. For the most part the increased workload is reflected in the large amount of overtime required of existing personnel to accomplish their responsibility.

The budget message recommends complete financing of the Wildlife Conservation Board from the Fish and Game Preservation Fund (see page 434).

^a Federal grants are deposited in the Fish and Game Preservation Funds subject to the provisions of the Pittman-Robertson Act and the Dingell-Johnson Act. Neither the revenues nor the expenditures are included in the overall budget totals.

REGIONAL OPERATIONS

Objectives

Regional offices were established in the department to relieve the central staff of an enormous volume of administrative work. The hunting and angling public come in contact with the department through the regional offices which are located at Redding, Sacramento, San Francisco, Fresno, and Los Angeles. These offices provide staff familiar with problems of the locality and co-ordinate with a headquarters group responsible for state-wide planning and research. Through decentralization, local supervisors of the various functions are located in the field where they can take action based on intimate knowledge and field work.

Program and Performance

In general the regional program in addition to a headquarters function, includes inland fisheries, game management, and wildlife protection. The activities of the inland fisheries operations

are concentrated on hatcheries, stream improvement, fisheries investigation, and local water development problems. The activities of the game management program in the field include all phases of research, applied research, and management of big game and upland game. Field operation of the patrol is under the wildlife protection function. This latter function also supervises hunter safety programs, educational programs, and many field maintenance responsibilities. Direct costs of regional operations by function, excluding employees' retirement, are as follows:

	1957-58	1958-59	1959-60
Headquarters	\$521,890	\$560,450	\$564,011
Inland fisheries	2,012,987	2,164,226	2,224,309
Game management	1,143,383	1,202,112	1,198,962
Wildlife protection	2,281,891	2,449,682	2,446,018
Total	\$5,960,151	\$6,376,470	\$6,433,300
